The bill which I introduced in the 96th Congress, H.R. 7334, was considered in a hearing before the Subcommittee on Health and the Environment, September 5, 1980. A record of that hearing is available for the consideration of Congress and the public.

I urge our careful consideration of this needed legislation. The medical use of heroin for the relief of terminal cancer pain is a compassionate concept too long overlooked by Congress.

H.R. 2642

A bill to authorize the use of heroin for terminally ill cancer patients

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (b) of schedule I in section 202(c) of the Controlled Substances Act (21 U.S.C. 812) is amended by striking out clause (10) and redesignating clauses (10) through (22) as clauses (9) through (21), respectively.

(b) Paragraph (b) of schedule II in such section is amended by adding at the end the following:

"(22) Heroin.".

SEC. 2. (a) Section 303(f) of the Controlled Substances Act (21 U.S.C. 823(f)) is amended (1) by striking out "(f) Practitioners shall" and inserting in lieu thereof "(f)(1) Except as provided in paragraph (2), practitioners shall", and (2) by adding at the end the following:

"(2)(A) A practitioner shall be registered for the dispensing of heroin if the Attorney General determines that—

"(i) the practitioner is authorized under the law of the State in which the practitioner practices to dispense controlled substances in schedule II;

"(ii) the practitioner will dispense heroin in accordance with subparagraph (B); and

"(iii) the practitioner will comply with requirements established by the Attorney General under subparagraph (C).

A registration issued under this subparagraph shall be in effect for such period (not in excess of one year) as the Attorney General may prescribe. Such a registration may be renewed under the same terms as applied to its initial issuance.

"(B)(i) Heroin may only be dispensed for an individual who is an inpatient of a hospital or hospice and who is diagnosed in accordance with clause (ii) as terminally ill with cancer. An individual shall be considered to be terminally ill with cancer if—

"(I) there is histologic evidence of a malignancy in the individual,

"(II) the individual's cancer is generally recognized as a cancer with a high and predictable mortality, and

"(III) there is no treatment recognized by experts as safe and effective for the cancer or therapies recognized by experts as safe and effective have been exhausted and further treatment of the cancer would not reasonably be expected to benefit the individual.

"(ii) A diagnosis that an individual is terminally ill with cancer shall be made before heroin is dispensed for the individual and shall be made as follows:

"(I) The diagnosis shall be initially made by the attending physician of such individual.

"(II) The diagnosis of the attending physician must be attested by an oncologist and reviewed and approved by the medical review board of the hospital or hospice in which the individual is an inpatient.

"(C) To protect against the diversion into illicit channels of heroin to be dispensed in accordance with this paragraph, the Attorney General shall, within six months of the date of the enactment of this paragraph, by regulation prescribe requirements respecting the manufacture, storage, distribution, and dispensing of heroin.".

(b) Section 304 of such Act (21 U.S.C. 824) is amended—

(1) by adding at the end of subsection (a) the following: "A registration under section 303(f) to dispense heroin may be suspended or revoked by the Attorney General upon a finding that the registrant failed to comply with any requirement under such section."; and

(2) by inserting after "303(g)" in the second sentence of subsection (d) the following: "or a requirement under section 303(f)".

(c) Section 307(c)(1)(A) of such Act (21 U.S.C. 827(c)(1)(A)) is amended by inserting "is heroin or" after "unless such substance".

SEC. 3. The last sentence of section 1002(a) of the Controlled Substances Import and Export Act (21 U.S.C. 952(a)) is amended by striking out "manufacturing heroin or".

SEC. 4. The Director of the National Cancer Institute shall take such action as may be necessary to secure an exemption from section 505 of the Federal Food, Drug, and Cosmetic Act for heroin to be used in an investigation sponsored by the Institute of the safety and effectiveness of heroin for the treatment of pain.

SEC. 5. The amendments to the Controlled Substances Act and the Controlled Substances Import and Export Act made by this Act shall take effect upon the expiration of the ninth month beginning after the date of the enactment of this Act.●

GREEN FIGHTS AUTO THEFT

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. GREEN. Mr. Speaker, I am today introducing the Motor Vehicle Theft Law Enforcement Act of 1981, which is designed to provide law enforcement authorities with a needed tool to fight the increasing problem of professional auto theft.

The annual number of reported motor vehicle thefts exceeds 1 million. Unfortunately, the recovery rate of stolen motor vehicles decreased significantly during the most recent decade.

Until relatively recently, amateurs, or juvenile joyriders, accounted for most car thefts. However, in 1979, for the first time, there were more adults than juveniles stealing cars. Many of these adults are professional thieves who steal the autos in order to chop them into major component parts for sale. Such illicit chop shop activity is popular and lucrative because it is done with relatively little risk and enjoys a ready market with unknowing consumers. As a result, auto theft has grown to a $4 billion-a-year problem, which the American taxpayer funds through increased law enforcement costs and through higher insurance costs.

The House Commerce and Foreign Affairs Committees spent several days in the last Congress holding hearings on my bill, studying the problem, and amending my legislation. The bill I am introducing today is essentially in the form it was reported from the House Commerce Committee September 25, 1980. Certain minor and technical changes have been made. The committees produced overwhelming evidence to indicate that additional vehicle identification numbers (VIN's) on major component parts would have a substantial effect on professional theft and would be very cost-effective.

The purposes of this bill are to:

First, improve the identification numbering systems for motor vehicles and their major parts and components;

Second, increase the Federal criminal penalties imposed upon persons trafficking in stolen motor vehicles and their parts and components;

Third, establish procedures to reduce opportunities for exporting stolen motor vehicles; and

Fourth, establish a task force to study problems relating to the theft of off-highway vehicles.

Testimony by law enforcement officers, convicted auto thieves, and other experts indicated that additional VIN's will discourage auto theft, aid law enforcement organizations in identifying stolen property, and aid prosecutors in convicting those who operate chop shops.

Fifty-seven Members of the House cosponsored the bill in the last Congress, and the House Commerce Committee approved it late in the session 22 to 1. Further, my legislation has been endorsed by the Justice and Transportation Departments, the International Association of Chiefs of Police, the Consumer Federation of America, legitimate parts recyclers, the insurance industry, and others.

I believe that my bill represents a responsible and popular approach to a costly and violent problem which is growing at an alarming rate. Consequently, I hope that the House will take prompt and positive action on my legislation.●

SAVIMBI OFFERS WEST SECOND CHANCE IN ANGOLA

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. DERWINSKI. Mr. Speaker, columnist Smith Hempstone has just returned, safe and sound, I am glad to say, from a visit to Angola. Except for an event such as the capture in Angola last November of two Soviets, an Air Force pilot, and an engineer, the press does not contain much news about Angola. Mr. Hempstone has written of the relatively unknown war being waged by Jonas Savimbi against the Communists in Angola, including Soviet, Cuban, and East German forces.

I am reprinting for the Members a series of four columns on his Angola visit, by Mr. Hempstone, appearing in the South Bend Tribune on February 23 and 27, and March 2, and 3. The final article was entitled, "Savimbi Offers West Second Chance in Angola."

[From the South Bend Tribune, Feb. 23, 1981]

JUST GETTING TO ANGOLA IS ADVENTURESOME

(By Smith Hempstone)

LIKUA, ANGOLA.—After a chance meeting in Washington in 1979 with Jonas Savimbi, leader of UNITA, the nationalist movement fighting Angola's Cuban-supported Marxist regime, I'd told the 46-year-old guerrilla leader I'd like to visit the liberated area of his war-ravaged West African nation.

When early last year Reader's Digest agreed to finance the adventure, I quickly discovered that getting there was easier said than done.

Friends in the Central Intelligence Agency were interested and sympathetic, but dared not help. Their British cousins were equally standoffish.

Over the next few weeks, I tried through many channels to get in touch with Savimbi; none worked. Finally, through the intercession of an American friend in Paris, I made telephone contact with Jeremias Chitunda, Savimbi's agent in France.

There followed over the next six months a series of cryptic trans-Atlantic telephone calls, and a meeting with Chitunda in a Washington bar. The problem was to find a time when an airplane was available to spirit me past Russian MiGs into Angola to a jungle strip near where Savimbi was operating.

Finally, on Sept. 12 of last year, I was on my way to the capital of an African republic near Angola. My instructions were to check into a specific hotel and wait for a call from a man named Mongo.

On such assignments, it is healthier not to linger along the way. I lunched in Paris, and 10 hours later arrived at my African destination.

With the exception of brief forays into the hotel swimming pool, I stayed in my room for the next 48 hours. No Mongo.

Finally, the evening of Sept. 15, the telephone in my room rang. I jumped about a foot out of my chair.

"This is Mongo," announced a disembodied voice, "may I come up?" Indeed he might.

Mongo was a brisk young Angolan who held the rank of major in Savimbi's army, and ran UNITA's intelligence net in the African republic.

He warned me to stay in the hotel and keep my mouth shut: the city was riddled with Angolan and Communist bloc intelligence agents. There would be a plane for me sometime within the next three or four days; that was good news, since the alternative was walking several hundred miles to reach Savimbi.

Time passed slowly. Two nights later, Mongo called at last to say we'd leave at dawn the following day. I rechecked my shoulderbag for essentials—maps, compass, flashlight, camera, mosquito net, tape recorder, hunting knife, malaria suppressant, antibiotics—called my wife in Maryland (it took six hours to complete the call) to tell her I was going in, and grabbed a couple of hours' sleep.

A bleary-eyed Mongo was waiting for me in the deserted lobby at dawn.

At a decrepit African hotel in the native quarter of town, we gulped a cup of bitter coffee, switched cars and headed for the airport.

We turned off the potholed highway short of the passenger terminal, sped across the apron and screeched to a halt beside a venerable DC-4. There was a small metal ladder and a knotted rope hanging from its open hatch.

The 46-year-old plane was hot as an oven. The interior was stripped down, but four seats has been fixed in the rear; a jumble of freight was piled forward. There were small holes in the fuselage. No toilet. The emergency exists were marked in Danish: This was a plane that had been around.

Two shirtsleeved white men were in the cockpit, checking the instrument panel. Oblivious to the smell of gasoline, both were smoking. The pilot said the plane belonged to him, and that he would get $35,000 from Savimbi for the illegal flight into Angola.

I slept fitfully, dreaming of home. Seven hours later, we changed course abruptly and dropped to 1,500 feet. From the position of the sun, I could tell we were flying west, into Angolan air space. The old DC-4, its throttles wide open, was shuddering as it chased its shadow across waterless country the color of a lion's pelt. While trying to appear nonchalant, I kept eyeing the sky for MIGs.

Suddenly there was the scar of a dirt airstrip beneath us. We circled the strip twice, waggling our wingtips as a recognition signal. Then we went into a steep landing approach.

"Here goes nothing," I thought, crossing myself.

We braked to a stop and Mongo pushed open the hatch. There were Africans beneath us—some in uniform, some not—waving their Kalashnikov automatic rifles and smiling up at us. As the engines coughed twice and died, I could hear African women trilling a chant of welcome.

I had made it to Jonas Savimbi's guerrilla kingdom, one of the few places in the world where free men were engaged in combat against Russians, East Germans and their Cuban surrogates. And, as the DC-4's pilot gave the thumbs up signal, cranked his engines and took off into the sunset, I felt very much alone. I had a feeling I was going to earn my writer's fee.

[From the South Bend Tribune, Feb. 27, 1981]

IT'S A HARD LIFE FOR ANGOLA'S GUERRILLAS

(By Smith Hempstone)

LIKUA, ANGOLA.—At the bush airstrip in guerrilla-held southeastern Angola, where my chartered plane had left me, I was met by Maj. Jean Bock.

Bock, a terrier of a man scarcely five feet tall, was missing his left forearm, a somewhat inauspicious omen in an African who described himself as a demolition expert. In remarkably good English, he welcomed me to that third of this West African republic wrested from the Luanda government and its 20,000 Cuban troops by Jonas Savimbi's UNITA fighting men.

As we jolted along in a captured East German Star truck over a dirt track that was little more than a game trail, he explained the local situation to me:

The 46-year-old Savimbi, who'd fought Portuguese colonialists for a decade and since 1975 has waged war against the Communist regime the United States does not recognize, was far away; but I would certainly meet him during my stay. Most of Cuando-Cubango province was in UNITA hands, but there was likely to be a major guerrilla attack soon on the town of Mavinga, 70 miles to the north.

Heavy fighting was going on along the length of the Benguela railroad, from Zaire to the Atlantic Ocean, but it would take me a month's march to reach the railroad. The Cubans, who had sustained 3,000 casualties in the early years of the fighting, now confined themselves largely to the big cities.

At a UNITA roadblock, our truck lurched to a stop in one of the clouds of dust that was to be my constant companion for the next two weeks. Ahead, in a grove of leafless thorn trees, I could see the flickering flames of torches.

These were held by African women and children who, on our disembarkation from the truck, broke into a long, repetitious song of welcome for the stranger who had come to them from so far away. In the preliterate society that much of rural Angola still is, despite 400 years of Portu-

guese rule, songs and poetry take the place of newspapers, books and radio broadcasts. The singing of women and children in the camps, and of Savimbi's guerrillas on the march, was always with me in the days that followed.

Bock led me down the ranks of singing women to a square grass hut set by itself in the grove of trees.

"This will be your home while we're here," he explained. "There's a latrine behind it. Be careful where you step: There are snakes. Salome will bring you a canteen of water, a lantern and food if you're hungry. You must be tired, so we'll talk tomorrow."

My 12-foot square hut, which was constructed without benefit of a single nail, was made of bundles of reeds and grass lashed to wooden poles with strips of bark. It contained a large bed, a table and two benches, made of the same materials and dug into the sandy soil.

On the bed was a rough blue blanket to supplement the blanket and poncho I'd brought with me. As I was to discover in the days to come, these cool and airy huts are the perfect architectural response to a climate that is hot and dry, with daytime temperatures seldom falling below 90 degrees (yet it could be bitterly cold in the predawn hours).

Where there is no electricity, one lives by the cycle of the sun. I awoke at dawn to the melodious sound of the laughter of African women, and the smell of wood smoke. Soon Salome—a middle-aged woman with a shy smile—was at the doorless entry to my hut with a mug of sugared but milkless tea (we never had coffee) and a plate of surprisingly tasty fried dough. As she swept the dirt floor of the hut with a bundle of twigs, she explained that her three assistants would wash and sew for me, and that I should ask if there was anything I wanted.

To be the guest of guerrillas is, in a sense, to be their prisoner. I was dependent upon them for food, water and transport. When I walked around the camp, an armed guard followed me. If I wanted to talk to Major Bock, a runner was sent for him. I could not leave Angola until they were ready to let me go. My safeguard was the fact that their interest was parallel to mine: to get me out of Angola alive so I could tell their story.

Whether in camp or on the march, we were never hungry. But thirst was our constant companion. In the bush of Cuando-Cubango, there are few rivers or streams. Water from the swamps, often black as coffee, we flavored with the juice of the passion fruit.

On the move, we traveled either by truck or on foot, over trails hacked out of the bush. So rough are these trails that vehicles average no more than eight mph. With us went the African women, most of them the wives of UNITA guerrillas. At night, if there was a camp nearby, we slept in huts; otherwise, we slept under shelter-halves or scraps of canvas. The earth, broken with a machete and covered with grass, served as our bed.

Discipline was strict, and there was no drunkenness. Cigarettes were in short supply, but morale seemed high; the men sang as they marched, praise-songs of Savimbi, recitations of their victories and chants derisory of the Marxist government of Eduardo dos Santos and his Cuban supporters.

The days faded into one another. And then one morning a smiling Major Bock brought the good news: UNITA guerrillas were ready to attack the town of Mavinga, one of the last government strongholds in Cuando-Cubango, and we were to join them.

Within an hour, we had broken camp and were on our way. The days of waiting were over.

[From the South Bend Tribune, Mar. 2, 1981]

ANGOLA'S SAVIMBI FORCE TO BE RECKONED WITH

(By Smith Hempstone)

MAVINGA, ANGOLA.—Fernando Augusto de Silva Figueiredo, the commandant of Mavinga, never knew what hit him.

De Silve Figueiredo, an Angolanborn Portuguese leftist, realized, of course, that his position was exposed. Earlier in 1980, Jonas Savimbi's anti-Communist UNITA (Union for the Total Independence of Angola) guerrillas had overrun the nearby towns of Luengue and Rivungo; indeed, half the 1,100 government troops under his command were the survivors of those garrisons.

What the commandant did not know, as witnessed by the fact he did not bothered to lay minefields or string barbed wire around his entrenchments, was that three regular battalions of Savimbi's forces—1,400 men—under the command of Col. Antoine Rinalto, had been moving into position around Mavinga since early in September.

Antoine had with him batteries of 82 mm. mortars, Chinese bazookas, American 75 mm. recoilless cannons and two captured Russian "Stalin Organs" (multiple 122 mm. rocket lanchers). Special five-man UNITA reconnaisance teams, dressed in captured government leopard-spot dungarees, had infiltrated Mavinga and returned with the location of every gun position in the town.

Rinalto waited until the big Russian Antonov transport plane had made its weekly Mavinga run, resupplying the garrison with everything from soap to SAM missiles.

Then, at 5 a.m. on Sept. 19, Rinalto blew his whistle and the UNITA gunners unleashed a devastating 400-round barrage. The Communist guns replied, but were soon knocked out. Under the cover of a final salvo of shells and rockets, the three UNITA battalions charged Mavinga's entrenchment.

A few of the government troops fought bravely, but the settlement's 800 civilians, fleeing down the bed of the Cubia River, were soon followed by the bulk of the garrison. Most of them fled in such a hurry they left their boots behind.

When I entered Mavinga with support troops hours after the assault, ammunition was still exploding in burning buildings. Stray dogs were howling mournfully for their departed masters. Vultures wheeled high overhead, eyeing the bloating bodies of the 60 government dead.

The four UNITA dead and 27 wounded had been removed from the battlefield. Away to the west, in the direction of government-held Cuito Cuanavale, one could hear the popping of small arms as Antoine's troops finished off those survivors unable to keep up with the remnant of the fleeing garrison.

"Many will die on the way," said Antoine. "It's a 100-mile walk, and they have no water. All the wounded will die because the Cubans dare not bring in helicopters to pick them up."

The booty of Mavinga, by guerrilla standards, was a rich haul: 14 14.7 mm. dual purpose ack-ack guns, five 82 mm. mortars, five SAM-7 missiles, more than 300 rifles, 12 trucks, thousands of rounds of ammunition and tons of food, medicine, clothing and equipment. Almost enough to equip a full battalion of Savimbi's guerrillas.

Mavinga was, to put it mildly, no Stalingrad. But its fall was indicative of a new strength on Savimbi's part. While his troops still lack the anti-tank and anti-aircraft guns necessary to seize and hold major population centers, his 16,000 regular troops and 5,000 militia are more than a match for the government's forces in the bush and small towns.

Even the 20,000 Cuban troops, 3,000 East Germans and 1,500 Russians, having sustained some 3,000 casualties in the early years of the Angolan fighting, now confine themselves largely to the big cities, where they are harassed by the 46-year-old Savimbi's urban guerrillas.

That is no small accomplishment for a nationalist movement that, by the end of 1975, deprived of American and South African help, had to abandon all Angola's population centers to the Communists and pull back into the bush.

In the main, Savimbi has accomplished this on his own. The few million dollars in American help he received in 1975 was cut off the following year with the passage of the Clark amendment, an unprecedented self-denying ordinance that had the effect of turning Angola over to the Russians.

Savimbi gets some money from the diamonds and ivory in the third of Angola under UNITA control. Other funds come from conservative African and oil-rich Arab states, which have no wish to see the Russians entrenched on the flank of the tanker route from the Persian Gulf around the Cape of Good Hope to Western Europe and America.

A few UNITA officers, like Savimbi himself, have been trained in Communist China. A handful were trained by the South Africans. But the great majority receive their instruction in Morocco, whose conservative monarch, King Hassan II, himself is fighting a war against Algerian-based (and Libyan-financed) Polisario insurgents.

UNITA agents, traveling on diplomatic passports provided by friendly African nations (Savimbi paid incognito visits to a dozen such states in 1980), shuttle between Paris and Peking, Rome and Bonn, London and Washington, in search of understanding and support.

Savimbi asserts that with such support he could turn Angola into a Vietnam for the Soviet Union and its Cuban surrogates. And he could be right: The war, which is costing Moscow $1.6 million a day, is being fought (in contrast to the conflict in Afghanistan) far from the locus of Russian power. Neighboring Zaire, Zambia and South African-administered Namibia could provide supply routes and sanctuaries for Savimbi's guerrillas if encouraged by Washington.

The prospects are that, with or without American aid, Savimbi will keep on fighting. After all, he's been doing just that for more than 14 years. And as the ruins of Mavinga testify, he has once again become a force to be reckoned with.

[From the South Bend Tribune, Mar. 3, 1981]

SAVIMBI OFFERS WEST SECOND CHANCE IN ANGOLA

(By Smith Hempstone)

MUCUSSO, ANGOLA.—After a spine-jolting, three-day truck ride through the bush, I caught up with Jonas Savimbi at a training camp just north of the Cuito River in the

rough tsetse fly country of southeastern Angola.

The 46-year-old anti-Communist guerrilla leader was addressing a 500-man battalion of his UNITA forces that had finished its training and was about to go into action against the troops of Angola's Marxist government and its Cuban allies.

Physically, Savimbi is an impressive man, barrel-chested and narrow-hipped, clear-eyed, with teeth that are large, white and very even. Standing just under six feet, which is tall for an Ovimbundu, he has a broad nose, skin the sheen of well-rubbed ebony and a curly, black beard. He walks on the balls of his feet, like a black panther stalking its prey.

Savimbi, who speaks rapid, unaccented English, was dressed like the soldier he is: camouflage trousers tucked into combat boots, short-sleeved khaki shirt adorned with green epaulets bearing the three stars of a lieutenant general, green beret. On his left hip, the grip reversed, was a .38 revolver; to his right thigh was strapped a hunting knife.

Jonas Savimbi by any standards is an effective and unusual nationalist leader, in that he believes in fighting rather than talking. Born in Munhango in central Angola on Aug. 3, 1934, Savimbi is the son of a railroad stationmaster who was converted to Christianity by an American missionary.

As a young man, studying medicine in Portugal (which ruled Angola for 400 years until 1975), Savimbi joined Holden Roberto's National Front for the Liberation of Angola (FNLA). Harrassed by the Portuguese secret police, Savimbi fled to Switzerland, where he completed his studies, earning a doctorate in political science. In 1962, he became Roberto's "foreign minister."

In 1964, as he explained to me later that evening, Savimbi left the FNLA "because I wanted to fight for Angola's freedom, not just talk about it in Europe and America."

Virtually unarmed, Savimbi's followers attacked Portuguese police posts with bows and arrows, capturing the weapons they needed for battle. Gradually support grew for the new movement.

For 10 years UNITA troops fought the Portuguese army, clashing occasionally with MPLA and FNLA units. In 1974, with an anti-war government installed in Lisbon, Savimbi, Roberto and Marxist Agostino Neto agreed to share cabinet portfolios equally among them, and to hold elections when the Portuguese withdrew in November of 1975.

But the MPLA, which was (and is) led by mixed-blood Marxists and hence has little tribal support, soon broke the accord, attacking MPLA and FNLA forces with the help of Castro's troops using sophisticated Russian weapons.

Roberto's forces were driven back into Zaire, he went into French exile and his movement quickly collapsed. But Savimbi, while unable to hold major population centers in the face of Cuban tanks and East German-piloted MiGs, pulled back into the bush, switching from conventional to guerrilla warfare.

In the earlier stages of the fighting against the Cubans (who sustained an estimated 3,000 casualties), Savimbi had been assisted by a column of 1,200 South African troops from Namibia. But when the Western powers withdrew their diplomatic support, South Africa pulled out its troops, which Cuba did not. At the same time, the U.S. Congress, still in a state of shock after the fall of Saigon earlier in the year, cut off all aid to Roberto and Savimbi, an ill-advised move that President Gerald Ford aptly described as "a deep tragedy" and an "abdication of responsibility."

That UNITA did not collapse like the FNLA is a tribute both to Savimbi's charismatic leadership and to the underlying strength of his movement. Gradually, with a little assistance from conservative African and Arab states, Savimbi forced regular battalions and went to the offensive.

But without guaranteed access to a flow of more sophisticated anti-aircraft weapons, Savimbi cannot hope to rout the 25,000 Cubans, 3,000 East Germans and 1,500 Russians who prop up the MPLA regime, which the U.S. does not recognize.

During his election campaign, Ronald Reagan cited Savimbi's anti-Communist movement as the sort of group the United States ought to be supporting. But with El Salvador apparently selected by the administration as the first place to test Soviet and Cuban intentions, it is not yet clear how soon and in what way the President's sympathies will be translated into policy.

Savimbi, when we talked in the days that followed, made no secret of his contempt for past American policy toward Africa.

"The makers of the Carter administration's African policy thought America's prestige in Africa was high. It is not; it is low. All the applause has been coming from those who are not your friends. Your friends—the Senghors, Hassans, Mois and Houphouets—all fear you may drop them as quickly as you have dropped some of your other friends."

It certainly can be argued that the 1975 Western backdown in Angola, distant from either the Soviet Union or Cuba, convinced the Kremlin the U.S. would not respond to Communist aggression anywhere, and that this, coupled with the debacle in Iran, ultimately led to the Soviet invasion of Afghanistan and Cuban adventurism in Central America.

With Savimbi in the field and Reagan in the White House, the West has a second chance now in Angola. But as I shook hands with Savimbi and boarded the blacked-out plane that was to fly me out of UNITA-held territory, I was by no means sure there was enough boldness in Washington to seize the opportunity bought for us with the blood of men willing to fight to be free.●

TELEPHONICS CREATES JOBS

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. CARMAN. Mr. Speaker, I am pleased to announce that a Long Island corporation, Telephonics of Huntington, has been awarded a new contract of at least $100 million by the IBM Corp. for work on a U.S. Navy project. The first segment of the contract, which extends through 1986, is worth over $16 million and will be used in the production of avionics systems for the U.S. Navy's new Seahawk helicopter.

Because of the size of the award, Telephonics expects to supplement it's existing plant capacity with another 140,000 square feet. It is expected the new production facility will be put up on a 30-acre site, adjacent to the company's existing complex in the Huntington, N.Y. area. The company also expects to add a significant number of technical personnel, at all levels, to its current staff * * * Workers that will support the people are already involved in the project.

Mr. Speaker, at a time when unemployment is far too high, I am happy that new jobs will be created on Long Island in the Third Congressional District. These are not make work jobs, but productive positions, which will help strengthen the U.S. military while boosting the economy of Huntington, Suffolk County and Long Island.●

ETERNAL BUREAUCRACY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. GILMAN. Mr. Speaker, an ancient adage has it that "the more things change, the more they remain the same." This could not have been demonstrated more convincingly than it was by the continuing relevance of an article recently sent to me by a constituent, Gilbert C. Nourse of Monroe, N.Y. Mr. Nourse wrote:

I am a collector of trivia and for some reason I kept a copy of the 1936 Reader's Digest. President Reagan has announced a program to control the Government bureaucracy—others have tried. The enclosed article from the 1936 January Reader's Digest might be of interest even though it is 45 years old. As the saying goes, there is nothing new under the sun. The Book of Ecclesiastes says there is a time and place for everything—but that was long before Government bureaucracy was developed.

The article Mr. Nourse sent me was condensed from the December 1935 Country Gentleman. Entitled "They Never Die," by Senator Bennett Champ Clark of Missouri, it decries the growth of, inter alia, the Department of Agriculture, which had at that time reached a spending level of $300,000,000. Now, of course, that Department spends many billions of dollars, the difference being due only in part to inflation.

Mr. Speaker, the Government carries on many useful activities that are essential to modern American life. I am a friend of the Government employee, who often serves at a financial sacrifice to preserve the public order, safety, and welfare. But the pendulum has swung a bit too far toward big government, and I intend to assist the administration's effort to make some prudent cutbacks.

Mr. Speaker, I ask that the article by Senator Clark be printed at this point in the RECORD, so that my col-

leagues can see just how far we have progressed since 1935.

THEY NEVER DIE

(By Bennett Champ Clark)

Some years ago a veteran member of the House of Representatives, retiring from that body after 18 years' service to become governor of a great state, sagely remarked that the secret of his success had been never to vote for a tax or against an appropriation. Sadly enough, this viewpoint, not quite so blatantly expressed, pervades the executive departments of our Government, is quite prevalent in the legislative branch, and has assisted mightily in building up what, for lack of a better term, is called "Bureaucracy."

Bureaucracy is state and local as well as Federal. It may be defined as a vast organization of administrative officials of every category, who, once on the public payroll, devote their efforts, rarely in unison but always persistently, to increasing the public expenditure. The fact is that we have never created a government department, commission or bureau which did not immediately start in to multiply itself by discovering new fields for its regulatory or inquisitorial authority over the ordinary citizen—and new necessities for increased personnel and greater appropriations. Very few of the new jobs created are ever abolished, and when they are abolished, two or three new jobs are created in their places.

Although a part of the executive branch of the Government, the bureaucracy is something apart from the President. It is a permanent, aggressive force. And in the matter of reducing its numbers or doing away with its activities, Presidents have found themselves as helpless as Congress.

Some of these bureaus are of mushroom growth like the NRA and the AAA. Others have been of slower growth, like the Department of Agriculture which started in 1839 as a modest bureau with an appropriation of $1,000 to collect agricultural statistics. Today its annual appropriations for ordinary activities, exclusive of the AAA, run close to $300,000,000 and it comprises literally hundreds of divisions and bureaus within itself. One of these, the Office of Solicitor of the Department of Agriculture, is among the most powerful offices in the Government, employing scores of lawyers, clerks and investigators. Astonishingly, it was never created by Congress at all, but like Topsy has just "growed"—from a thousand-dollar item for a law clerk slipped into an appropriation bill back in the '80's.

These bureaus have one characteristic in common. They never die. Let a bureau be once established, let it go through its normal growth for a brief period, let it get its personnel well fixed upon the payroll, and the task of ending it is appalling.

After the NRA had been declared unconstitutional by the Supreme Court, Congress authorized its continuance in "mere skeleton form" for the collection of information. Two months later this skeleton was still employing nearly 5,000 persons, with a payroll of nearly a million dollars of the taxpayers' money a month.

And despite the fact that the NRA had originally been limited by law to two years, a fact known to every employee from the start, a demand went up as a matter of right that employes laid off by the NRA should be taken care of in other Government agencies. In addition, officials of the NRA promptly came to Congress with a scheme for its resurrection in a slightly different form, and lobbied actively—and will continue to lobby—for its passage.

The bulwarks of bureaucracy are a powerful and active lobby and an enormous engine of propaganda, supported by the taxpayers' money.

There has for many years been a law against using directly or indirectly any part of any appropriation to pay for any personal service (which of course includes salaries), advertisement, telegram, telephone, letter, printed or written matter, or other device, intended to influence a member of Congress. Exception is made for recommendations to Congress through proper channels.

This salutary statute has been flagrantly disregarded. Today nearly every branch of every department maintains a publicity department of its own ostensibly for making information of governmental activities convenient to the public, but more largely used to create public sentiment in favor of their pet legislative measures. Tons of literature are sent out, hundreds of hours of radio time are consumed, multitudinous speaking tours of the country made.

As for their personal lobbying, the corridors of the Capitol are thronged almost as much by officeholders as by office seekers—each trying to get something for himself or his department.

It is by no means to be understood that there is coordination between the activities of bureaucracy. Far from it. Innumerable instances might be cited of bureaus, departments and administrations spending the taxpayers' money in pursuit of divergent or even conflicting aims. One perennial row is between the Reclamation Service of the Department of the Interior and the Biological Survey of the Department of Agriculture. The former is attempting to reclaim arid or unusable lands for cultivation; the latter is trying to restore to water certain ancient nesting places for migratory birds in order that the species may not be extinguished. In their latest battle, over the bitter protest of the Biological Survey the Reclamation Service insisted on draining a large lake in a western state on the ground that is would furnish rich wheat land—to find, after large expenditure in draining, that all the lake bed with the exception of the edges consisted of peat, which speedily took fire and has been afire ever since.

While the AAA and other agencies are taxing the consumers of the United States vast sums to retire land from cultivation, on the theory that this will help the deplorable farm situation, the Reclamation Service strides sturdily ahead bringing new land into cultivation to wring from the soil products to replace those retired by the AAA. And in so doing it is only performing its plain duties under the law.

President Coolidge once said: "Of all forms of government, those administered by bureaus are about the least satisfactory. Being irresponsible, they become autocratic. Unless bureaucracy is constantly resisted it breaks down representative government and overwhelms democracy."

For instance, the effort is now being made to reach down to regulate the smallest and most insignificant transaction in the most inaccessible village in the nation. Some clerk in Washington is to determine the price for pressing a pair of pants in Bluebell Valley, Nevada. For be it remembered that when such powers are granted to the President, he cannot perform them. He turns them over to an administrator, who turns them over to a deputy administrator, who turns them over to a division chief, who turns them over to a subdivision chief, who turns them over to some clerk.

Now the clerk will be as thoroughly imbued with his bureaucratic authority as the administrator himself, and so he proceeds with gusto to pass on the lives and well-being of our people.

Who is to blame? Well, the Executive is to blame (and when I say Executive I mean a long line of Presidents and their advisers) for always boring in for new powers. And Congress is to blame for meekly yielding, and for occasionally creating or expanding agencies of its own.

Congress is also to blame for its supineness before the forces of propaganda. Every time it is proposed to abolish or curtail an agency, Congress is bombarded by the friends and relatives of everyone on the payroll, and even more so by the special beneficiaries of that agency's activities. Then, of course, we have the pressure of the great forces of organized propaganda, the farm organizations, the manufacturers' organizations, etc., etc., each of which has its pet agencies in the bureaucracy.

The remedy? There is no remedy until the taxpayers of the United States awaken to a factor which contributes so greatly to the intolerable tax burden and enforce their will for reform. And even then, with the country thoroughly aroused, it will be a gigantic task for any group of elective officials to rout the entrenched forces of bureaucracy.●

BOB MICHEL SUGGESTS FREE WORLD TALKS

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. LOTT. Mr. Speaker, over a year ago, our colleague, the distinguished leader of the Republicans in the House, BOB MICHEL, made a speech in which he called for a "conference of the industrial democracies." Recently, columnist Bob Wiedrich of the Chicago Tribune has written about that speech and it is clear to me that what BOB MICHEL said over a year ago is as true today as it was then. In tribute to the far-seeing wisdom of our good friend and colleague, I insert in the RECORD, "Michel Suggests Free World Talks" by Bob Wiedrich, the Chicago Tribune, March 18, 1981:

MICHEL SUGGESTS FREE WORLD TALKS

(By Bob Wiedrich)

Since World War II, the Soviets have forged a captive alliance that holds nearly half of Europe in its grip.

They have built a powerful military machine. They have expanded their political impact throughout the world. By wile, treachery, subversion, and lies, they have made their influence felt in many Third World countries.

When the Western democracies have been confronted by political or economic adversity, the Russians have done their best to turn developing or underdeveloped nations against the major powers.

At the same time, they have enjoyed the domestic benefits from détente by turning it

into a one-way street not readily apparent to gullible lovers of peace at any price.

They have committed aggression, either with their own forces, as in Afghanistan, or through surrogates, as in El Salvador.

And the democracies, for the most part, have sat on their hands, powerless or unwilling to counter Soviet moves that threaten them, except to appeal for relief to the United Nations through its largely powerless machinery.

When OPEC threatened, the West was unprepared. It was equally caught off balance by the Islamic revival. The Soviets took advantage in both instances because of lethargic Western reflexes.

That is why Rep. Robert H. Michel of Peoria, the House Republican leader, is renewing his year-old call for a conference of industrialized democracies, so that future responses to Soviet threats will be well thought out and swift.

He is taking to heart Benjamin Franklin's admonition to the signers of the Declaration of Independence, "Well, gentlemen, we had better all hang together or most assuredly we will all hang separately."

It is a compelling thesis and one at least worth entertaining.

According to Michel, such now aging international mechanisms as the UN, European Common Market, Organization of American States, and other collective security agencies are nearing the end of their usefulness.

They all suffer limitations from their origins and purposes, he said. So, something new is needed to meet the requirements for mutual safety of the industrial democracies in the next 20 years and more.

"I suggest that we form a conference of the industrialized democracies in a loosely knit fashion that would not bring about the formulation of staff, a headquarters, and regular meetings in a formal setting," Michel said.

"There are, in my opinion, far too many tightly structured international organizations in existence today. What I have in mind is simply a conduit for continual and swift communication among the free, industrialized nations and a means of better coordinating their positions."

Michel said the Soviet Union and the OPEC nations are not the greatest obstacle to the creation of such an organization. Rather, it is the refusal of the industrialized democracies to realize the time has long passed when a nation could go its own way and still have a chance to survive modern day threats.

Many American allies, he charged, are living in a dream world in which they still can do business as usual with the Soviets, despite the Afghanistan invasion.

Instead of supporting the United States in its lead role as a defender of free world Persian Gulf interests, they have resorted to "discreet silence," he charged.

"France says she does not want to lose the special trade relationship with the Soviet Union," Michel said. "West Germany wants to pursue the policies of ostpolitik.

"But what will their trade policies and their ostpolitik be worth when the Soviet Union, through a combination of military-economic pressure all over the world, isolates the Western nations and picks them off, one by one?"

As a prelude to convening such a conference, Michel suggests that the U.S. must reassert itself with the strength, determination, and commitment of a world leader.

Then—and then only—will the Western democracies be capable of framing a strategy for shared responsibility and mutual protection against communist threats.

As an agenda for periodic meetings, Michel suggests these four major issues:

The condition of the industrial, agricultural, and military capabilities of member nations.

Current threats to the economic stability, political freedom, and desire for peace of the free world.

Devising ways to effectively communicate the philosophy of freedom to the rest of the world.

Reviewing scientific discoveries, social movements, and demographic changes that might affect security or self-interests.

Had there been such an organization seven years ago, the industrial nations might have been able to more quickly formulate policy toward OPEC demands, Michel said. There might also have been a joint trade policy with which to respond to Soviet aggression, such as in Afghanistan.●

CONDO CONVERSIONS AFFECT CHILDREN

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. ROSENTHAL. Mr. Speaker, in connection with the Subcommittee on Commerce, Consumer, and Monetary Affairs' investigation into the impact of Federal programs and activities on the conversion of rental housing to condominium and cooperative ownership, I have become aware of problems arising from these conversions all across the country and in every age and racial group. Many people adversely affected are elderly, low- or moderate-income residents. Increasingly, however, I am learning of adverse impacts of conversions on the young and on racial minorities. I am submitting for the record a statement sent to me by the executive director of the Fair Housing for Children Coalition in Santa Monica, Calif. In the statement, Ms. Dora Ashford describes how black families were displaced from their houses in Culver City, Calif., because of a conversion they could not afford. Whites replaced them. Other examples in Tarzana and the city of Carson in California are cited of many people displaced by the nightmare of conversion.

Ms. Ashford's statement follows:

STATEMENT OF FAIR HOUSING FOR CHILDREN COALITION

Dora Ashford does state:

1. I am the Executive Director of the Fair Housing for Children Coalition and have worked in the area of housing discrimination against families with children for the past five years. In this capacity, I have seen the devastation that conversions wreak on low and moderate income renters, especially families with children.

2. As an example, in 1978 our Coalition was involved in an effort to stop the wholesale eviction of hundreds of renter families in Culver City, California. Approximately 90% of the families were Black; most could not afford to purchase the $60,000 condos which previously rented for $330 a month. Most families could not find housing in Culver City because the vacancy rate was below 1%. They were uprooted and their children had to leave their friends and schools. Racial discrimination was suspected when it was discovered that even those Black families who wanted to buy were given different financial information than White families. After the conversion, the majority of residents were White.

3. Another example of how extensively conversions reduce housing opportunities was compiled by the Tara Village Tenants Association, Tarzana, California. Their survey of their community showed that over 1,000 apartment conversions in process. That's 1,000 lost apartments in just one small area of the County of Los Angeles. The Tenants Association has been fighting the conversion because over 85% of the tenants would be unable to purchase their units.

4. One final example of the difficulties encountered by victims of condominium conversions is from the City of Carson, California. The city established a special project to relocate 153 families displaced by a condominium conversion. (The families could not afford to purchase the $60,000 condos.) With professional help from housing experts and several thousand dollars each in relocation funds from the converter, it still took over 10 months to relocate these families—and many did not find comparable units.

5. It is a myth that conversions help tenants to achieve the dream of home ownership. Conversions are a nightmare for most tenants and result in massive upheavals. No tenants dream of conversions. That is left for those who profit enormously from this gold-mine approach to housing. No new units are provided and the converter can take the money and run to the next conversion.

6. Assurances are necessary that condominium conversions will not continue to take housing away from good tenants who have paid their rent faithfully and helped their landlord buy the apartment building in the first place.

Executed on March 13, 1981, at Los Angeles, California.

I declare under penalty of perjury that the foregoing is true and correct.●

FORMER CONGRESSMAN GEORGE OUTLAND DIED

HON. BOBBIE FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Ms. FIEDLER. Mr. Speaker, I rise today to inform the House that one of our former colleagues George Outland passed away on March 2. Congressman Outland served the citizens of California in the 78th and 79th Congresses. He was born in Santa Paula, Calif., on October 8, 1906. Congressman Outland attended public schools in Whittier, Calif. He received his B.A. degree from Whittier College in 1928, his M.A. degree from Harvard in 1929, and his Ph. D. in 1937. He also attended for a time the University of Southern Cali-

fornia in Los Angeles. Congressman Outland served as assistant director of boys' work at Denison House in Boston and at Neighborhood House in Los Angeles. He was supervisor of boys' welfare for the Federal Transient Service of Southern California. Later Congressman Outland served as director of New Haven, Conn., Community College and an instructor at Yale University, Santa Barbara State College, and the University of California at Berkeley. After serving in the House, Congressman Outland lived in San Francisco. I am sure, Mr. Speaker, that my colleagues will join me in sending our sincere condolences to former Congressman Outland's family.●

INCREASED JUDGESHIPS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. RODINO. Mr. Speaker, on behalf of the Judicial Conference of the United States, I am today introducing legislation that would authorize 35 permanent and 9 temporary positions for the U.S. district courts and the circuit courts of appeals.

Eleven permanent and three temporary positions would be allotted among 8 of the 11 judicial circuits. Twenty-four permanent and six temporary positions would be distributed among 25 of the 95 Federal judicial districts.

In asking for this increase, the Judicial Conference said that it had carefully screened requests for additional judgeships and is seeking only those necessary to continue to serve the public adequately.

As chairman of the Committee on the Judiciary, I promise full and fair consideration of this request. I want to stress, however, that I have yet to be convinced that continuing growth of the Federal court system is the wisest way in the long run to address the problem of overloaded courts. Expansion has not and will not of itself cure the overload. The new judges soon become buried under backlogs. In addition, I fear constant enlargement will create a large bureaucracy and will make recruitment of highly qualified persons more difficult.

Additional mechanisms to complement the Federal courts must be found. We have attempted in the past to find these ways, and we will continue to do so in this Congress.

Let me say, finally, that my misgivings about judicial expansion are not new or partisan. In our report on the omnibus judgeship bill of 1978, the Judiciary Committee expressed sentiments and concerns similar to those I state here today.●

AMENDING THE FOREIGN CORRUPT PRACTICES ACT

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. RINALDO. Mr. Speaker, ever since the passage of the Foreign Corrupt Practices Act in 1977, American businessmen overseas have been forced to abandon markets and walk away from contracts. European and Asian competitors have been only too happy to fill the void, since they are not bound by similar laws. Clearly this is a situation which needs to be corrected. It is time for Congress to take a close look at the Foreign Corrupt Practices Act (FCPA) and to remedy those provisions which have caused interpretive and enforcement problems, while preserving the prohibition of bribery of foreign officials in order to obtain business.

I have recently introduced H.R. 2530, the Business Accounting and Foreign Trade Simplification Act, which will provide a number of important changes in the statute without compromising the original intent of the act. Joining me as cosponsors of this bill are Congressmen COLLINS of Texas, BROWN of Ohio, LAFALCE, ALEXANDER, and ROUSSELOT.

THE PROBLEM

In a report issued earlier this month, the General Accounting Office was highly critical of the administration and enforcement of the FCPA. The report agrees with industry that the United States is losing business abroad because of this statute. Among the major findings was that ambiguity and uncertainty associated with the antibribery provisions make compliance difficult and costly. Added to the growing confusion is the controversy over accounting standards and the degree of precision required by them. About 55 percent of the companies responding to a GAO survey believed that the costs of the new accounting standards outweighed the benefits. It should be noted that all domestic businesses are required to comply with the accounting provisions regardless of whether they are doing business abroad.

The Carter administration characterized the FCPA as a leading export disincentive. In September 1980, the Department of Commerce and the Office of U.S. Trade Representative pointed out that the FCPA—

Caused companies to withdraw from joint ventures for fear they would be held responsible for the acts of their foreign partners,

Forced companies to incur substantial legal and investigative costs to check the backgrounds of their sales agents abroad,

Resulted in lost contracts simply because of the time needed to investigate sales agents and institute safeguards, and

Caused companies to withdraw from existing markets and to decline to enter new markets.

While Government regulators indulge in hair-splitting arguments about whether a remittance is a commission, a security deposit, or a grease payment, U.S. businesses are losing foreign contracts and the jobs that go with them. Hardest hit are the labor-intensive construction industries, commerical aircraft companies, and the telecommunication equipment industry. But every sector of the economy has been hurt because so many American jobs depend on foreign trade.

BUSINESS ACCOUNTING AND FOREIGN TRADE SIMPLIFICATION ACT

This bill would continue the present prohibition of bribery of foreign officials, which would be punishable by both criminal and civil penalties. It would eliminate many of the statute's present ambiguities and would allow guidelines for compliance to be provided to U.S. companies. The Justice Department would be the sole enforcer of the corrupt practices provisions, while the Securities and Exchange Commission would administer the accounting standards provisions. A more detailed summary of the bill's provisions follows these remarks.

I would also like to call to the attention of all Members an article in the March 16, 1981, issue of Time which provides detailed information about problems under the present statute. The article appears in the RECORD at the end of these remarks. In addition, I refer Members to the very helpful and informative GAO report entitled "Impact of Foreign Corrupt Practices Act on U.S. Business," AFMC-81-34, March 4, 1981. I am sure all Members would find this worthwhile reading.

It is time for Congress to take steps to remedy the export disincentives caused by the FCPA. This bill will provide precision, clarity, and simplicity so that businesses will know what they can and cannot do both here and abroad and will increase American exports and jobs. I urge the early review of the FCPA and the consideration of this bill by the House of Representatives.

A summary of the bill and the Time article follow:

BUSINESS ACCOUNTING AND FOREIGN TRADE SIMPLIFICATION ACT—H.R. 2530

MAJOR PROVISIONS

Changes the name of the Foreign Corrupt Practices to the Business Accounting and Foreign Trade Simplification Act. This is a more accurate description of what the law is all about. (Sec. 3).

Accounting provisions of the law would be in conformance with Generally Accepted Accounting Principles (GAAP) instead of the ambiguous and overly detailed standard

that now exists. The new standard would be subject to cost/benefit criteria.

In addition, violation of the record-keeping and accounting controls provision would occur only if it was knowing and willful. (Sec. 4 and 6(a)).

Jurisdiction for antibribery enforcement would be transferred from the Securities and Exchange Commission to the Department of Justice. (Sec. 5(a)).

Rewrite of Sec. 104, prohibition against bribery of foreign officials so as to clarify what is permitted and what is not. (Sec. 5 (b)).

Clarification of antibribery provisions, to exclude customary gifts, routine business expenses and conduct lawful in foreign countries. (Sec. 6(b)).

This Act would be the exclusive substantive statute governing overseas bribery. (Sec. 7).

Department of Justice actions to assist with compliance would include guidelines describing specific types of conduct which would be permissible. Following these guidelines would create a rebuttable presumption of compliance with the Act. (Sec. 8).

Expresses the sense of Congress supporting bilateral and multilateral agreements on international business practices so that competitive disadvantages against U.S. businessmen would be eliminated. (Sec. 10).

[From Time, Mar. 16, 1981]

(By Christopher Byron)

BIG PROFITS IN BIG BRIBERY

At a table in Mexico City's Camino Real Hotel, a foreign businessman and a middle-ranking government official are talking quietly in a corner. Midway through the conversation, the foreigner casually places an envelope on a chair next to him. When the foreigner rises to leave, the envelope remains behind. The government official slips it into his coat pocket a few minutes later and departs.

That is the way all too much of the world's most important business is done these days. From the shrewdly sophisticated kickback schemes of the Middle East and Latin America, to the virtual Mafia-style and shakedowns of sub-Saharan Africa and Indonesia, the universal game of bribery in the pursuit of profit goes on and on.

Is this a game that U.S. businessmen should be allowed, and even encouraged, to play? Or should they instead be compelled to wash their hands of it entirely, leaving the spoils to competitors in other lands? Those are some of the difficult questions that were addressed last week when the General Accounting Office released a detailed study of the impact on American business of the 1977 Foreign Corrupt Practices Act.

The act sprang from the nation's Watergate-era revulsion at the global bribery excesses of such well-known American companies as Lockheed, Northrop and Gulf Oil. During the mid-1970s those companies, and others, made headlines almost weekly as sensational disclosures surfaced about their roles in paying megabuck bribes to high foreign officials to clinch deals.

In an effort to stop such corruption, revelations of which rocked the government of Takeo Miki in Japan and disgraced Prince Bernhard in The Netherlands, the Foreign Corrupt Practices Act made it a criminal offense to pay bribes of any sort to foreign officials to secure or retain business abroad. Punishment could be a prison sentence of up to five years and fines of as much as $10,000 for individuals and $1 million for corporations. The legislation also set up accounting procedures designed to make it virtually impossible for companies to disguse such "sensitive payments" or to hid them elsewhere in the corporate books.

There is little doubt that the passage of the 1977 act has made U.S. businessmen think twice about bribing abroad. At Lockheed Corp., whose very name was synonymous with payoffs and freebies for foreign officials in the 1970s, the company now no longer picks up even hotel bills for customers visiting its California headquarters for contract talks.

By contrast, "caution" to some U.S. companies simply means figuring out clever new bribery schemes that are harder to spot. One way is to join up with a foreign company that is not prohibited from making the necessary payments, and let it do the dirty work instead.

The major problem of any law on bribery is that in much of the less-developed world what some Westerners might regard as commercial corruption of government and business has always been looked upon as an inescapable fact of everyday life. The stylized arrangements for giving and taking payments are often perfectly normal and legal under local law and custom.

Nevertheless, foreign officials usually design schemes to hide the transactions as much as possible, since few, if any, are willing publicly to admit taking the payoff. Likewise, foreign businessmen are equally queasy about being discovered offering the gift in the first place.

One reason for the generalized embarrassment is the sheer magnitude of the funds involved. In recent years, the worldwide explosion of oil prices has sent hundreds of billions of dollars cascading into some of the poorest nations on earth. These countries have set out on instant-industrialization programs and often spend money as quickly as it is earned.

The typical major case of bribery involves a large project in an industry that is highly competitive, but with little significant difference among the products. The size of the project allows both parties to hide the payoff in the price without undue notice. The number of competitors means that the seller and the buyer can more easily bargain for deals. These conditions, for example, are found in contracts for the sale of telecommunications equipment or aircraft and for most construction programs. Says Jules Kroll, a New York-based consultant on white-collar crime: "If there's only one or two companies bidding on a deal, it might go down very straight. But if you've eight buyers who can do it, then people are going to get creative."

The Persian Gulf has now become a romper room of business corruption. In Saudi Arabia, a key government minister is widely reported to have collected upwards of $500 billion in "commission fees" in connection with foreign business ventures in the past year alone. To do business in Saudi Arabia, it is essential to be connected, via an agent or middleman, to a member of the royal family, which controls not just the government but business as well. Says a veteran U.S. businessman bluntly. "Everyone needs a prince." Finding one is not hard: there are 5,000 princes in the royal family in this underpopulated nation of 6 million.

Bribery in that part of the world, though, can still be a complicated affair. According to a Justice Department complaint, in 1976 two U.S. businessmen, Roy Carver and R. Eugene Holley, coowners of a tax haven oil company in the Caribbean, allegedly paid the Oil Minister of Qatar a bribe of $1.5 million for exploration rights in that country. But when the lease expired, a new minister had taken over and he refused to renew it. The indignant oilmen thereupon protested to the local American ambassador, who informed the Justice Department. The department in turn obtained a federal court injunction in 1979 preventing the men from violating the Corrupt Practices Act, which was by then U.S. law.

Mindful of the spreading Islamic disgust at the sort of corruption that helped topple the Shah of Iran two years ago, the Saudi regime has recently begun a well-publicized clean-up drive. The campaign, though, is largely cosmetic; payoffs continue unchecked. One method is fifty-fifty partnership arrangements between foreign companies and Saudi locals. Complains a Dutch industrialist: "It's all very well arranged, with profit-sharing arrangements set up for this purpose. But it is still bribery."

In the developing nations of Africa, foreign visitors have been bestowing gifts on local potentates since time began. Nothing much has changed except the value of the trinkets, which these days are more likely to be yachts and sports cars than beads and mirrors. In many sub-Saharan nations, a favorite scheme is to create a lucrative job in a project for an official's relatives or friends. For years the British-based Lonrho Ltd. trading house kept its Kenyan operations running smoothly with President Jomo Kenyatta's son-in-law as its head. When Kenyatta died in 1978, that connection no longer counted for much. Complains a foreign businessman in Nairobi: "Now there is a whole new set of people to deal with—and they all are asking for far more money."

In Latin America corruption is pandemic from the Rio Grande to Tierra del Fuego. Bribing in Mexico is handled with the stylized flair of a Latin seduction, beginning with dinner at an expensive restaurant like La Hacienda de los Morales, and climaxing with a weekend jet-jaunt to Punta Cancun or Acapulco. The target of such lavish hospitality is most often the head of purchasing in one of the Mexican government's state ministries, who oversees procurement and importing.

In Brazil bribery is often not just figuratively but literally a matter of seduction. Says a top West German businessman there: "Lavish entertainments with women—that is very effective." In the booming industrial megalopolis of São Paulo, a favorite spot to nurse along a deal is La Licorne, a discreetly mirrored nightclub with a striptease show, where call girls cost $120 a night, and foreign businessmen pick up the tab.

By contrast, love objects in Argentina run more toward postimpressionist paintings from pricey Buenos Aires galleries like Wildenstein, or jewelry selected by government officials for their wives from a famed jewelry shop like Ricciardi, a favorite haunt of the late Evita Perón. Those bills too, of course, are paid by the deal-hungry businessmen.

For really big South American deals, one Italian-based construction company is building an entire luxury real estate development on Uruguay's Punta del Este coastline. Yet none of the development is so far for sale to the public; instead, plots are being doled out like candy drops to favored Latin-American officials.

Leading European electric companies reportedly paid as much as $140 million in payoffs and kickbacks to win a share of the business in the construction of the $10 billion Itaipu Dam that is being built jointly by Brazil and Paraguay. Reports a U.S. business executive who watched the bidding unfold: "The European managers had unlimited authority. They paid cash into half a dozen Swiss bank accounts, and the money trickled down."

While the goal of bribery is the same in Asia, the style is often very different. In Malaysia, aspiring foreign businessmen reward government officials by making use of the Malaysian mania for gambling. A common approach is to invite a minister or government official for an afternoon of golf, bet heavily and then spend the next three hours swatting the ball into sand traps. An only slightly more straightforward method is to get into an after-dinner poker game with a key civil servant and lose heavily.

In Indonesia, corruption is so family-oriented that in the early 1970s, President Suharto's wife Tien was known as "Mrs. Ten Percent." These days scandal surrounds one Haji Achmad Thahir, a drab Indonesian government employee who never made more than $9,000 per year in salary in his life. But relatives fighting over his estate discovered him to have a bank account of nearly $35 million. The Indonesian state oil company, Pertamina, has charged in court that two German companies, Siemens and Klockner Industrie, paid Thahir the money in connection with the construction of a $500 million steel mill near Djakarta.

While the U.S. took a firm moral stand against corruption with the 1977 legislation, the governments in most leading West European countries either openly condone bribery or look the other way. A confidential West German memorandum by the Federal Office for Foreign Trade Information advises companies to be prepared in difficult deals to fork over as much as 20% of the contract price to corrupt foreign officials. All such expenditures, which can run into the millions of dollars on large engineering and construction projects, are completely tax deductible as a necessary cost of business. Italy passed a law in 1980 stating that payments to foreign officials to get business are perfectly legal for Italian companies. France has no law at all on foreign bribery. Explains the head of a medium-size French company doing extensive business in the Middle East: "The French authorities know quite well that you cannot deal in those countries without payoffs."

The attitude is similar for leading Asian exporting countries. In Japan, paying off foreign officials to secure business is regarded as normal. Likewise, in Korea, the government takes the attitude that businessmen should not be hamstrung in their efforts to develop export markets and get overseas contracts.

Corruption exists, and probably always will, in this obviously imperfect world. But should the U.S. participate in it? Bribery on the global scale that is now occurring is costly, saps political vitality and can eventually undermine a people's trust in government. The regimes of the Shah in Iran or General Anastasio Somoza in Nicaragua are testimonies to the problem.

Last week's GAO study, however, makes plain that the current American law is riddled with complicating ambiguities and shortcomings. Many of the problems arise from confusion over what constitutes a bribe. So-called grease payments, such as fees to get low-level civil servants to perform their bureaucratic duties of stamping documents and processing licenses, are specifically permitted on the grounds that petty corruption is unavoidable almost anywhere. But there is a large gray area between that sort of bureaucratic paper shuffling and the discretionary authority of local officials to withhold approval for a project or license, and thereby extort not $50 or $100, but perhaps $10,000 or even $500,000 from a victimized company.

American businessmen also complain that the complex law keeps them out of many profitable deals. Says Robert Malott, chairman of Chicago's FMC Corp., a leading manufacturer of chemicals and machinery (1980 sales: $3.5 billion): "The law has American export companies thoroughly confused. We simply cannot get clarification on what is legal and what is not."

Dubbed by one Wall Street wag the "Accountants' Full Employment Act of 1977," the legislation has forced companies not only to beef up their internal auditing staffs but to check and double-check the propriety of even the most inconsequential payments. Example: in Xerox's Cairo office, local staffers had to get permission from a senior corporate officer in the U.S. before they could pay $8 a month in tips to Egyptian telex and telephone repairmen.

More confusion surrounds a company's liability under the act for the actions of its foreign agents. If the local representative uses even a part of his commission, as often happens, to bribe officials to keep a deal on track, the act asserts that the U.S. company is responsible if the executives had reason to know what the agent was doing. The GAO study recommends that Congress rewrite the law to give clearer guidance to businessmen as to what they can and cannot do to curry favor with foreign customers. It suggests that Congress repeal the criminal penalities connected with the accounting provisions of the law and that the Department of Justice and the Securities and Exchange Commission clear up the ambiguities in the act's antibribery provisions.

Senate Republican John Chafee of Rhode Island is expected to reintroduce a bill this week that would make some such changes in the Foreign Corrupt Practices Act. Chafee lauds the law as an "important step toward the objective of prohibiting bribery of foreign government officials." But he also says that it is "difficult to decipher, hard to implement, and its ambiguities have bred confusion."

The Reagan Administration has already signaled its dissatisfaction with the act, and particularly its tendency through loose wording to cast a chill over the willingness of U.S. businessmen to push into foreign markets and thereby help boost U.S. exports.

Instead of taking the politically foolish position of calling for repeal of the act, and thus appearing to be in favor of worldwide bribery by American business, the Administration seems to be indicating, whether intentionally or otherwise, that it is prepared to let enforcement of the act languish. Indeed, the President's transition team on the workings of the Securities and Exchange Commission, which shares enforcement jurisdiction over the act with the Justice Department, has recommended decriminalization of bribery.

Such a stance by the Administration toward foreign bribery would itself cause problems. By failing to enforce the act as written, the Administration not only would leave the legislation's ambiguities unresolved, but would show a disrespect for the law, which is itself corrupting. Since the U.S. has adopted a moral position with regard to foreign bribery, neither the Administration nor Congress can now afford to let the subject wither away without compromising its principles in the process.

MUM'S THE WORD

A bribe is a bribe by any name—and the more euphemistic the name for it, the better. Baksheesh, currently in wide use in the Middle East, is a Persian word that is also found in Turkish and Arabic. It actually means a tip or gratuity given by a boss to his underling. The word was first used extensively to mean a bribe in connection with the money that a new sultan gave his troops. In most Spanish-speaking countries, el soborno means a payoff, but in Mexico payola is aptly described as the bite (la mordida). The Germans call it Schmiergeld (grease money), though export traders usually simply say N.A. for nützliche Abgabe (useful contribution). In France, where there is veritas in the vino, a payoff is called a pot-de-vin or jug of wine. The Italians refer to a bribe as a bustarella (little envelope). Under-the-table payments in East Africa go by the sobriquet chai, Swahili for tea. In onetime British colonies, the words vary widely: a bribe in Nigeria is called dash, in India a backhander. The popular Japanese word for bribe is wairo, but corruption is poetically called kuroi kiri, or black mist.●

NEW BALANCED BUDGET AMENDMENT INTRODUCED

HON. L. A. (SKIP) BAFALIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. BAFALIS. Mr. Speaker, today I am pleased to offer with 34 of my colleagues a joint resolution calling for an amendment to the U.S. Constitution to promote fiscal responsibility. This resolution is to be distinguished from another somewhat similar measure I introduced earlier this Congress.

Essentially, this new resolution is a procedural amendment; it sets forth a process by which we can achieve a balanced budget and thereby restore fiscal integrity to our Government.

I should like to point out that this proposal does not limit the prerogatives of the Congress by writing specific economic policy into the Constitution. Instead, by requiring a recorded vote every time Congress wants to increase either spending or taxation, it insures that congressional decisionmaking with regard to balancing the budget is made responsible to the American public.

Key to this amendment is the principle whereby if Congress, for whatever purpose, intends to spend money, it should and must have the funds already in its possession with which to pay for the necessary goods and services. By this we mean to reestablish the relationship between Government

receipts and expenditures, and thereby eliminate the current bias toward raising the level of spending and continued deficit spending.

This amendment does not prescribe an absolute limit on the amount which Congress can spend. If Congress wants to increase spending in proportion to its revenues, it can, but only by a three-fifths vote of the Members or, in the event of war, a majority vote.

Furthermore, this amendment, under section 2, stipulates that taxes must not increase at a rate greater than the growth of our national income. It is clear that under our present tax structure Congress benefits from the phenomenon known as bracket creep, whereby taxpayers are pushed into higher marginal tax rates due to rising inflation. Nevertheless, whether it is inflation or real growth that causes this to occur, the proposal I am introducing today aims to remove the tendency for Congress to continue unstopped these automatic tax increases. If passed, the amendment would allow taxes to increase to offset deficit spending only by a rollcall majority vote of the Members.

The American people have clearly expressed their support for efforts to restore discipline to the Federal budget: 30 States have passed legislation urging the Congress to summon a constitutional convention on the subject of a balanced budget amendment, and legislative bodies in four other States have made similar petitions.

However, I believe this particular resolution, which limits both spending and taxation, will work to bring about sound, responsible fiscal policy without predetermining precisely what those policies will be.

As this same amendment is an outgrowth of a bipartisan consensus in the Senate and has received wide support from Members of that body, I encourage my colleagues here in the House who are unfamiliar with this proposal to give it every consideration. I am hopeful that they will want to join us in this effort to restore the confidence of the American people in Congress desire for a balanced budget.●

LIMIT SALES OF IMPORTED AUTOMOBILES

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. FRENZEL. Mr. Speaker, on March 16 several national associations sent the President a mailgram protesting possible action by the Government to limit sales of imported automobiles. I commend the contents of the letter to my colleagues as an example of public concern for possible voluntary or legislated quotas.

[Mailgram]

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The resolution of the current dispute over automotive trade policy will have consequences that far transcend any single industry or product, or even the relationship between the United States and any single country. Many will view this issue as a test of the Aministration's resolve to let market forces stem inflation and increase productivity.

We recognize the serious difficulties presently faced by our domestic automobile industry. However, we believe that an objective economic analysis will show that automobile imports are essentially a symptom of the problem, not the cause. A decision at this time to restriet imports of automobiles would not be a substantial help to the domestic industry and could undermine the fragile structure of world trade.

The undersigned organizations, representing various segments of our economy, urge you to review this issue with extreme caution within the context of the broad national interest. Once the United States raises trade barriers as a special favor to a troubled industry, other industries will demand similar treatment, and other nations will swiftly follow suit. A protectionist response to the automobile problem would jeopardize future U.S. exports, penalize U.S. consumers, and, in general, retard growth in the U.S. economy.

Signed:

American Importers Association, American Soybean Association, Consumers for World Trade, Imported Hardwood Products Association, National Corn Growers Association, National Council of Farm Cooperatives, National Customs Brokers & Forwarders Association, National Grange, U.S. Feed Grains Council.●

DINGELL CONDEMNS DOE BUDGET CUT ON ENFORCEMENT

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. DINGELL. Mr. Speaker, on March 12, the Oversight and Investigations Subcommittee I chair on the Energy and Commerce Committee conducted a hearing on the outrageous budget cut of the Department of Energy's Enforcement Division.

Over the last 5 years this subcommittee has conducted investigations and held numerous hearings on the adequacy of resources devoted to the enforcement effort of the Department of Energy. In the last 2 years, the effectiveness of the enforcement effort has improved to the point where the special counsel has alleged overcharges by the major oil companies of over $10 billion. Additional hundreds of millions of dollars in overcharges have been levied against the nonmajors. The Department of Justice is currently presenting criminal cases developed by the Energy Department to grand juries. Justice relies heavily on DOE auditors and investigators during the grand jury phase. Other criminal cases are being pursued in the courts. In addition, the Energy Department is in the final stages of referring criminal conspiracy cases to the Justice Department involving the country's largest oil companies.

In the face of this activity, the Reagan administration is cutting the heart out of the Energy Department's enforcement budget effectively granting amnesty to these price gougers and potential criminals.

Now under the guise of balancing the budget, the administration has proposed reducing the Department's enforcement spending by over $40 million. This will reduce the current level of about 1,300 auditors, attorneys, clerical and administrative personnel to about 300 people in fiscal year 1982, which begins in October.

The practical effect of this reduction will be the virtual elimination of the enforcement sections as an effective force. Audits of oil companies for the last 2 years are far from complete. Meanwhile, we have seen in this 2-year period the greatest rise in oil prices in history and, we expect we will find the largest overcharges.

The DOE has a number of oil companies under investigation for civil and possible criminal penalties for participation in these inline transfers.

What is the Reagan administration's response to this flurry of law enforcement activity—but to wield their unthinking, meat ax budget approach to eliminate the budget and staff that can pursue these cases. So much for the much publicized Reagan attack on fraud and abuse in the Federal Government.

Under the administration's plan, these audits will never be completed. With the certain knowledge that time was on their side, companies that have been charged with billions of dollars in violations based on audits from earlier years have no desire to settle these cases as many have done in the past. Rather, they only delay with the certain knowledge that their accusers will soon be abolished. Moreover, the ability of the Department of Justice to proceed in existing criminal cases would also be undercut and future referrals of even the most blatant ripoffs would be out of the question. In a word, the Reagan proposal is amnesty for oil companies.

It is not as if the oil companies need the money. Following the banner year of 1979, when the oil industry enjoyed the largest increase in profits in its history, the industry recorded a further 30-percent increase in 1980. According to a report by the Democratic Study Group, oil company profits accounted for a staggering 40 percent of all the profits earned by all U.S. manufacturing firms in 1980. In other

words, some 30 oil companies made almost as much profit as the 9,000 other major U.S. companies. They did so at the expense of those 9,000 companies.

The first irony in the administration's plan is that the budget cuts are generally being touted as measures that will reduce inflation. This assumes that Government spending and not rising energy prices is responsible for inflation. In fact, skyrocketing energy prices have been the largest cause of increased inflation in the last 2 years. Direct and indirect energy costs have contributed about one-third to the total inflation in consumer prices in 1979 and 1980. Put another way, but for the increases in energy prices, the rate of inflation in the last 2 years would have been about 8 percent, or roughly the same level as in 1978.

The second irony of the budget cut so far as the DOE compliance elements are concerned is that it is a false economy. DOE audits have recouped more money for consumers and the U.S. Treasury than it cost the taxpayers to fund the auditors. Thus, the proposed budget cuts will not only sweep massive overcharges and possible criminal violations under the rug, they also will cost consumers money.

Such a policy is indefensible, fiscally irresponsible, and just plain wrong.●

"THE LAWMAKERS"

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. ROSENTHAL. Mr. Speaker, "The Lawmakers" is one of the most informative and yet truly entertaining programs now on television. Correspondents Linda Wertheimer, Paul Duke, and Cokie Roberts present a lively, thorough weekly summary of congressional issues and activities. Through clips of hearings and debates, through personal interviews, and thoughtful analysis, this exceptional news team provides a unique insight into the work and workings of Congress.

With agressiveness and imagination, the staff explores the facts and arguments of important public policy issues more deeply than commercial television ever has. "The Lawmakers" is testimony to the value and importance of public television in providing critical alternative programing. It is bright, it is fast-paced, it is educational, and it is good—qualities which few commercial shows seem to possess.

"The Lawmakers" is made possible in part by a grant from the Corporation for Public Broadcasting. CPB is the primary vehicle for providing Federal financial assistance to the 217 radio and 170 television stations that currently comprise the noncommercial broadcasting system. President Reagan is now proposing a 25-percent cut in 1982 funds for CPB with additional reductions to be made in 1983 and 1984. Mr. Reagan maintains that Federal support has led public television, as well as many organizations in the arts and humanities, to become dependent on public money rather than private contributions. Yet, by reducing the corporation's budget so quickly, the President is providing no lead time for the development of private funding. Such immediate and severe cuts could have a devastating effect on public television and on the quality programing it provides.

"The Lawmakers" provides an invaluable public service both to us as legislators and to our constituents. Through the discerning presentations of the correspondents and the extraordinary commentary of former Congressman Otis Pike, this program manages to convey a true picture of the congressional process.

"The Lawmakers" sets an example of excellence which I believe will, in time, help to upgrade the quality of television programing across the board. This show should be recognized and praised for a job well done.●

DEREGULATION OF CONSUMER INTEREST RATES

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 19, 1981

● Mr. LaFALCE. Mr. Speaker, I recently received a survey prepared by the New York State Banking Department on New York State's experience after usury ceilings on consumer loans were lifted late last year. New York, as you recall, had caps on the interest rates that could be charged on consumer credit. Because of the high inflation we have been experiencing, the State's low usury ceilings seriously affected the availability of consumer credit. The legislature met in emergency session last November to lift the limits and allow the marketplace to determine the interest rates and fees that would be charged for consumer credit.

The survey shows that, initially at least, the roof has not fallen in on New York State's consumers since the usury ceilings were ended. Muriel Siebert, the State superintendent of banks, reported that while interest increased as expected, consumer credit became more available and lending institutions began to engage in vigorous competition on the interest and fees that they charged for that credit. The experience so far represents a balance between the needs of lenders and borrowers. Let us hope that it remains the rule rather than the exception.

At this time, I insert a summary of Ms. Siebert's report, released March 4, 1981, in the RECORD:

BANKING SUPERINTENDENT RELEASES REPORT ON CONSUMER CREDIT RATES AND CHARGES AND ON DEREGULATION OF CERTAIN INTEREST RATES

Muriel Siebert, New York State Superintendent of Banks, today released the Banking Department's report on its survey of interest rates and charges on consumer credit. The survey was conducted in order to develop information on the initial experience of deregulation of consumer credit interest rates under the Omnibus Banking Bill.

Superintendent Siebert indicated that there were three major findings evident from the survey:

1. The deregulation of interest rates on consumer credit has resulted in an increase in those rates at financial institutions and automobile dealers. This was to be expected since the previously existing level of interest rate ceilings was unrealistically low and led to a drying up in the availability of consumer credit for New Yorkers during much of last year.

2. There has been an increase in the availability of consumer credit as a number of financial institutions which had previously placed limits on their consumer lending have actively re-entered the market, liberalized their credit standards and raised their credit line limits. There was also some indication from automobile dealers of increased availability of financing for the average consumer.

3. Lenders are charging a wide range of interest rates and fees, thereby providing consumers with alternative choices which they can take advantage of by shopping for credit. Substantial variations in rates and fees on consumer loans were evident at banks in New York City and in each of the major metropolitan areas upstate: Albany, Utica, Syracuse, Rochester and Buffalo.

Superintendent Siebert also stated that since passage of the Omnibus Banking bill, the Banking Department has embarked on a campaign to educate the public about the new law and to urge that people shop for credit. As part of this campaign, the Department developed a brochure called "Shopping for Credit—A Consumer Guide for Credit in New York State", of which more than 3½ million copies have been distributed.

In addition, through the assistance of the Outdoor Advertising Association of New York State, free billboard space has been provided throughout the State with messages urging consumers to shop for credit and announcing release of the Department's brochure. The savings banks and commercial banks industries have joined the outdoor advertising campaign by preparing billboard posters, with free billboard space once again being made available through the efforts of the Outdoor Advertising Association, with the theme that consumers should shop for credit.

Moreover, the New York City Transit Authority, as a public service, is providing free advertising space on subway cars for a three-month period, with the same theme as the billboards.

The Banking Department has also submitted a report to the Legislature recommending further deregulation of specific interest rate provisions in State law and other conforming amendments pursuant to the action taken in the Omnibus Banking Bill.●

HOUSE OF REPRESENTATIVES—*Monday, March 23, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, we reach out to You in prayer for ourselves and those most near to us, thanking You for Your presence with us and Your nearness to us in all the moments of life. This day we also extend our prayer for those needy in all parts of our world—to those who live in communities where crime and killing persists, to those who live under government that does not allow the freedoms of choice or determination, to those in different lands who do not have the opportunity of work and security and know only frustration or fear. Protect Your people, O God, wherever they are, and give them that measure of hope, grounded in Your love, that they may know Your peace and presence. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

CONGRESS URGED TO PROTECT ITS COLLEGE STUDENTS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PEYSER. Mr. Speaker, we all know how difficult it is to get the public to turn out on a Saturday morning at 10 o'clock for any real reason. This past weekend in Yonkers, N.Y., I had asked for a meeting on student aid.

Over 400 parents came out to a meeting at 10 o'clock to express their deep concern over what is about to be happening if the Congress gave way to the Reagan administration's slashes in the student aid budgets.

Mr. Speaker, this morning I am putting into the RECORD a letter from North Carolina Agricultural and Technical State University, in Congressman JOHNSTON'S district; a letter from Christopher Newport College in Congressman TRIBLE'S district; and a letter from University of Wisconsin-Parkside, in Congressman ASPIN'S district. All of these letters point out the tragedy that would take place if these cuts were allowed to go through. I hope Congress will vote soon and protect its students.

Mr. Speaker, the letters follow:

NORTH CAROLINA AGRICULTURAL AND TECHNICAL STATE UNIVERSITY,
Greensboro, N.C., March 9, 1981.

Hon. PETER A. PEYSER,
House of Representatives,
Washington, D.C.

DEAR MR. PEYSER: Thank you very much for your letter of February 25, 1981, concerning the new Administration's proposed cuts in the area of student assistance programs. It is assuring to know that you and some other members of Congress support the student assistance programs and are prepared to initiate action to sustain these programs.

This University's total enrollment, based on the Revenue Journal, is 5,303; of that number 74 percent of the students are receiving some form of financial assistance. If reductions in the student assistance programs are enacted, North Carolina Agricultural and Technical State University will be negatively affected.

The ramifications of the proposed reductions on this University are numerous. The reduction in the maximum award for the Basic Opportunity Grant and/or the failure of Congress to pass supplemental appropriations legislation will render the University ineffective in terms of meeting the financial needs of its students thereby increasing the probability that the University will experience a marked decline in enrollment.

Further with reductions in student assistance programs, many qualified students will be denied access to higher education which may ultimately minimize their societal contributions throughout their adult lives.

Since it is recognized that these reductions will have a detrimental effect on higher education specifically in the present, and society generally in the future, the University Community at North Carolina Agricultural and Technical State University is willing to join you and your colleagues in your efforts.

Kindest regards.

Sincerely,

CLEON F. THOMPSON, Jr.,
Acting Chancellor.

CHRISTOPHER NEWPORT COLLEGE,
Newport News, Va., March 6, 1981.

Hon. PETER A. PEYSER,
U.S. House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN PEYSER: In response to your request of February 27, 1981 asking for my assistance in supporting the continuation of the student assistance programs I am happy to help in any way I can.

As an index of my concern on this matter, I am enclosing a copy of letters to Congressmen Daschle, Trible, Natcher, Schmitt, Whitehurst and Warner on the Veterans Cost of Instruction Payments program.

Please let me know, specifically, what I can do to further this cause.

Sincerely yours,

JOHN E. ANDERSON,
President.

CHRISTOPHER NEWPORT COLLEGE,
Newport News, Va., February 25, 1981.

Hon. THOMAS A. DASCHLE,
Chairman, Congressional Vietnam Veterans Caucus, Russell Office Building, Washington, D.C.

DEAR CONGRESSMAN DASCHLE: Through the Veterans Cost of Instruction Payments (VCIP) program, this college has assisted thousands of military veterans in numerous ways. The VCIP program, as you may know, is now in serious jeopardy of being terminated.

Specifically, the Carter Administration earlier asked the Congress to rescind funding for approximately $34 million in programs aiding colleges in fiscal year 1981, which included $12.039 million for the Veterans Cost of Instruction Payments (VCIP) program. Should this occur, Christopher Newport College, as well as more than one thousand other colleges throughout the United States will be forced to terminate outreach, recruiting, and counseling services to military veterans, especially Vietnam era veterans.

At Christopher Newport College, the Office of Veterans Affairs has assisted more than 3,000 Vietnam era veterans annually since 1976, when we received our first VCIP grant. Although some 400 veterans now attend the College, a myriad of services have been made available to the more than 20,000 military veterans who reside within our service area.

These area military veterans have had our Office of Veteran Affairs staff to help them with V.A. payment problems, claims for medical and dental benefits, and other problems that would have been handled by the Veterans Administration's Veterans' Representatives (Vet Reps) on Campus. This past year, the remaining thirteen hundred (1300) Vet Reps, placed on college campuses by the V.A. in 1974 to assist with reporting the status of veterans in school have been removed because of the V.A.'s own budget problems. With the Vet Rep program gone, VCIP staffers have occupied a similar role as those Vet Reps, helping to assure that overpayments to veterans are kept to a minimum. If VCIP is terminated, overpayments to veterans nationwide will reach the one-half billion dollar mark.

With continued funding of the VCIP program and a $2.3 million supplemental increase in this funding (to maintain the current FY-80 funding level of $14.38 million annually), these urgently needed services to veterans will continue to be provided.

I urge your support of the VCIP program. This is undoubtedly one federal program whose funding has continued to provide much needed services to the millions of U.S. military veterans, both in school and out.

I might parenthetically add that if we are in deed and fact interested in demonstrating as a nation our commitment to the often ne-

---

UNIVERSITY OF WISCONSIN-PARKSIDE,
Kenosha, Wis., March 11, 1981.

Representative PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE PEYSER: Thank you for your letter of February 27 and your expression of concern for student assistance programs. It is a concern I share. I have already written to Wisconsin's two senators and to our Congressional representative, Les Aspin. In writing to our Congressional delegation I stressed the impact of the proposed student financial aids reduction at UW-Parkside. I am enclosing a copy of one of the letters for your information.

Your committee will play a key role in determining the level of support for needy students who wish to attend college. If I can help you in that role, please let me know.

Sincerely,

ALAN E. GUSKIN,
Chancellor.

UNIVERSITY OF WISCONSIN-PARKSIDE,
Kenosha, Wis., February 25, 1981.

Senator WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: I am writing to express my strong concern for the plight of many of our students currently dependent on federally sponsored financial aids packages to attend UW-Parkside. My concern is for the present need to pass supplemental appropriations for the 1981 fiscal year to avert a critical shortage and to assure that the proposed Reagan administration budget cuts in this area for the 1982 fiscal year not be adopted by Congress. I know that restoring money to these programs flies in the face of the prevailing winds, yet I feel compelled to protest the cuts.

Specifically, the reductions will affect our campus financial aids program in the following areas if supplemental relief is not provided for the 1981 fiscal year:

1. BEOG/Pell: 200 of our current 850 students receiving such assistance will be denied money necessary for them to attend the University. Of those remaining eligible under the program, their grants may be reduced by $400 per student at a time when we are experiencing double-digit inflation.

2. NDSL: 100 of our 355 students receiving these loans will be eliminated.

Since many of our students are adults with families or come from lower or middle income families, loss of this source of funds effectively forces these students out of college.

The effects of the proposed Reagan cuts are even more devastating:

1. NDSL: The proposal to eliminate this program over four years at a rate of 25% per year means that we stand to lose more than 350 students who have the academic ability to attend college, but not the financial resources.

2. Social Security Benefits (18-22 year olds): If eliminated as proposed, another 50 UW-Parkside students will be affected.

3. GSL: While it may be necessary to increase the interest charged for these loans, the Reagan proposal's drastic increase, coupled with a more restrictive calculation of student financial need may reduce by as much as 50% the number of eligible recipients. At UW-Parkside that means that as many as 250 students may be directly affected by the changes.

As you can see, for a campus of 5,500 commuter students the negative impact of not supplementing the current funding levels and of adopting the Reagan proposals is significant. For a state which has always prided itself, even during difficult economic times, on the widest possible access by its citizens to a college education, the cuts could be devastating. I urge you, therefore, to oppose such sharp cuts and to pass the supplemental appropriations bill now before the Congress.

Sincerely,

ALAN E. GUSKIN, *Chancellor.*

REPORT TO ACCOMPANY HOUSE RESOLUTION 115, PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY STANDING AND SELECT COMMITTEES OF THE HOUSE

Mr. ANNUNZIO, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-11) on the resolution (H. Res. 115) providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House, which was referred to the House Calendar and ordered to be printed.

UNITED STATES MUST IMPROVE ITS AIR DEFENSES

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, our air defenses have been neglected since the 1960's.

Air defense is part of that little known and almost forgotten area known as strategic defense.

As we stand here today, our borders are vulnerable to an attack from Soviet Backfire bombers. This is not a scare tactic, this is a fact. Our bomber radar systems can be penetrated.

Most of our bomber interceptor fighters are outdated and no match for the technically superior Backfire bomber. Our interceptor forces have decreased from 2,600 aircraft in the early 1960's to less than 275 today. Over 1,000 surface-to-air missiles protected our cities 20 years ago; today not a single SAM performs that service in the United States.

The current arms race is geared toward highly sophisticated offensive weaponry. I propose that the United States also begin a national defense system aimed at protection. One step in that direction is to improve our greatly weakened air defenses.

EL SALVADOR—SYMPTOM OF A SICK FOREIGN POLICY?

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, on February 3, I wrote to Secretary of State Alexander M. Haig, Jr., concerning the question of military aid to El Salvador and the fact that it did not appear to be conditioned on the Government of El Salvador taking vigorous steps to discipline its national security forces, to investigate atrocities, including, of course, the murder of the American Catholic nuns, and to further implement the agrarian reform program. I urged the Secretary to take steps to impose such conditions on any further military aid.

On February 20, I again wrote Secretary Haig noting that the administration, according to news accounts, had explicitly ruled out any link between military aid and progress by the Duarte government toward elimination of the excesses perpetrated by Salvadoran national security forces. In that letter I said:

> The failure of the United States to insist that the Duarte Government seek a political solution to the violence in El Salvador as a condition for the granting of U.S. military aid would create a situation which may well increase, rather than end, the violence in that country.

I did not receive a reply to either letter until March 13. The reply was in the form of a letter from Mr. Alvin Paul Drischler, Acting Assistant Secretary for Congressional Relations. Mr. Drischler's letter was somewhat reassuring in that he stated:

> The U.S. has expressed its concern over such abuses and will continue to press the government privately for progress in this area. We believe that in this manner we will be more effective in obtaining results.
>
> The U.S. continues to support strongly these reforms which include agrarian and banking reforms, promotion of employment, and encouragement of the private sector. In FY 80 and 81, the U.S. provided over $123 million in economic assistance, primarily to help the GOES implement these reform programs.
>
> We continue to impress upon the GOES the importance of controlling violence, whatever its source.

I offer my letters and Mr. Drischler's reply for printing in the RECORD at the end of these remarks.

Despite the assurances in Mr. Drischler's letter, the letter also implies that the military component of U.S. aid to El Salvador continues to have first priority. Remarks by Secretary Haig and other administration spokesmen and the talk of sending another $25 million in weapons and additional military advisers to El Salvador give the clear impression that the administration is still emphasizing a military solution in El Salvador.

The push for further military aid seems to be at odds with news accounts that indicate that the flow of weapons to the insurgents in El Salvador is drying up, thanks, it must be said, to the very firm stance the administration has taken against actions by Cuba or other countries facilitating the flow of such weapons to the insurgents. It is also at odds with statements by former Ambassador Robert White to the effect that the Duarte government has the military situation under control and statements by President Duarte himself indicating that further military aid is not necessary at this time.

Mr. Speaker, I have not joined in sponsoring any of the resolutions which have been circulated demanding a complete cutoff of further military aid to El Salvador, even though I think no case has been made as to the necessity for such aid at this time and even though I think such aid sends the wrong signals to the military elements in El Salvador who appear to be the principal sources of violence in that country. It may well be that a situation will arise warranting further such aid to El Salvador. In such case, I could support additional military aid, if the Government there shows a substantial commitment to curbing the excessive and indiscriminate violence of the military and paramilitary elements and if it is making significant progress toward economic, social, and political reform.

Undoubtedly violence from the terrorists of the extreme left continues to be a real menace in El Salvador. The Reagan administration is to be commended for its efforts to choke off the flow of arms to these groups. However, by far the greatest violence and indiscriminate slaughter has come from the extreme right. Providing military aid to the Duarte regime unconditionally and beyond the minimum necessary will only intensify actions of violence by military and right-wing death squads against innocent people in El Salvador and will, in turn, increase rather than decrease armed resistance to the Duarte government.

Unfortunately, the Reagan administration gives the impression that it intends to impose additional weapons and military advisers on El Salvador for reasons of its own and not because they are either needed or desired by President Duarte. It is not clear whether this policy is merely the result of the desire of the Reagan administration to make a political point at home or abroad, is the result of manipulation of policy by the Pentagon, as implied by former Ambassador Robert White, or is simply an example of Secretary Haig's propensity for choosing military solutions to political problems.

In any event, the most disturbing aspect of the Reagan administration's posture with respect to El Salvador is that it is part of a larger pattern which plays down support for human rights and economic aid in favor of military support for even the most despotic governments so long as they are rightist rather than leftist in their political orientation. One would think that past experience with such regimes as that of Batista in Cuba, the shah in Iran, and Somoza in Nicaragua would have driven home a lesson that not even the most hard shell militarist or right-wing zealot could ignore. These governments collapsed for one simple reason: They had committed so many outrages against their own people that they finally lost the support of the middle-class business community in their countries, as well as the masses of the poor and working people. Until that point was reached, no Communist or other revolutionary movement had much chance of success. But once it was reached, U.S. military aid was powerless to prevent the collapse of the regime. In fact, most notably in the case of the shah, U.S. military aid was seen by the people as helping to perpetuate the despotic regime and to facilitate its barbarities, thereby adding to the popular revulsion not only against the regime but against the United States as well. Much of the Iranians' hatred and bitterness against the United States, which enabled the fanatics in Iran to seize our Embassy and hold the hostages and made it impossible for moderate elements to negotiate an early end to the crisis, arose from this fact.

Of course, each country's situation is different. Nevertheless, the apparent movement of the Reagan administration toward renewal or expansion of military aid to the tyrannical regimes in Argentina, Chile, and Guatemala foreshadows a comparable series of disasters, unless such aid is conditioned on genuine commitments and significant progress toward respect for basic human rights.

Moreover, unless there is a substantial component of economic assistance, whether through bilateral aid, international financial institutions, or private investment, accompanying military aid programs in less developed countries, the perception will be that the United States lacks a genuine interest in the people of the country and in helping eliminate the incredible poverty which usually is the root cause of most political unrest.

Without going into the specifics of the Reagan administration's developing policies toward Africa, I would say only that they seem to provide further evidence of the administration's insensitivity, indeed blindness, to the moral and political concerns of the people in the developing countries. There is no question about the importance of maintaining U.S. and NATO military strength versus the Soviet Union and its Eastern bloc allies. But to configure our foreign policy with respect to Latin America, Africa, and other Third World countries as though they were mere pawns in the East-West military conflict is, in my view, a tragic misreading of the nature of the problem we face in these parts of the world. If it continues, it is likely to lead to further instability and failures of the kind that we have experienced in the recent past.

The letters referred to follow:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 3, 1981.

Hon. ALEXANDER M. HAIG, Jr.,
Secretary of State, U.S. Department of State, Washington, D.C.

DEAR MR. SECRETARY: I am writing to express my concern about the new lethal military aid package being sent to El Salvador.

As you know, there appears to be substantial evidence that elements within El Salvador's national security forces have been responsible for politically motivated harassment and murder perpetrated against innocent civilians in El Salvador. I recognize that the politcal situation in El Salvador, coupled with U.S. national security interests in Central America, presents no easy solution to El Salvador's internal problems. I am also aware of reports indicating that the insurgent movement in El Salvador has received military aid from Cuba and from sympathizers in other Central American countries.

Nevertheless, I am disturbed by the fact that the current lethal military aid package contains no requirement that the government of El Salvador take vigorous steps to discipline its national security forces, investigate alleged atrocities committed by either the left or the right, and further implement the agrarian reform program. The absence of strict conditions on the granting of lethal military aid to El Salvador may well provide direct encouragement to the forces of repression in El Salvador.

In order to make it clear to the Duarte government that we cannot continue sending aid to El Salvador if its national security forces continue kidnapping and murdering innocent civilians, I urge you to take steps to make military aid to El Salvador conditional upon certification by the government that it is taking concrete steps to curb excesses by its national security forces, is working to bring to justice those responsible for political murders in the country, and is vigorously pursuing the land reform program.

Sincerely,

JOHN F. SEIBERLING.

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 20, 1981.

Hon. ALEXANDER M. HAIG, Jr.,
Secretary of State, U.S. Department of State, Washington, D.C.

DEAR MR. SECRETARY: As you may recall, I wrote to you on February 3 urging you to impose strict conditions on the granting of U.S. military aid to El Salvador.

Though I have not yet received a reply to my earlier letter, I am writing again because, according to news accounts of Tuesday's congressional briefing on U.S. aid to El Salvador, the Administration has explicitly ruled out any link between current or future military aid and progress by the Duarte government toward elimination of

the excesses perpetrated by Salvadoran national security forces.

The unconditional granting of U.S. military aid would be, in my view, a singularly unfortunate step, and could well serve to encourage further actions of violence by paramilitary oranizations or elements within the national security forces against the population of El Salvador. As a Washington Post editorial of February 18 points out, any "military" solution to the problems in El Salvador must be accompanied by a political solution as well. The failure of the United States to insist that the Duarte government seek a political solution to the violence in El Salvador as a condition for the granting of U.S. military aid would create a situation which may well increase, rather than end, the violence in that country.

I believe any policy of unconditional military aid to El Salvador should be carefully reviewed in th light of the above-mentioned considerations.

Sincerely,

JOHN F. SEIBERLING.

DEPARTMENT OF STATE,
Washington, D.C., March 5, 1981.

Hon. JOHN F. SEIBERLING,
House of Representatives.

DEAR MR. SEIBERLING: I am responding to your letters to Secretary Haig of February 3 and February 20 regarding your belief that the U.S. should impose conditions on military aid to El Salvador and that we should not seek a military solution to the problems facing that country.

Concerning the question of imposing conditions on the Duarte Government in return for our assistance, we do not believe that an effective relationship with that government can be built upon the linkage of U.S. aid to a specific set of demands. Experience has shown that direct linkage of this sort arouses the resentment of the aid recipient and does not accomplish the ends the donor wishes to achieve.

Specifically, with respect to the indiscriminate violence and abuses being committed by elements of the Salvadoran security forces, the Duarte Government has begun to take steps to bring this problem under control. The U.S. has expressed its concern over such abuses and will continue to press the government privately for progress in this area. We believe that in this manner we will be more effective in obtaining results.

You also refer to the Washington Post editorial of February 18 which dealt with the necessity for a political solution in El Salvador to accompany efforts to achieve a military solution. Our policy toward El Salvador has both a military and political component. El Salvador is in the middle of a major struggle to preserve its very existence from the threat of a terrorist insurgency supported from the outside. The government's most immediate priority, therefore, is to ensure the stability and security of the country. Our focus on the security issue in recent weeks stems from this objective reality.

The Salvadoran Government remains committed to carrying out basic economic and political reforms including elections in 1982-83. The U.S. continues to support strongly these reforms which include agrarian and banking reforms, promotion of employment, and encouragement of the private sector. In FY 80 and FY 81, the U.S. provided over $123 million in economic assistance, primarily to help the GOES implement these reform programs.

The successful implementation of these reforms would provide the GOES with broad popular support and facilitate a transition to an elected government. Until the violence is controlled, however, such a transition is difficult to make. That is why the GOES is concentrating its efforts on countering the terrorist forces.

Violence is the enemy of all democratic change, of individual rights and of economic progress. Those who are responsible for the violence and terrorism, with arms support from Cuba and other countries are the real obstacle to negotiations. We continue to impress upon the GOES the importance of controlling violence, whatever its source.

In El Salvador, an end to the present suffering and violence would permit that nation to get on with the task of economic reconstruction and progress. The United States, with its long tradition of democratic change, recognizes the need for and supports peaceful and democratic change in El Salvador.

Sincerely,

ALVIN PAUL DRISCHLER,
Acting Assistant Secretary for Congressional Relations.

PUBLIC TELECOMMUNICATIONS ACT OF 1981

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr COLLINS of Texas. Mr. Speaker, I am introducing today the Public Telecommunications Act of 1981. The purpose of this legislation is to extend the authorization for the Corporation for Public Broadcasting (CPB) and to make certain very fundamental changes in the way CPB and public broadcasting is organized and financed.

President Reagan has proposed reductions for CPB in the amount of funds which it receives from the Federal Government. I strongly support the President in his effort to reduce Government spending, and the cuts for CPB are entirely appropriate, particularly when cuts are planned in nearly every other Federal program.

The public broadcasting establishment is fighting these cuts in an all-out fashion. This group apparently believes that is should be insulated from any cuts and should not share in the effort to gain control of the Federal budget. I think nothing more clearly manifests this position than the testimony of CPB before the Subcommittee on Labor, Health, Human Services and Education of the House Appropriations Committee on March 17, 1981, in which, rather than show any fiscal restraint, it asked for fiscal year 1984 appropriations of $293 million. This amount is $183 million more than the Reagan budget projections and, incredibly, even $106 million more than the Carter budget. Higher and higher Federal spending is in direct conflict with the mandate given to both President Reagan and the Congress to cut Federal spending. The present budget is $172 million. President Reagan asks for austerity but CPB asks for $293 million.

The argument against President Reagan's efforts was that his recommended rescissions for fiscal year 1982 and 1983 violated the principle of advanced appropriations begun in 1975. This practice is one that I have no real quarrel with, under ordinary circumstances, but this year the economy needs substantial reductions in Federal spending. This is imperative if inflation is to be controlled and interest rates are to be reduced. This goal of a sound economy is a far higher principle than advanced appropriations for public broadcasting.

Advanced appropriations, it is claimed, provide political insulation for public broadcasting. By being given 2-year advanced appropriations, it is contended that public broadcasting is protected from political reprisals against their appropriations in response to possibly politically unpopular programing. The argument is ridiculous, because in order to keep the funding at a 2-year-in-advance pace, appropriations for CPB are voted on each year, at which time political reprisal would then be available. The only way to truly eliminate this possibility is to eliminate the Federal role in financing.

Even though I could not be more fully supportive of the President's efforts to cut spending, the reauthorization legislation for CPB, which my Energy and Commerce Committee must report by May 15, 1981, can and should mitigate the effects of these spending cuts. This is one of the prime purposes of my legislation.

I find two things happening which I believe border on the incomprehensible: First, that anyone has the temerity to argue that their public broadcasting budget should not be cut when many much higher priority Federal programs are being cut; and, second, that people are actually paying attention and giving support to these efforts. Public broadcasting should bear its share of the efforts at economic recovery.

MAJOR FEATURES OF THE PUBLIC TELECOMMUNICATIONS BILL OF 1981

FIRST: AUTHORIZATION LEVELS

The Corporation for Public Broadcasting (CPB) is reauthorized for a 3-year period—fiscal years 1984, 1985, and 1986—thus continuing the concept of advanced authorizations. The fiscal year 1984 level is $110 million, and the fiscal year 1985 level is $100 million, as recommended by the President. The authorization level for fiscal year 1986 is $90 million.

SECOND: PUBLIC BROADCASTING STATION FUNDING

Current law requires that at least 50 percent of the Federal funding be flowed through to the stations. Last year, fiscal year 1981, 60 percent of

the Federal funding was allocated to the stations. My legislation changes the amount required to be distributed to the stations to at least 80 percent in fiscal year 1982, rising to 85 percent in fiscal year 1983. By increasing the percentages, the public broadcasting stations receive essentially the same amount as they would have received under the Carter budget for fiscal year 1982 and fiscal year 1983.

THIRD: LIMIT ON COMMUNITY SERVICE GRANTS

In fiscal year 1981, seven public broadcasting stations received in excess of $1 million from CPB in the form of community service grants. They are, for that year:

KCET, Los Angeles, $1,886,169.
KQED, San Francisco, $1,187,102.
WTTW, Chicago, $1,141,443.
WGHB, Boston, $2,452,474.
WNET, New York, $4,740,636.
WHYY, Philadelphia, $1,097,426.
WQED, Pittsburgh, $2,172,705.

Grants to stations would be limited to not more than $1 million. This would retain $7.7 million for distribution to stations which are far needier than these stations in major markets. The Federal funding, at current levels, represents only between 7 and 12 percent of the total income of these stations.

FOURTH: INSTITUTIONAL ADVERTISING

This legislation permits stations, on a voluntary basis, to sell institutional advertising on a limited basis. This advertising cannot be of a product or service-specific nature; it cannot interrupt programing; it can be aired any time throughout the broadcasting day, so long as it does not interrupt programing; no single spot can be for longer than 30 seconds; and collectively, these spots can be for no more than 2 minutes at a time. This will especially aid the larger stations whose grants are limited to the $1 million level.

FIFTH: CORPORATION FOR PUBLIC BROADCASTING

Under this legislation, CPB will have only two remaining responsibilities: national programing and distribution of funds to stations.

In fiscal year 1982, 24 percent of CPB funds went to national programing, and was estimated to decline to 22 percent by fiscal year 1983. Under my bill, in fiscal year 1983 and subsequently, 15 percent of the Federal funds will be available to CPB. The only expense item which they will have, other than national programing, is administrative expenses, which can be substantially reduced under current levels due to the fact that many current responsibilities will be eliminated under this legislation.

Additionally, the current 15-member CPB Board is reduced to 7 members, and the requirement is eliminated that CPB impanel an advisory board to evaluate its program decisions.

SIXTH: FACILITIES

Consistent with the budget of President Reagan, the facilities program administered by the National Telecommunications and Information Administration of the Department of Commerce is not reauthorized.

ADMINISTRATION SAVES $40 MILLION, LOSES $5.5 BILLION

(Mr. GORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GORE. Mr. Speaker, in one of the administration's budget cuts that I believe to be misguided, they are proposing to save $40 million by cutting out 80 percent of the lawyers, investigators, and auditors investigating the oil companies' illegal overcharges during the period of price controls that is now over.

This issue does not involve price controls. It involves law enforcement. By saving $40 million the administration will lose $5.5 billion in identified overcharges that could be returned to consumers; and all criminal cases pending will have to be dropped.

One of the next persons on the audit list was the head of the administration's transition team for the Department of Energy. Three of the six oil company executives just appointed to the advisory board of the Department of Energy are targets of pending investigations and a fourth one just settled out of court last year.

I call on the administration to restore that $40 million and help the public recover the $5.5 billion in identified illegal overcharges and to see that we have equal justice under law.

APPOINTMENT AS MEMBERS OF COMMISSION CONCERNING ROLE OF GOLD IN DOMESTIC AND INTERNATIONAL MONETARY SYSTEMS

The SPEAKER. Pursuant to section 10(a) of Public Law 96-389, the Chair appoints as members of the Commission Concerning the Role of Gold in Domestic and International Monetary Systems the following Members on the part of the House:

Mr. REUSS of Wisconsin;
Mr. NEAL of North Carolina;
Mr. WYLIE of Ohio; and
Mr. PAUL of Texas.

THE 29TH SESSION OF THE UNITED NATIONS COMMISSION ON NARCOTIC DRUGS

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 10 minutes.

● Mr. GILMAN. Mr. Speaker, the 29th session of the United Nations Commission on Narcotic Drugs recently completed its deliberations in Vienna, Austria, on February 2-11, 1981. The U.S. delegation, which was led by Roger Kirk, Chief of the U.S. Mission to United Nations System Organizations in Vienna, consisted of Clyde D. Taylor, Deputy Assistant Secretary of State for International Narcotics Matters; Gene Haislip, John Warner, and Mark Golubock of the Drug Enforcement Administration; Dr. Jean Paul Smith of the National Institute on Drug Abuse; Dr. Stuart Nightingale, Acting Commissioner for Health Affairs of the Food and Drug Administration; Walter V. Hall, Narcotics Affairs Counselor of the U.S. Mission in Vienna; Victor Jacobson, Customs Attaché at our Embassy in West Germany; and Dianne Hurley Graham of the State Department.

Although I was unable to attend the Commission's 29th session, through the good offices of Ambassador Kirk, I presented a statement on the global dimensions of narcotics trafficking and drug abuse that was distributed to the delegates attending that session.

In my paper, I discussed the apathy toward combating drug abuse, the urgency for a comprehensive, coordinated global drug strategy, the need for the U.N. to consolidate its diverse drug programs, policies, and organizations into a single, highly visible anti-narcotics commission or committee, and the low level of contributions to the United Nations Fund for Drug Abuse Control (UNFDAC).

Given the global dimensions of drug trafficking and drug abuse—an epidemic that has reached into the hundreds of billions of untaxed dollars in drug trafficking and that has caused misery for unknown millions of individuals who are dependent upon or addicted to drugs, I am appalled that leaders throughout the world, including many in our Nation, are unwilling to admit—or choose not to admit—the existence of this problem. Given that narcotics trafficking and drug abuse is a crisis comparable to the international energy crisis, double-digited inflation and the fragile state of the international economy, I am appalled that the drug problem is relegated to such a low priority on our domestic agendas and international forums.

The United Nations Educational, Scientific, and Cultural Organization's 3-year budget for 1981-83 amounts to $625,374,000, of which less than two-tenths of 1 percent—or $1,142,900—is devoted to educating citizens throughout the world on the dangers of drug abuse. The $1,142,900 represents UNESCO's miniscule global commitment to drug education for the next 3 years. Similarly, drug abuse programs for the International Labor Organization amounted to a paltry $108,000 for 1978 and 1979, and the Food and Agriculture Organization allocated from its regular budget in 1978-80 an estimated $20,000 each year for its drug programs.

Although I have not received the final report of contributions to the United Nations Fund for Drug Abuse Control (UNFDAC), the preliminary report, as of September 30, 1980, shows that only 29 nations—or 19 percent of the 152-member states of the U.N.—contributed a meager $4,621,690 to the U.N. Fund; private contributions amounted to $454,327, for a total of $5,075,017. In 1978, 38 nations contributed $7,296,200. This is a dismal record for a global war on drug abuse. It is also indicative of the low level of priority granted to the drug problem by government leaders and their representatives to the U.N. I understand that as of February 1981, the following 11 nations have contributed slightly more than $2.3 million to UNFDAC: Australia, $100,000; Austria, $5,300; the Federal Republic of Germany, $1,000,000; France, $100,000; Hong Kong, $20,000; Italy, $111,110; Japan, $300,000; Malaysia, $2,000; Norway, $65,000; Sweden, $500,000; and the United Kingdom, $110,000.

Mr. Speaker, what does it take to shake the apathy, the complacency, from leaders of our Nation and those of other nations into realizing that drug abuse has become a global problem undermining the institutions of all nations and destroying the health of citizens throughout the world? What does it take before leaders the world over will act in a concerted manner to wage war on drug trafficking and drug abuse? As I stated in my paper:

Until all of the member-States of the U.N. realize that it is in their best interest to pool their resources, personnel, equipment and funds, then the war on drug abuse will surely be lost and the human misery for millions of drug abusers will continue unabated.

Mr. Speaker, in an effort to inform my colleagues of the global dimensions of narcotics trafficking and drug abuse, I am inserting at this point in the RECORD the following items: First, the complete text of my statement before the U.N. Commission on Narcotic Drugs; second, a list of contributions and pledges to UNFDAC as of October 31, 1980; and, third, the statement of David Caldwell, our Representative to the U.N. General Assembly's Third Committee, urging that committee's support of a West German resolution pertaining to international cooperations in drug abuse control:

STATEMENT OF HON. BENJAMIN A. GILMAN

Mr. Chairman, distinguished representatives to the Twenty-ninth Session of the United Nations Commission on Narcotic Drugs, for several years I have had the pleasure of sharing with you my thoughts and the thinking of many of my colleagues in the United States Congress regarding efforts by the international community to combat narcotics trafficking and drug abuse. I welcome once again, this opportunity to share with you our thoughts as you deliberate during this session the complex problems of preventing and controlling drug abuse and drug trafficking.

Drug trafficking and drug abuse have reached epidemic proportions throughout the world. Interdicting narcotics trafficking, eradicating the illicit production of drugs at their source, alerting the world's citizenry to the dangers of drug abuse, and preventing, treating and rehabilitating those who have become dependent upon or addicted to drugs is a staggering, global problem.

No nation, regardless of its political ideology or socio-economic status is immune to the devastating and debilitating effects of drug abuse or from the insidious drug merchants who profit from human suffering. Every region of the world—from North America to Latin America, from Europe, Africa and the Middle East to the Orient and Oceania—has become a victim to drug trafficking and drug dependency. And in every region there can be found major narcotic distribution hubs and financial centers for international narcotic syndicates.

GLOBAL DIMENSIONS OF NARCOTICS TRAFFICKING AND DRUG ABUSE

The battle against heroin, cocaine, marihuana, hashish, Phencyclidine (commonly known as PCP or "Angel Dust") and other dangerous drugs is never-ending in its confrontations with this illicit multibillion dollar business. In the United States alone, drug trafficking in 1979 escalated to an estimated $64 billion in street sales, compared to the illegal $48 billion drug sales back in 1977. The global dimensions of drug trafficking, for which accurate statistics are unfortunately unavailable, reach into the *hundreds of billions of dollars*, causing untold human suffering for unknown millions of our world's citizenry.

The excellent compilation of data being considered by this Commission entitled, Review of the Illicit Traffic in Narcotic Drugs and Psychotropic Substances During 1979, E/CN. 7/660, 20 November 1980, clearly depicts the worldwide dimensions of drug trafficking. It reports the global seizures of nearly 60 tons of narcotics for 1979, a 46 percent increase from the slightly more than 41 tons of narcotics seized worldwide in 1977; the more than 7 tons of cocaine seized in 1979, compared to nearly 4 tons seized in 1977; and the increased seizures frequently by the boat load and plane load by law enforcement authorities of marihuana, LSD, stimulants, depressants, hallucinogens and other dangerous drugs.

With respect to the worldwide demand for illicit drugs, the report entitled, Review of Drug Abuse and Measures to Reduce Illicit Demand, E/CN. 7/661, 10 November 1980, discusses the alarming increase of drug dependency by citizens in every region of the world. A portion of that report indicates the magnitude of the global drug problem:

"Heroin abuse has further spread, mainly among young people in urban areas, in most countries of Western Europe and also in a number of countries of North America, the Middle East, South East Asia and Oceania. Other opiates, such as synthetic narcotics and morphine, are widely abused in most regions but to a lesser extent; unlike heroin these drugs are frequently obtained by illegal means from licit sources. Traditional opium consumption involving addiction persists principally among the middle aged populations of both rural and urban areas in a number of countries of Asia and the Far East and the Middle East."

* * * * *

"A further increase in the abuse of amphetamine-like substances, such as methampetamines, is observed in a number of countries in all regions and in some is reaching serious proportions."

* * * * *

"The abuse of cocaine hydrochloride in North and South America and Europe continues to rise. There is some expansion of cocaine abuse in the Middle East and Oceania, but on a much smaller scale."

* * * * *

"An increasing trend to abuse barbiturates, non-barbiturate sedative-hypnotics and benzodiazepines is observed in many countries of all regions. Such abuse, either by injection or orally, contributes to a rise in drug-related deaths."

* * * * *

"Multiple drug abuse, often in combination with alcohol, is emerging as a principal pattern in many countries."

* * * * *

"Recorded drug abuse predominantly affects the youth, although populations of all age groups and all social strata are encountered as abusers. While abuse of drugs remains in most countries much more common among men, there has recently been an increasing trend to abuse drugs by women."

Obviously these reports on the extent of worldwide narcotics trafficking and drug abuse depict only the tip of the drug problem. The data in these reports do not and cannot account for the amount of illicit drugs that escape detection by law enforcement officials. These statistics do not account for the unknown number of abusers who are not reported as drug addicts. The reports cannot include those who are not registered in drug treatment centers or who are physically and psychologically dependent upon amphetamines, barbiturates, tranquilizers or who are cross-addicted to pills and alcohol. The data does, however, reflect what we all know: that narcotics trafficking is a worldwide multi-billion dollar business that knows no boundaries, no political ideologies or competing economic systems; and that it adversely affects the health and well-being of all of our citizens.

To wage "war" on the drug problem, nations of the world must submerge their competing political and economic differences. Just as the world cannot survive nuclear confrontation, so too it cannot long endure "victories" by international drug traffickers * * * the international criminal syndicates, the independent entrepreneurs, and the so-called "respectable" citizens whose sophisticated and well-financed business operations reach into every corner of our societies. Such illicit business activities undermine our institutions, jeopardize the health of our citizens and destroy the roots of our societies—our youth. No nation or its citizens are immune to this devastation.

Leaders from all sectors of the international community must recognize that narcotics trafficking and drug abuse is not going to go away today or tomorrow, that drug abuse prevention and control is a never-ending battle requiring dedicated and coordinated action by the entire family of nations.

APATHY TOWARDS COMBATING DRUG ABUSE

All of the distinguished representatives gathered at this session are familiar with the grim statistics depicting the global dimensions of the drug problem, and the devastating effects that it causes to our citizens. The drug problem is as severe and urgent as the international energy crisis, the escalating rates of inflation and the fragile state of the international economy. Since we all recognize that we live in an interdependent world it is difficult to understand the apathy by many leaders throughout the world, including some in my own country, regarding the urgent need to effectively wage "war" on drug abuse. Why is drug trafficking and drug abuse relegated to such a low priority on our domestic agendas and in the international forums?

It is appalling that there is no sense of urgency within the UN regarding narcotics trafficking and drug abuse. I am appalled by the absence of a real commitment from leaders of the international community and from representatives to the UN General Assembly and other UN drug-related units to provide the kind of substantial resources needed to the "war on drugs". It is incredible that so many leaders throughout the world fail to realize (or choose not to realize) that drug abuse is a major social and economic problem adversely affecting the health and well-being of the entire international community.

Permit me to be more specific by noting that the United Nations Educational, Scientific and Cultural Organization's (UNESCO) drug education efforts is virtually nonexistent. Out of its total budget of $303 million for the 1979–80 biennium, a paltry $735,000 (or less than three-fourths of one percent) was devoted to the "global" effort of educating citizens throughout the world on the dangers of drug abuse. Such a minuscule sum would not even sustain a mass media national drug education campaign. Furthermore, of the $735,000 for UNESCO's drug education program, the UN Fund for Drug Abuse Control (UNFDAC) underwrote $528,000 or 72 percent; the remaining $207,000 (or less than 0.07 percent of UNESCO's total budget) came from UNESCO's Regular Budget.

Although I have not seen UNESCO's recently approved three-year budget for 1981–83, which I understand amounts to $625,374,000, the originally proposed budget of $620,378,000 for 1981–83 included a meager $1,129,000 for that organization's drug education program, or which $1,050,000 (or 93 percent) would have been underwritten by UNFDAC and the remaining $79,000 (or 7 percent) by UNESCO's Regular Budget. Although the size of UNESCO's approved budget increased markedly from an average of $151.5 million for the two-year period of 1979–80 to an average of nearly $208.5 million for the three-year period of 1981–83, its drug education program was increased by a paltry $13,900 for a 3 year total of $92,900. Its drug education budget for the triennium 1981–83 totals $1,142,900 of which $1,050,000 (or nearly 92%) is underwritten by UNFDAC and the remaining $92,900 (or 8%) by UNESCO's regular budget. In short, during the next three years, UNESCO intends to devote an annual average of nearly $381,000 or less than two-tenths of one percent of its total resources for educating citizens throughout the world on the dangers of drug abuse. Given the global dimensions of narcotics trafficking and drug abuse, it is shocking that out of more than *$625 million*, UNESCO's total commitment to drug education represents a meager few hundred *thousand* dollars.

The meager drug abuse programs of the International Labor Organization (ILO) and the Food and Agriculture Organization (FAO) are also discouraging. The ILO's drug abuse control activities for 1978 and 1979 amounted to a paltry $108,000 (or an average of $54,000 for the two-year period); FAO allocated from its Regular Budget an estimated $20,000 per year for 1978–80.

If the international community means what it says about preventing and controlling drug abuse, obviously, then, the UN drug-related agencies must elevate the narcotics issue to a higher level of priority on their agendas, and must allocate more of their resources to the "war effort".

URGENCY FOR A COMPREHENSIVE GLOBAL DRUG STRATEGY

It is encouraging that this Commission will be considering a draft document entitled Strategy and Policies for Drug Control, E/CN.7/658 (Part One and Part Two), 13 October 1980.

Given the political instability in the Middle East, the difficult task of the central governments of Southwest Asia (Afghanistan, Iran and Pakistan) and the Golden Triangle (Burma, Laos, and Thailand) to control the illicit production of opium, and given reports of increased illicit opium production from the Golden Triangle, and the vast heroin, marihuana and cocaine traffic originating from Latin America, there is an urgent need to formulate a comprehensive, coordinated global strategy to prevent and control drug abuse. Such a strategy must be aimed at interdicting narcotics trafficking, eradicating the illicit production of drugs at their source, educating citizens throughout the world on the dangers of drug abuse, and treating and rehabilitating those who have become dependent upon or addicted to drugs.

I would hope that such a strategy would be more than a mere declaration . . . more than mere words in a glowing account . . . but would provide sufficient resources to implement the strategy. Lofty resolutions condemning narcotics trafficking and drug abuse are meaningless without sufficient funds, personnel and equipment.

Surely the 152 member-nations of the UN have sufficient resources and expertise to wage an all-out "war" on drug abuse. Just as Chapters VI and VII of the United Nations Charter pertain to situations "likely to endanger international peace and security" or constitute a "threat to the peace," "breach of the peace," or "acts of aggression," so too does narcotics trafficking and drug abuse constitute a clear and present danger to the entire family of nations requiring collective action to combat this scourge of all mankind.

CONSOLIDATING U.N. DRUG EFFORTS

Since the UN approach to the drug problem is fragmented among numerous organizations, boards, commissions, councils, and the like . . . a problem not uncommon to some nations working in the drug field, including my own country, I would also urge that the diverse drug programs, policies and organizations be consolidated into a single, highly visible, anti-narcotics committee or commission from existing UN personnel that would formulate, implement and coordinate a comprehensive global drug strategy.

CONTRIBUTION TO UNFDAC

With regard to financial contributions to UNFDAC, I find it disheartening that as the UN Fund celebrates its 10th anniversary, only a handful of nations have contributed $100,000 or more to the Fund. In 1979, 44 nations (or 29 percent of the 152-member nations to the UN) contributed a meager $4,621,387 to the Fund, a sharp decline of nearly 1.7 million dollars from that $7,296,200 contributed to UNFDAC in 1978. Private contributions to the Fund in 1979 amount to $304,521 for a total "global" effort of $4,925,908 for that year.

Preliminary reports for 1980 indicate a continued decline in contributions to the UN Fund. As of September 30th, 1980, 29 nations contributed or pledged a meager $4,621,690 to UNFDAC; private contributions amounting to $454,327 resulted in a total of slightly more than $5 million.

From 1971, when UNFDAC was created, until the third quarter of last year, 75 nations sporadically contributed $46,937,752 to the Fund, which, when added to the $951,374 from private contributions and $1,307,656 from the interest on income (as of 31 December 1978) amounted to a pathetic total of $49,196,782, or an annual average of slightly more than $5.4 million for the nine-year world-wide "campaign" to combat drug abuse.

As I stated last year in my remarks before the Sixth Special Session of this distinguished Commission:

"We cannot wage a global assault on narcotics on such a paltry budget. Such limited financing will not provide the equipment, the personnel and the programs needed to combat the international drug traffickers' sophisticated operations that reach into every corner of the world. We cannot effectively eradicate the illicit production of drugs at its source, educate our citizens on the dangers of drug abuse, and treat and rehabilitate those individuals who have become dependent upon or addicted to drugs on such a pathetically small budget. It is appalling that those nations that have substantial drug problems have made minuscule, if any, contributions to UNFDAC. Nations that can afford to contribute to the UN Fund have made only token pledges of less than a few thousand dollars or are conspicuously absent by not contributing a single penny to wage 'war' on drug abuse."

Furthermore, voluntary contributions to UNFDAC should not underwrite the operations or activities of the specialized UN drug-related organizations. Rather, these activities should be supported by the Regular Budgets of the affected agencies.

Two years ago, the UN Joint Inspection Unit's Report on the Organization and Management of Drug Abuse Control Activities in the United Nations (E/1979/10, 22 February 1979) stated that UNFDAC is carrying a large proportion of the financial burden for drug activities in the UN system, and

"* * * the specialized agencies, such as FAO, UNESCO, WHO, and ILO, could justifiably be asked to include in their regular budget programs some drug abuse control projects in their special area of competence, rather than relying on UNFDAC as a source of funds to the extent that they now do."

The report also stated: "The intentions behind the Fund's existence are frustrated if it has to function as a substitute for the regular budget of the United Nations or of a specialized agency," and it observed that the UN Fund is "functioning more as a substi-

tute for the regular budget than as a supplement to it."

CONCLUSIONS

At a time when narcotics trafficking and drug abuse have become such a vast multibillion dollar business, when customs inspectors throughout the world are seizing substantial amounts of currency from organized crime's attempt to launder funds obtained from their nefarious drug transactions, when nearly every region of the world is reporting increased seizures of heroin, cocaine, marihuana, PCP and other dangerous drugs, and when increased numbers of their citizens are being reported to hospital emergency rooms for drug overdose, it is incredible that UN drug-related agencies are allocating only minuscule amounts of funds from their Regular Budgets to combat drug abuse.

Mr. Chairman, it is discouraging to witness year after year the twin impediments eroding our efforts to effectively combat drug abuse: the low level of priority granted to the drug problem by government leaders and their representatives to the UN and the dismal record of voluntary contributions to the UN Drug Fund.

In the course of this session, let us consider—

How we can effectively combat the onslaught of the illicit drug trafficking that is causing so much misery for so many citizens;

How we can help raise the consciousness of our citizens regarding the dangers of drug abuse;

How we can help raise the profile regarding the seriousness of narcotics trafficking and drug abuse within the UN General Assembly and other agencies of the UN; and

How we can satisfactorily respond to these issues when leaders throughout the world apparently misperceive the magnitude of the drug problem (or perhaps do not want to admit the existence of the drug problem).

Preventing and controlling drug abuse requires that the entire family of nations recognize the seriousness of the drug problem and the urgency to (A) elevate this problem to a high level of priority, (B) pool their resources and act in a concerted, cooperative manner, (C) formulate a comprehensive, coordinated global drug strategy, and (D) implement that strategy with sufficient resources to effectively wage "war" on this scourge of all mankind.

Until all of the member-States of the UN realize that it is in their best interest to achieve the above goals, then the "war" on drug abuse will surely be lost and the human misery for millions of drug abusers will continue unabated. If that tragedy occurs, then the world will gradually sink into becoming a drug-oriented society.

Mr. Chairman, the time to act is upon us. The health and well-being of all of our nations demand that we recognize the urgency of the drug problem and unite to resolve it. We can no longer be complacent about this problem. We must elevate this issue to a top priority status and commit our resources to wage an effective "war" against the drug traffickers and to help those who are drug abusers. When that has been accomplished, then the world will be a better place for all of us.

UNITED NATIONS FUND FOR DRUG ABUSE CONTROL—CONTRIBUTIONS AND WRITTEN PLEDGES AS AT OCT. 31, 1980 [1]

[In U.S. dollars]

Country	1971–79	1980

Total	44,120,765	5,910,080
Grand total	[2] 50,030,845	

[1] Includes cash payments and written pledges for the period 1971–80. Pledges made orally at the sixth special session of the Commission on Narcotic Drugs and not subsequently confirmed in writing are excluded.
[2] Includes unpaid written pledges totaling $4,661,388.

SPECIAL CONTRIBUTION TO UNDP FOR NARCOTICS-RELATED PROJECT

	U.S. dollars
Netherlands	500,000
Contributions in kind to date:	
Australia	[1] 62,422
India	[1] 5,000
Kuwait	[1] 290,000
Malaysia	[1] 15,000
Netherlands	[1] 209,440
Poland	[1] 50,000
Switzerland	[1] 40,000

[1] Estimated cash value.

GOVERNMENT CONTRIBUTIONS [1] TO UNFDAC-SUPPORTED PROJECTS AND ASSOCIATED DRUG CONTROL PROGRAMS

Country (duration of project)	U.S. dollars
Afghanistan (January 1974 to October 1980)	1,527,882
Argentina (December 1976 to November 1980)	200,000
Bolivia (December 1975 to June 1980)	4,500,000
Burma (May 1976 to April 1981)	6,985,016
Egypt (August 1977 to December 1978)	28,571
Laos (December 1977 to December 1981)	500,000
Lebanon (June 1973 to December 1976)	260,000
Malaysia (October 1978 to October 1980)	22,680,900
Pakistan (May 1976 to April 1981)	2,447,774
Peru (January 1976 to June 1981)	2,547,159
Portugal (July 1977 to July 1979)	80,000
Thailand (December 1971 to December 1982)	8,125,000
Turkey (March 1975 to December 1980)	45,000,000

[1] Estimates made by the governments concerned and included in project agreements. Include operating and other costs (personnel, transport, equipment, buildings, etc.) related to drug abuse control program in each country. Amounts in local currency have been converted into U.S. dollars at rate of exchange on date of signature of project agreement.

STATEMENT BY DAVID CARDWELL, U.S. REPRESENTATIVE IN THE THIRD COMMITTEE

The U.S. has been a longtime advocate of greater UN involvement in drug abuse prevention and control. We believe that only through a concerted global effort to eradicate drug abuse and all of its corresponding problems—illicit production, illicit trafficking, use and abuse of narcotic and psychotropic subtsances—can the international community even begin to envision feasible solutions and results to this deleterious problem. The U.S. is therefore pleased to cosponsor the initiative of the delegation of the Federal Republic of Germany in its campaign to acquire broad support for this resolution.

I would like to refer briefly to several specific provisions of the resolution now before us. The first regards operative paragraph 3 calling for close collaboration with the INCB and other narcotics bodies in the UN. The need for close collaboration by member governments with the INCB, and particularly the need to supply all relevant data regarding national trends in drug abuse, cannot be overemphasized. Without the vital statistics from member governments regarding current trends, the UN drug agencies cannot effectively carry out their work, nor will they be able to implement the new international strategy of drug abuse control which will be presented to the Commission on Narcotic Drugs in February. We would urge all members to cooperate with the UN agencies in supplying the information requested by the agencies and the UN system.

Operative paragraph 9, relates to the global strategy document that is now being prepared by the Division on Narcotic Drugs. This international program for drug abuse control has been in the making for three years. When complete, it should provide clear guidelines for actions by the member governments, by the specialized agencies of the UN system as well as the UN agencies

themselves. We are all anxious that this document be completed and its provisions put into effect, and so we call special attention to the urgency with which this task should be addressed. Indeed, we would hope that a global strategy paper is not the final product. We can easily envision the great value of annual or biennial national strategy papers, produced by every member of the UN. And we can envision as well annual or biennial strategy papers, produced by the various specialized agencies and other multilateral organizations that have opportunity to deal with drug abuse problems. We raise this now so that members might give this concept serious review as we consider methods of putting the global strategy paper into effect.

Finally, I would like to underscore the appeal made in this resolution for increased support to the United Nations Fund for Drug Abuse Control. Without sustained and increased contributions, the Fund cannot realistically continue to support those projects particularly the multisectoral projects in several Asian countries that is has funded and overseen. These are projects that have produced positive results in such areas as crop substitution, education and treatment and rehabilitation. Compared to other UN agencies and bodies, the Fund is very small. But it is a highly necessary ingredient to the global attack on drug production, trafficking and abuse. National programs are essential, and bilateral cooperative programs are necessary. But a multilateral action program—one that can stimulate both national and bilateral activities, one that can go places and do things that other programs cannot—is absolutely indispensible. The UN Fund for Drug Abuse Control is now so small that it is in danger of faltering. It needs help. It needs encouragement, but it also needs more than words. It needs money, and my government appeals to all member governments to take heed of the problem raised in this resolution and to contribute generously to the work of the UN Fund.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GREGG) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes, March 24.

Mr. GILMAN, for 10 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, March 24.

(The following Members (at the request of Mr. BRINKLEY) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LANTOS, for 60 minutes, on March 26.

Mr. BLANCHARD, for 60 minutes, on March 31.

Mr. FOWLER, for 60 minutes, on March 31.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. GREGG) and to include extraneous material:)

Mr. DANNEMEYER.

Mr. RITTER.

Mr. GILMAN in two instances.

Mr. MICHEL in two instances.

Mr. FINDLEY in two instances.

Mr. BETHUNE.

Mr. COLLINS of Texas in three instances.

(The following Members (at the request of Mr. BRINKLEY) and to include extraneous material:)

Mr. MAZZOLI.

Mr. HUTTO.

Mr. SHANNON.

Mr. RANGEL.

Mr. WYDEN.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. ECKART.

Mr. HALL of Ohio.

Mr. RODINO.

Mr. LEHMAN in two instances.

Mr. OBEY.

Mr. OTTINGER in two instances.

Mr. SCHUMER.

ADJOURNMENT

Mr. BRINKLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 14 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 24, 1981, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

848. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the justification for the operations and maintenance budget estimates submitted for fiscal year 1982, pursuant to 10 U.S.C. 138(e); to the Committee on Armed Services.

849. A letter from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize supplemental appropriations for military construction for fiscal year 1981; to the Committee on Armed Services.

850. A letter from the Acting General Counsel, Department of Defense, transmitting a draft of proposed legislation to authorize certain construction at military installations for fiscal year 1982, and for other purposes; to the Committee on Armed Services.

851. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the laundry function at Nellis Air Force Base, Nev., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

852. A letter from the Acting Administrator of General Services, transmitting a draft of proposed legislation to authorize certain transactions involving the acquisition and disposal of strategic and critical materials for the National Defense Stockpile; to the Committee on Armed Services.

853. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to dissolve the National Consumer Cooperative Bank, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

854. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving nuclear facilities with the National Power Corporation of the Philippines, pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

855. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting the sixth annual report of the Corporation's Office of Consumer and Compliance Programs, pursuant to section 18(f)(6) of the Federal Trade Commission Act, as amended; to the Committee on Banking, Finance and Urban Affairs.

856. A letter from the Secretary of Education, transmitting a draft of proposed legislation to make certain amendments to the Higher Education Act of 1965; to the Committee on Education and Labor.

857. A letter from the Chairman, National Commission for Employment Policy, transmitting a report on increasing the earnings of disadvantaged women, pursuant to section 505 of the Comprehensive Employment and Training Act of 1973, as amended; to the Committee on Education and Labor.

858. A letter from the Secretary of Energy, transmitting the annual report on activities under the Powerplant and Industrial Fuel Use Act of 1978 and section 2 of the Energy Supply and Environmental Coordination Act of 1974, pursuant to section 806 of Public Law 95-620; to the Committee on Energy and Commerce.

859. A letter from the Acting General Counsel, Department of Energy, transmitting notice of a meeting relating to the international energy program to be held on March 24, 1981 in Paris, France; to the Committee on Energy and Commerce.

860. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting a draft of proposed legislation to amend the Solid Waste Disposal Act; to the Committee on Energy and Commerce.

861. A letter from the Secretary, Interstate Commerce Commission, transmitting notice of the Commission's further extension of the deadline for reaching a decision in Docket No. 37276 (Sub-No. 1), *Coal, Wyoming to Redfield, Arkansas,* and Docket No. 37456, *Arkansas Power and Light Co., et al. v. Burlington Northern, Inc., et al.,* pursuant to 49 U.S.C. 10707(b)(1); to the Committee on Energy and Commerce.

862. A letter from the Comptroller General of the United States, transmitting a report on the financial status of major acquisitions of the U.S. Government (MASAD-81-13, Mar. 20, 1981); to the Committee on Government Operations.

863. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting a report on the Corporation's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

864. A letter from the Chairman, Federal Home Loan Bank Board, transmitting a report on the Board's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

865. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

866. A letter from the Acting Inspector General, Department of Health and Human Services, transmitting a report in response to a complaint filed with the Special Counsel of the Merit Systems Protection Board, pursuant to 5 U.S.C. 1206(b)(5); to the Committee on Post Office and Civil Service.

867. A letter from the Acting Director, Federal Emergency Management Agency, transmitting a draft of proposed legislation to amend the Disaster Relief Act of 1974, as amended, to authorize the appropriation of additional sums to carry out the act, and for other purposes; to the Committee on Public Works and Transportation.

868. A letter from the Board of Directors, Tennessee Valley Authority, transmitting the 47th annual report of the agency, covering fiscal year 1980, pursuant to section 9(a) of the Tennessee Valley Authority Act of 1933, as amended; to the Committee on Public Works and Transportation.

869. A letter from the Acting Administrator, National Aeronautics and Space Administration, transmitting proposed amendments to the NASA authorization bill previously submitted; to the Committee on Science and Technology.

870. A letter from the Special Assistant, Office of the Secretary of Defense, transmitting a report covering fiscal year 1980 on Defense Department procurement from small and other business firms, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

871. A letter from the Acting Administrator of Veterans Affairs, transmitting a report on the utilization of educational entitlement by veterans of the post-Korean conflict and Vietnam era, pursuant to section 304(b)(1)(A) of Public Law 95-202; to the Committee on Veterans' Affairs.

872. A letter from the Acting Administrator of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; and for other purposes; to the Committee on Veterans' Affairs.

873. A letter from the Secretary of Education, transmitting a draft of proposed legislation to make certain amendments to the act of September 30, 1950 (Public Law 874, 81st Congress) and Public Law 93-380; to the Committee on Education and Labor.

874. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend section 7227, title 10, United States Code, to provide for the furnishing of routine port services at no cost to naval vessels of a friendly foreign country, when, by agreement or custom, such services are provided reciprocally to visiting naval vessels of the United States; to the Committee on Armed Services.

875. A letter from the Acting Assistant Attorney General (Legislative Affairs), transmitting a draft of proposed legislation to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes; jointly, to the Committees on Judiciary, Energy and Commerce, Foreign Affairs, and the Permanent Select Committee on Intelligence.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ANNUNZIO: Committee on House Administration. House Resolution 115. Resolution providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House (Rept. No. 97-11). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MICHEL:

H.R. 2651. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2652. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2653. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2654. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2655. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2656. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2657. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2658. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2659. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2660. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2661. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2662. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2663. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2664. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2665. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2666. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2667. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2668. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2669. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2670. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2671. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32),

transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2672. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2673. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2674. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2675. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2676. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2677. A bill to rescind certain budget authority contained in the message of the President of March 10, 1981 (H. Doc. 97-28), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2678. A bill to rescind certain budget authority contained in the message of the President of March 10, 1981 (H. Doc. 97-28), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2679. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2680. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2681. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2682. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2683. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2684. A bill to rescind certain budget authority contained in the message of the President of March 10, 1981 (H. Doc. 97-28), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2685. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2686. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2687. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2688. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2689. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2690. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2691. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2692. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2693. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2694. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2695. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2696. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2697. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2698. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2699. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2700. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2701. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2702. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2703. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2704. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2705. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2706. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2707. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2708. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2709. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2710. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2711. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2712. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2713. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32),

transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2714. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2715. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2716. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2717. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2718. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2719. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2720. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2721. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2722. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2723. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2724. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2725. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2726. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2727. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2728. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2729. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2730. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2731. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2732. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2733. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2734. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations

H.R. 2735. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2736. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2737. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2738. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2739. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2740. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2741. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2742. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2743. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2744. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2745. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2746. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2747. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2748. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2749. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2750. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2751. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2752. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2753. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2754. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2755. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32),

transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2756. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2757. A bill to rescind certain budget authority contained in the message of the President of March 19, 1981 (H. Doc. 97-34), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2758. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2759. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2760. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2761. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2762. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2763. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2764. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2765. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2766. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2767. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2768. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2769. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2770. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2771. A bill to rescind certain budget authority contained in the message of the President of March 17, 1981 (H. Doc. 97-32), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

H.R. 2772. A bill to rescind certain budget authority contained in the message of the President of January 29, 1981 (H. Doc. 97-16), transmitted pursuant to the Impoundment Control Act of 1974; to the Committee on Appropriations.

By Mr. BETHUNE:

H.R. 2773. A bill to transfer to the Secretary of Agriculture certain functions relating to fish research; to the Committee on Merchant Marine and Fisheries.

By Mr. COLLINS of Texas:

H.R. 2774. A bill to amend the Communications Act of 1934 to extend certain authorizations of appropriations relating to the Corporation for Public Broadcasting, and for other purposes; to the Committee on Energy and Commerce.

By Mr. FRENZEL (for himself, Mr. HOLLAND, Mr. PERKINS, and Mr. ERLENBORN):

H.R. 2775. A bill to amend the Internal Revenue Code of 1954 to clarify provisions prohibiting discrimination in vesting standards under plans governing qualified trusts, and for other purposes; to the Committee on Ways and Means.

By Mr. LEWIS:

H.R. 2776. A bill to help States provide financial assistance to innocent victims of crime; to the Committee on the Judiciary.

By Mr. LUKEN:

H.R. 2777. A bill to amend the Flammable Fabrics Act to require the Secretary of Commerce to study the necessity and feasibility of establishing Federal standards relating to fire prevention and control, and for other purposes; jointly, to the Committees on Energy and Commerce and Science and Technology.

By Mr. PERKINS (for himself and Mr. MCEWEN):

H.R. 2778. A bill to authorize construction of a modification of the Gallipolis Locks and Dam, Ohio River, Ohio and W. Va., and to insure that this work shall be completed expeditiously; to the Committee on Public Works and Transportation.

By Mr. SMITH of Iowa:

H.R. 2779. A bill to direct the Secretary of the Army, acting through the Chief of Engineers, to carry out a water resources development project on, and along, a certain segment of the Des Moines River, Iowa; to the Committee on Public Works and Transportation.

By Mr. WYDEN (for himself, Mr. FOLEY, and Mr. AUCOIN):

H.R. 2780. A bill to modify the Bonneville Lock and Dam project to provide that the Secretary of the Army, acting through the Chief of Engineers, is authorized to construct a new lock; to the Committee on Public Works and Transportation.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 142: Mr. DINGELL, Mr. KILDEE, Mr. RUSSO, Mr. WILLIAMS of Ohio, Mr. BONIOR of Michigan, Mr. FORD of Michigan, Mr. CROCKETT, Mr. LAFALCE, and Mr. BUTLER.

H.R. 146: Mr. FORD of Tennessee.

H.R. 153: Mr. GUARINI.

H.R. 269: Mr. BENNETT, Mr. LUJAN, Mr. ROBERTS of South Dakota, and Mr. SHELBY.

H.R. 909: Mr. CONYERS, Mr. KASTENMEIER, Mr. PEPPER, Mr. ZEFERETTI, Mr. FORD of Michigan, Mr. MOTTL, Mr. CROCKETT, Mr. FORD of Tennessee, Mr. GORE, Mr. RODINO, Mr. ST GERMAIN, Mr. ANDERSON, Mr. BINGHAM, Mr. DYSON, Mr. PHILLIP BURTON, and Mr. NEAL.

H.R. 910: Mr. CONYERS, Mr. HOWARD, Mr. KASTENMEIER, Mr. PEPPER, Mr. ZEFERETTI, Mr. FORD of Michigan, Mr. MOTTL, Mr. CROCKETT, Mr. FORD of Tennessee, Mr. GORE, Mr. RODINO, Mr. ST GERMAIN, Mr. ANDERSON, Mr. BINGHAM, Mr. DYSON, Mr. PHILLIP BURTON, and Mr. NEAL.

H.R. 911: Mr. DE LA GARZA, Mr. BEREUTER, and Mr. FORSYTHE.

H.R. 912: Mr. CONYERS, Mr. KASTENMEIER, Mr. PEPPER, Mr. ZEFERETTI, Mr. FORD of Michigan, Mr. JAMES K. COYNE, Mr. MOTTL, Mr. CROCKETT, Mr. FORD of Tennessee, Mr. GORE, Mr. ST GERMAIN, Mr. ANDERSON, Mr. BINGHAM, Mr. RODINO, Mr. DYSON, Mr. BONIOR of Michigan, and Mr. PHILLIP BURTON.

H.R. 914: Mr. FAUNTROY, Mr. KASTENMEIER, Mr. PEPPER, Mr. WEISS, Mr. MITCHELL of Maryland, Mr. BEILENSON, Mr. CLAY, Ms. MIKULSKI, Mr. ZEFERETTI, Mr. CROCKETT, Mr. RODINO, Mr. ST GERMAIN, Mr. ANDERSON, Mr. BINGHAM, Mr. RANGEL, Mr. STOKES, Mr. PHILLIP BURTON, and Mr. BARNES.

H.R. 915: Mr. CONYERS, Mr. KASTENMEIER, Mr. PEPPER, Mr. ZEFERETTI, Mr. FORD of Michigan, Mr. BEDELL, Mr. MOTTL, Mr. CROCKETT, Mr. FORD of Tennessee, Mr. ST GERMAIN, Mr. ANDERSON, and Mr. BINGHAM.

H.R. 1015: Mr. CARNEY, Mr. JOHNSTON, Mr. ROSE, and Mr. SKEEN.

H.R. 1016: Mr. HORTON and Mr. KRAMER.

H.R. 1017: Mr. HORTON and Mr. KRAMER.

H.R. 1100: Mr. NEAL.

H.R. 1147: Mr. NEAL.

H.R. 1293: Mr. GUARINI and Mr. BEDELL.

H.R. 1325: Mr. BEARD, Mr. BARNARD, Mr. MCDONALD, Mr. WHITTAKER, Mr. HINSON, Mr. LEATH of Texas, Mr. GUYER, Mr. COLLINS of Texas, Mr. HANSEN of Idaho, Mr. MOORHEAD, Mr. ROBINSON, Mr. MARTIN of North Carolina, Mr. PAUL, Mr. HAMMERSCHMIDT, Mr. SPENCE, Mr. BAFALIS, Mr. LONG of Maryland, Mr. DANIEL B. CRANE, Mr. RUDD, Mr. HOPKINS, Mr. BAILEY of Missouri, Mr. WAMPLER, Mr. EDWARDS of Oklahoma, and Mr. YOUNG of Florida.

H.R. 1364: Mr. DERRICK, Mr. KILDEE, Mr. MARTIN of North Carolina, Mr. ROUSSELOT, and Mr. WOLPE.

H.R. 1400: Mr. EVANS of Indiana.

H.R. 1713: Mr. DOWNEY, Mr. BENJAMIN, Mr. JONES of North Carolina, Mr. MURPHY, Mr. WON PAT, Mr. STUMP, Mr. MCCLOSKEY, Mr. PANETTA, Mr. DUNCAN, Mr. GINN, Mr. ERTEL, Mr. HINSON, Mr. LEVITAS, Mr. YOUNG of Alaska, Mr. LOTT, Mr. CORRADA, Mr. MILLER of California, Mr. WINN, Mr. DANNEMEYER, Mr. GUARINI, Mr. ROE, Mr. COELHO, Mr. YATRON, Mr. PEPPER, Mr. BAILEY of Pennsylvania, Mr. DOUGHERTY, Mr. BEDELL, Mr. WILSON, Mr. LIVINGSTON, Mr. SHUMWAY, Mr. JONES of Oklahoma, and Mr. GOODLING.

H.R. 1853: Mr. GRAMM, Mr. COLLINS of Texas, Mr. RINALDO, Mr. FROST, Mr. STENHOLM, Mr. DUNCAN, Mr. LEATH of Texas, Mr. HUBBARD, Mr. EVANS of Georgia Mr. DOUGHERTY and Mr. MITCHELL of New York.

H.R. 1954: Mr. YOUNG of Missouri, Mr. MOTTL, Mr. BONIOR of Michigan, Mr. WILLIAMS of Ohio, Mr. BENJAMIN, Mr. HERTEL, Mr. ROE, Mr. DAVIS, Mr. FORD of Michigan, Mr. KILDEE, Mr. BAILEY of Pennsylvania, Ms. MIKULSKI, Mr. CROCKETT, Mr. HUNTER, and Mr. CONYERS.

H.R. 1983: Mr. HOLLAND.

H.R. 1995: Mr. FAZIO and Mr. MCHUGH.

H.R. 2312: Mr. BARNARD and Mr. PORTER.

H.R. 2385: Mr. PARRIS, Mr. VANDER JAGT, and Mr. MOORE.

H.R. 2400: Mr. BLILEY, Mr. CLAUSEN, Mr. ERDAHL, Mr. HYDE, Mr. KEMP, Mr. MCEWEN, Mr. SOLOMON, and Mr. WYLIE.

H.R. 2456: Mr. MOORE, Mr. SUNIA, Mr. DERWINSKI, Mr. LAGOMARSINO, Mr. WEBER of Minnesota, Mr. SPENCE, Mr. FUQUA, Mr. GOLDWATER, Mr. MCDONALD, Mr. JEFFRIES, Mr. BONKER, Mr. WHITEHURST, Mr. HERTEL, Mr. FORSYTHE, Mr. DOUGHERTY, Mr. WYDEN, Mr. PORTER, and Mr. SOLOMON.

H.J. Res. 160: Mr. CLAY, Mr. RAHALL, Mr. DUNCAN, Mr. WYLIE, Mr. DINGELL, Mr. HUTTO, Mr. LAGOMARSINO, Mr. CORRADA, Mr. FROST, Mr. SUNIA, and Mr. VENTO.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

40. By the SPEAKER: Petition of the City Council, Wheeling, W. Va., relative to allowing construction and improvements to properties within a flood plain; to the Committee on Banking, Finance and Urban Affairs.

41. Also, petition of the Board of Supervisors, Amite County, Miss., relative to funding for community health centers; to the Committee on Energy and Commerce.

SENATE—*Monday, March 23, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Father in heaven, who are able to keep us from falling, whose grace is always sufficient, protect Thy servants in the Senate from evil influences—so pervasive, so corrupting, so seductive, so relentless—that would neutralize their influence, drag them down to infamy, and destroy their families. Strengthen them against unworthy critics who have no purpose but to tear down. Sensitize them to criticism that will make them more effective at their tasks. Guard them against debilitating sickness. Keep them and their loved ones well and strong.

We thank Thee for the recovery and return of the Secretary of the Senate, William F. Hildenbrand.

Thank you, Father, for Dr. Cary and his staff who take so seriously the responsibility for the health of the Senators.

Lord God, let the mantle of Thy love and grace envelop this place. Let Thy glory be manifest here. Let Thy presence be felt and Thy will be done.

We ask this in the name of Him who in love gave Himself for us all. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I thank the Chair. I ask unanimous consent that the Journal of the Proceedings of the Senate be approved to date.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

CHANGE IN SEQUENCE IN ORDERS FOR RECOGNITION OF SENATORS

Mr. BAKER. Mr. President, there are a number of special orders entered this morning. I ask unanimous consent to change the sequence of those special orders as follows: Senator BAKER, Senator SCHMITT, Senator DOMENICI, Senator DOLE, Senator HELMS, Senator SIMPSON, Senator LAXALT, Senator MCCLURE, Senator ROBERT C. BYRD, Senator HATFIELD, and Senator COHEN.

My request as well includes the conditions and circumstances described in the request on Thursday last.

The PRESIDING OFFICER. Without objection, the order will be changed, and the order will be entered for the recognition of the Senator from Maine (Mr. COHEN).

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that when the two leaders have executed the time allocated to them under the standing order, and the completion of the special orders as heretofore provided for, there be a period for the transaction of routine morning business not to exceed 1 hour in length with Senators permitted to speak therein for not more than 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE OF THE SENATE

Mr. BAKER. Mr. President, I wish to reiterate the schedule for the benefit of all Senators. On the completion of the time allocated to the two leaders under the standing order, the completion of the special orders, and the close of routine morning business, the Senate will return to the consideration of S. 509 and the consideration of the so-called Melcher casein amendment, the Zorinsky second-degree amendment, and other amendments and matters which might come up in connection with that bill.

The Senate will not be able to complete action on the bill today since votes have been ordered for tomorrow.

I repeat, we will not be able to finish S. 509 today in light of the fact that the Senate made provisions for votes on that measure on Tuesday next, tomorrow. But if other matters can be routinely done and by unanimous consent become available from the Calendar of General Orders or the Executive Calendar, the Senate will turn to their consideration.

The Senate will be in session tomorrow. The schedule of the Senate adopted earlier this year was meant to accommodate the requirements of committees which needed maximum time to consider new matters brought before them, and to report legislation as it became available from those committees. The policy that the Senate meet in active session on Tuesdays, Thursdays, and Fridays as necessary, ended last week. All Senators are on notice that the Senate will now be in session for the regular full schedule of the Senate Monday through Friday, and Saturdays as necessary.

It is still the intention of the leadership on this side to try to maintain the hourly schedule of the Senate to provide that if a late session is necessary in the course of the week, whenever possible every effort will be made to schedule that late session for Thursday. That will not always be possible, but the leadership will make its best effort to do so.

Since votes on this past Thursday were stacked until this coming Tuesday, there is a possibility that the Senate will be in late this Tuesday as a carryover from last Thursday. I hope not, however, and I expect not.

BUDGET RESOLUTION OF RECONCILIATION

Mr. President, it is my understanding that the Senate Budget Committee has this morning filed its report in connection with the action on a resolution of reconciliation and instructions. It is my hope that this report can be returned from the Public Printer as promptly as possible, and that we can turn to the consideration of that measure on Thursday of this week.

Mr. President, I will reserve any further comments I have, especially in connection with the budget resolution, until that time provided by special order for me to speak later in the morning.

I am prepared now, Mr. President, to yield any time I have remaining to the distinguished minority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Senator from West Virginia.

DO NOT SELL THE AMERICAN ECONOMY SHORT

Mr. ROBERT C. BYRD. Mr. President, in recent weeks there has been a great deal of discussion about the importance of a sound, vigorous, and competitive economy. To the extent the debate has resulted in the productive exchange of ideas, many of us here in the Senate

have welcomed it. However, some have spoken about the economy as though the sky were falling. This, I believe, is counterproductive. Politically generated hysteria cannot form a solid basis for economic policy planning.

No single ingredient is more essential to the healthy performance of a free-market economy than confidence. Confidence—from both consumers and producers—is the grease which turns our economic wheels. It promotes savings—a key to investment. And it stimulates investment—the key to future growth. Ultimately, to slay the inflation dragon, we must produce more, and increased savings and investment will help to achieve that goal.

I believe that the President and the Congress have a shared responsibility to develop confidence in our economy and in our future. Building trust, however, will mean leaving behind campaign rhetoric that portends economic disaster and military weakness. It will mean recognizing our strengths, which are ample and enduring. It will also mean seeing our problems as challenges, with a sense of perspective and a sense of purpose. Let us realistically take stock of our situation, and decide where we are and where we want to go.

Early on in his economic address to the Nation, President Reagan began using the year 1960 as the benchmark after which things began to go wrong for America. By comparing the year 1980 to 1960, the President concluded, "We all know we are very much worse off." The facts clearly establish otherwise. As a whole, Americans are better off today than they were 20 years ago. And, to some degree, people enjoy a higher standard of living because they have benefited from Government programs. This is not to say that all Government programs should be spared the budget ax. We should indeed put our fiscal house in order. But Americans are, in many ways, better off today than they were in 1960. After adjusting for taxes and inflation, average per capita income is up by two-thirds. For the population as a whole, average real disposable income has more than doubled.

The benefits of economic growth have been reasonably well distributed. The percentage of Americans living in poverty has been cut in half over the last 20 years. Today, some 1 out of 10 people are living below the poverty level; in 1960, twice as many people lived in poverty.

The most basic measure of the standard of living is the quality of life itself. Americans are healthier today than they were 20 years ago, in part because of the money that has been pumped into public health—into hospitals, medical education and research, as well as programs such as sewage treatment, rat control, and community outreach projects designed to educate the public.

The average person's life expectancy is now nearly 74 years, almost 4 years longer than in 1960. The infant mortality rate has declined by 46 percent: From 26 deaths per 1,000 to 14 per 1,000. More women are receiving medical care and proper nourishment while pregnant. And Americans in general are eating better. They eat more meat, fish, poultry, and fresh vegetables per capita than they did in 1960.

There are other reliable indicators of our improved standard of living: More Americans own their own homes today, and many more own automobiles.

The quality of housing has improved substantially. The number of families living in physically inadequate housing has declined steadily: From more than 20 percent of all households to about 8 percent. Less dramatic, but substantial progress has been made in reducing overcrowded housing units. Today, the United States has the lowest average number of persons per room of housing than any other country in the world.

Today, Americans are better educated. More people have graduated from high school, more people have gone to college, and more people have pursued graduate studies. In 1959, nearly 16 percent of the labor force had less than an eighth grade education; by 1979, less than 5 percent had not completed at least 8 years of schooling.

Americans are better protected against uncertain futures. In 1960, only 48 percent of our workers had regular health insurance; today more than 68 percent are insured. Twenty years ago, less than 58 percent of all workers had life insurance coverage; today almost 80 percent of the work force is insured.

There are other less quantifiable gains. Cleaner air, cleaner water, improved safety in the workplace, and improvements in the quality of certain goods and services all contribute to higher living standards. These economic benefits often escape traditional economic analysis. While we all have attacked heavy-handed or unreasonable Government regulation, we must remember that some regulation represents a legitimate response to meeting real needs.

Let us look at the facts. In his economic address, President Reagan said, "The percentage of your earnings the Federal Government took in taxes in 1960 has almost doubled." That is not what the facts tell us.

The total amount of Federal personal income taxes and social security taxes paid in 1960 accounted for 13 percent of total personal income. In 1980, they accounted for 15.9 percent. In 1960, the average worker with three dependents paid 9.6 percent of his or her earnings in Federal taxes. In 1980, that worker paid 12.3 percent. In large part, the tax rise that occurred during this 20-year period went to pay for social security. In 1960, Federal personal income taxes were 10.8 percent of total personal income. In 1980, they were 11.9 percent.

If we examine national income, and all Federal receipts including corporate tax revenues and various business duties, we discover that in 1960, Federal receipts were 22.8 percent of national income, and 20 years later, they were 24.5 percent.

If we examine the relationship of all Federal taxes and fees to the gross national product, we see that in 1960, they were 18.7 percent of the GNP, and 20 years later, they were 19.8 percent.

While the level of Federal expenditures has grown, we must remember that the size of the Federal work force has fallen in relation to our growing population. In 1960, we had 1,808,334 nonpostal civilian employees, or 1 percent of the population. In 1980, we had some 2,215,852 employees, or 0.97 percent of the population.

The public debt has been falling in terms of our gross national product. In 1960, the public debt stood at 56.9 percent of the GNP. Twenty years later, the debt stands at about 35 percent of the GNP. In other words, in 1960, the entire productive capacity of our economy would have had to work more than 6 months to retire the national debt. In 1980, it could—theoretically—be retired in just over 4 months. Of the leading industrial nations, the United States has one of the lowest deficits as a percentage of GNP—West Germany, Japan, and other countries all run higher deficits. France is the only industrialized country to run a comparably low budget deficit.

In his speech, President Reagan said that U.S. industry is being taxed so hard, it is "being priced out of the world market." Between 1977 and mid-1980, U.S. exports grew 35 percent. It is estimated that they were actually 22 percent higher in 1980 than in 1979. The dollar is relatively strong. Our trade balance is improving, despite massive oil bills.

President Reagan began his economic address by telling the American people that "we are in the worst economic mess since the Great Depression." During the Great Depression, 25 percent of the people were unemployed, the banks were closed, and the country was fighting deflation—an abnormal decline in prices—rather than inflation.

Today, our banks are secure. In the last decade, employment grew by 25 percent and in the last 4 years, by 11 percent. The massive influx of new workers into the labor force will slow now that the baby boom has come of age. The work force will be more mature, better educated, and better skilled, and more productive.

During the last 3 years, investment as a percentage of GNP was higher than in any other similar period in the last 3 decades. The GNP expanded at a 5-percent annual rate in the fourth quarter of 1980, a healthy jump. Assuming investment continues at a healthy rate, the ratio of labor to capital will improve, further spurring worker productivity.

In painting a realistic picture of the American economy, we must recognize that inflation is a major problem. It breeds uncertainty—people feel less able to mark their progress or gage their future needs. We cannot conquer inflation until we stop sending more than $80 billion annually out of the country for the purchase of foreign oil. I do not believe that the private sector has the capability to shoulder this burden without incentives and other assistance from the public sector. Federal spending can be pared to the bone and everyone can be given a substantial tax cut, but these actions will not end this country's dependence upon foreign oil.

Some people within the administra-

tion have suggested that our society faces an "economic Dunkirk." Some have used the fear of impending doom to urge Americans to sacrifice the economic and social progress which has set this country apart from the other nations of the world. The American economy is strong and still growing, but it needs a program for revitalization which should be developed from clear and rational public debate. Public policy should not spring from a climate of alarmist cries, which may themselves become self-fulfilling prophecies.

It is my expectation that the Congress will act on the President's economic program as promptly as prudent foresight allows.

There is broad bipartisan consensus that Congress should complete work on the President's program by midsummer. It would be unwise if the President's program were to be stampeded through Congress, with warnings of economic calamity. It is my hope that President Reagan's proposals can be examined in a realistic environment, with a steady eye on past accomplishments, present strengths, and future goals.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. I yield to the distinguished Senator from Wisconsin 3 minutes.

CONTEMPLATION BY A SURVIVOR ON AUSCHWITZ AND ITS REALITIES

Mr. PROXMIRE. Mr. President, I bring to the attention of the Senate a remarkable book by Jean Amery, called "At the Mind's Limits: Contemplations by a Survivor on Auschwitz and Its Realities." Jim Miller of Newsweek describes it as a collection of restrained, yet moving meditations on the nature of Jewish identity, the feelings of a homeland, and the limits of the intellect in a place like Auschwitz.

Amery was born in 1912 in Austria, the only child of a Catholic mother and a Jewish father. In 1935, he married, fled to Belgium, and joined the resistance movement. He was captured, and sent to a series of concentration camps. Despite living daily with death, Amery left the camps just as he had entered them—as an agnostic. He preserved his intellectual passions, yet suffered deep spiritual wounds and emotional displacement.

According to Miller, Amery possesses "the ear of a poet and the eye of a novelist," and "vividly communicates the wonder of a philosopher" over the horrors he sees. Amery does not pretend to make sense of the Nazi terror, or to view his experiences with full comprehension or clarity. On the contrary, he writes that "clarification would also amount to disposal, settlement of the case, which can then be placed in the files of history. My book is meant to aid in preventing precisely this."

Recollections of holocaust survivors often end this way. Amery's memoirs are especially stirring, but the message is the same: "Never forget." It implores us to confront the terrible crime of genocide directly, and not merely to consign it to the realm of the unthinkable or unmentionable.

Mr. President, how many victims must bear witness before we can get this message? The Genocide Treaty is not eloquent, or profound, or stirring, but it does get to the point. It states that all signing nations agree that genocide is an international crime against all humanity, and pledge to enact laws to prevent it. Approved by both the American Bar Association and the American Civil Liberties Union, designed not to infringe on U.S. sovereignty, supported by every President, Republican and Democrat, from President Harry Truman, when it was first approved by the United Nations, to President Ronald Reagan, the treaty still languishes before a Senate that chooses to take no action.

Jean Amery argued that the horror of torture lay both with the physical pain and with the fear that no one else in the world can help. He notes that "with the first blow from a policeman's fist, against which there can be no defense and which no helping hand will ward off, a part of our life ends and it can never again be revived."

We can begin to provide the expectation of help by ratifying the Genocide Convention. The time for this first step is long overdue.

RAOUL WALLENBERG

Mr. PROXMIRE. Mr. President, last night the story of Raoul Wallenberg, a remarkable Swede, who devoted his life to saving the lives of Jews, was told very vividly on the CBS television program "60 Minutes."

This is one of the most widely watched programs in our country on television. It was a very moving story of Raoul Wallenberg, a young Swede—not Jewish—who went behind the Nazi influence and saved the lives of thousands of Jews from being exterminated by Hitler. Mr. President, the wife of the distinguished Senator from New York, Senator MOYNIHAN, has written an article about Raoul Wallenberg and his remarkable human efforts.

I ask unanimous consent that the article from the Washington Post, dated March 22, 1981, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHERE IS RAOUL WALLENBERG?

(By Elizabeth B. Moynihan)

It is a bitter irony that Raoul Wallenberg is becoming a symbol of injustice because of his fate when he should be a symbol of humanity because of his heroism. Wallenberg's story is as mysterious as it is tragic.

In 1944, when the Nazis defeat was certain, Adolph Eichmann madly pursued the "final solution" by deporting Hungarian Jews to Nazi extermination camps. At the request of the U.S. War Refugee Board, the Swedish government sent Wallenberg to Budapest on a rescue and relief mission. Defying Eichmann, he saved at least 20,000 people from deportation trains and another 70,000 from violent death in the ghetto. His methods were daring and dramatic, and the personal risk was enormous. But Wallenberg seemed to have a charmed life until January 1945, when the Russians entered Budapest and almost immediately took him into custody.

Although previously disclaiming knowledge of Wallenberg, in 1957 the Soviet Foreign Ministry reversed itself, stating that he had died of a heart attack in prison in 1947. Neither the Swedish government nor Wallenberg's family accepted this statement because it came without the usual documents and because his name was misspelled on the single note provided as evidence.

Most Americans who knew about Wallenberg presumed he was dead until released Soviet prisoners claimed he was still alive in the Gulag. These assertions stunned Hungarian-American Jews, among them Rep. Tom Lantos, who was saved by Wallenberg. In July 1979, Lantos and his wife encouraged Wallenberg's sister to come to the United States to seek help. Sens. Frank Church, Claiborne Pell, Daniel P. Moynihan and Rudy Boschwitz agreed to serve as co-chairmen of the Wallenberg Committee, which has operated with a small working group. As our goal was to secure the release of Wallenberg—not to generate anti-Soviet propaganda—it was felt that diplomatic and private means of resolving the mystery should be exhausted before any large public campaign was organized.

Official American support was immediate: President Carter raised the Wallenberg question, and the State Department pressed the inquiry. The 96th Congress passed a concurrent resolution honoring Wallenberg and called on our delegation to raise his case at the Madrid Conference on Security and Cooperation in Europe. In Madrid, Sen. Pell joined the American delegation led by Max M. Kampelman in an appeal for Wallenberg. When the Soviets responded to any of these inquiries, they merely repeated the 1957 statement.

As the Soviets know the prisons and cells in question, they could identify the inmates if, as a Soviet official suggested, former prisoners had mistaken their identity.

There are now active Wallenberg committees in six countries, for people everywhere seem genuinely moved by his story, and the Soviet silence fans public outrage. At international hearings co-sponsored by the International Sakharov committee in Stockholm in January, a panel reviewed evidence and heard testimony regarding Wallenberg's imprisonment. The resolution presented to the Swedish foreign minister stated there was every reason to believe he is still alive.

No public charges have been made against him, and it is not known if Wallenberg, who would now be 69, was actually sentenced. If he was, why couldn't the Soviets commute his term on humanitarian grounds because of his age? Then the world could honor him as he deserves rather than protest his fate. Why would the Soviet government allow the mystery of Raoul Wallenberg to become a divisive international issue?

Mr. PROXMIRE. Mr. President, I understand that this week a resolution will be introduced in the House to make Mr. Wallenberg an honorary American citizen, inasmuch as his efforts on behalf of European Jews was at the instigation of the United States and the Swedish Government has not been successful in getting him out of Russia.

Mr. President, I will do my best to call this to the attention of the Senate, too. I hope we will pass that resolution and certainly if we pass that resolution we should act on the Genocide Treaty. At least, I certainly hope so.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President,

does the Senator from New Mexico wish any additional time? I can yield him some of mine.

Mr. SCHMITT. No, the Senator from New Mexico does not need any additional time. I believe I have a special order.

Mr. ROBERT C. BYRD. Very well. I yield back the remainder of my time.

RECOGNITION OF SENATOR BAKER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Tennessee, Mr. BAKER, is recognized for not to exceed 15 minutes.

SPENDING REDUCTIONS

Mr. BAKER. Mr. President, as we begin our deliberations this week, I wish to take just a moment to express my admiration of and my appreciation to the membership of the Senate Committee on the Budget, particularly, the chairman of that committee, the Senator from New Mexico (Mr. DOMENICI) and the ranking member of the committee, the Senator from South Carolina (Mr. HOLLINGS).

I do so as a citizen, as a colleague, and as one fortunate and honored to have been chosen as the Republican leader of the Senate. One of the first pledges I made to the Senate, the Nation, and myself upon becoming majority leader this past January was to have the Senate move thoughtfully, yet expeditiously, on President Reagan's economic recovery programs.

My distinguished friends, Senator DOMENICI and Senator HOLLINGS, and the other members of the Budget Committee have made me appear quite adroit in that regard and have redeemed that promise for me in this instance; and I am most grateful.

I particularly want to make note of the extraordinary leadership of my colleague, Senator DOMENICI. As much as our friends across the aisle have had to become accustomed to minority status, so have we had to come to terms with the realities and the responsibilities of majority status. In view of that, and considering the unprecedented magnitude of the President's spending reduction proposals, Senator DOMENICI has done an absolutely outstanding job.

This past year, for instance, in the final sessions of the 96th Congress, the Senate labored for more than 6½ months in an effort to reduce Federal spending authorizations and outlays. And despite the best efforts of Senators on both sides of the aisle those changes amounted to $4.5 billion. But this year the deliberations of the Senate Budget Committee has approved reductions in budget outlays totaling $86.9 billion—$2.8 billion for the balance of fiscal 1981, $36.4 billion for fiscal 1982, and $47.7 billion for fiscal 1983.

What the Budget Committee has done constitutes a unique and remarkable accomplishment, of which that committee, this Senate, and the entire Nation can be justly proud.

It will be my intention to speak on this matter again later in the week. For now, however, as we begin our consideration and discussion, I would suggest to my colleagues that we view the work of the Budget Committee, splendid as it is, not as a culmination of our labors, nor as the final crowning achievement for it is neither.

Rather, we have made a beginning, a most auspicious beginning to be sure, but still, just a beginning. Other spending reductions must follow. They will be still more wrenching and more difficult. But they must come in the months and years ahead.

We must still act this year on comprehensive tax reduction and reform legislation. We have shown in our Budget Committee and will show on this floor this week, I am sure, that we are determined to reduce Federal spending. Thus, we can and must in good conscience act this year, I believe, to reduce the crushing tax burden on this Nation.

We must still act this year and every year to strip away the burdensome and stultifying regulations which so often stifle our productivity.

All of this will come in time, I trust. But for today and for this week, we in the Senate can be proud of the Budget Committee, of the Budget Act, of Members on both sides of the aisle, and the process which has just begun.

Mr. President, I yield back any time I have remaining under the special order.

RECOGNITION OF SENATOR SCHMITT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New Mexico, Mr. SCHMITT, is recognized for 15 minutes.

TAMING THE FEDERAL BUDGET: STEP ONE

Mr. SCHMITT. Mr. President, I appreciate the remarks of the distinguished majority leader and associate myself with them, particularly in praise and compliments to the distinguished senior Senator from New Mexico, Mr. DOMENICI, and his colleague, the ranking member of the Budget Committee, the Senator from South Carolina, Mr. HOLLINGS.

Mr. President, it is obvious, if one just looks at the historical record since 1974 when we passed the Budget Act, that we have not succeeded in controlling the Federal budget. In particular, we have not succeeded in preventing an annual deficit in the range of $60 to $70 billion each of the years since that time and we have not succeeded in controlling other Federal borrowing, the so-called off-budget borrowing, of the Federal Government which now amounts to well over $100 billion total.

This borrowing, this competition by the Federal Government in the private sector for the moneys that you and I and anyone else in this country needs in order to increase their personal and business activities, has resulted not only in extraordinary pressure on interest rates—the price of which we are paying dearly today—but has underlying mechanisms that make it the principal cause of inflation.

So the problem is, Mr. President, we have not succeeded. The Budget Act, although it may have reduced the level of deficit in borrowing, nevertheless, has failed. All one has to do is look at the economy of today with double digit inflation of 12 percent at least, the prime interest rate still hovering up close to 20 percent, unemployment steady at almost 7½ percent, maybe rising, and a gross national product that is not growing one iota.

Those kinds of statistics are very dangerous, particularly since this country is the only major champion of freedom in the world today.

As we look at the problem, we must ask ourselves: Why has it not worked? I do not think we can say it has been solely the fault of the Budget Committee. They have roughly met their schedules. They have tried to give the Senate and the House, the Government in general, guidelines to follow that, had we been able to follow them, clearly would have reduced, if not eventually eliminated, the Federal borrowing.

I think, rather, Mr. President, the problem has been in the reaction of the Congress as a whole, and the committees more specifically, to the budget process.

There has been a de facto incompatibility between the actions of the Budget Committee, the Appropriations Committee, and the Finance Committee. Those three committees represent the essence of the financial control mechanism within the Congress.

As everyone will recall, almost invariably the appropriations process and the processes under the jurisdiction of the Finance Committee have followed rather than led the budget process. It is my belief that the budget process envisioned by the Budget Act of 1974 will only work if the Appropriations Committee and the Finance Committee report their actions to the Senate and to the House prior to any finalization of budget action by the Budget Committee.

As chairman of the Appropriations Subcommittee on Labor, Health and Human Services, and Education, I am well aware that in the past the bill under the jurisdiction of that subcommittee has been one of the last, if not the last, bill to be handled by the Senate, and usually very late in the session in each year. In fact, last year we did not even handle that bill. There was not even a markup. We are operating today on a continuing resolution dealing with that and many other important matters.

Mr. President, we cannot allow that process to continue. If it does continue, the budget process will continue to fail. With this situation in mind, the distinguished chairman of the Senate Appropriations Committee (Mr. HATFIELD) has encouraged the subcommittee chairmen and the Appropriations Committee as a whole to move quickly and vigorously to do its job in parallel and in anticipation of the actions of the budget process.

It is my belief that this is the only way in which we will ever get control in the Congress of that process.

The Budget Committee should not be expected to act either on resolutions such as is before us today dealing pri-

marily with the fiscal year 1981 expenditures, or with its normal resolutions dealing with fiscal year 1982 expenditures, without definitive, detailed judgments being provided by the Appropriations and Finance Committees in a timely manner.

This year, the Appropriations Committee began its process early, that is, late in January, through a set of oversight hearings dealing with the economy, and then the subcommittees have gone to work to understand the basic budget parameters under their jurisdiction with an eye toward providing detailed recommendations to the Budget Committee in a timely manner. This, I believe, has been done. The budget numbers that are before us today do reflect that kind of deliberation and reflect a growing working relationship between the Appropriations Committee and the Budget Committee, one which I think holds a promise of finally bringing this juggernaut under control.

Today the Senate Budget Committee has filed its report on reconciliation for spending in 1981, including its recommendations to the Senate Appropriations Committee that overall spending under the jurisdiction of that committee be reduced by $13.5 billion.

This is an extraordinary number, one which I believe is achievable, but only through continued diligent efforts on the part of the individual subcommittees of the Appropriations Committee, of that committee, itself, and eventually on the part of the Senate.

Actually, this is a very important step in enacting the President's economic recovery program and one which I am sure members of both parties will support in the final analysis, although details may be adjusted.

The Senate Appropriations Committee will now proceed to refine its activities with respect to this budget resolution and should be able to report to the Senate a rescission bill that will comply with the dates contained in the committee's instruction. That reply, of course, will be to the full Senate. It is my hope, as I am sure it is the chairman's hope, that we will be able to meet the $13.3 billion number contained therein.

This rescission effort, however, is just one step in the total budgetary process, for the Senate Budget Committee must now turn its attention to the first concurrent budget resolution, which is an advisory resolution that is only as good as the advice it has received from the various authorizing and appropriations committees.

The Budget Committee has scheduled a markup session on that resolution to take place prior to the Easter recess. I encourage them to make that schedule for they have before that committee detailed information from most of the committees of the Senate upon which to base their first set of recommendations to the Senate.

The March 15 report produced by the Appropriations Committee contains a far more substantive look at the matters under its jurisdiction than has been previously the case. I commend that report to the Budget Committee as a good basis for the recommendations that they will send to the full Senate in the form of the first concurrent budget resolution due May 15.

Mr. President, I ask unanimous consent that there be printed at this point in the RECORD that section of the Congressional Budget and Impoundment Control Act of 1974, Public Law 93-344, section 301(c), which provides the instructions to other committees in their support of the budget process.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

(c) Views and Estimates of Other Committees—On or before March 15 of each year, each standing committee of the House of Representatives shall submit to the Committee on the Budget of the House, each standing committee of the Senate and the Joint Economic Committee and Joint Committee on Internal Revenue Taxation shall submit to the Committees on the Budget of both Houses—

(1) its views and estimates with respect to all matters set forth in subsection (a) which relate to matters within the respective jurisdiction or functions of such committee or joint committee; and

(2) except in the case of such joint committees, the estimate of the total amounts of new budget authority and budget outlays resulting therefrom, to be provided or authorized in all bills and resolutions within the jurisdiction of such committee which such committee intends to be effective during the fiscal year beginning on October 1 of such year.

The Joint Economic Committee shall also submit to the Committees on the Budget of both Houses, its recommendations as to the fiscal policy appropriate to the goals of the Employment Act of 1946. Any other committee of the House or Senate may submit to the Committee on the Budget of its House, and any other joint committee of the Congress may submit to the Committees on the Budget of both Houses, its views and estimates with respect to all matters set forth in subsection (a) which relate to matters within its jurisdiction or functions.

Mr. SCHMITT. Mr. President, this year the Appropriations Committee held 4 days of economic overview hearings, from January 27 to January 30, 1981. A detailed report of those hearings was given to the Senate by Chairman HATFIELD, myself, and other members of the committee the week following those hearings. I commend that information to the Senate, not only because it contains, I think, some very good estimates on the near future of the economy, but also because it does represent a commitment on the part of the Appropriations Committee to do its part now in assisting the Budget Committee in the formulation of workable, realistic estimates of what the economy is going to do and what the impact of the economy will be on various programs and projects under the committee's jurisdiction.

The committee heard from newly appointed administration economic advisers as well as four private sector economic forecasters. These private sector economists were chosen to present a balance from a wide range of economic thought. Fortunately, several of these witnesses also brought to the Appropriations Committee the experience of previous public service, particularly what has worked and what has not worked.

One of the more prevailing recommendations that all economists made under questioning as well as voluntarily was that we should be pessimistic about the economy rather than optimistic, as has been the case in the past.

They did not advise that we look at the absolutely worst case that could happen should all things go badly for the economy, for the American people, but that we should not assume that everything is going to go as wishful thinking would devise.

In that regard, the committee's recommendations on inflation, interest rates, unemployment, and other matters related to the economy are somewhat more pessimistic than those of the administration in the budget that they have presented to the Congress.

All this means is that if the Senate follows the recommendations of the Appropriations Committee, we are going to have to find more areas for cut and we may have to adjust the timing of various cuts and tax incentives to match what is the more likely somewhat more pessimistic view of the economy for the remainder of this year and next year.

The Appropriations Committee also sought the advice of several present and former administration officials as to the controllability of the Federal budget and its impact on our committee deliberations. There was, I think, a unanimity of opinion that, unless the budget became more controllable—that is, fewer entitlement programs—we were very likely doomed to failure.

The PRESIDING OFFICER. The 15 minutes of the Senator has expired.

Mr. SCHMITT. Mr. President, I make an inquiry of the Chair: Who has the next special order?

The PRESIDING OFFICER. The Senator from Kansas (Mr. DOLE) has the next 15 minutes.

Mr. SCHMITT. Mr. President, the Senator from Kansas is not here. I ask unanimous consent that the special order that will be under the control of my colleague (Mr. DOMENICI) be transferred to my control.

The PRESIDING OFFICER. The Senator is correct. Without objection it is so ordered.

Mr. SCHMITT. Mr. President, out of the 4 days of hearings held by the Committee on Appropriations in late January, there came many important insights for the committee. One important point, supported by virtually every witness, was the significant impact that fluctuations in the basic economic conditions will have, a tremendous effect, on the Federal budget. For example, an upward change of 1 percentage point in the unemployment rate can add $5.5 billion to the cost of running the Federal Government and, in addition, will add tremendous cost to the total economy. far above this $5.5 billion figure. So you can see that a misestimate of the unemployment rate for fiscal year 1982. as with a misestimate of the rate of growth of the Consumer Price Index, or of the interest rates the Government must pay to borrow money for its various programs. will have a tremendous impact on just what the num-

bers turn out to be at the end of that fiscal year.

One of the basic problems we have had with these kinds of projections is that we have tended to be optimistic—too optimistic—and have found it necessary, late in the fiscal year, as will be necessary this fiscal year, to revise further, to provide supplementals, further to disrupt continuity of the economy. It is this Senator's recommendation that we be more pessimistic than optimistic so that that does not have to occur. If we have been overly pessimistic, then, so much the better.

I realize that no one can accurately predict all of the changes that affect the economy, nor can the budget be fully insulated from changes in economic conditions, both those that might be under our control and those which are not yet under control, particularly in the international arena. These changes, which in recent years have usually entailed more pessimistic estimates of economic performance, are reflected in significant increases in the costs of services that the Government has made a commitment to provide to the American people. Members of the Appropriations Committee, to a person, are seriously concerned about the resulting effect those demands will place upon the availability of funds for other priorities in the fiscal year should we wrongly anticipate them at this time.

The Committee on Appropriations, in its report, encouraged the review of programs which are considered uncontrollable or mandatory. We shall be making continued recommendations to the authorizing committees on what programs seem to be most desirable as candidates for increased controllability. This uncontrollability that we have today is due in large part to commitments made through prior-year budget authority and spending necessary for entitlement programs.

In addition, Mr. President, we have considered certain aspects of our national defense program as "uncontrollable." I think it is safe to say that the Defense Appropriations Subcommittee, as well as the full committee, will be looking at some of those areas very, very closely this year, as well as in succeeding years. There is no question in the mind of our committee that our national defense has deteriorated and must be repaired; but there is some question, even some disagreement, apparent with the administration's proposals on just how best that can be done and at what price.

In addition, Mr. President, recent attention has been directed to problems resulting from the automatic indexing for inflation of numerous entitlement programs. This automatic indexing is only a problem when inflation is running so out of control as it is today, but clearly is something the committee must look at. I am personally not sure whether there is a great deal to be gained by changing the indexing formula and its impact on various programs. but, still, we are obligated to look at that issue and look at it very closely. The economists who met with our committee in January were almost unanimous in saying that some revision of the Consumer Price Index formula should be made. This has not, of course, been the recommendation of the Reagan administration, but the weight of those recommendations must be considered in light of other economic and political realities.

In various ways, Mr. President, it is estimated that 77 percent of the outlays in the fiscal year 1982 budget are uncontrollable; that is, currently beyond the control of the Congress or of the administration.

Spending associated with entitlement programs explicitly indexed for inflation is estimated to make up 30 percent of the total budget outlays. The Congressional Budget Office estimates that, without including any more programs under automatic indexing, the percent of total outlays that these programs will require will be 32.7 percent in 1986, a steady, seemingly uncontrollable rise.

In addition to the programs that are explicitly indexed, other entitlement programs, such as medicaid and medicare, which are directly affected by inflation, contribute to the upward pressure of uncontrollable expenditures because of the nature of those programs and the nature of the expenses that States and other providers must endure as a result of inflation and increasing interest rates.

Even the 23 percent of the budget that is defined as relatively controllable is clearly less discretionary than it would appear. This relatively "controllable" portion of the budget includes items such as military and civilian pay.

The Committee on Appropriations, more specifically, has only 60 percent of budget authority and 62 percent of outlays of the total Federal budget for consideration within its spending jurisdiction. Of that amount, approximately 55 percent of budget outlays is uncontrollable; the remaining 45 percent is what can be technically defined as controllable. However, of the 45 percent considered controllable, 60 percent is for nonmandatory defense expenditures and 1 percent is for civilian pay items.

In this present international climate and in view of the deterioration of our national defense structure, it is hard to say that the majority of our defense expenditures are candidates for major cuts; the percentages I have just mentioned translate into only $193.3 billion, out of a total budget well in excess of $600 billion, that can be considered relatively controllable, within the jurisdiction of the Committee on Appropriations. Defense spending makes up $116 billion and pay items are $1.8 million, which leaves only $75.5 billion of the total $193.3 billion that is truly discretionary within the jurisdiction of the Appropriations Committee.

The question of whether any budget outlays are controllable by the Committee on Appropriations is a discussion for another time and forum.

But clearly in budget authority we have some work to do.

I and other members of the Appropriations Committee intend to find every economy available in both the proposed supplemnetal request and previously enacted legislation. However, overestimation as to the amounts of money that can be withdrawn without serious consequences to the operation of the Government is a serious problem, particularly when we are faced with only effectively one-quarter of fiscal year 1981 to which rescissions can be applied.

All too often the "fat" in budgets are believed to have been trimmed by economies only to find such is not the case. In trimming that so-called "fat" in previous years, programs of great national importance have suffered unduly.

The technological basis and the scientific base of this country have not grown to match the demand that is upon us in terms of our national security relative to potential adversaries and in terms of our economic security relative to our economic partners and competitors in the free world.

Recent hearings by my Subcommittee on Science, Technology, and Space of the Commerce Committee have documented, as have others, that the current annual shortfall of scientists and engineers with advanced degrees is on the order of 15,000, and that is 15,000 advance degree personnel on top of an already large deficiency of technical and scientific activities related to our national defense as well as to our national economy.

Many of these areas that are in the national interest are beyond the capacity of State and local governments to provide funds and as a result the Federal Government is going to have to be more deeply involved in the creation of this pool of renewable resources, a pool that is composed of highly trained people.

In addition, our technology base has been eroding because it has been considered "fat" over the last several years until we now find that our international competitors are beating the pants off of us.

For instance, the United States, once the leader in space exploration and now on the eve of launching the Space Shuttle, may give up its participation in international cooperative efforts such as the Solar-Polar mission and the mission to investigate Halley's comet. In the former program, 15 European institutions have invested millions of dollars in monitoring equipment for participation via the European Space Agency. A formal protest has been lodged with the State Department over this economy. The Halley's comet mission cancellation has caused the U.S.S.R. to expand its own mission with expanded international cooperation thus scoring large propaganda points at our expense.

As we go through the exercise of cutting the budget, we need to identify our national defense needs with greater clarity to include missions such as these for they do contribute not only to scientific knowledge but also to our defense effort.

But not all research efforts, even in space-related areas, should be so included. One of the administration reductions that I have supported was that I have supported was that which reduced NOAA's budget for remote sensing.

Given my specialized background, I am extremely concerned about Federal support for energy and technological advancement. Probably more than any

other Member of Congress, I have consistently advocated private sector involvement in this area, yet I realize there are certain areas where Federal support is essential. These expenditures are investments in our future. The micro-chip processors and our booming electronics industry are directly related to past Federal research and development expenditures, primarily in the space program. For instance, any delays in implementing an operational remote sensing system relinquishes U.S. leadership in the new and expanding markets of applications of space technology.

I continue to believe the private sector ought to play a major role in the establishment, management and operation of a remote sensing system. The reduced funding provides an opportunity to reexamine the role of NOAA in managing an operational system and provides an opportunity to expand private sector involvement at the earliest possible stage leading to reduced governmental cost in system development of an operational system.

During the last Congress, I introduced legislation on this point (S. 875) and will undoubtedly do so again during the 97th Congress.

Mr. President, in closing I would like to say that we have many challenges ahead in our effort to reduce Federal spending. There is no question that the Federal Government has tried to do too much. The States and local governments must accept responsibility for some of what Washington has done heretofore. At the same time, regulations which unduly complicate their efforts must be dramatically eased so that reduced Federal taxes are not absorbed in increased local tax bills issued to increase funds for programs transferred to local government units.

A new economic recovery program includes, in my view:

Reduced Federal spending, especially in the areas of transfer payments which exceed the "social safety net";

Continued Federal support for sound research and development as such expenditures are investments for the future;

Substantial deregulation of the American economy with a regulatory reform bill, including a legislative veto provision;

A revitalized national defense; and

Tax reductions which are tied to incentives to save and invest the extra money available to taxpayers.

Such a program will guarantee our success.

The PRESIDING OFFICER. The 15 minutes of the Senator from New Mexico has now expired.

Mr. SCHMITT. Mr. President, I yield the floor to the Senator from Utah.

The PRESIDING OFFICER. The next order is for the Senator from Kansas (Mr. DOLE).

Mr. HATCH. Mr. President, we are trying to get the Senator from Kansas here so he may speak.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I ask unanimous consent that the time reserved for Senator DOLE be set aside and that Senator HELMS be recognized for his special order time.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR HELMS

The PRESIDING OFFICER. The Senator from North Carolina is recognized for 15 minutes.

Mr. HELMS. Thank you, Mr. President, and good morning.

THE FIRST CONCURRENT RESOLUTION AND RECONCILIATION

Mr. HELMS. Mr. President, there must be major cuts. There must be substantive reductions—above and beyond the $48 billion the President has discussed. The cuts he has proposed are really not much more than holding the dollar figures the same for many problems.

Every day, there are folks who come to my office and say, "Senator, I know that we must cut, and I support the President, but there must be one or two exceptions and my program should be one of them." I will tell you, to the great credit of many of those who come to Washington to plead their case, that they will say that they are lobbying not so much to insulate their program but to minimize the size of the cuts. I recognize their views, and I believe those people are sincere. They are convinced that their pet programs are worthy ones. I also recognize that the cuts have to be spread as evenly as possible.

I recognize that the budget cutting cannot stop at the programs the President has listed. The cuts also have to go into other programs. The problems of the social security program, already a basket case, will have to be faced. The great unfunded liability of various retirement programs must be dealt with in the next few years.

But, in the process of cutting, how can our political institutions handle the two key problems of helping the truly needy, and neutralizing the lobby that has a vested self-interest in the continuation and expansion of some of these programs?

First, not many argue with the President's pledge that we should maintain the safety net for those who cannot care for themselves.

But I believe that tax-rate cuts will help us. Tax-rate cuts will help get the economy moving. The tax cuts, if they are deep enough, and if they are soon enough, will mean more jobs and more opportunities for more people: more jobs and less unemployment. More opportunities mean lessened dependence on the "safety net." A faster growing economy means that the welfare lobbyists will soon be representing a smaller constituency.

Is it not ironic, for example, that in the past 2 years, the tax-rate cuts adopted in Puerto Rico have resulted in greater economic growth in that island Commonwealth? The economic boom has meant more jobs, more opportunities. And—would you believe it—it has meant for the past 2 years that more Puerto Rican-born Americans have moved to Puerto Rico and out of New York than have come to New York.

What do you think happens to the ability of a Spanish Harlem welfare lobbyist who tries to argue for an expanded program when all his clients have flown back to jobs in San Juan?

An oversimplification, perhaps. But what happens to the ability of a community to finance its own capital improvements when we have economic growth, and its tax base expands? Why, we find that fewer cities come appealing for Federal handouts.

I could say the same about auto companies. What happens if taxes are reduced so firms can modernize, and can attract needed capital for higher productivity? What happens when people have higher real incomes to be able to afford another car? My guess is that with economic growth, you will see fewer Chrysler Corp.'s coming to the Federal trough.

Mr. President, the Budget Committee's report, as the saying goes, contains some good news and some bad news.

The good news is that its recommendations, approved by a 20 to 0 vote, represent $2.9 billion in reduced Federal spending in fiscal 1981, $36.4 billion in cuts for 1982, and $47.7 billion in cuts for 1983. Needless to say, this is considerably preferable to the action of the House Committee on Education and Labor, which has rejected the Reagan administration's efforts to cut Federal spending. That rejection borders on being total.

As the distinguished chairman of the Budget Committee has pointed out, even the most liberal members of the Budget Committee have sensed that the American people have grown weary of the business as usual policies which have produced double-digit inflation and soaring interest rates.

In 1969, when the Federal Governmental expenditures were only $184 billion, 548 million, the national unemployment rate stood at 3.5 percent, and the consumer price index rose only about 5 percent—from 104.2 to 109.8. In a little over a decade, we have grown to a proposed expenditure amounting to over 3½ times the 1969 Federal spending. Unemployment now exceeds 7 percent and inflation during the past calendar year was 11.7 percent.

In view of the massive increase in the misery index during this period, can anyone seriously suggest that our additional $500 billion represents money well spent?

The Budget Committee's recommendations represent a tentative first step toward slowing the growth of the Federal

Government and its tremendous drag on the economy.

But in the view of this Senator, it does not go nearly far enough. The President's proposal, even if it is fully enacted, will not decrease the size of the Federal Government, but will merely slow the growth of the Federal Government to a rate of 6 percent during 1982. Economist Lewis Lehrman has estimated that it would take a Federal budget cut of $100 billion to achieve the scope of economic recovery which this Nation really needs.

So what does all this mean? It means that at a minimum it is absolutely critical that this Senate perform its independent function of searching out major cuts in Federal spending which go even beyond those recommended by the President.

I mentioned the good news. Now the bad news.

The bad news in the Budget Committee's report was that, unfortunately, in many areas, it was not even able to maintain the President's recommendations.

In the area of elementary and secondary education, $653 million was added to the President's figures. There can be fewer areas in which Federal governmental efforts have been so clearly counterproductive as in the area of elementary and secondary education. While our expenditures for programs such as environmental education, health education, women's equity projects, bilingual education, population education, the arts and education, and prelegal education have continued to increase, every statistical indicator of the ability of American schoolchildren has continued to decline. We have used our Federal leverage to shift States away from the skills which really matter to our children, and instead required the States to concentrate on the latest Washington trend in education.

And that is demonstrably, Mr. President, sheer folly.

In the area of legal services, the committee has added $100 million to the President's recommendations. Ironically, this decision was made on the heels of the publication by the distinguished senior Senator from Idaho of a Legal Services Corporation memorandum laying out a massive unlawful lobbying plan on behalf of that corporation's reauthorization. That memorandum concedes that the Legal Services Corporation has lost the support of large numbers of clients and poor people. It proceeds to attempt to remedy this situation by, among other things, collecting dossiers containing data on Senators and Representatives.

Other areas in which long-overdue Reagan cuts have been overridden including funding for the Export-Import Bank, various youth job training and handicap programs which in fact destroy institutions which service the populations intended to be benefited, and the Corporation for Public Broadcasting.

And if we think it was difficult to hold the line on the Reagan budget in the Senate, this is only a fleeting premonition of the difficulties we will have when we begin to negotiate with the House of Representatives.

So I say again, Mr. President, there is good news and there is bad news. Things could be better and things could be worse. For my part, I am going to continue to work for the Reagan cuts in spending but I am going to work for further cuts in Federal spending as well.

I hope that my colleagues will be attentive to the need to think of some forgotten people in this country, the taxpayers.

Mr. President, I yield the floor and I reserve the remainder of my time.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GRASSLEY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR DOLE

Mr. DOLE. Mr. President, a parliamentary inquiry. We are on the special order on reconciliation?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, does the Senator from Kansas have any allotted time?

The PRESIDING OFFICER. The Senator from Kansas has 15 minutes previously allotted to him.

RECONCILIATION INTENTION

Mr. DOLE. Mr. President, I might say, first of all, that I just left the discussion with the committee chairman, the Republican chairman of the Senate on the reconciliation. I would indicate, as I did in that meeting, that we need to move very quickly in the Senate and House on the reconciliation instruction that was ordered by the Senate Budget Committee last week.

Earlier this morning, I had the privilege of speaking to an association of realtors—hardworking men and women, middle-class Americans who work and work and pay and pay their taxes. I was surprised with the speed at which they passed a resolution—and I assume there were Democrats, Republicans, and Independents in the audience—supporting the President's program. In fact, I commented that I only wish Congress would move as quickly as their association.

But they are concerned about spending. We are all concerned about spending. Everyone agrees we must make some changes. But there is disagreement when we try to determine where the cuts should be made.

I would indicate, as I will later on in the week, that I have a few areas I think should be modified. I am not totally satisfied with the nutrition instructions.

As chairman of that subcommittee in the Agriculture Committee which deals with WIC and food stamps and school lunch programs, it may be that we can make some changes there without violence to the President's efforts.

But I think it is well to point out that I watched what was sort of presented as a documentary last night on the CBS network about the student loan program.

They did not interview a single student who did not leave the impression that they were going to lose their benefits if the Reagan package were passed.

With this one-sided reporting, it is rather difficult for anybody who views that program to have anything but a biased view.

Here is a program that has gone up in cost tenfold since 1970, nearly $6 billion today as opposed to $576 million in 1970.

The President is not suggesting that we do away with the program; he is just suggesting we stop the growth and maybe reduce the total cost by $1 billion. That can be done in most cases without doing violence to any student who truly needs a scholarship, a Pell grant, or a guaranteed loan.

It is these distortions that we are finding in the press from time to time that make it very difficult to get Government spending under control. I would assume that many Americans are beginning to wonder are we, in fact, doing violence to the poor; are we in fact denying needy young Americans a college education?

I would add that if the facts are told, which is not a bad idea from time to time, that I think the American people will continue to understand the need for a change, and certainly that time has come. I think we will find Republicans and Democrats alike joining in efforts to try to stop the hemorrhaging of the economy and start an economic recovery program.

If you are satisfied with 17-percent interest rates, if you are satisfied with 12- to 13-percent inflation, if you are satisfied with 8-percent unemployed, if you are satisfied with the myriad of regulations that cover up many small business people, if you are satisfied with the monetary policy that has gone up and down—I think now it is much better and I applaud Chairman Volcker for his efforts in trying to get some help from Congress and the administration—if you applaud all the things that have brought us where we are today, then, of course, you would not want to move very quickly on the reconciliation. You would want to delay it, to pick it to death, to pick it to pieces, lose the confidence of the American people and the support of the American people.

It is the view of this Senator that it is time for all of us to take a hard look, make some hard choices, and cast some hard votes. It may impact our States, it may impact people in our States, but rather than a sacrifice it seems to me we have an opportunity to make a contribution, a contribution to an ailing economy, a contribution that might help economic recovery.

As chairman of the Finance Committee, I am not so certain that I agree with everything in President Reagan's tax package. We are free spirits in the Congress of the United States. It is his responsibility to make the proposition and it is ours to make the disposition of legislation. There will be changes made. There are bound to be changes made in the budget package. But the point is

I think we ought to try to keep an eye on the goals outlined by the President as far as budget cuts are concerned and tax reductions are concerned.

I would hope that we can convince the American people when it comes to the tax reduction that they, in fact, will invest or save what money might be coming back to them through tax reductions. Otherwise, it will be hard to persuade many of us that the tax cut is not inflationary.

The economic data of the last several months and, indeed, the last few years suggests strongly that a change in course is needed. Double-digit inflation and high unemployment have become all too, common in our country. Over the last 12 months prices have increased by 12.3 percent and unemployment has averaged 7.2.

To say that these high levels cannot be tolerated is belied by the fact that we have tolerated them for several years. In 1979, unemployment averaged 5.8 and the CPI increased by 13.3 percent; 1978 was not much better.

CAUSES OF ECONOMIC WOES

The seeds of our current economic woes have been in the soil a long time. These seeds are an explosion in Government spending, a tax system that too often penalizes incentives, work and production, overregulation and monetary policy that has sometimes been erratic. The reconciliation instruction that we are discussing today is an attempt to come to grips with the first of these problems. Our desire to change economic directions in this country will not succeed unless, in the next few months, we tackle all four.

I might say, as I said to the chairman of the Budget Committee, the Finance Committee does not wish to become a subcommittee of the Budget Committee. We have no intention of doing that. We have no intention of trading any jurisdiction with the Budget Committee. But it seems to me that they are acting within their authority, that they have acted within their authority; that they have laid out certain targets, and we will have certain options in our committee.

Controlling the growth in national spending should clearly be one of our highest priorities. During the 10-year period from 1971 to 1980, Federal Government outlays grew from $211 billion to almost $580 billion.

That is where the focus should be. It almost tripled in about 10 years. The American people, the American taxpayers, I do not believe fully understand the magnitude of the increase in spending in the last decade. That is why the taxes remain high. That is why we have inflation. That is why interest rates are out of sight. That is why Americans cannot buy a home.

Unless we are willing in a bipartisan way to turn that around, and we are going to start the reconciliation process and hopefully conclude it in the Senate Thursday or Friday of this week, then the American people will be looking at the Congress and those in this Congress who do not want to change, who want to do business as usual, who want to say, "I am for cuts but I do not want to cut any of these programs."

It just seems to me that that time has passed. We cannot have it both ways in the Congress of the United States. We have had it that way long enough and the people who have suffered have been the American taxpayers, plus, I might add, low-income Americans.

I know of no group that suffers more from inflation than those on low incomes, than those on welfare, than those on SSI, than even some of those on social security.

I would hope that we can preserve many of the programs we have and make them worthwhile and meaningful, then while we do something about spending and inflation.

In 1981, spending is estimated to reach $655 billion and even in the Reagan budget it is estimated to be $695 billion next year. By contrast to the Reagan budget, the current policy estimate for fiscal year 1982 is $735.9 billion in Federal spending. This current policy number is more than double Federal outlays as recently as 1976. During the last 2 years Government spending has grown by an average rate of 16 percent.

No one needs to be reminded that while spending has grown deficits have also been a major problem. During the last two decades we have had 1 year when our Federal budget was not in deficit. In the years 1971 to 1980 we have deficits over $40 billion five times. It is significant that prior to this 10-year period we only had a deficit as big as $40 billion during World War II. This fiscal year the deficit is estimated to run near $60 billion.

ECONOMIC EFFECTS OF SPENDING

The explosive growth of Federal spending has had an adverse effect on this country in a number of ways. It has tended to tilt the balance of power in Federal-State relationships toward Washington and away from the States, further distorting our Federal system. The growth of spending has also tended to increase the intrusion of Government into the life of every American. Every Senator has had constituents complain about seemingly unnecessary Federal regulations and bureaucratic interference.

The most pernicious effect of the growth in Federal spending, however, has been the adverse consequences it has had for our economy. The incredibly high levels of spending have added pressure to keep taxes high, thus stifling investment incentive and ultimately productivity. Federal spending has led to the huge Federal budget deficits which have fed inflation by sending the Government to the capital markets to borrow and too often, to the printing presses.

SENATE BUDGET COMMITTEE ACTION

The Senate Budget Committee is to be applauded for its work in recent years and particularly the marathon sessions that lead to its ordering reported this revised second concurrent budget resolution and reconciliation instruction. I observed some of those meetings and can testify to the hard work and determination of the chairman and ranking member as well as all the other Budget Committee Senators.

The vote was unanimous, 20 yeas and no nays being cast on the budget reduction.

The Budget Committee recommends that the Committee on Finance be instructed to reduce its direct spending by $200 million in BA and $800 million in outlays in fiscal year 1981, $4.4 billion in BA and $8.8 billion in outlays in fiscal year 1982, and $4.5 billion in BA and $10.9 billion in outlays in fiscal year 1983. These are totals that we feel we can live with, although cutting entitlement programs by these amounts will not be easy. Indeed the Committee on Finance voted unanimously to recommend similar totals for fiscal year 1982 to the Budget Committee. We, of course, are not bound to any particular proposal in arriving at these figures.

We believe we can live with these totals. In fact, I am not certain that we cannot find more areas to reduce spending in our committee. The Finance Committee has jurisdiction of about $380 billion. Over half of the budget comes to our committee. I would again point out that of this figure, about $385 billion to $390 billion that we have jurisdiction of in the Finance Committee, that we are talking, out of those hundreds of billions of dollars, of a reduction in fiscal 1982 of outlays of about $8.8 billion.

Mr. President, if you keep everything in perspective, you will understand that we are not asking to turn the clock back. We are simply trying to get a handle on spending, to reduce the rate of growth of spending for the sake of our economy and for the sake of the American taxpayer.

REVENUES IN RECONCILIATION

This Senator is pleased that the Budget Committee voted not to include a revenue reduction target in the reconciliation instruction. The purpose of reconciliation is to reduce budget deficits by recommending cuts in spending and, where necessary, recommending increases in taxes. Recommending tax cuts is wholly inconsistent with this purpose.

I might suggest that when that vote was taken in the Budget Committee it was almost unanimous not to tamper with that.

The level of revenue is set in the first and second budget resolutions but the Congress does not need to use reconciliation to cut taxes.

The Senate Budget Committee has met its responsibility to recommend a major cut in spending to the Senate. It is now up to the rest of us, both in this body and in the House, quickly to modify it where appropriate and to pass it.

The Finance Committee has already begun legislative hearings on the proposals that can implement these budget figures. These hearings will continue this week and next week. We hope to begin markups soon thereafter. If we all meet our responsibility as well as the Budget Committee did, a change in direction in this country will be inevitable.

I would just hope that we would not do this just to support the President of the United States, though that is not a bad idea either, but to do this because it is the right thing to do, to do this because it is not a Republican thing or a Democratic thing but the right thing to do.

If we work together in the Congress, there is no reason we cannot complete action on this entire package by mid-year, hopefully by not later than mid-July.

CONTROLLING TRANSFER PAYMENTS

As I have noted over the last week, the Senate Finance Committee has been holding hearings on the spending reduction proposals within its jurisdiction. One of the witnesses at our hearing, Mr. Erich Heinemann, presented an interesting analysis of Federal spending problems by breaking the budget into its two main components—purchases of goods and services and transfer payments. For the calendar year 1980, Federal purchases of goods and services came to about $108 billion in real 1972 dollars, which is roughly 6 percent below the level of Federal spending for goods and services in the first year of the Eisenhower administration. This drop, Mr. Heinemann noted, is largely owing to the drop in real military outlays. This means that over a span of almost 30 years there has been no increase—in fact a decline—in the Federal Government's demands on the human and material resource base of the economy.

The near doubling in real Federal expenditures since the early 1950's is directly traceable to the rapid rise in the level of real transfer payments. In this framework, the Federal Government's contribution to inflation comes, not from bidding scarce resources away from the private sector, but rather by shifting resources from savers to consumers and by driving the monetary authorities to excessive monetary expansion through large budget deficits.

Thus, if we are going to bring the Federal budget under control, we must act to stem the growth of transfer payments. Since a great number of the transfer payment programs fall within the Finance Committee's jurisdiction, we have a particularly pivotal role in bringing about this fundamental change in direction. I am optimistic that the committee will rise to the task.

I am hopeful that the 20 members of the Finance Committee will have nearly unanimous support for many of the efforts we make. I guess if you look at it from the straight political view, we are all in politics and most of us like to survive. I do not know of anybody who likes to go out and announce we are going to reduce the growth of any program.

Again, I would close as I started. What are the alternatives? What are the alternatives? I would hope that those in the media will take a look at the facts and not, maybe unintentionally, distort the package to make it appear in some case that everybody is going to be taken off food stamps, that no one will be entitled to medicaid, that no one will be entitled to student loans. I would hope that we will see more balanced reporting on some of these items in the weeks and months ahead as we begin the debate.

It is easy to single out some cases, and there may be some unintentionally who may be impacted by the budget cuts. But I would hope that in the final analysis the economy recovers, the economy strengthens, that inflation is reduced, that interest rates are reduced, and up and down the economic scale in this country the American people will learn that with strong leadership from the White House and strong leadership and hopefully bipartisanship in the Congress, we can stop the hemorrhaging of the economy, that we can help those low-income Americans and all other Americans turn this economy around for the good of our country.

It is a new beginning. It is time we started now. The die has been cast. The President has sent us the proposal; it is our responsibility now to make some rapid disposition of that proposal. If we do not agree with everything, we can change certain things, but let us not forget the goals he has set forth.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. LAXALT). The Chair suggests the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET RECOMMENDATIONS OF THE COMMITTEE ON VETERANS' AFFAIRS

Mr. SIMPSON. Mr. President, I am most pleased to report that President Reagan's program for economic recovery will encounter no significant obstacles in the critical area of veterans affairs. The Committee on Veterans' Affairs, which I chair, has issued budget recommendations in harmony with the administration's recommendations and the Budget Committee has agreed to accept those recommendations.

Now that the committee has acted in that fashion, I trust that this body will proceed with the same dedication and singleness of purpose to back those actions.

President Reagan's belief, one that I most certainly share, is that we must begin to balance the Federal budget. To do so, Congress and every single committee must make significant cuts in programs that affect all of us—veterans and non-veterans alike. The popular mandate that catapulted President Reagan into office and changed the numbers in the Senate reflects a very real and pervasive mood of national self-restraint. It is now our duty as legislators—not just out of political whim or some sadistic budget-cutting pleasure—to give prompt effect to that mandate by making appropriate cuts as equitably as is possible.

Of course, Mr. President, we do not lose sight of the tremendous debt that this country owes to its 30 million veterans, their 58 million family members, and the 4 million survivors of deceased veterans. With respect to the most deserving of our veterans, any cut in vital benefits or services would clearly be unconscionable. We have avoided that result. We have taken care to preserve and protect the compensation and pension benefits of all of those veterans with service-connected disabilities, as well as those of truly needy wartime veterans who suffer non-service-connected permanent and total disabilities or those who are over age 65. These described programs, in fact, will enjoy full cost-of-living increases, currently estimated to be 11.2 percent by the Office of Management and Budget and 12.3 percent by the Congressional Budget Office.

Nor will we diminish the level of services offered by the VA health care system. To indicate otherwise is certainly an erroneous assumption, since those health care services are crucial to the continued protection and maintenance of our most deserving veterans.

To accomplish these important goals, Mr. President, President Reagan has proposed a total VA budget for fiscal year 1982 that is significantly higher than that projected for 1981 by President Carter. To be quite specific, President Reagan's proposed 1982 budget calls for $24.2 billion in budget authority and $23.6 billion in outlays, as compared with President Carter's 1981 projections of $23.2 billion in budget authority and $22.5 billion in outlays. That is a very evident increase.

What is lost in the process of discussion is that we have a $1.1 billion increase in the Veterans' Administration budget. That is substantial. But it still falls a bit below the level of funding that would be required to maintain each and every single existing VA program, while still taking on the full and necessary cost-of-living increases. It falls short of that full funding level by $744 million in budget authority and $831 million in outlays. As a consequence, the Veterans' Affairs Committee and this Congress must find further cost savings in major construction projects, general operating expenses, and a number of yet unspecified areas. On that latter item, we have our work cut out for us in every respect.

Obviously, Mr. President, although all of us on this floor know, deep in our hearts, that we must trim this budget in every reasonable way, it is inevitable that, for every single such cut recommended, there will rise up a corresponding outrush of pain and anguish from those most directly affected. There is no doubt that these proposed cuts in VA spending will require a certain degree of reemphasis and possible sacrifice.

Quite naturally and historically, the national veterans' organizations may feel compelled to speak out. That is as it should be. But I am confident that individual veterans, in their capacity not just as veterans as I am, and also a lifetime member of the VFW, but as citizens of this proud country in a time of national economic distress, will recognize that the greatest possible good for all veterans and for all Americans can only be achieved with the restoration of a vigorous economy and that they and their national organizations will be willing to accept limitations upon the growth of certain less essential programs. Truly, Mr. President, we are in this one together, soldiers in the fray.

Mr. President, the Veterans' Affairs Committee has made and the Budget Committee has, by its actions, endorsed the following recommendations. First, we have accepted President Reagan's

March recommendations for each appropriation fund or account that is unchanged from President Carter's January recommendations wherever we found such an appropriation or fund account was not based upon any specific legislative proposal.

Second, we have neither accepted nor rejected President Reagan's assumptions concerning the appropriate eventual cost-of-living rates of increases as to compensation and pension benefits. We directly recommend that the Budget Committee compute its own assumptions to assure the appropriate cost-of-living increases in pension and compensation without adversely affecting any other veterans program in the event that the President's economic assumptions might be inconsistent with current economic estimates.

Third, we believe that the President's recommended cut for general operating expenses may be based upon an inadequate saving assumption and that it might otherwise prove to be incapable to fund certain critical veterans benefit programs.

I should note that the committee rejected the administration's proposal to cut $45.4 million in 1982 by suggesting a centralization of certain benefit services. The committee endorses the centralization as a savings concept but does not feel that such centralization or any corresponding savings may be realized until fiscal year 1986.

Indeed, we shall ask the Veterans' Administration to prepare a benefit services centralization plan for the Budget Committee's review before fiscal year 1982. Such a plan would effect centralization of specific benefit services into one or more locations by the end of fiscal year 1985 and would incorporate the necessary features to take full advantage of the implementation of the TARGET computer system.

We also recommended the restoration of $2.7 million in order that the VA might update the vocational rehabilitation program mandated by Congress in Public Law 96-466. The Committee on Veterans' Affairs does, however, recommend an overall $16.4 million reduction in the Department of Veterans' Benefits, $3 million of that amount through the consolidating of insurance operations in Philadelphia, and other administrative changes alone, and $8.8 million through decreasing payments to the State approving agencies, which is a reduction that was rejected in the appropriations process last year.

Fourth, we endorse the President's request for a $96 million reduction in outlays for veterans life insurance programs. To accomplish this, the Veterans' Administration will increase from the present 5-percent rate to 11 percent the interest rate charged to individuals who borrow on the cash value of their veterans' life insurance. Such an increase in interest rates will be accomplished without legislative action and will result in a most significant reduction in borrowing activity and a tremendous protection to the insurance beneficiaries who are denied the full proceeds of the policy because of the loan.

Fifth, the committee felt that the $6.653 billion in outlays proposed by the administration for medical care in fiscal year 1982 is inadequate to provide an appropriate level of health care for eligible veterans. The committee is particularly concerned about the personnel staffing level proposed by the administration. The committee, therefore, is recommending outlays of $6.762 billion to fund medical care in fiscal year 1982. That is an increase there of $109 million. This funding will allow the Veterans' Administration to maintain nearly the same medical staffing levels as authorized by Congress for fiscal year 1981, and not any rumored reduction of 7,000 medical trained personnel. Included in this amount is $8.8 million that the committee feels is required by three essential programs, the hospital based home care program, urodynamic laboratories, and staff augmentation to rehabilitation centers for catastrophically disabled veterans.

Also included in the committee's recommendation is $25 million to fund the continued operation of the VA's readjustment counseling program, the so-called "storefront" counseling centers for Vietnam veterans, in anticipation of legislative extension of the eligibility period for entry into the program.

I think all of us have read what I have come to respond to as unfortunate misinformation about the taking away of that particular program and the essence of determining its real worth by the Veterans' Administration. There is some problem in determining that worth and we find that many of those centers, although most are acceptable, and appropriate, some have become small cliques of support groups funded by the Federal Treasury. There is nothing wrong with that, but let us admit that that is where we may be headed when those persons with those problems, at that age of their lives, are simply relying on a support system, when true professional care is available through the existing Veterans' Administration health care system. We must assist them in breaking the support system umbilical cord—and do that in a way which contributes to their worth and self-esteem.

The committee endorses the President's recommendations for other medical accounts, with the sole exception of medical administration and miscellaneous operating expenses. For this account the committee recommends outlays of $60.2 million which includes a restoration of some $1.8 million in order to assure adequate funding for development of the computerized health care information system.

Sixth, the Committee on Veterans' Affairs has indicated that President Reagan's recommended $91 million reduction in outlays for major construction projects should be modified. This will be accomplished by canceling a new hospital construction project and by postponing an unspecified number of other major projects.

One of the curious things that occurred in my freshman year here was the discussion of the construction budget. We were presented with one authorization for $16 million for a veterans hospital, and I thought that would be actually quite adequate, finding then, later, that that was only for the engineering studies and the survey costs and that the hospital itself would cost 265 million bucks.

The committee accepts the need for a reduction of $80 million but considers such a proposed reduction simply as a target and not as a specific recommendation concerning any one particular construction project. The administration recommendations concerning specific project cancellations and postponements are still under review by the Veterans' Affairs Committee. The President's proposal to reduce funding for minor construction by $8 million was accepted by the committee.

Finally, our recommendations are also based upon some major assumptions:

First, that Congress may enact legislation at a cost of no more than $25 million in fiscal year 1982 to provide certain benefits for former prisoners of war.

Second, that Congress will enact legislation which will provide for $325 million in additional and, as yet, unspecified cost savings in order to achieve the full spending levels proposed by the President for fiscal year 1982. Here, now is a very important fact upon which this entire matter hinges. It is important to observe that the President, for good and valid reasons, has not yet nominated an Administrator, a Deputy Administrator, or an Inspector General of the Veterans' Administration. Obviously, then, we cannot yet expect the Veterans' Administration to be able to effectively develop or even consider specific cost savings proposals until these appointments have been made, and that of a General Counsel also. Clearly, however, it is not unreasonable to expect that these reductions can be made without impairing the ability and the mission of the Veterans' Administration to adequately meet the needs of our Nation's veterans. Indeed, the $325 million savings is only about 1½ percent of the VA's total annual budget of nearly $24 billion.

The Committee on Veterans' Affairs is aware of and in its minutes and hearings has discussed several areas in which those reductions can be made but does not choose at this moment in time to make any specific recommendations for the reasons I have previously noted.

It should also be pointed out that the committee feels that it should not consider any further cost-savings legislation that would result in reductions below the President's recommendations, unless all other authorizing committees are required to undertake similar such reductions.

Regarding accounts shared with other committees, the Committee on Veterans' Affairs agrees with the President's request, and the committee does wish to indicate that the Disabled Veterans Outreach program (DVOP) has been an extremely successful program as administered by the Department of Labor's Veterans Employment Service.

That program is specifically designed to assist disabled and the Vietnam-era veterans in finding suitable employment.

The committee strongly urges that the integrity of this program be maintained without reduction from the levels mandated by Public Law 96–466.

Those are the committee recommendations, recommendations to assist this new administration. We Members all recognize that budget matters affecting veterans are historically an extremely sensitive issue and in these times of particular economic woe, the political pressures associated with these matters can be particularly intense and they only make it harder to arrive at the tough decisions that should be made. Was it ever thus? It is true in this area of responsibility as in any other.

We have reached that moment of truth in our Nation's history as was so well expressed in the President's address. He stated: "We can no longer afford things simply because we think of them."

I trust that the full Senate will accept our recommendations and in the spirit in which they were hammered out, with an equal concern for the ever-compelling interest for our Nation's fine veterans and for the swift and lasting economic recovery that this Nation now cries out for, knowing also that every single one of us in this Chamber and in this land must surely recognize that economic recovery is indeed a goal of the very highest national priority.

Thank you very much, Mr. President.

RECOGNITION OF SENATOR LAXALT

The PRESIDING OFFICER (Mr. RUDMAN). Under the previous order the Senator from Nevada is recognized for a period not to exceed 15 minutes.

Mr. LAXALT. I thank the Chair.

RECONCILIATION—ECONOMIC RECOVERY

Mr. LAXALT. Mr. President, as we begin our historical debate today for the reconcilation bill—in essence, the President's proposed Federal budget reductions—I wish to outline for a few moments what we are truly undertaking under the course of this debate and the assumption of this program.

The hot political rhetoric over details that will fill this Chamber over the next few days may obscure the broad picture as so often is the case here.

But it seems to me that by keeping the important issues in focus I believe that only one outcome to the vote on the reconciliation is possible. By that I mean an overwhelming endorsement of the President's program for economic recovery.

No one can question that for the first time in decades we have a President who has rejected "politics as usual," and I think it has been a source of great mystery and surprise particularly here in this cynical town to have a President who is actually going to carry out his campaign promises.

Whether you look at foreign affairs or domestic policy, it is obvious that President Reagan is not tied to the failures and dogmas of the past. He has shown his willingness and enthusiasm to look for a new approach.

As a matter of fact, I think that he considers his election last November to be a mandate for a new approach, a mandate for fundamental change.

So as a result of all of that, he is stepping out boldly, concerned not with past policies or special interests, but only with that which is best for the American people. And the American people are responding, confident that at last the occupant in the White House is a creative, dynamic individual with the welfare of the whole Nation as his guiding principle.

Now, within the last few days we have been informed here that there is a devastating Gallup poll to the effect that this President is receiving, in terms of opposition, more opposition at this point in his career than preceding Presidents over a long period of time.

That is not surprising to this Senator at all. What is surprising to me is really that the percentage of opposition is not even stronger, because when you consider that this President during these few days in office has stood for more fundamental change, for more redirection in basic policies in relation to this Federal Government, coalescing at an early point those who are opposed to change Washington style, it is truly amazing to this Senator, as I have indicated, that that degree of opposition is not even more severe.

Nowhere has this willingness to break with the failures of the past been more forcefully demonstrated than in the President's program for economic recovery.

The President's program abandons the shopworn traditions that threaten the economic well-being of our Nation. It focuses, I think, on the right problem. It tackles the problem in a comprehensive way by proposing sound, social, and economic alternatives and, if enacted by this Congress, it will provide an economic foundation of prosperity that every American will share.

I believe the President has provided Congress with a framework for a better tomorrow. The choice is now up to each of us. Do we really want to be part of a better tomorrow?

Do we want to guarantee the economic future of our children's children? Or do we want to see our Nation sink into a sea of Government-induced, massive stagflation? Do we want to maintain "business as usual" with all that that implies: High inflation, high unemployment, crumbling economic markets, and increasing Government burdens on individual freedom? Mr. President, I do not see that we have much of a choice.

The President's program for economic recovery will be a success because it focuses on the right problem.

Our economic difficulties primarily stem from the past policies of our Federal Government. Our problems cannot be solved if the Government continues to overregulate, overspend, overtax, and overprint money, and then point fingers at private industry, wage rates or international factors as the cause of our difficulties.

This President refuses to do that. Instead he has boldly asserted that he will first tackle the problems with Government, knowing full well that once our own house is in order, others will fall into place.

The Federal Government is the primary cause of inflation in this country. For those of us who participate in hearings, particularly with the money committees, we hear a lot of phony, esoteric theories setting forth the reason why we have that, and we are told about OPEC, and told about this factor, and told about that factor. The fact is that the principal and fundamental cause of inflation in this country is excessive spending on the part of this Government. This President sought to change this for a long time. He talked about this when I was a fellow Governor with him back in the 1960's, when it was not fashionable to do so, when the fashion at that time was to come here to Washington and look for new Federal programs, look for additional spending of money, and hope eventually the problems out in the private sector and elsewhere would dissolve.

Well, they did not. He spoke to these matters back in the 1960's, when a lot of people felt that he and others who spoke in this fashion, like Senator GOLDWATER, were products of a Neanderthal era, and simply were not with it.

High taxes have soaked up resources into nonproductive uses. They have destroyed the incentive to produce, and have driven millions of Americans into the underground economy. All over our country, small groups of taxpayers are organized, and refusing to pay taxes. If anyone mistakenly believes that taxes can be continually raised without difficulty, he or she is absolutely wrong. We should realize that if only 5 percent of our Nation's taxpayers refuse to pay what is asked of them, our tax collecting system would be in chaos. One squeeze too many from the Federal Government may result in a widespread tax rebellion with untold consequences.

Skyrocketing Federal spending levels have caused massive deficits while fostering waste, fraud, and unnecessary programs.

It has been indicated in the press the last few days that this is going to be fraud-and-waste week here in Washington in terms of this administration, with this President leading the charge. Deficits, in turn, force massive borrowing which drains our capital markets. Resources are forced to flow from productive uses to nonproductive ones, as the economic foundations of our economy erode. Deficits also cause the Federal Reserve to print more money to pay them, forcing billions of dollars into our economy and causing inflation.

Overregulation causes businesses, both large and small, to place still more resources into nonproductive uses, and to raise their prices in order to cover the increased costs of compliance. Some studies estimate that up to $100 billion is needed each year to comply with Government regulations. Those costs, in turn, are paid for by every consumer. That is, I think, the underlying reason why we had this tremendous cry from all sectors of our economy, irrespective of region,

crying out for regulatory reform, because while all of us would love dearly to have 100 percent safety conditions, 100 percent clean water, and clear air, it is now becoming quite apparent to millions of consumers in this country that it costs billions of dollars to maintain those levels, and that is why we have had the great pressure exerted on this Congress through this administration to institute massive regulatory reforms to lessen the burden upon not only business and industry, but to lessen the costs eventually to consumers.

These are the causes of inflation that the President's plan will eliminate. The President is not seeking to hide behind finger-pointing rhetoric. He is tackling the No. 1 cause of inflation—Government, the Federal Government—head on. And once the monster of Government is back in its cage, I think we will discover that the other blamed causes of inflation will not turn out to be as serious as we have been led to believe.

The President's program for economic recovery is a comprehensive set of policies designed to solve these problems. It is a farsighted approach, designed to attack all the aspects of governmental mismanagement of the economy. It is not just a program which piecemeals one failed half-measure after another, but rather a logical, consistent plan of action moving toward a clear goal.

It is important, it seems to me, for those of my colleagues who are listening over their various speakers in their offices today that we focus on the fact that this is comprehensive and that its impact, its effectiveness, will determine whether or not it is truly comprehensive, because it appears to me that while we could be successful in one of the many aspects of this campaign and not in others, the whole will fall.

So it seems to me in terms of the overall effectiveness of this program that we are all seeking to achieve we must, in fact, pass a comprehensive program.

The overall program for economic recovery on the part of the President rests on four major ingredients: First, a comprehensive tax cut, which is going to be hotly controversial around this town and in these Chambers because it has been often said, and repeated to me, "How in the world can you consider declaring a dividend when we are going broke?" That is not the theory at all. The theory is that the money is best spent in the real world, in the private sector, much better than it is here by the bureaucrats in Washington.

Admittedly, as we grind through this process in the weeks and months to come, that is going to be hotly controversial, a hotly controversial issue, and I suspect probably in terms of its passage will be more difficult than, perhaps, the spending reductions.

In addition to the tax cut, we will have the spending reductions, we will have regulatory reform, and we will have close cooperation between the executive branch and the Federal Reserve.

This Senator, along with many other colleagues, is constantly being told, "Why in the world does not the Federal Reserve decrease pressure because these inflationary rates, the high interest rates, that are now being posed in the economy are causing severe stress on the part of just millions and millions of small-business-type people who simply do not have the resources to even floor their inventory these rates?"

The plain fact of the matter is, in justice to Mr. Volcker of the Federal Reserve, that until recently they have been the only game in town, the only inflationary deterrent we have had here in town.

I hope now that this President has moved as aggressively as he has toward attempting to do something meaningful in the inflationary areas, coupled with a firm resolve on the part of Congress, that that will be a clear enough signal to the Federal Reserve, independent agency that it is, to be responsive and, perhaps, cause some easing in terms of our interest rates.

Today we are considering the first part of the President's package—the spending cuts. While each prong is essential, I believe that the spending reductions are the most essential component. Spending cuts signal most clearly to the American people an end to "business as usual." By voting for the reductions, Congress will show its commitment to the American people, and not to Capitol Hill special interests. We will show, by our votes, how responsive we are to the common good that unites our country.

It is important, at the same time, that everyone understands just what the cuts entail. We are not advocating the dismantlement of the basic core of programs, which today make up what the President has referred to as our social safety net. The needs of the poor, the sick, the aged, the handicapped, and the disadvantaged will continue to be met. In fact, even the size of the overall budget will continue to grow. The Reagan budget for fiscal year 1982, after all the cuts, is still $40 billion more than the budget for fiscal year 1981. It is hard to give any credence to claims that a budget of $695.3 billion is inadequate to meet our Nation's needs. To claim that the Government needs an additional $48 billion, as President Carter proposed, is to surrender to fiscal madness.

Mr. President, we are meeting the social needs of our Nation, and we will continue to do so under the Reagan administration. In the long run, we are doing much more. We can only meet our social obligations when our economy is strong enough to provide for everyone in our economy. How long would those in need be cared for if inflation was allowed to continue and push our economy over the brink? Not very long, I would bet. The best investment for the needy in our society is a strong economy producing enough goods and services to provide for all.

The American people understand this. They are way ahead of us in these areas; way ahead of us. If you do not believe it, just read our mail. They know that the choice is a simple one. Either we must use our resources in productive ways so that everyone can share in the benefits, or we will continue to divert resources from production to nonproductive Government uses, leaving less and less for everyone. The economy is not static. Either the economy is growing or it is shrinking. And if we allow it to shrink, we are dooming our children to a lower standard of living. That is the decision, it seems to this Senator, that we must face. If we allow Government spending to continue to swell, then we are sacrificing our future for today. On the other hand, if we do curb our current appetite and simply slow the growth of Government spending, we insure for our children a healthy, prosperous future.

In short, Mr President, any rhetoric stating that the President's program for economic recovery will hurt the American people is false. We are providing for all the legitimate needs of our people today, and we are providing for a better tomorrow. "Business as usual" will no longer work. By continually increasing Federal spending, we limit our future options. I do not believe it is humane to increase benefits to Americans, only to have them devoured by inflation. Instead, I favor an investment in our national economy.

Mr. President, I am exceedingly pleased by the actions of the Senate Budget Committee. I will be frank to say that I would have been delighted the other day by a 12-to-8 vote or a 16-to-4 vote, anything indicating a fairly clear majority. But to have a 20-to-0 vote come out of that committee is the most reassuring thing, I think, we have seen in this Congress since the Presidential inauguration. Under the sound leadership of Chairman DOMENICI and Senator HOLLINGS, the ranking minority member, the committee has handled a tough political issue, and done an outstanding job. They demonstrated that we can act not as parochial-minded individuals, but rather as concerned legislators trying to serve the whole country. I am confident that the entire Senate will act in a like manner. Together we will put "business as usual" to rest forever, and we will join together with the administration for a new beginning.

RECOGNITION OF SENATOR McCLURE

The PRESIDING OFFICER. Under the previous order, the Senator from Idaho is recognized for a period not to exceed 15 minutes.

THE NEED FOR A BOLD NEW COURSE OF ACTION

Mr. McCLURE. Mr. President, 1 month ago the President of the United States came to Capitol Hill and spoke to the Members of this Congress a simple truth we have all known, but for one reason or another have been unable or unwilling to face up to as a body for far too long. In President Reagan's own words that truth is—

> We can no longer procrastinate and hope things will get better. They will not. If we do not act forcefully, and now, the economy will get worse.

Really, Mr. President, little else needs to be said as we begin what I am sure will be a most historic week of deliberation and action in the Senate of the

United States. "If we do not act forcefully and now, the economy will get worse." That is the simple truth. So we must begin to work on a bold new course of action to rescue our Nation from economic and social ruin.

Later this week, we will take up on the Senate floor a concurrent resolution reported by the Senate Budget Committee instructing the committees of the House and Senate to cut $36.4 billion from the size of increased spending for the fiscal year ending September 30, 1982. And I want to emphasize that it is not a reduction in spending as much as it is a reduction in the increase in spending. If enacted, it will result in the most massive single reduction in spending in our Nation's history, even though the budget will continue to rise in total. It is a proposal of historic magnitude and unprecedented importance.

I certainly wish to commend the members of the Senate Budget Committee for their diligent work in reporting this package so expeditiously. To have been able to accomplish this task in such an efficient manner is, again, unprecedented in the Halls of Congress, and I hope the rest of us will learn from their example that it can be done, and that we will move ahead on the timetable we all know is so critical—while the American people still have confidence we can get the job done. That is, Mr. President, essentially the point I would hope to make today. It is that we must pass this legislation intact and in time.

I have never felt that it is or ever should be our role as Members of Congress to merely rubberstamp what the President wants to have done. Regardless of the political party to which a President belongs, to do so would, in my judgment fail to meet our constitutional responsibilties as the policymaking branch of government.

But I am without doubt that the first item on the national agenda—and the second, and the third as well—is to stop inflation; and I am also without doubt that these sharp spending cutbacks the President has called for are essential in order to reduce the Government's excessive demands on this Nation's resources. Again, I want to emphasize that it is not a reduction in spending as much as it is a reduction in the size of the increase of spending.

Inflation, as measured by the Consumer Price Index doubled within the single decade of the 1970's, and would have doubled again within only a half decade if the pace of early 1980 had been maintained. No one can deny the close connection between the doubling of prices and the upsurge of deficit financing over the past decade. The combined Federal deficits of the 1970's reach $315 billion—about the same as the total of all deficits recorded in the Nation's entire earlier history. In fiscal year 1980, the deficit reached a near-record $59 billion. Can there be any doubt that year after year of multibillion dollar deficits have had a negative effect on our economy?

It has got to stop, Mr. President. I cannot say it forcefully enough—we must bring the Federal budget under control.

We all know what the economic situation is doing to our Nation and to our people to their ability to earn a living. We have all heard the statistics, but no statistics can tell of the misery of workers who have lost their jobs. No statistics can explain the fear of senior citizens whose life savings are gone. Ten years ago, in 1970, the median income of American families was $9,750. In 1980, it was $19,950. But if you subtract from that the effect of inflation, and remove the trebled payroll taxes, and the automatic increases in taxes of all kinds caused by inflation, the real, take-home pay of that family actually dropped by about $912 in 1980 dollars. That is a cut in real after-tax wages of about 5 percent.

Is there any wonder working men and women across this Nation are asking for a change? And I am speaking now especially to my colleagues on this side of the aisle that frustration with our Nation's past course is in large part responsible for putting many of you in office and our party in the majority in this body. I fear for the future of our Nation if we should not be able to stand together to bring about the change in direction we have led the American people to expect from us. There is, of course, no guarantee the President's program will work. But we know very well what has not worked, and we have seen no plan better than the President's offered from any other quarter. And given the clear failure of past thinking, it is refreshing to have an idea that offers hope for recovery. The big question now is whether or not we will have the nerve to carry it out. Whether we will be motivated by petty political consideration, or whether we will at last, with new purpose and confidence in our ability to lead, look to the long view as the Senate was intended to do.

All of us have our favorite programs, our own ideas and priorities about how Federal dollars should be spent. There are aspects of the President's spending proposals with which I personally do not agree. The Budget Committee has, in fact, made my own task even more difficult than the administration would have by virtue of its actions with regard to the strategic petroleum reserve, and I am not sure how that will be resolved. But the bottom line is that I am ready and willing to support the President fully at this time, in order to see what I consider to be an absolutely essential economic program enacted. I know it will be difficult, but I admonish and encourage my colleagues on both sides of the aisle to do the same.

Even before President Reagan revealed the details of his planned budget cuts, the chorus of special pleading from various interest groups fearful of finding themselves among his targets began. I suspect that was only a mild foretaste of what the next few weeks will be like. The charge inevitably arises that these spending cuts will favor the rich at the expense of the poor. But that is, Mr. President, nothing but consummate nonsense. Even if it were true that these cuts would really hurt the truly needy, a failing economy and raging inflation would be harder on the poor than anything the administration has suggested. And those who stand to lose specific Federal subsidies for business, labor, or welfare have a very real chance to recoup their losses, and more, from an economy restored to health.

The truth of the matter is, Mr. President, that the increase in expenditures for so many of the social welfare programs our friends on the other side of the issue argue are so essential to the Nation are often rooted as much in political expedience as in genuine increase in human need. They are essential not to the Nation but to their own political well-being as they perceive it.

Take, for example, the AFDC program. Total expenditures for aid to families with dependent children increased from something under $2 billion in 1967 to nearly $8 billion in 1981. The President has proposed a number of changes in the AFDC program which are designed to determine welfare needs more accurately, improve the administration of the programs, reduce fraud and waste, and decrease Federal and State costs. For example, the income of a child's stepparent would be used in determining the child's eligibility for benefits.

I have heard many comments to the effect that virtually all of the families whose AFDC payments would be reduced or eliminated are below the poverty line and should be considered truly needy. But in fact a majority of the families affected are not poor. Fifty-seven percent of the families that will no longer be eligible and 58 percent of the families whose benefits will be reduced have incomes above the poverty line. By way of contrast, only 13 percent of current AFDC families that will continue to receive benefits are above the poverty line. Among the families below the poverty line that will be reduced, nearly three-quarters will be affected by two proposals that are designed to remove people who are not needy from the rolls. Most of those cases are AFDC families that live with step-parents or with other providers of income. Such families would not be poor if the resources of the whole household were considered. The other families have 18-, 19-, and 20-year old students who will no longer be covered by AFDC.

Another example of an idea gone totally out of control is the food stamp program. Expenditures for food stamps jumped from under $100 million in 1967 to nearly $11 billion in 1981. On November 8, 1979, Senator EAGLETON, as chairman of the Appropriations Subcommittee on Agriculture, asked the investigations staff of the full committee to review the food stamp program. The findings of this study were published in November, 1980. Although copies of the report were not well circulated, some of the findings are shocking. Among them was that fraud by recipients, errors by program workers, and loopholes in food stamp regulations resulted in waste of as much as 20 percent annually, or about $1.8 billion in 1980. That is precisely the amount President Reagan has asked us to save in the food stamp program. And people are still arguing that it spells disaster for poor people. Baloney. Frank-

ly, I think we could go much deeper and still not hurt the truly needy, but it is at least a beginning in bringing under control a program which has run absolutely wild and unchecked.

Mr. President, recent history shows us Government-run welfare programs have not and cannot work. They do not help the people they are intended to help with the kind of help they need. The basic idea behind them—that Government should intervene in our lives for our benefit through regulations, social agencies, and spending programs—creates serious inequities. I note that my distinguished colleague from New York (Mr. MOYNIHAN) has been quoted on the Budget Committee's action in the Wall Street Journal, charging that they have, "undone 30 years of social legislation in 3 days." Certainly those who have been responsible for the last 30 years of legislative history have had good intentions. Those who promote or have promoted Government welfare programs have acted out of concern for others, but noble objectives do not necessarily bring noble results. Using Government to achieve the "noble objectives" of welfare programs means trying to do good with someone else's money, and nobody spends somebody else's money as carefully as he spends his own, and you cannot do good with someone else's money unless you take it away from him first. The result has been more and more people paying more and more money in taxes for more and more waste. The end result is the welfare state in which the government tries to take care of everybody, with loss of initiative, independence, and personal liberty for all.

The point is, Mr. President, that we should not think of this exercise in terms of hardship and loss, but rather optimistically in terms of revitalizing our Nation's energies and making Government work better for all of us. We were not elected to repeal the New Deal—we were elected because we are united behind the only strategy that can get this country on track and moving again.

We have the opportunity to achieve, once again, a healthy, growing economy and full employment without inflation. The issue today is not capital versus labor, rich versus poor, black versus white, consumer versus producer, or conservative versus liberal. The issue is getting this country moving again, restoring the American dream, not just for some but for all. We should all be anxious to get on with the job at hand.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, might I inquire of the Chair, are there remaining unexecuted special orders?

The PRESIDING OFFICER. The Chair advises the majority leader that there are, in fact, two, the minority leader, who is in the Chamber, and the chairman of the Appropriations Committee (Mr. HATFIELD).

Mr. BAKER. I thank the Chair.

Mr. President, I am advised that the distinguished chairman of the Appropriations Committee, Senator HATFIELD, has indicated that it is not possible for him to be on the floor at this time. He may wish to speak during morning business, which will follow on after the special orders.

Mr. President, I ask unanimous consent that the special order in favor of the Senator from Oregon (Mr. HATFIELD) be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. HATFIELD, delivered during the period for routine morning business, are printed at this point, by unanimous consent.)

THE RECONCILIATION PROCESS

Mr. HATFIELD. Mr. President, the reconciliation process is a painful one. Not only are we called upon to make sacrifices in truly worthwhile programs, but the function of reconciliation significantly diminishes the responsibility of the authorizing and Appropriations Committees for setting their own priorities. In these unprecedented economic times, reconciliation has been a necessary procedure. However, I do not expect this process to repeat itself. I am confident that our committees will exercise the restraint necessary to avoid reconciliation in the future.

The Appropriations Committee is responsible for and fully capable of scrutinizing its share of the budget and putting into effect a sound fiscal program of spending cuts which will improve the economy. Title 10 of the Budget Act establishes a procedure for rescission of budget authority and making spending cuts. It is with this traditional tool that such cuts could be accomplished. However, because of the uniqueness of this budget year and the urgency for implementing the President's program, I agreed with the majority leader that the Appropriations Committee should be instructed.

Our instructions are to cut $13.3 billion in budget authority for fiscal year 1981 and $1.5 billion in outlays. That is our goal and the Appropriations Committee will make every effort to meet that target, reporting those savings to the Senate floor by the June 5 deadline. However, I must warn the Senate that the goal will be difficult to achieve. The level of reduction in current year outlays called for can put unrealistic constraints on a budget that is already very lean. I think we will learn that some of our favorite projects will have to be cut, if not eliminated, and so be it.

Mr. President, I must observe that one committee escapes reconciliation. It is certainly no secret that the Budget Committee has recommended zero reductions in funded authority for the armed services in fiscal year 1981, 1982, or 1983.

I am greatly concerned that such lack of instructions will produce a cavalier disregard for achieving necessary savings in military spending. The administration plans to more than double the Pentagon's $171 billion annual budget to $368 billion in fiscal 1986. For fiscal 1982 alone, budget authority would rise $25.8 billion. That increase in defense authority consumes more than 50 percent of the decrease in some 300 Federal domestic programs that the Budget Committee has instructed other committees of the Senate to carry out.

In his recent State of the Union speech, President Reagan rightfully decried the mounting Federal deficit which is approaching $1 trillion. He illustrated how large a sum this was by saying it constituted a stack of thousand-dollar bills 67 miles high. It might be pointed out that a similar stack equal to the Reagan defense expenditures in the next 5 years would reach 100 miles high.

This enormous commitment to weapons and personnel poses profound questions, and some potentially enormous dangers.

Mr. President, I fear we are ignoring an excellent chance to build a more efficient defense establishment. Instead, we have fallen prey to the same mistakes we have made with social problems. They cannot be solved just with sums of money.

In examining the package proposed by the Budget Committee, I also must note my disappointment and very serious concern over the lack of emphasis on entitlements.

Just weeks ago, the Appropriations Committee held a series of overview hearings in which nationally renowned economists with views ranging from the more traditional laissez-faire theory to the extreme of the Keynesian viewpoint gave their versions of the Nation's economic ills. I have found, Mr. President, as you may have, that these authorities rarely agree. However, they were in accord, in fact, adamant, that to ignore the issues of indexation and entitlement is foolhardy. If we are truly serious about controlling Federal spending, we must come to grips with that increasingly uncontrollable portion of the Federal budget.

As the entitlement portion of the budget continues to escalate, our options in Congress shrink. We no longer have the flexibility to respond to the changing economic circumstances and changing national priorities. We are bound by automatic indexation and rigid formulas. I urge my colleagues to consider the serious ramifications of the failure to confront this issue.

Those concerned with the flexibility of Federal spending should also be concerned with the outyear reductions in funded authorization levels. Substantial reductions are called for in discretionary programs, except for defense. These reductions could amount to as much as $23 billion in fiscal year 1982. That is money Congress spends on health research, park maintenance, space exploration, agricultural research, water projects, veterans hospitals, fish hatcheries, and the like.

If it is the decision of Congress to reduce Federal spending by eliminating discretionary programs rather than controlling the so-called uncontrollables, then so be it. But I do not believe the mechanism for that decision should be a provision in this resolution calling for funding reductions in the outyears. Such a procedure is not contemplated by the

Budget Act. Reconciliation was designed to bring spending in line with the budget ceiling for a particular year, not future years. We can achieve the reductions necessary in fiscal year 1982 and fiscal year 1983 by lowering the total budget ceiling for those years when we enact the budget resolutions. Attempting to force those reductions now, prior to consideration of the budget resolution for those years, does violence to the Budget Act and robs Congress of the flexibility it must have if Federal spending is going to be controlled and fiscal policy be manageable.

I would hope we could demonstrate more confidence in ourselves and our commitment to reduce Federal spending, and not resort to a budgetary straitjacket in our eagerness to support the President's program. I support that program, but I do not wish to totally sacrifice the authority of the authorizing and appropriations committees in the procedure to do so.

Thank you, Mr. President.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I will inquire of the distinguished minority leader if he intends to speak pursuant to his request.

Mr. ROBERT C. BYRD. Mr. President, I do not intend to speak, and I am ready to yield back the time if no Senator asks me to yield. I see no such indication. I yield back my time.

Mr. BAKER. Mr. President, I believe this morning I may have asked for a special order in favor of the distinguished Senator from Maine (Mr. COHEN) in an abundance of caution.

I ask unanimous consent that any special order in favor of the Senator from Maine (Mr. COHEN) be vitiated at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 1 hour, during which Senators may speak for up to 10 minutes each.

JAPANESE AND GERMAN DEFENSE POLICY

Mr. EXON. Mr. President, there is a growing consensus that our national level of effort for defense must be increased in view of the potential threats we face and I endorse this need. Indeed, here in the United States, we are in the process of dramatically realining the Federal budget to reduce the overall rate of spending increases while significantly increasing the defense budget.

However, the United States cannot and should not shoulder the burden of protecting Western interests alone. As the leader of the free world, I concur that the United States must set the example in this regard and I believe that we are so doing. However, it is disturbing to me that our NATO and Japanese allies are not, in my view, meeting their end of the bargain.

Recently I have heard statements to the effect that Japan cannot spend greater than 1 percent of its gross national product on defense and that the Federal Republic of Germany is not allowed to deploy its armed forces outside of the prescribed NATO area. The question arises as to whether these statements are based on constitutional prohibitions, legal restraints, or political realities. Therefore, I requested that the Law Library of the Library of Congress evaluate these issues and report to me. This has been accomplished and I request at this time that their study be printed in the RECORD at the conclusion of my remarks, so that my colleagues, the administration, our allies, and all other interested parties may have benefit of this professional analysis.

The PRESIDING OFFICER (Mr. HATFIELD). Without objection, it is so ordered.

(See exhibit 1.)

Mr. EXON. Mr. President, in addition to evaluating the constitutional, legal and political issues involved in the level of effort which may be expended on defense in these two countries, this study also reviews those aspects in relation to the possible deployment of forces overseas and prohibitions on the development of certain types of weapons. This analysis speaks for itself; however, the key point is that there seem to be no constitutional or legal prohibitions in either Japan or the Federal Republic of Germany which would hinder either nation from increasing their defense efforts in the manner which most of us would like to see—for example, enhancing their efforts in their own areas of the world so that U.S. forces can increase our capabilities in areas of mutual interest where we are uniquely capable of doing so.

According to the Secretary of Energy, Japan, and Western Europe rely on Persian Gulf oil for about two-thirds of their oil imports while the United States relies on that region for about one-quarter of our oil imports. The Secretary also predicted that the free world's dependence on Persian Gulf oil is unlikely to change significantly during this decade. While the United States is making great strides in insuring that this oil supply remains uninterrupted, our allies must assist in this effort in a mutually agreed division of labor.

Deputy Defense Secretary Frank Carlucci made this point at the recent Verkunde Conference in Munich when he said that:

> In this situation, the United States cannot be expected to improve and strengthen U.S. forces in Europe, unless other allies increase their own contributions to the combined defense effort. Nor can the United States, unaided, bear the burden of promoting Western interests beyond Europe.

Mr. Carlucci also said that Congress and the American people will be asking what new accompanying sacrifices the allies are going to make while the United States embarks on massive new defense increases. I should like to underscore these points, as I have ever since coming to the U.S. Senate.

Recent reports of West Germany reducing its long-term military spending goals and Japan's lower-than-expected defense increases appear to me to be unacceptable in light of the current world situation. I certainly hope that the new administration's plans for increased consultation with our allies will lead to an enhanced and improved mutual defense effort. For surely if we cannot work better together in a harmonious spirit, we will all suffer greatly together. If history tends to repeat itself, then a new direction is of the utmost importance.

EXHIBIT 1

THE JAPANESE CONSTITUTION AND SELF-DEFENSE FORCES

INTRODUCTION

By virtue of the so-called no-war clause of the Constitution of 1947,[1] Japan is prohibited from maintaining armed forces as well as from developing a war potential. Article 9 of the Constitution provides:

> Aspiring sincerely to an international peace based on justice and order, the Japanese people forever renounce war as a sovereign right of the nation and the threat or use of force as a means of settling international disputes.
>
> In order to accomplish the aim of the preceding paragraph, land, sea, and air forces, as well as other war potential, will never be maintained. The right of belligerency of the state will not be recognized.

The outbreak of the Korean War in June 1950 and the establishment of the Japanese National Police Reserve Force in July of that year, however, raised the question of whether Japan should again arm herself for self-defense. Several Japanese groups demanding rearmament indicated the advisability of restudying the Constitution to determine whether it perhaps needed to be revised.[2]

In June 1954, the Police Reserve Force was renamed the Self-Defense Forces (hereinafter referred to as the SDF) pursuant to the enactment of the Self-Defense Forces Law.[3] At the same time, the Defense Agency, headed by a civilian Director-General, was established as an external organ of the Prime Minister's Office under the Law Concerning the Establishment of the Defense Agency.[4]

The SDF's mission is spelled out in Article 3 of the Self-Defense Forces Law, which states that they are charged with guarding "the nation's peace and independence" and defending "the nation against both direct and indirect invasion in order to preserve the safety of the nation." However, the main activities of the SDF have been relief and rehabilitation tasks in local communities stricken by natural disasters.

Japan's SDF exists today in spite of Article 9 and without revision of her Constitution. The principal political parties opposing the government consider the SDF to be unconstitutional, but successive governments have taken the position that Article 9 of the Constitution cannot take away Japan's inherent, sovereign right of self-defense. Successive governments have also interpreted Article 9 as not prohibiting the establishment of a minimum force necessary to sustain the right of self-defense, and that a defense force in excess of the minimum considered necessary for such purposes would constitute "war potential" which is banned under Article 9.[5] It is upon this interpretation that Japan's present self-defense system has been built.

JAPANESE DEFENSE POLICY AND RESTRICTIONS ON DEFENSE SPENDING

Japan's defense policy is based on the Basic Policy for National Defense adopted at a Cabinet Meeting in May 1957. This basic policy calls for (1) the promotion of international cooperation and efforts for peace, (2) the establishment of a basis for national security through domestic political stability, (3) the gradual establishment of an effective defense capability, and (4) the maintenance of security arrangements with the United States.[6]

Utilizing the 1957 Basic Policy, the Japanese Government formulated four consecutive defense build-up plans for a period of three to five years, from FY 1958 (April 1958 to March 1959) to FY 1976. These plans are as follows: The First Plan (FY 1958–60); the Second Plan (FY 1962–66); the Third Plan (FY 1967–71); and the Fourth Plan (FY 1973–76). These plans were designed to gradually enhance the nation's defense capability commensurate with Japan's strength and position.

With the completion of the fourth defense plan during FY 1976, the government adopted the National Defense Program Outline at the Cabinet meeting on October 29, 1976. Unlike the previous four defense plans, the Outline does not set any fixed period during which to improve defense capability, but lays down the guidelines for Japan's future defense plan and provides the basis of administration and operation of the SDF. Thus, from FY 1977, the defense build-up as structured along the 1976 Outline, is designed to be planned on an annual basis in order to determine what is needed each year. After the temporary suspension of the previous five-year build-up plans, the government again proposed to prepare a new five-year plan from FY 1980 through FY 1984.[7]

Neither the Constitution nor any specific law contains provisions stating that a specified percentage of the Gross National Product (GNP) is to be spent on defense. From FY 1961 and thereafter, the percentage of defense spending, however, was set on a five-year basis as outlined in the defense build-up plans. During this period, the Defense Agency Director-Generals argued before the National Defense Council and before the Cabinet for an increase in defense expenditures of up to 2 percent of the GNP. Their requests for a larger portion of the GNP were based on the economic growth of Japan, the extremely low levels of defense spending, and the reduction in the United States' forces in and around Japan.[8]

On several occasions, the Defense Agency was opposed by the Ministry of Finance, the Ministry of International Trade and Industry, and the Economic Planning Agency on the grounds that the present rate of defense spending was not necesary and might interfere with their plans for economic growth. On each occasion, economic planners prevailed and the Defense Agency Director-Generals were unable to convince the Prime Ministers and Cabinet Ministers that 2 percent, rather than 1 percent of the GNP was necessary to build-up and maintain the SDF. It has been difficult for the Defense Agency to make a stronger case for a larger share of the budget.[9]

In the Cabinet meeting held on November 5, 1976, the Miki Cabinet decided to keep Japan's defense-related costs for each fiscal year at 1 percent of Japan's GNP.[10] Since then, succesive Cabinets have made it clear that they would continue this policy. In FY 1980, the total defense budget was 2,230.2 billion yen, wnich was 0.9 percent of the initially estimated GNP and 5.2 percent of the General Account Budget[11] (for previous figures, see Appendix).

As the FY 1981 defense budget is currently being prepared, there has been a growing demand within the ruling Liberal-Democratic Party and in business circles, as well as in the United States, for expansion of defense spending to more than 1 percent of the GNP. On November 12, 1980, Prime Minister Suzuki told the Special Committee on Security, Okinawa and Northern Territory Problems, that his government will hold Japan's defense spending is within 1 percent of the GNP.[12] On November 28, 1980, the Prime Minister again told foreign correspondents at his official residence that Japan will not expand its defense spending to more than 1 percent of the GNP. He pointed out that the desire to maintain defense expenditure at 1 percent was a national consensus and that "any further expansion of the spending beyond this limit would touch off fears among the members of the Association of Southeast Asian Nation."[13]

OVERSEAS DEPLOYMENT OF THE SELF-DEFENSE FORCES

On numerous occasions,[14] spokesmen for the Japanese government have reiterated the view that an overseas assignment of the SDF in excess of the limit of the right of self-defense would not be permissible under the Constitution. In their view, overseas deployment for the purpose of conducting military action within the territorial confines of other states—whether conducted by ground forces, ships or planes—would exceed the limit of the right of self-defense, thus contravening the Constitution.

In reply to the question of whether or not the SDF's participation in a UN force would be constitutional, a government spokesman stated in 1961 that Japanese participation in a UN action such as occurred in Korea would violate the Constitution, but that a role for Japan in a situation such as occurred in Lebanon would be permissible.

The Korean case was characterized as one wherein each participating nation fought as a sovereign nation although nominally under the UN flag. In the case of Lebanon, in which action was taken by the UN in response to a crisis in that country, the situation was describe as one wherein actions were taken at the command of the Secretary-General in supporting the internal security of Lebanon and these actions did not constitute involvement by sovereign nations. Participation by Japanese nationals as individual volunteers in UN actions would not raise constitutional questions unless the will of the state were in some way involved, e.g., any supportive actions taken by the government.[15]

In 1966, however, another spokesman stated that although Japan's participation in a UN action such as was taken in Lebanon would be permissible under the Constitution, it would still be repugnant to the existing SDF law.[16] According to a more recent pronouncement of the government (1978), it would not be possible to deploy the SDF overseas to participate in a UN force without revising the existing SDF Law and that at present the government did not intend to amend the SDF law for such purposes.[17]

On October 28, 1980, a similar government view was expressed to the extent that under the Constitution, Japan is allowed to send the SDF personnel overseas for non-military purposes. The government also stated that it is constitutional for Japan to participate in the UN peace-keeping forces if the SDF are not engaged in military actions; however, the existing SDF law neither allows Japan to deploy its forces overseas nor permits them to join UN peace-keeping activity.[18]

RESTRICTIONS ON THE DEVELOPMENT OF WEAPONS

The government has long maintained that the possession of offensive weapons such as ICBMs, IRBMs, MRBMs and SLBMs and long-range bombers (B–52s) would be a violation of the Constitution. The basic assumption is that any weapons, nuclear or not, which are designed primarily for attacking purposes are prohibited. On the other hand, F–86 fighter-bombers, F–4 phantom jets, Nike ground-to-air guided missiles, and HAWK missiles are considered to be defensive weapons and thus permissible under the Constitution.[19] In February 1978, the government justified the purchase from the United States of F–15 interceptor-fighter and P–3C anti-submarine warfare aircraft States on the grounds that they were defensive weapons.[20] The government has not published a list indicating what constitute offensive and defensive weapons. Some of the above distinctions were made in the Diet when pressed by members of the opposing political parties.

Government officials have conceded that war potential is banned by the Constitution. They have stated, however, that defensive needs are determined by the international situation, the nature of contemporary technology and various other factors. Thus, in the view of the government, the concept of a self-defense capability is flexible and changing, and there are no objective or constant criteria. The guiding principles have always been the minimum degree of military capability necessary for self-defense.

With respect to nuclear weapons, government officials have stated repeatedly since 1957 that the Constitution does not ban all types of nuclear weapons, but only those which are deemed to be offensive weapons.[21] In the view of the government, the possession and/or production of nuclear weapons is not forbidden. However, such possession and/or production of nuclear weapons would contravene the Basic Atomic Energy Law which provides that "the possession, development and utilization of atomic energy shall be limited to peaceful uses" and that the results of such atomic energy shall be limited to peaceful uses" and that the results of such atomic energy-related activities must be made public.[22]

Apart from the legality of the problem, government officials have consistently stated that Japan would not possess any nuclear weapons as a matter of policy; this policy is based on the "three nuclear principles." According to these three principles, Japan would not produce, possess, or permit the stationing of nuclear arms on Japanese soil. When Japan became a signatory country of the Nuclear Non-Proliferation Treaty in 1976, the government also cited this treaty as banning the possession and deployment of any nuclear weapons.[23]

It should be noted that the government tends to explain the limitation regarding offensive nuclear weapons in terms of the Constitution itself, the Atomic Energy Basic Law, the government policy and treaty, rather than as stemming from the scope of the right of self-defense.

FEDERAL REPUBLIC OF GERMANY

I. CONSTITUTIONAL LIMITATIONS ON TROOP DEPLOYMENTS OUTSIDE THE FEDERAL TERRITORY

A. Issue: What limitations exist in German law on the permissibility of troop deployments outside of the Federal territory, in particular, outside the NATO region, as described in article 6 of the North Atlantic Treaty?

B. Conclusion: The Constitution of the Federal Republic of Germany contains no specific provision that prohibits the deployment of German troops outside the Federal territory. The authorities agree that such deployment would be constitutional within the limits foreseen in article 6 of the North Atlantic Treaty, but it can be argued that a historical interpretation of the Constitution and an interpretation of its articles 26, 87 a, paragraph 2 and 115 a–115 1 prohibit a deployment of German troops ouside the German territory and the NATO region, unless such deployment is undertaken to defend an attack on Germany or its NATO partners. However, these provisions could also be interpreted to the effect that they contain no such general prohibition, and that such deployment is constitutional, unless undertaken in a manner apt to disturb the peace or prepare for an act of aggression and with specific intent of achieving these goals.

C. Analysis:

1. Arguments in support of unconstitutionality.

Statements made in the second half of 1980 by Chancellor Helmut Schmidt [1] that it would be unconstitutional for German troops to be deployed in the Persian Gulf have not included an analysis of these Constitutional issues; however, the following arguments can be made in support of his position: [2]

Historical interpretation

When the Constitution was drafted in 1948, it excluded the issue of defense almost entirely.[3] Aside from certain provisions touching on the military, such as the right of individuals to be conscientious objectors, it contained no legislative or executive powers over defense and no system for the formation of armed forces. These omissions were in keeping with both the intent of the population and with the will of the occupying powers. The Constitution's preamble contains a peace-loving ideology, and article 26 renders acts of aggression and their preparation, in particular a war of aggression, unconstitutional and mandates the legislature to make such acts a punishable offense. Constitutional provisions for the reconstruction of a defense system were only included in 1954 and 1956,[4] as a consequence of Germany's accession to the North Atlantic Treaty. The legislative history of the Constitution reveals the pacifist ideology of some of its drafters,[5] and a strictly historical interpretation of the Constitution might severely limit the capacity of the German Government to engage in military activities. The legislative materials show particularly, in the discussion of article 26 of the Constitution (see below), that some of its drafters considered that anti-military safeguards as going well beyond the inclusion of a provision that prohibits the waging of war.[6]

Article 26 of the Constitution

Another argument for the unconstitutionality of troop deployments outside of the NATO region can be made from article 26,[7] paragraph 1, of the Constitution. It provides as follows:

Acts tending to and undertaken with the intent to disturb the peaceful relations between nations, especially to prepare for an aggressive war, shall be unconstitutional. They shall be made a punishable offense.

A rigid interpretation of this Article could justify doubts on the constitutionality of troop deployments aside from the defense of the German territory and that of its NATO partners.

Support for such a position is contained in a statement by Karl Hernekamp.[8] In discussing article 87a, paragraph 2, of the Constitution he states:

Article 87a, paragraph 2, prevents the *Bundestag* [9] from deciding the occasion for a deployment of troops at its own discretion. Instead, this power is reserved to the constitution-amending legislature. Because of the absolute barrier of the prohibition of aggression (article 26 in conjunction with article 1, paragraph 2, and article 79, paragraph 3) such authorization can concern only international mandates to establish order (for example, German participation in United Nations troop contingents) or deployment possibilities within the territory.

Also, there is no doubt that acts that could touch on the prohibitions of article 26, paragraph 1, are subject to judicial review by the Constitutional Court. Menzel, the renowned constitutional scholar, states this view as follows: [10]

The ascertainment of whether an endangerment of the peaceful coexistence of the nations—not purely of peace—lies within the free judicial determination which, however, must be exercised under consideration of the practice of foreign states.

In interpreting article 26, paragraph 1, Hernekamp characterizes the peaceful coexistence envisioned by this provision as a coexistence characterized by the absence of any military force. He further states that the mandate to keep peace does not go beyond the prohibition to use force found in the Charter of the United Nations.[11]

Article 87a, paragraph 2, of the Constitution

Yet another argument for the unconstitutionality of German troop deployments outside the NATO region can be made on the

Footnotes at end of article.

basis of article 87a, paragraph 2, which provides:

Apart from defence, the Armed Forces may only be used to the extent explicitly permitted by this Basic Law.

This provision was included in the Constitution by an amendment in 1968 that primarily provides the acceptable occasions when a state of defense or of tension may be declared in Germany and outlines the concomitant issues of power of command, declaration of war, and the entering into effect of emergency powers.[12] Whereas most commentators agree that the primary purpose of article 87a, paragraph 2, looks inward, i.e., to refer to the permitted uses of the Armed Forces inside of Germany in the manner permitted by various constitutional provisions,[13] a limitation of the peacetime deployment of troops abroad may be found in the term defense.

One constitutional scholar, E. Klein, investigated this issue on the occasion of a potential German participation in armed peacekeeping missions of the United Nations.[14] He examined the meaning of the term defense in this constitutional provision; and, since there is no legal definition in the Constitution itself, he rejected a very restrictive interpretation that would permit defense measures only after a state of defense is declared (article 115a, see below). But, he also found that the term defense cannot justify participation in military operations anywhere in the world outside of a direct relationship to territorial defense or the defense of an ally.

Article 115a of the Constitution

Article 115a of the Constitution provides that a state of defense is to be declared in a formal parliamentary proceeding, and only upon its declaration may certain measures described in sections 115a through 115l enter into effect. (These measures include a transition of the command over the armed forces from the Federal Minister of Defense to the Federal Chancellor.) A state of defense can be declared only if the Federal territory is being attacked by an armed force or if such an attack is imminent.

This provision clearly aims at establishing when a transition from peacetime law to emergency law can take place, and there is a consensus that measures of defense as envisioned in article 87a, paragraph 2, can be undertaken without such a declaration.[15] However, in analyzing the possibility of German participation in UN peacekeeping missions, Klein found such participation at least politically questionable; it might violate the intent of article 115a that stresses parliamentary participation, since such peacekeeping actions might lead to more serious involvements of the Federal Republic without the parliament ever having been involved in the decision-making process.[16]

2. Arguments upholding the constitutionality of troop deployments.

a. A recent analysis of the issue:

Chancellor Schmidt's statements on the constitutional limitations with regard to a potential troop deployment in the Persian Gulf have been criticized in several recent newspaper articles. One very interesting analysis of the Constitution was undertaken by G. Gillessen, in an article in the Frankfurter Allgemeine Zeitung, entitled "The Basic Law does not mention the Indian Ocean."[17] His conclusion that a participation of the Federal Republic in an international armed endeavor outside the NATO region is permitted under the Constitution is based on the following reasoning:

Historical interpretation

He concedes that a historical interpretation of the Constitution reveals that the provisions dealing with defense were issued primarily under the assumption that they will deal only with territorial defense, but he rejects a historical interpretation as the proper ultimate analysis.

Article 115a

He then proceeds to examine the provisions of article 115a, i.e., the formal declaration of a state of defense as a prerequisite for emergency powers; however, he sees the exclusive purpose of this provision in deciding when a peacetime system of government has to be replaced by emergency measures.

Article 87a and 26

In analyzing article 87a of the Constitution, Gillessen finds that its concept of defense is limited only by the prohibitions of aggressive acts according to article 26. To determine the content of article 26, he relies on some statements made in a very authoritative commentary to the Constitution, i.e., that published by Maunz, Dürig, Herzog, and Scholz.[18] He summarizes their comments as follows:

The Basic Law prohibits the Federal Republic from taking an attitude hostile to peace. In a crisis the organs of state retain considerable leeway in judging the political situation. Whether their political, diplomatic, or military measures hope to prevent a crisis development in the individual case or whether they deliberately contribute to its occurrence because they are convinced that it is inevitable in view of the malice of the other side, remains of no consequence as long as they themselves are free from a malicious intent bent on disturbing the peace. Therefore, in judging actual defense policy from the point of view of constitutional law, the intent is decisive, not the form of military measures or their preparation. In this context, defense is to be understood as the opposite of a war of aggression.

Article 24

Gillessen then proceeds to find in the German participation in NATO and its constitutional authorizations in article 24 of the Constitution proof that defense can mean more than mere territorial defense. Article 24, paragraph 2, provides as follows:

For the maintenance of peace, the Federation may enter a system of mutual collective security. In doing so it will consent to such limitations upon its rights of sovereignty as will bring about and secure a peaceful and lasting order in Europe and among the nations of the world.

He finds that the Constitution would not prohibit the Federal Republic from instigating an expansion of the NATO operational region in the NATO Council, and it would not prohibit the Federal Republic from making a political show of its Armed Forces outside the NATO region, as long as this action is undertaken with a peaceful intent. He also mentions German troop deployments that have been undertaken within the NATO regions, i.e., in North Norway and near the Greco-Turkish border. The constitutionality of these deployments was not questioned.

Issues of international law

From the point of view of international law, Gillessen equates the blocking of maritime straits for the delivery of oil to a maritime blockade of a European port. He considers measures to overcome these problems as permissible under international law.[19]

Furthermore, he states that since the NATO region is not a constitutionally defined term, deployments outside the area are also permissible.

Political versus legal decision

Gillessen concludes by finding that statements on the constitutional prohibitions for overseas troop deployments shift the discussion from the political forum where it belongs to the legal forum, thereby cutting off a desirable political debate.

b. Other considerations:

Historical interpretation

Whereas the Constitution as originally enacted in 1949 contained no provisions for a system of defense, shortly after its enactment both the German Government and the occupation powers found it desirable that the Federal Republic be rearmed in order to contribute to the defense of Western Europe. Originally it was envisioned that this be accomplished within the framework of the European Defense Community. This project ultimately failed because France did not want to relinquish the amount of sovereignty called for in this proposal. Ultimately, the Federal Republic of Germany acceded to the North Atlantic Treaty in 1955.[20]

The proposed German defense contribution led to an intense constitutional struggle during which the Constitutional Court was invoked several times; and numerous briefs, responses, and advisory opinions were written. This well-documented constitutional dispute showed clearly that at that time, i.e., 1950–1954, the opinions of scholars and politicians were sharply divided on how pacifist and opposed to a system of defense the Constitution actually was.[21]

2. Judicial review of foreign policy decisions.

In the above described dispute, it is interesting to note that the Constitutional Court, when called upon to decide the issue, which according to German law was justiciable, in fact delayed rendering a substantive decision until the issue was resolved politically.[22]

The Constitutional Court was again, thereafter, called upon to review a foreign policy decision, i.e., the constitutionality of the Saar Agreement. The Court confirmed the policy of the Government.[23] A similar occasion arose in 1958 when the issue of the permissibility of nuclear weapons on German soil (within NATO) was at stake. In this case the Court acted very quickly to help the Government by prohibiting an informal phebiscite planned in some of the laender. These decisions may justify the general statement that the Court will tend not to interfere in the Government's conduct of foreign policy. Whereas some scholars criticize the positions that the Court took,[24] others find its self restraint commendable.[25]

Article 26

Since the interpretation of article 26 of the Constitution is a key issue in deciding the constitutionality of troop deployment abroad, whether it is considered as the only criterion or in conjunction with other constitutional provisions, a closer look at the very perceptive analysis of this provision as contained in the Maunz-Durig Commentary to the Constitution is of interest.[26] This analysis is remarkable since it investigates article 26 in the light of political realities.

These comments stress that article 26 must be interpreted in a restrictive manner, since otherwise the very broad wording contained therein would bring it close to an absolute prohibition of war, which was not the intent of the framers. This commentary points out the difficulties of distinguishing a war of aggression from a defensive one in international law, and the even greater difficulties in deciding which actions outside of war should be characterized as disturbing peaceful relations. It continues to state that:

Without doubt hardly any act is conceivable that could not lead in some way to international discord. If a methodology adopted in its interpretation that, in accordance with the wording, takes into consideration all possible results and this were coupled with the principle of causation of condition sine qua non, almost any public and private activity would become unconstitutional.

The Commentary then proceeds to interpret the provision as considering the war of aggression as the main and typical example of a prohibited act and that the Constitu-

Footnotes at end of article.

tion does not prohibit any use of international means of pressure, but only a malicious kindling of the flames.

In analyzing the hostile motive required to make policy decisions unconstitutional, the Commentary states that the Constitution merely prohibits an attitude that is opposed to peace. But the Constitution does not prohibit otherwise neutral acts merely because hostile states could make them the occasion to start a dispute. As long as the state organs of the Federal Republic lack the peace-disturbing intent, their actions remain constitutional, even when a crisis is deliberately brought to a climax, if this is considered as inevitable in view of the conduct of the opponents.

Article 87a and 115a

A convincing opinion on the meaning of defense as stated in article 87a, paragraph 2, is given by K. Ipsen.[27] He represents the view that defense measures do not necessarily require a state of defense according to article 115a or a state of tension according to article 80a, since this is not stated in the Constitution. He shows the absurdity of the opposite view by describing a hypothetical case: If a naval vessel of the Federal Republic were attacked on the high seas, this would not constitute a state of defense, yet defense measures to counteract it would be needed. In his opinion, external defensive measures are permissible if they do not violate article 26, when an attack according to article 6 of the North Atlantic Treaty is given, and the attack makes collective or individual defense permissible according to article 51 of the United Nations Charter.

He then notes that the power to set such defensive acts lies with the executive branch of government. From the legislative history of article 115 a and its predecessor, article 59 a (now repealed), he derives that the lack of parliamentary involvement in the setting of external defensive acts according to article 87 a, paragraph 2, was not an oversight of the drafters but intended.

3. Political outlook:

Whereas there is considerable room for dispute about the existence of constitutional limits for an involvement of German troops in the Persian Gulf, most German politicians consider such an involvement as politically unwise. For instance, the German candidate for Chancellor of the Christian Democratic Union and Christian Socialist Union in the 1980 elections stated in September of 1980 and in January of 1980 that the protection of the oil deliveries from the Persian Gulf region was of concern to Germany, but that these interests should be protected by major maritime powers. He felt that Germany should not engage itself outside the NATO region but perhaps assume additional NATO responsibilities to compensate [28] for its lack of action in the Persian Gulf.

II. LIMITATIONS ON THE DEVELOPMENT OF WEAPONS BY THE FEDERAL REPUBLIC

Limitations concerning the production of weapons exist in the Federal Republic in the Constitution, in statutory law, and through international treaties.

A. Constitutional Limits:

Article 26, paragraph 2 of the Constitution provides the following:

Weapons designed for warfare may not be manufactured, transported, or marketed except with the permission of a Federal Law. Details shall be regulated by a Federal Law.

B. Limits by international agreements:

The Federal Republic of Germany is bound by international agreeemnt to refrain from manufacturing in its territory nuclear, chemical, and biological weapons. The Federal Republic is also bound by international agreement to refrain from producing certain other weapons such as warships and long-range missiles. This latter prohibition, however, is subject to modification of the parties to the agreement.

These restrictions came into force in the course of Germany's accession to the Brussels Treaty and the North Atlantic Treaty and it was accomplished in a series of Protocols and Appendices that were signed in Paris on October 23, 1954.[29] In Appendix I to Protocol No. II., the Federal Chancellor of the Federal Republic declared that the Federal Republic will refrain from manufacturing in its territory atomic, chemical, and biological weapons as described in Appendix II. He also declared in Appendix I that the Federal Republic will refrain from manufacturing in its territory the weapons described in Appendix III, including long-range missiles, influence missiles, and warships, with the exception of smaller ships for defense purposes, and bomber aircraft. Modifications concerning these armaments, however, can be made by the Council of Western European Union. In Protocol No. III the contracting parties, i.e., the members of the Brussels Treaty, accepted the declaration of the German Chancellor.

The armaments described in Appendix III have been modified several times in the manner foreseen by the agreement.[30]

Further limitations on the production of weapons are also found in the following treaties to which the Federal Republic is a party:

Treaty on the Prohibition of the Emplacement of Nuclear Weapons and other Weapons of Mass Destruction in the Sea-Bed and the Ocean Floor and in the Subsoil thereof; [31]

Treaty Banning Nuclear Weapon Tests in the Atmosphere, in Outer Space, and Under Water; [32]

Treaty on the Non-Proliferation of Nuclear Weapons.[33]

C. Limits of Statutory Law:

In compliance with article 26, paragraph 2, of the Constitution, the Statute on the Control of War Weapons was enacted in 1961.[34] It describes as war weapons those listed in an Appendix to the Statute. Part A of the Appendix describes the weapons covered by Protocol III modifying the Brussels Treaty (see supra page 16), and Part B contains a detailed and exhaustive list of other substances and objects that are considered as war weapons in Germany. The statute further provides the administrative framework for the authorizations required for any production, marketing, or transportation of the listed weapons within the territory of the Federal Republic.

III. CONSTITUTIONAL LIMITS ON SPENDING LEVELS FOR DEFENSE

Like all expenditures of the Federation, the expenditures for defense purposes are subject to the general budgeting provisions of articles 104a–115 of the Constitution. Article 110 provides that all expenditures of the Federal Government shall be included in the budget that must be enacted into law by the Federal parliament. The budget may be enacted either for one year or for longer periods. Once enacted, the budget is binding on the executive department as statutory law. However, articles 111 and 112 contain provisions enabling the Government to continue spending if the budget is not passed in a timely way and that permit Government to incur overruns. A constitutional limitation of expenditures foreseen in the budget is contained in article 109 of the Constitution and provides that the fiscal planning of the Federation must take due account of the requirements of overall economic equilibrium.

In addition to these general provisions concerning the budget, the Constitution contains a specific provision for the manner in which the armed forces must be reflected in the budget. Article 87a, paragraph 1, provides that the numerical strength and the organizational structure of the armed forces shall be shown in the budget.

QUORUM CALL

Mr. EXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AT LAST A NEWSPAPER REPORT GIVES THE DAIRY FARMER HIS DUE

Mr. PROXMIRE. Mr. President, after more than 20 years in this body I have learned that many of the most important fights are won or lost—not on their merits and not necessarily on who does the best lobbying job—by who gets there fustest with the mostest, to paraphrase General Forrest's observation. No, often the big fights are won in the press, the media, by the perception the American public gets from what they read in their morning paper and see on their evening TV news.

And on this bill—this dairy price adjustment bill, I have despaired because until one story appeared one day last week the media had been relentlessly, brutally, unanimously unfair to the dairy farmer. The New York Times, the Washington Post, even Wisconsin papers had run one grossly unfair, one-sided story after another reporting that the 80-percent price support was too costly to the taxpayer and the consumer and that it was making the dairy farmer rich. CBS news did a classic one-sided hatchet job on the dairy farmer. And that pained me because the CBS morning news is one of the most competent and fairest on the air. The only farm CBS showed in their report on the dairy price support milk fight was a New York State farm with 300 cows. Three hundred! That happens to be exactly 10 times as big a herd as the average dairy farm in this country on which there are 30 cows.

You will not find 1 dairy farm in 100 or in 1,000 that has 300 cows.

The impression the TV viewer received was that all dairy farmers are rich and prosperous and producing too much milk because the price is so high.

And then last week, a story appeared, not in a Wisconsin publication, or a farm publication, but in the Wall Street Journal—the Wall Street Journal, Mr. President—that told the truth about the dairy farmer—how very hard and long he works, how remarkably efficient he is, what an investment he makes, and what a unique sacrifice he already makes at present prices to make a living.

Mr. President, I had been prepared to come on the floor and challenge the newspapers or the TV to send a reporter out to a typical dairy farm, to get up with the farmer at the crack of dawn and out to a cold barn, to watch the remarkable effort of the farmer, his wife and his kids as they do the hard, tough, skillful job that dairy farming requires. I was intending to point out how papers send reporters to Afghanistan or El Salvador to cover controversial stories far removed from our borders. But here is a great story right here in America that no one had told.

Last Friday, Lawrence Ingrassia of the Wall Street Journal told the story.

Mr. President, that story is so impressive that I do not intend simply to put it into the RECORD but to read it verbatim so Members of the Congress will get some taste, some smell, some understanding of why the dairy farmer deserves and needs a break.

I point out that this story reports on a dairy farmer who happens to disagree with me on the basic issue in the pending bill—the continuation of the 80-percent price support level. We obviously will lose on that issue tomorrow, the bill will, unfortunately, pass, but the story I am about to read indicates why this action cutting a third of the dairy farmer's income will be a mistake.

The bill will probably pass overwhelmingly, maybe by a voice vote.

The story I am about to read indicates why this action cutting one-third of the dairy farmer's income will be a mistake.

The story, as I say, is written by Lawrence Ingrassia, a reporter I do not know. I do not know his work, but he did a bangup job here, and if I had any Pulitzer Prize, I would give it to him.

The report is from Jim Falls, Wisc.

DESPITE THE DRUDGERY, A MIDWEST DAIRYMAN STICKS WITH HIS COWS—CALVIN MAIER LOVES THE LIFE, BUT MANY OTHERS FORSAKE ETERNAL DAILY MILKINGS—BAD NEWS FROM WASHINGTON

(By Lawrence Ingrassia)

JIM FALLS, WIS.—Calvin Maier milked his first cow in 1940, when it was done by hand. Fields were plowed with horses, and manure was shoveled out of the barn.

Machines do all this today, but one thing hasn't changed. The cows must still be milked morning and night, seven days a week, 365 days a year. Even with modern conveniences, Mr. Maier is tied to his farm just as his father was.

He has had one vacation in 15 years and usually gets away for only a couple of weekends a year. The 45-year-old dairyman spends so much time with his cows, he says matter-of-factly, that "you could blindfold me and sit me beside a cow, and if I felt her udder I could very likely tell you her name."

Despite laboring long hours, often in bone-

chilling cold or sweltering heat, in a dreary and pungent barn. Mr. Maier loves dairy farming. But fewer and fewer dairy farmers are up to this daily drudgery, especially when they see many of their country cousins—farmers who raise only grain, for instance—heading to Florida for fun in the sun each winter and jetting to farm conventions now and then.

Farmers have been getting out of dairying in droves. There are currently about 170,000 U.S. dairy farms, down 35% since 1969, and a proposal by the Reagan administration to hold down dairy price supports could hasten the departure of more dairymen.

That doesn't mean that the children of America will go without milk. Although fewer, the remaining dairymen have become so efficient that they produce more milk than Americans drink. Rising farm productivity in the U.S. is well known, but perhaps nowhere is it more evident than on dairy farms. The average bossy produced 11,813 pounds of milk last year, up from 5,842 pounds in 1955, because of improved breeding and feeding.

That is more than doubling the production per cow of milk, from 5,842 pounds to 11,813 pounds in the last 25 years because of improved breeding and feeding.

That is not just automatic. That is because the dairy farmer is smart, because he is efficient, because he has done a great job.

For all the complaints about sagging farm income, dairymen have prospered. Increased productivity and higher prices helped raise the average profit before taxes of Wisconsin dairy farmers to $19,635 in 1979, up 76 percent from 1977, according to Truman Graf, a University of Wisconsin agriculture economist.

Mr. President, I hesitate on that point. They say prospered. We should put that in quotes. Nineteen thousand dollars is a nice income. Most people in America do not make $19,000.

Mr. President, this is not the income of one person. This is the income of about six people who work very hard, who work an average, according to the University of Wisconsin, of 130 to 150 hours per week for that.

They make an investment of $250,000. The return on that investment is nil.

Their income is $2.89 per hour of work, skilled work, hard work, tough work.

WATCHING WASHINGTON

But President Reagan's plan to eliminate a scheduled April 1 increase in dairy price supports would skim the cream off the farmers' profits. Under the program, the price of milk rises with inflation because the government offers to buy milk at the support price—which lately has been increased twice a year—and thus forces other buyers to meet that price.

Forgoing the April price-support increase would cost Wisconsin dairymen, for example, an average of $5,850 a year, Prof. Graf estimates.

I want to point out that $5,850 a year is a one-third cut in their income. No other group in America is being asked to take a one-third cut in their income because of the budget cuts this year. It is a one-third cut in their net income. They will drop $2 an hour for the hours they put in.

But it also would save money for shoppers. It's estimated that if Congress rejects Mr. Reagan's proposal milk prices will rise about 7½ cents a gallon, cheese 9 cents a pound and butter some 10 cents a pound. Despite heavy dairy-lobby opposition, the proposal is moving through the House and Senate and is expected to be approved by April 1. The House Agriculture Committee approved the Reagan plan yesterday.

In the past, any threat to price supports would have touched off intense lobbying by the politically potent dairy industry. But this time the protests have been somewhat muted, at least in some segments of the industry. With high prices encouraging dairymen to produce too much milk. "Most dairy leaders in the country recognize that some adjustments must be made," concedes Hollis Hatfield, director of the American Farm Bureau Federation's dairy department.

Mr. Maier reluctantly agrees. President Reagan's plan won't so much reduce his income as keep him from making up to $7,000 more in 1981 (his milk production is a little higher than average). "I'd like higher prices, sure, but I won't go out of business because of it," he adds.

Mr. Ingrassio is wrong. It will reduce his income. As the economist from the University of Wisconsin pointed out, his analysis shows it will cut his income by $5,850 a year.

PAST 2 YEARS WERE GOOD

Indeed, 1979 and 1980 were two of Mr. Maier's best years, with net income of about $24,000 a year.

I shall point out in a minute that this is not a typical farm. This is a farm which has 50 cows, which is about one-third more than the average dairy farm in Wisconsin and two-thirds more than the average dairy farm in the country.

Out of Maier's total sales of about $127,000 last year (including $103,000 from the sale of milk and $24,000 from the sale of cattle for meat and milk production) come all his cash operating expenses, plus depreciation on everything from the barn to the family pickup truck.

That is important. Anybody who has ever been in a business knows that you do not take your gross and figure that that is your net. You have to pay for your equipment over time. You have to pay your taxes, you have to pay all kinds of expenditures. When the dairy farmer is through with that, as I say, he has a very, pitifully small hourly income.

In addition, like any small businessman, Mr. Maier can deduct from taxable income the costs of such combined business-personal expenses as trips to state fairs, part of his telephone and electric bills and $110 a month in allowances his children get for their work. "I guess we make a little money," Mr. Maier says, "but we're entitled to it. It isn't a get-rich-quick scheme. I got ahead because I'm out here doing a man and a half's work all the time."

Mr. Maier bought his farm here in 1966, after saving enough money by working in dairies as a foreman and later as a government inspector. He confesses to being a country boy at heart. "A $100,000 salary wouldn't be enough to get me to live in Chicago," he says.

Mr. Maier paid $39,000 for 160 acres, an aging farmhouse, a barn, a machine shed, a small silo and 30 black-and-white Holstein cows, to which he added five cows that had been kept for him on his father's farm nearby. The Maiers now milk 50 cows and farm 240 acres; they have plowed nearly all their earnings back into their farm. It's worth about $350,000 today, Mr. Maier figures. His debt is $70,000.

For the Maiers, and for many farmers here in the rolling dairy country of northwestern Wisconsin, dairying isn't just a way to make a living; it's a way of life. In Jim Falls, a hamlet of about 150 and home of Falls Dairy Co., such evening activities as Lion's Club dinner meetings and school parent-teacher conferences never start before 8 p.m., so farmers have time to finish their chores.

Mr. MOYNIHAN. Will the Senator from Wisconsin yield on that point?

Mr. PROXMIRE. Yes, Mr. President, I am delighted to yield.

Mr. MOYNIHAN. The distinguished Senator knows that my home in New York is on a milk farm. I may, in some formulation, be thought the only dairy farmer in the Senate. I am not a dairy farmer; I am privileged to live among them in Delaware County. The farm we bought years ago, which has been the base of our family ever since, is used by my neighbor, Bernald Briggs. I met young Mr. Briggs just at a time, just after President Kennedy's assassination, that we went up and bought this place. He was just starting out in business, in farming. He asked if he could rent our farm for a nominal fee, which he did. He uses the barns, he uses the fields.

He was a young man, then. He is a young man now, in some respects. He soon thereafter married and went for a honeymoon in Niagara Falls. That would be, I believe, 1964. That was the last vacation, to my knowledge, Bernald Briggs has ever had. It may have been the last day he has had off. It has to have been the last day he had off, because he milks every day. He milks on Christmas morning, he milks on New Year's Eve.

He has five wonderful young boys who help him now, who can begin to drive tractors and do things like that. His wife works in the fields alongside him, doing the hard labor in those fields.

The winters in upstate New York are not any milder than those in Wisconsin. They are bitter. At 6 o'clock in the morning, it is bitter cold. And you milk; you make your way, you break your way. The ice is in the pails. You milk at 6. You feed all day, work all afternoon, then milk again and finally get to bed in order to get up at 5:30 in the morning. It never stops.

Bernald Briggs has never taken a penny from any one, not a nickel from any one. He has a fine family to show, a good family to show. But, my Lord, the work that goes into milk farming. No other work in America is the same. Nobody—coal miners have Sundays off, steeplejacks get down from the top sometimes. Even Senators have an occasional recess. Milk farmers never get a day. I do not think anybody appreciates how that work is done. I wanted to share that.

Mr. PROXMIRE. Mr. President, I want to thank my good friend from New York. This is a facet of the Moynihan personal experience I did not know about. I am glad to hear it. I know, of course, that he has been a great diplomat at the United Nations, he has served in various capacities with great distinction in the executive branch; he is a superlative U.S. Senator, a great professor. I had no idea he had a dairy farm. He rises even higher in my estimation.

You are now at the apex, PAT.

Mr. President, I think what Senator MOYNIHAN has reported to us is the truth. Anybody who has been out to a dairy

farm, who has worked on a dairy farm, knows this. I had the privilege, a few years ago, of working on a dairy farm in Marathon, Wis., the biggest dairy farm in the country. It was an experience, believe me, an experience I shall never forget. I have worked at a foundry all day; that is tough. But working on a dairy farm is so unrelenting, so steady, so constant.

I want to go on to make that point.

The Maier children belong to the Junior Holstein Association, not the Boy or Girl Scouts. Instead of golfing in the little spare time they have, Mr. Maier and his friends gather at meetings of the Dairy Herd Improvement Association.

Running the farm is a family affair. About 6 o'clock each morning, a bleary-eyed Mr. Maier shouts upstairs to get Tom, 16, Shari, 14, and Steve, 13, up and out to the barn. (Mary, nine, and Tim, five, get to sleep longer, but they will help later.) Tammy, 19, goes to college but has to pitch in on weekends when she's home. Mr. Maier's wife, Eunice, 42, handles the household chores. She worked in the barn too when the children were younger.

The Maiers spend endless hours in the musty, cramped barn, which never gets above a nippy 48 degrees or so in winter and always smells of cowhide and manure. The Holsteins are waiting patiently every morning in their narrow, straw-filled stalls. Dairy cows must be milked twice a day at about the same time. Otherwise their udders, engorged with milk, hurt and they bellow for relief.

They also dry up, of course, and you lose your producer.

SOAP AND WATER

Even with automatic milking machines, the task is tiring and time-consuming. Tom, who helps Mr. Maier with the milking, first washes each cow's udder to meet strict sanitation standards. Each milking machine (the Maiers have four) has four stainless steel suction cups that must be attached individually to the cow's teats. The milk is pumped through plastic tubes into overhead pipes, which carry it to a refrigerated tank in a separate clean room in the barn. It takes five to ten minutes to milk each cow, or a minimum of about two hours in both the morning and evening.

All the while, Steve and Shari lug 50-pound bales of hay to feed about 60 calves and heifers that are raised as replacements. The children head into the house at 7:30 to get ready for school. Their evening chores start at 4:30 and last till about 9, with an hour off for supper at 5:30.

The Maier children sometimes grumble about their never-ending duties. "It makes me mad," Shari says. "After school some of my friends go swimming or work out at the gymnasium. They go to movies all the time." Tom and Steve play football in the fall, and Shari is the manager of a girls' basketball team in the winter, but they don't get out of their chores. They just end up working later.

And there's more to dairy farming than milking and feeding cows. The barn must be cleaned, calves checked, machines fixed, new straw bedding put down and fields plowed, planted, fertilized and harvested. Each winter morning Mr. Maier spends a bone-numbing hour on his tractor spreading manure on his fields. Inside the barn a conveyer belt in a gutter, placed strategically behind the cows, carries it to the spreader.

ARTIFICIAL BREEDING

Like most dairymen, Mr. Maier has spent years improving his herd through breeding. His cows average 17,070 pounds of milk a year, compared with 12,500 pounds in 1970. To keep track of production and for help in breeding, Mr. Maier gets a computer printout each month (for $75) showing such statistics as how much milk and butterfat each cow is producing, the day it last calved and its age.

Each cow is bred every year, by artificial insemination. Mr. Maier selects from a list put out by vendors the bull semen he thinks will produce the best calf out of each cow. The cows are milked until six to eight weeks before calving, when they are allowed to "go dry" so they can build up their strength before delivery.

About three-fourths of Mr. Maier's cows are four years old or younger, but his oldest cow, 10-year-old Flec, is one of the best; she yields more than 20,800 pounds of milk a year. And one of her granddaughters, Fancy, a five-year-old, is the best producer of all.

Mr. Maier sells about 25 percent of his cows each year, replacing the poorer producers with offspring of his better cows. One hamburger candidate this spring; Gail, who's producing about 14,000 pounds of milk a year. But Faith, a two-year-old great-granddaughter of Flec who is producing at a rate of 11,600 pounds a year, will be given another year to improve. "When a cow's got a good family, you don't kick her out without giving her a chance," he explains.

HOME EVERY DAY BY 4

Modern equipment enables the Maiers to run a bigger farm now with the same amount of work it took before. But the size also makes it hard to get away because it would take several outsiders to run the farm. This rankles Mrs. Maier, who grew up in Colfax, about 30 miles west of here. Usually a jovial woman, she talks glumly about the year-round demands of dairying.

"When we get together (with my family) for the holidays, we have to come home at 4 o'clock to milk the cows," Mrs. Maier says. "My sisters (who aren't married to farmers) have a different kind of life. Two of them just came back from weekends in Las Vegas."

Since buying the farm the Maiers have taken just one vacation, to Colorado in 1978 as chaperons for a group of 4H children; Tammy stayed home and ran the farm with two relatives. Most years the Maiers get away for just a couple of weekends to the Minnesota and Wisconsin state fairs, usually leaving Tammy and Tom behind.

For Mr. Maier, who says he has few interests outside of dairying, this life is worth enduring the austerity. He cherishes being his own boss and watching his children grow up. Five-year-old Tim, for example, faithfully follows his father throughout the day, craning to see Mr. Maier help a cow deliver her calf one moment and tossing hay with a pitchfork the next. "I'll know my boy better than any father in town ever will," he says proudly.

Mr. Maier's zest for dairying has rubbed off on Tammy and Tom, who plan to dairy farm, the grueling schedule notwithstanding. For them, going into dairy farming is natural." "I never had very much free time when I was a kid, so I don't think I'll miss it when I'm older," says Tom. "I would rather be doing something in the country than sitting behind a desk." Tammy adds, "I don't know anything else but dairy farming."

Mr. President, that story by Lawrence Ingrassia in the Wall Street Journal is a tribute to the Wall Street Journal and to Mr. Ingrassia.

As I have said many times we have the best newspapers in the world, and there is no question about it. I am still working on my doctoral dissertation which I started more than 30 years ago on developing standards on evaluating the political content of the American newspaper, and I have learned that the newspapers have been improved enormously in this country in the last 100 years, and they are far better than they are in any other country in the world, but they are very far short in reporting stories of this kind.

So, for the life of me I cannot understand why it took so long with all the reports they have on this dairy bill before us before we finally found a newspaper and a reporter with the ingenuity to go out to a dairy farm and see what it is, see how tough that life is, how hard those people work and how enormously efficient they are.

Talk about intellect and capital. When we lose these people who understand equipment, and believe me that equipment is hard to maintain, who understand animals and the health of those animals is the very lifeblood of their operation, who understand soil chemistry and understand how to operate a farm, how to manage a farm, how to keep books, we lose something that is very precious in this country and very vital.

There is a great difference between this country and the Soviet Union. The difference is not in our factories, it is not in our commerce; it is in our agriculture. We have 4 percent of our population on farms and the Soviet Union has 30 percent.

It is because these people own the farm. They own their animals. They own their equipment. They have this marvelous motivation and are doing a superb job and simply not getting the kind of recognition or the kind of support they deserve.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a comment?

Mr. PROXMIRE. I yield.

Mr. MOYNIHAN. Mr. President, the gentleman, Mr. Maier, who the Senator was describing, seems to be getting about 17,000 pounds a year out of his herd, his milkers. If I am not mistaken, a decade ago a good farmer, as he obviously is, would have been getting about 12,000 pounds.

Mr. PROXMIRE. That is exactly right. He got about 12,000 a decade ago.

As I said earlier, the typical farmer in 1950 was getting between 5,000 and 6,000 pounds, and today the typical farmer—this is an exceptional one—gets a little over 11,000 pounds. So there has been more than a doubling in the efficiency of our dairy farmers. But this farmer is doing quite well but doing well because he is extraordinary. If he were in business with this kind of skill, there is no telling what he would be doing.

Mr. MOYNIHAN. How many evenings have we spent in the Chamber in the last 4 years talking about the decline in productivity in America? And here is one of the most elemental of all efforts. I mean there is no more ancient enterprise in the agrarian, be they in the Ganges Valley or northern Wisconsin, than looking after cattle and living off the milk, meat, and hide. There is this most spectacular change and improvement in productivity in the American economy in this whole period. These people are superb technicians as well as great farmers.

One has to like those cattle and we also have to understand their biology.

Mr. PROXMIRE. I thank my good friend from New York very, very much.

I once again pay tribute to Lawrence Ingrassia and the Wall Street Journal. I think they are doing a real service. I think if the people of this country were told this story more fully they might have had a chance to maintain 80-percent price supports. I think one can make a devastating case on that issue, but it is gone. The Agriculture Committee has acted on it. There is no point in me trying to blow smoke. We are going to lose on that issue.

I hope when we come to the big bill, the major agriculture bill and decide on what kind of a price support system we are going to have for the dairy farmers that we recognize this is the program that has been in effect since 1949. It has worked and worked extremely well.

The Federal Government does not do everything wrong. They do many things wrong but not this. The farm credit program, the technical assistance program, the county agent program, the research programs, and the farm price support programs make it possible for family farms to remain. These are good programs that deserve our support in the longrun.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, as there appears to be a moment's pause in the Senate's discussion today of the milk price support question, I shall continue some of the remarks I was making in an exchange with my distinguished friend the senior Senator from Wisconsin.

It may indeed be the fact that I am the only dairy farmer in the Senate at this point. It is also the fact that I would be presuming on the credulity of the Chamber to suggest that I actually deserve so honorific a title. But it is the case that for almost 20 years now, our home has been a dairy farm in Delaware County, in the State of New York.

This was bought with the purpose of spending such time as we could get out of the city into the country. Its great attraction to me was that there was an old, one-room schoolhouse on the corner of McDougal Road and Prosser Hollow Road which had been built in 1835 or so, with the understanding that when it ceased to be used as a schoolhouse, it would revert to the farm from which a little snippet of land was taken. It was used as a one-room schoolhouse until 1945, when the central school was built in Davenport.

So everything a person could ask in the way of peace and quiet, to read and to write, was there at the crossroads, and that was an attraction to me. To my wife, the attraction was the herb garden she was soon able to plan, as well as the glories of the wild flowers and the birds and the life generally.

To our children, the glory of that farm were the cows, which continued—as they have done for a century and a half at least—to use the meadows and to go up the hillside in the morning, to come back down at night, and to be fed not only from the grass that grows naturally but also from the corn and silage that is grown in the meadowlands by the farmers using this land.

In the course of what is now almost 20 years, I have come to know that hollow very well, I think. I am listed in the Congressional Directory as living at Pindars Corners, but more than once I have made the point that that is where I vote, which is about a mile away, and where I live is in Prosser Hollow.

The whole of the life of the hollow is the milk farm—some of it a very simple family operation, some of it much more extensive.

I have described the work of my friend and neighbor, Mr. Bernald Briggs, who, from the day he married some 18 or 19 years ago, has worked his farm and the land of our acres 365 days a year, and raised four wonderful young boys. But with what effort, with what extraordinary attachment to an enterprise.

I do not believe that an urban American can have any idea either of the pleasures or the labors of that work: A February morning in Prosser Hollow, at 5:30 a.m., up before breakfast to feed 60 cows and milk 60 cows in the icy wind and blasting cold, is something most Americans have no conception of. The idea of doing it 365 days of the year, in one circumstance or another, and every year of your life, is something I think few Americans could contemplate.

It is no longer the case that the whole of one's life is taken up with this labor. Mr. Briggs is the son of Mr. and Mrs. Mahlon Briggs, who also live in the valley. As they came to retirement age, social security, among other things, and their own savings from a lifetime of work have enabled them to take off a few months in the winter to go south and avoid the rigors of the New York winter. But come spring and the plowing, they are back, all through the summer, into the haying, which starts in June and never stops until the corn crop starts coming in, in late September and early October; and then there is plowing again, to be ready for the spring.

We have another neighbor across the hill who uses a part of the Banner farm, as we describe a second property we bought some years ago. The value of this land is very little, and only persons of heroic enterprise could make a living out of it. These men do. In this case, Mr. Meyerhoff, a farmer of the most enterprising and dynamic kind, has built himself, from very small beginnings, large herd, has installed the most advanced machinery—such as Senator PROXMIRE spoke about earlier today—the most careful computer analysis of the production and productivity, which is the ratio, of his herd.

This is a service provided by Cornell University, one of the great centers of agricultural research, particularly dairy farming research.

If Mr. Meyerhoff were to liquidate—as they say in business—his property, sell off his herd, sell his farm, and his machinery, he could realize a very considerable sum of money, such that I would not be surprised that if invested in Treasury bonds, it would insure him higher annual earnings than he has now; and yet, he would not consider such a move.

It would seem to him altogether inappropriate not to be working, not to be saving, because he is a man of some substance today, not through inheritance but through the steady accumulation each year of a little saving, a little more saving, reinvestment, reinvestment, saving, and reinvestment and technology and keeping up and working hard the days that milking starts as early for him as anyone and the day's chores end as late as for anyone.

He does it because it is a way of life that embodies those things which matter most to him, which is industry and husbandry, and fathering. One of his sons is with him on the farm and I gather he hopes to stay with him and one day take it over. It is an extraordinary sight, those two, as it is to see the Briggs children with their parents and to see the Meyerhoffs on monster machines, never stopping a task until finished, never leaving anything half done, never thinking to come back later and work it all out, but rather roaring through their work from the earliest glimmer of light until the solid darkness of the day, never pausing, never relenting, and taking such a huge joy in it such as to make you realize you are in the presence of very special persons, part of a very special aspect of American agriculture.

It is the element, agriculture, since we ceased to be a nut-and-berry-gathering species. The first of the animals to be domesticated, no doubt, was the dog. And the purpose of the dog was, as much as anything else, to look after the cow.

I can remember over in Ireland my grandfather's brother—getting very ancient, this would be 30, 35 years ago—going back, as the Irish say, such that he was lapsing into Gaelic which was his native language and the only one on the farm who understood Gaelic was his old dog. And he would talk to him and go out and send the dog running around after the cows.

The cultivation of cattle, their care, and their association with civilized nations is as old as the agriculture civilization itself. It precedes planting. It is the first fact of a human economy as against simply a human ecology. It stays with us; it is deep in us.

I had the privilege for several years of living in India, from whence the Aryan race, as it is called, originates. There the sacredness of the cow is a matter which one has to see to understand how humane and how normal and how natural an attachment there is to this animal. It is, as I say, from the first human economy as against the mere ecology and was one in which we raised herds, milked, butchered, tanned, and became something more than beasts of the field in the company of this most extraordinary creature, with which anyone having the least association—as I say, I have all these years now lived on a dairy farm—cannot but become involved with.

Any nation as fortunate as we in the dairy farmers of this country ought to take the greatest care to see that they prosper and to see that they continue in their extraordinary development of an industry as old as man itself, but only in

our time coming into the extraordinary productive levels of American herds.

We are dealing with a problem today that is the problem of the success of our farmers in increasing by 50 percent in two decades the amount of milk produced per cow in our herds. We would do well to attend to that extraordinary efficiency and enterprise that brought it about.

I think it is important, Mr. President, also to note that in the State of New York, certainly, which I believe is the third largest dairy State in the country, the President's proposals not to have an April adjustment in dairy price supports are not opposed in principle by farmers and they are not opposed by any organization which I am aware of, the statement being made that if this is something the economy requires, it is something the dairymen can sustain.

I have been in public life long enough and sufficiently long in this body to recognize the implacable drive of the self-interests that verges all too often on selfishness on the part of economic interests everywhere. Without exception, economic interests are self-interests. And it is really quite extraordinary to see the dairymen of my State, or their representatives, stating that if this is something that has to be done, we will live with it; not bellowing, not charging, not complaining, and not asking that they be exempted from anything else than what would be required of everyone else.

It is an example that ought to be called to the attention of others, because it is an example that can most usefully be emulated.

Mr. President, I see that the distinguished chairman of the Agriculture Committee is on the floor. He has risen and, in his characteristically generous way, has not chosen to interrupt, but rather patiently wait until the end of this discourse. I am happy at this time to thank the Chair and thank the chairman for his patience in hearing out his friend the dairy farmer from New York.

Mr. HELMS. Mr. President, I thank the Senator.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 86–380, appoints the Senator from Tennessee (Mr. SASSER) to the Advisory Commission on Intergovernmental Relations.

MILTON D. STEWART

Mr. NUNN. Mr. President, I want to call attention to the fact that one of our most dedicated and competent public servants, Mr. Milton D. Stewart, has left Government service to pursue a career in private industry.

Mr. Stewart served as the first Chief Counsel for Advocacy of the Small Business Administration with a vitality and enthusiasm few persons bring to any job. As the first head of a newly created office, his task required the definition of the role of that office as much as the execution of formal duties.

Mr. Stewart took the initiative to actively pursue better relations between small businesses and Government. Primary among these initiatives was his development of the White House Conference on Small Business, which served as a forum for all parties interested in the health and continued success of individual enterprise in America.

During his tenure as Chief Counsel for Advocacy, he made over 200 speeches to over 40,000 small businesses and women. Two themes ran throughout those speeches. First, the importance of small business to the American economy; and, second, the need for small businesses to get involved in the Government and the legislative process.

Mr. Stewart, who testified over 30 times before Congress on legislative matters, worked hard to increase the reponsiveness of the Federal Government to the small business community. Those efforts paid off. During the past Congress five major pieces of legislation on regulatory flexibility, paperwork reduction, patent reform, equal access to justice, and small business economic policy were all enacted into law to make the 96th Congress the most important small business Congress ever convened. One of these bills—the Regulatory Flexibility Act—grew from a concept Milt Stewart developed 12 years ago.

Mr. Stewart's pursuit of coordination between Federal, State, and local governments, along with activities with regional small business groups, was a farsighted effort to use a Government office to reduce redtape and other obstacles at all levels for innovative firms in energy, environmental, and other fields.

The Office of Advocacy, which now handles over 100 individual cases for small business per month in the areas of health, energy, environment, transportation, media, agriculture, housing, and labor, has developed under Stewart's leadership into a viable and valuable link between Government and small business.

Working with businesses, the Office of Advocacy, has held hearings and thoroughly studied problems pervasive throughout the small business communities. The subjects of these indepth studies were economic stability, innovation, mergers, Government operation, and small business continuity, many of which directly resulted in the more than 50 publications issued by the Office of Advocacy during Mr. Stewart's tenure.

When Congress created the Office of Advocacy, there was some doubt as to whether the Office could function as Congress intended. Clearly, the role of the chief counsel was to act as a strong independent voice for small business both within the Congress and within the administration. On numerous occasions the Office has taken various positions on legislation and regulations that were contrary to those of some Government officials. Each time Mr. Stewart testified before Congress, he came forward with hard facts, data, and comments which represented the views of small business. We are pleased to report that after a 2½-year experiment, the chief counsel has allayed those earlier doubts. No one could have set a better example for chief counsels to follow.

Mr. President, I think that not only small business and the Congress, but also the American people are grateful to Milton Stewart and his staff for the outstanding job they did in unifying the small business community and ascertaining the interests of small business within the Federal Government.

Mr. Stewart's tireless efforts to improve relations between all areas of Government and small business, his spirited search for ways to assist the general public, and his unswerving dedication to his office are all worthy of special recognition. We wish Mr. Stewart well in his new role as editor of Inc. magazine.

MILTON D. STEWART

Mr. MOYNIHAN. Mr. President, the distinguished Senator from Georgia, Mr. NUNN, has called attention to the Senate today of the departure from Government of Mr. Milton D. Stewart, one of the distinguished public servants of our time.

Mr. Stewart served as the first chief counsel for advocacy of the Small Business Administration and, as Senator NUNN recounts, did an extraordinary job in that role.

I would simply like to add my own appreciation to Mr. Stewart's work. It happens that we have been associated in one way or another through a quarter century of public affairs in America. Mr. Stewart was assistant counsel to the Governor of the State of New York, Averell Harriman, at the time I was assistant secretary to the Governor. In those roles, we knew each other closely and have known each other since.

No one that I know of his talent and ability has so devoted himself to the role of small business in this country as a matter of principle and of national concern. His judgment in small business was not that it was simply an area of activity in which American profits may be made and losses sustained, but rather that it is a form of activity which is essential to American life.

It is the proven experience over how many generations now that technological innovation in the American economy, as in other economies like ours, in the greatest measure emerges from small firms. There is something the matter with bigness that kills off creativity.

You may only look at those every time a giant corporation announces that it has produced a research laboratory and engaged the most trendy architect of the age to build them, you may be pretty sure that not much research will be done any longer by that corporation. Ideas come out of back rooms and garages and basements. Even in an advanced technological nation, they continue to. This conception of Milton D. Stewart has sustained him in what is now more than two decades of effort in this field.

I join Senator NUNN in wishing Mr. Stewart well in his new role as head

of INC magazine, and we remind him of our old days in putting our publications for the Democratic Party in the State of New York which were not nearly so successful.

He has distinguished his post and he leaves behind him a standard of performance which I hope and I am sure his successor will maintain.

THE NATIONAL ECONOMY

Mr. MOYNIHAN. Mr. President, the administration has repeatedly challenged critics of the President's economic program to suggest a plan of their own. In his speech on February 18, Mr. Reagan said:

(M)ay I direct a question to those who have indicated unwillingness to accept this plan for a new beginning: an economic recovery? Have they an alternative which offers a greater chance of balancing the budget, reducing and eliminating inflation, stimulating the creation of jobs and reducing the tax burden?

At least one organization has an alternative; it is the AFL–CIO. The union described its plan recently in a policy statement about the national economy. The AFL–CIO executive council issued the statement 3 weeks ago, after its midwinter meeting in Bal Harbour, Fla.

I invite everyone with an interest in the economic policy debate to read it. The statement is well written. It is full of ideas.

I should say that the union and the administration differ little over objectives. Both want to reduce unemployment and to control inflation. But the union would do it differently, in part because it believes that the poor have little room for additional sacrifice, in part because it prefers to direct resources to specific industries and to specific areas rather than to provide a general stimulus.

Mr. President, I ask unanimous consent that the statement—"The National Economy"—be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY THE AFL–CIO EXECUTIVE COUNCIL ON THE NATIONAL ECONOMY

America needs economic policies that deal effectively and equitably with the causes of inflation and the weaknesses that prolong unemployment.

Such policies must base any sharing of austerity in the fight against inflation on the ability to sacrifice, and not demand even more sacrifice from those who know only austerity. They also must include adequate resources to provide needed investment in specific industrial and geographic sectors within an overall employment program.

Based on these key principles, the AFL–CIO supports economic policies that:

First, reduce interest rates. The high cost of money spreads throughout the economy and is built into the cost of all goods and services. High interest rates choke the economy and prevent expansion. High interest rates and high unemployment are the major contributors to a high budget deficit.

Second, dampen actual inflationary forces directly rather than attempting to depress demand in the hope that this generalized approach may eventually cool the causes of inflation as the entire economy is thrust into a deep freeze.

Cutting federal expenditures to balance the budget is not a cure-all for inflation. Budget cuts will not protect the economy from spiraling energy and food costs, nor will they bring down housing costs.

At a time like the present, when large portions of plant capacity stand idle and when a big segment of the labor force is unemployed, federal budget cuts will only aggravate already sluggish economic conditions. When both labor and capital resources are fully used, then a balanced budget makes sense.

Third, reduce unemployment by providing training and job opportunities for those specific population groups that have neither and encourage the rebuilding of the economy, especially in industries and geographic areas hardest hit by unemployment. The ranks of the jobless will not be diminished by undermining the wages, standards and safeguards of those who already hold jobs. Rather, there must be a policy that improves the ability of American industry to compete in the world economy by modernizing outdated plants and equipment and by modernizing outdated foreign trade policies.

Reducing unemployment is the most effective method of reducing the federal deficit. Yet, the current unemployment rate is 7.4 percent, a level that was surpassed in the post-World War II years only by the 1975–76 recession. Each one percent decline in joblessness increases federal revenues and decreases social costs a total of $30 billion. Putting one million jobless workers back to work would balance the previous Administration's proposed fiscal 1982 budget.

Fourth, use an effective combination of targeted taxing and expenditure programs to reverse the damage caused by inflation and unemployment. Individual tax cuts should be used to restore consumer buying power. Business tax cuts should be used to stimulate investment where it is needed the most. Government revenues should be used to sustain consumer spending during periods of unemployment.

A tax cut that fuels inflation by encouraging the wealthy to buy more luxuries or speculate in commodities is not an answer to the nation's economic woes. A general across-the-board business tax cut or depreciation speedup would provide large windfalls to sectors of the economy that are already prosperous while ignoring critical industry and area investment capital needs.

Today's problems of unemployment and inflation cannot be measured by "averages" or solved by aggregate across-the-board policies. The impact of unemployment and inflation are distributed unevenly across different sectors, regions, and demographic groups. The solution to these problems, therefore, does not lie in macroeconomic policies that are applied in an unfocused manner. The nation needs to address its problems in a manner that alleviates the underlying forces pushing up inflation and unemployment.

As we have said in the past: if an overall program of price and income controls becomes necessary to fight inflation, we are prepared to cooperate provided controls are fair and equitable and applied to all prices and all forms of income.

Specifically, the AFL–CIO calls for adoption of the following program:

I. LOWERING HIGH INTEREST RATES

Credit controls should be authorized by the President and instituted by the Federal Reserve Board. Funds and credit should be targeted to certain sectors of the economy for productive industrial development and needed housing expansion. Existing credit control procedures should be used and new tools developed to tighten credit for speculative activities and made available to productive uses.

II. ANTI-INFLATION POLICIES

To reduce inflation in energy

Mantain controls on natural gas to moderate price increases.

Continue presidential authority to control oil prices and invoke rationing in time of need.

Expand development of alternative sources of energy to prevent short-term and long-term shortages that artificially increase prices.

Assist utilities to convert from high-priced oil to coal.

Equalize utility rate structures to end the subsidy consumers are providing for large industrial users and institute peak-load pricing.

Expand energy conservation programs, especially the weatherization of schools, hospitals, public buildings and low-income housing.

Establish a U.S. oil import agency to purchase and distribute oil imports, thus assuring the nation an adequate supply of oil at a fair price.

To reduce inflation in housing

Expand the supply of low- and middle-income housing to alleviate the housing shortage that is driving up prices and rents.

Reduce mortgage interest rates by expanding the use of so-called "tandem plans" that provide below-market interest rate mortgages for low- and middle-income buyers.

Encourage home mortgage financing by union pension funds invested in long-term, fixed-payment mortgages guaranteed by the government.

Discourage the conversion of rental housing structures to condominiums in tight housing markets.

Restrict the export of logs which is causing shortage-induced domestic price increases for lumber.

To reduce inflation in food

Restrict the export of commodities in short supply.

Remove restrictions on the planting of crops.

Limit price support programs to small- and moderate-sized farms that are owned and worked by resident farm families.

Establish a National Grain Board, similar to the Canadian Wheat Board, to handle foreign sales of U.S. grain.

To reduce inflation in health care

Enact hospital cost containment.

Encourage expansion of Health Maintenance Organizations, which have a proven record of lower health care costs.

Use cost-reducing practices, such as second opinions before elective surgery and support for health planning to eliminate duplication of costly equipment and services.

Provide medical care for Medicare and Medicaid recipients under HMO programs using per capita payments for total health care services rather than more costly fee-for-service payments.

Reform health insurance practices to eliminate cost-plus reimbursement of hospitals and nursing homes by using prospective reimbursement and negotiated fee schedules.

Reform the health care system through national health insurance.

III. REDUCING UNEMPLOYMENT AND REBUILDING THE ECONOMY

Reindustrialization

Business, labor and government should participate in a Reindustrialization Board. Under this Board, a Reconstruction Finance Corporation would invest public and private funds in necessary reindustrialization projects.

The RFC should have authority to allocate $5 billion in depreciation allowances, investment tax credits, or other business tax

changes targeted to where they are most urgently needed.

The RFC should be allotted an additional $5 billion to: encourage new industries that have difficulty obtaining necessary financing; and assist older industries with special capital needs for modernization, expansion and restoration of their competitive position. The RFC should also direct its resources to specific geographic areas of the country that are most in need.

The nation's transportation network needs to be upgraded for people and goods to move more efficiently. Railroads, highways, port facilities and airports are in desperate need of rehabilitation. Urban mass transit systems need to be extended and modernized.

The urban infrastructure of sewers, water systems, streets and bridges needs to be renewed. Public investment of this nature would greatly improve economic efficiency and potential output of goods and services.

There should be a thorough review and analysis of existing investment tax "incentives" in the light of reindustrialization goals. The capital gains exclusion, rapid depreciation, oil depletion allowances, and investment tax credits have all been enacted as tax "incentives" to investment. Tens of billions of federal dollars are lost through these provisions, and it is time to restudy their value to the economy.

The multi-billion dollar tax subsidies available for overseas operations—such as the Domestic International Sales Corporation, foreign tax credits and the deferral of taxes on overseas profits are in direct conflict with national needs and restrict the availability of needed capital at home. They should be repealed. The Overseas Private Investment Corporation should also be ended, as it encourages U.S. firms to invest abroad by insuring such investments against political risks.

The tax benefits of state and local industrial development bonds should be curtailed and integrated into the overall approach to reindustrialization.

Employment and training programs

The unemployed men and women who cannot find jobs in the private sector should be put to work on the various public service and public works projects that expand the services and facilities needed for a healthy economy. The skills and abilities of the unemployed must be put to productive purposes and not go wasted. These programs can be targeted to increase supply and economic efficiencies in key areas, thereby moderating price increases, while reducing unemployment.

There should be expanded training programs for adult workers and youth. Training programs should provide new job skills and lead to employment opportunities.

Direct, targeted jobs programs tailored to the specific needs of unemployed workers are two to four times more effective in creating jobs than generalized tax cuts.

IV. RESTORING BUYING POWER

Federal taxes

The AFL-CIO calls for enactment of a refundable tax credit equal to 20 percent of the employee's and 5 percent of the employer's Social Security tax. Thus, the benefits would be concentrated on middle and low-income wage earners, those who have suffered the most from high inflation. It would more than offset the recent increases in Social Security taxes on workers and have no adverse effect on the financial stability of the Social Security trust fund.

Under such a tax program, a four-person family with a $12,000 per year income would receive a $160-a-year tax reduction compared with $92 under the first year of the Kemp-Roth proposal. At $25,000, the cut would be $332 compared with $305 under Kemp-Roth. At $30,000, relief is about the same, and above those levels, the maximum relief is limited by Social Security payments and, thus, would not provide the open-ended, ever-growing windfall to the wealthy that Kemp-Roth would provide.

This individual Social Security tax credit would cost the Treasury approximately $16 billion, or about half of the first-year cost of Kemp-Roth. The employer Social Security tax credit would cost the Treasury about $4 billion, and benefit employers in labor intensive industries.

Income support programs

Basic income support programs for the unemployed, the poor and the elderly must be maintained and improved to restore buying power lost to inflation.

When people are jobless, a minimum level of buying power is sustained by basic income support mechanisms such as unemployment insurance, trade adjustment assistance and food stamps. When inflation is high, the elderly and the poor, who are forced to rely on government, also need their income protected by Social Security, welfare and Medicaid.

In order to curb inflation, reduce unemployment and solve fundamental problems, the resources of the country must be redirected. Additional capital investment is needed in many, but not all industries and areas. Tax burdens should be lightened for many but not all individuals. The problems of the poor in our society must be solved, not aggravated.

BUDGET COMMITTEE MARKUP SESSIONS

Mr. MOYNIHAN. Mr. President, I rise to note in the Saturday edition of the New York Times a commentary on the recent markup, as we say in the Budget Committee, of the reconciliation instruction, that in the 4 days in which that process required, I was absent one evening and during that evening nine votes were cast, some of them tie votes, and these were described as also being key votes.

Mr. President, I wish first to establish the record here. There were eight rollcall votes that evening of which there was only one with a tie and that was a motion by my good friend, Senator EXON, of Nebraska, that would have eliminated Saturday urban mail delivery. It failed. Being a tie vote it failed, and I would have voted against it, which also means it would have failed.

Mr. President, at this point, I ask unanimous consent to have printed in the RECORD a letter from Stephen Bell, staff director of the Budget Committee, which describes those facts.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 23, 1981.

Hon. DANIEL P. MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MOYNIHAN: There were eight roll call votes taken during markup of the reconciliation instruction Tuesday evening (March 17, 1981). Only one of them was a tie: an Exon motion increasing the authorization cut for the Governmental Affairs Committee by eliminating Saturday urban mail delivery which failed 6/6.

Sincerely,

STEPHEN BELL,
Staff Director.

Mr. MOYNIHAN. Mr. President, I also ask unanimous consent to have printed in the RECORD a list of the actual votes that did take place on the evening of Tuesday, March 17.

There being no objection, the list of votes was ordered to be printed in the RECORD as follows:

VOTES

ENVIRONMENT AND PUBLIC WORKS

(1) Domenici, reductions in direct spending. Passed, voice vote.

(2) Metzenbaum, restore part of EDA cut and all of Regional Commissions cut. Failed 2 to 15.

(3) Riegle, restore part of EDA cut. Failed 8 to 9.

(4) Domenici, President's proposal. Passed, voice vote.

ENERGY

(5) Exon, restore DOE Alcohol Fuels cut. Failed 4 to 12.

(6) Hart, restore half of Solar Bank cut. Failed 4 to 13.

(7) Quayle, restore part of DOE Alcohol Fuels cut. Failed 8 to 9.

(8) Kassebaum, cut federal expenditures for Strategic Petroleum Reserve and further cut payments in lieu of taxes. Passed 13 to 4.

GOVERNMENT AFFAIRS

(9) Domenici, reductions in direct spending. Passed, voice vote.

*(10) Exon, eliminate Saturday urban mail delivery. Failed 6 to 6.

(11) Grassley, eliminate October 1, 1981, federal pay raise. Failed 5 to 7.

(12) Domenici, President's proposal. Passed, voice vote.

Mr. MOYNIHAN. Mr. President, finally, in that regard, I wish to observe that I was indeed absent on that occasion and, in a situation which is all too well known to the Members of this body, I was supposed to be in more than one place at one time.

During the middle of the day on Wednesday, in point of fact, I was absent as I am vice chairman of the Select Committee on Intelligence, and a matter of very urgent nature came up and we were required to meet in the Senate dome as we do and I, accordingly, left the proceedings in the Dirksen Office Building.

On Tuesday evening, the simple fact is that our new U.S. Permanent Representative to the United Nations was giving the first dinner that she has given at the U.S. mission residence in the Waldorf Towers and asked me to be present as the guest of honor. Invitations were extended to a wide number of persons in the political corps.

This was meant to be a statement of a certain kind, as these occasions invariably are, and I was torn between the duty to be in the Budget Committee and the duty to be at the Ambassador's dinner. I chose the latter, for the very simple reason that it is a rule that the Budget Committee invariably observed under all of our chairmen to date, that until the final action upon a reconciliation instruction or a budget resolution any member may ask that any vote once taken be taken a second time and for that matter a third, fourth, or fifth time until finally the committee has reached an agreement on its outcome and we are ready to vote on final passage.

*Tie vote.

Had there been any vote taken Tuesday evening which my vote might have reversed, it would have been a most elementary move on my part Wednesday morning simply to ask that the vote be reconsidered as it would have been done.

As the distinguished Presiding Officer, who is a member of the Budget Committee, will recall, on one occasion Thursday afternoon I did ask that the whole of the votes on the Veterans' Administration affairs be reconsidered, as indeed they were, and to no one's great surprise the outcome the second time was the same as it was the first time.

I make that point simply that it be understood that it is not always possible for us to be on hand at these committee meetings. It is, accordingly, the practice of most committees of which I am a member to allow matters to be reconsidered until a final measure is reported by the committee.

I further note, Mr. President, that this was March 17, and I missed the St. Patrick's Day parade in New York in order to be at the committee during the day. That strikes me as perhaps an even more grievous transgression, but I will not go further into the matter.

I thank the Chair for his courteous attention.

THE ANNUAL REPORT OF THE OFFICE OF TECHNOLOGY ASSESSMENT

Mr. THURMOND. Mr. President, as the President pro tempore of this body, I have received the annual report of the Office of Technology Assesssment for the calendar year 1980. This report, which has been submitted pursuant to the Technology Assessment Act of 1972, is available for review in my office.

CONCLUSION OF MORNING BUSINESS

Mr. HELMS. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ADJUSTMENT OF PRICE SUPPORT FOR MILK

The PRESIDING OFFICER. Under the previous order, the clerk will state the pending business.

The legislative clerk read as follows:

A bill (S. 509) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support of price of milk be adjusted semiannually.

The Senate resumed the consideration of the bill.

AMENDMENT NO. 8

The PRESIDING OFFICER. The clerk will state the pending amendment.

The legislative clerk read as follows:

Amendment No. 8. Proposed by the Senator from Montana (Mr. MELCHER) for himself and others.

The amendment is as follows:

On page 1, after line 5 insert a new section 2 as follows:

"SEC. 2. (a) Congress finds that milk protein products, including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 percent or more of these products, are being imported into the United States in such quantities as to render or tend to render ineffective, or materially interfere with, the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949.

"(b) To ensure that the entry into the United States of milk protein products will not render or tend to render ineffective, or materially interfere with the dairy price support program conducted by the Secretary of Agriculture under the Agricultural Act of 1949, the President shall by proclamation impose, under the authority of section 22 of the Agricultural Adjustment Act (7 U.S.C. 624), a quota limiting the amount of milk protein products including but not limited to casein, caseinates, lactalbumin, and whey protein concentrates or mixtures containing 5 percent or more of these products, that may enter the customs territory of the United States in any calendar year after 1980. The quota so proclaimed by the President shall be in an amount equal to 50 percent of the average of the total imports of such milk protein products into the United States during the five-year period 1976 through 1980. The proclamation shall be considered a proclamation issued by the President under section 22 of the Agricultural Adjustment Act (7 U.S.C. 624) meeting the requirements of that section.".

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the imports of subsidized casein have sharply increased in the last few years, interfering with the operation of the dairy price support program and needlessly costing the U.S. Government millions of dollars. There are a couple of points I would like to make in that regard.

Once casein was imported as an industrial chemical. Casein is now used to produce highly fabricated foods which are stealing the traditional markets of American dairy farmers.

In other words, those of us who have been led to believe that casein is for industrial uses, and that is its principal use, simply have to catch up with the facts, which are that casein now is used to produce fabricated foods.

Let me give one or two examples.

In 1980 we imported 36,749,000 pounds of casein that went into making imitation cheese. We imported, in the same year, 1980, almost 17 million pounds of casein that went into coffee whiteners, and an additional 11 million pounds of casein that went into frozen dessert toppings.

That adds up to over 64 million pounds of casein that we imported in 1980 for food purposes.

There is another group of products that uses casein that is also a food group. What are these? They are bakery products and breakfast foods, and that totals over 15 million pounds of casein.

What does this mean to the dairy program?

What it means to our domestic dairy program is, that all of these foods I have mentioned—imitation cheese, coffee whiteners, frozen dessert toppings, the bakery products, and the breakfast foods—could have used skimmed milk produced in this country instead of casein.

If we are going to operate a price-support program for domestic milk products, we have to defend the integrity of that program. What we are doing with casein is importing it in such quantities it is interfering with the program right now.

If the pending amendment, which would reduce the amount of casein that would be imported into this country by 50 percent of the past 5-year average, is agreed to, we would take a step forward to defend the integrity of a dairy program for domestic milk producers.

If that seems rather vague or if that does not grab you, let me tell you what it would mean in saving taxpayer dollars. It would save $230 million, approximately, in Federal outlays every year. Why? Because, instead of the imported casein for these food products, domestic skim milk would be used, and that would take it off the market and the dairy farmers would not be selling it to processors to process as nonfat dry milk, which would go into storage after purchase by the Government, and become part of the Commodity Credit Corporation stocks.

I think it is rather obvious, then, that a casein amendment is in the best interest of national fiscal responsibility, rather than S. 509, which is before us, just curtailing the price increase for domestic producers and saving, as the President's advisers claim, $147 million. We would add over $200 million in additional savings.

When we are asking all of our citizens to tighten their belts because of the urgent need to cut back the cost of the Federal Government, we must remember to sacrifice equally. The old, the poor, the indigent, and the children in this Nation are all asked to forego important Federal programs which have helped to sustain them. Dairy farmers have been reasonable in their acceptance of S. 509. It is only reasonable that foreign dairy producers take their cut as well.

I want to enlarge on some of these points a little bit. The administration currently is asking for a reduction in medicaid. Congress is asked for a reduction in the arts and humanities. The President's budget is asking for a reduction in Federal aid to education. And there are all sorts of other programs that are being suggested by the President and by the Budget Committee of the Senate to be cut, including student loans.

I would like to go on quite a while on those various programs that the administration is asking us to cut, and which the Senate Budget Committee is recommending that the Senate cut, but I have to echo what I know to be the case with my constituents, and I think rather generally, with all the citizens of this country, that we are intent on reducing Federal expenditures, attempting to reach a balanced Federal budget.

When S. 509 was in the Senate Agriculture Committee, where it was approved by a vote of 14 to 2, a rather lopsided vote, the amendment to reduce casein imports was defeated by a tie vote of 8 to 8. Since then we have improved

on the amendment in the hope of gaining a majority vote here on the floor.

What we are telling the dairy farmers of this country in S. 509 is that they are going to have to forgo a price-support increase. Is there anything wrong, then, in tying in with that a notice to dairy farmers in other parts of the world, to tell them that the United States has to make a reduction in the market for the milk product that they are producing to sell here in the United States, to tell them that that market is going to be reduced in the case of casein by 50 percent?

It seems to me that that is not an unreasonable position for the United States to take.

It would affect those dairy farmers who have been sharing this market in the United States, producing milk in their own countries and having it manufactured into casein and selling it to the United States, where it is made into food products here. It seems to me it is not unreasonable to tell those dairy farmers in various parts of the world, in other countries, that they are not going to have as much market for their product in the United States as they have enjoyed in the past because the United States has a surplus; the United States has to protect its own dairy price-support program.

The United States has currently in stock $1.5 billion worth of dairy product, and it is projected by the Department of Agriculture that before the year is out we are likely to have $2 billion worth of dairy stocks in storage, purchased by the U.S. Government and stored by the Commodity Credit Corporation in their warehouses.

If we do not do anything about this amendment, we are indeed going to see an increase of substantial proportions in the purchases by the Federal Government to support the U.S. dairy program, the domestic dairy program, the domestic industry.

So what the amendment is attempting to do is say we are going to forgo, we are going to prevent some of that Federal outlay. We are buying up milk here, in the United States, and having it processed into dry nonfat product and then stored and purchased by the U.S. Government. We are going to forgo some of that; we are going to make some savings in Federal outlay, and we are going to reduce some of the product that is imported—that is, casein—that goes into food products in this country, in order to accomplish that, thereby saving $200 million, perhaps $230 million per year in Federal outlay.

It is obvious that there is another point to be made, too. Every time we spend $1 on unnecessary imports—and this is surely an unnecessary import, the amount of casein that we are importing right now, since it can be offset by skim milk produced here—every dollar that we spend on imports that we really do not need depreciates the value of the dollar abroad and increases the amount of product we must import, further adding to inflation.

This does not undermine the President's effort to trim the budget. It helps it by saving the Government and the American taxpayer the $200 to $230 million a year that I have mentioned.

This amendment clearly saves money, increases greater activity through the private market, and boosts our economy. That is everything that President Reagan has called for in his program in budget cuts.

Mr. President, the argument is made that the casein amendment is somehow going to interfere with GATT. Let me put that to rest. This amendment is compatible with the intention of the U.S. policy on GATT agreements and with all the legal precedents that we can find. Let me point out that section 22 of the Agricultural Adjustment Act was enacted by Congress to limit imports of agricultural products which interfere with price support programs.

Second, the contracting parties to GATT agreed to a waiver recognizing the superiority of section 22 to trade agreements.

Third, precedent for section 22 actually is found in the Trade Agreements Act of 1979 and the Agricultural Act of 1956.

To emphasize that, Mr. President, I ask unanimous consent to have printed in the RECORD this list of precedents that establish the procedures, normal section 22 procedures, which, when used, create no additional opportunity for retaliation to other nations, the precedents I have referred to.

There being no objection, the list of precedents was ordered to be printed in the RECORD, as follows:

The proposed directive regarding the use of Section 22 presents no violation of U.S. obligations under the General Agreement on Tariffs and Trade than use of normal Section 22 procedures, creates no additional opportunity for retaliation by other nations, and is supported by precedent.

(1) The Section 22 waiver approved by Contracting parties to the General Agreement is confined to a waiver of U.S. obligations under Articles II and XI. It is not a waiver of the rights of affected parties to retaliate.

(2) Through a series of amendments and revisions, the Congress has made it clear that Section 22 stands in a superior position to any trade agreement or other international agreement to which the United States is a party. The Congress has expressed this principle in broad terms as it applies to the laws of the United States in general.

(3) The Congress has made it clear that its actions on international trade issues and passage of legislation dealing with these questions do not constitute approval of the General Agreement on Tariffs and Trade.

(4) Precedent for legislation directing Presidential action under Section 22 of the Agricultural Adjustment Act is found in the Trade Agreements Act of 1979 and in the Agricultural Act of 1956. The latter instance is identical to the present situation.

(5) The intent of Congress expressed in Section 22 has been frustrated by inaction and delay. The present amendment is necessary to overcome this failure of action.

(6) The threat of trade retaliation against the United States would be neither increased nor decreased as the result of this proposed action. The waiver afforded Section 22 under the General Agreement does not remove the retaliatory capability under any circumstance. Further, retaliation can be brought even in the absence of a violation of the General Agreement.

Mr. MELCHER. Mr. President, I think it is important that we lay to rest as many arguments used against this commonsense amendment as possible. I think this one clearly has been overemphasized by those who oppose the amendment.

Other arguments are, why not wait for administration action on this matter? There have been promises of studies and section 22 administrative action. They are just delaying tactics. The dairy farmers have been waiting for relief from unfair casein imports through four Secretaries of Agriculture. The message the American dairy farmer is getting is that there is a do-nothing policy by the Federal Government. To explain this a little more clearly, I ask unanimous consent to have printed in the RECORD an article recently prepared by the National Milk Producers Federation, which describes how long they have been waiting, and why there is no use in waiting any longer.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE MELCHER AMENDMENT MUST BE PASSED—CASEIN IMPORTS MUST BE CONTROLLED

PLACING A LIMIT ON CASEIN

In recent years, imports of casein have increased sharply from the historical level of 100–115 million pounds annually. At the same time, there has been a sharp increase in use for food and animal feed products and a decline in industrial uses such as the production of paints, paper coatings, plastics and adhesives. Over 80 percent of the casein used in the U.S. now goes into food and feed products compared with less than two percent in the 1950s.

Casein Imports, 1976–80, 1,000 lbs.

1976	112,141
1977	114,245
1978	137,134
1979	150,827
1980	151,226

In many of these food and feed uses, casein replaces domestically produced milk. This milk, in turn, is processed into nonfat dry milk which is sold to the Commodity Credit Corporation under the Dairy Price Support Program. The imports, therefore, have a two-fold impact. They take away markets for domestic production and they increase government costs under the price support program.

Based on data developed by the International Trade Commission, National Milk Producers Federation has estimated that in 1980 64.6 million pounds of casein went into food products which definitely displaced domestic milk production. This included products such as imitation cheeses, coffee whiteners, frozen desserts and whipped toppings. Another category of products where there is probably displacement of milk utilized 30.1 million pounds of casein. This includes such things as bakery products, breakfast foods and other food items.

An additional 56.9 million pounds of casein were used in industrial products and food and feed uses where displacement of milk likely did not take place.

But the 94.7 million pounds of casein that did displace milk represents the equivalent of 3.4 billion pounds of skim milk. This volume of skim milk, made into nonfat dry milk and purchased by CCC under the Dairy Price Support Program, represents almost 315 million pounds of nonfat dry milk and CCC outlays of over $295 million.

A SOLUTION IS AVAILABLE

The dairy industry has petitioned the last four Secretaries of Agriculture to place limitations on these imports under Section 22 of

the Agricultural Adjustment Act. That law requires such action if imports of a product interfere with the operation of a domestic price support program. No action has been taken to meet this directive.

Senator John Melcher of Montana has been joined by 13 other Members of the Senate in sponsoring an amendment to S. 509 that would place a Section 22 limit on these imports at 50 percent of the past five year average—about 69.5 million pounds per year.

S. 509 is legislation which would eliminate the scheduled April 1 adjustment of the dairy price support level. The Melcher amendment would provide an import level more than adequate to meet the needs for products where casein is essential. It would also provide substantial government savings through reduction in CCC costs under the Price Support Program. Conservative estimates place these savings at $200 million a year, more than the $147 million savings the administration projects from eliminating the April 1 price support adjustment.

THIS DOES NOT VIOLATE U.S. TRADE AGREEMENTS

A major argument made against the Melcher amendment is that it would be a violation of the U.S. trade agreements. A careful review of the situation indicates that it would not be a violation of the General Agreement on Tariffs and Trade (GATT). The following points must be considered.

(1) Section 22 itself states that the law must not be superceded by any international agreement entered into by the United States.

(2) There is precedent in the Trade Agreements Act of 1979 and the Agricultural Act of 1956 for Congressional action directing the establishment of Section 22 import restraints.

(3) The U.S. has never ratified the GATT.

(4) There is a waiver under the GATT for the operation of Section 22.

(5) The right of other countries to retaliate against the U.S. for actions under Section 22 is not waived. This is the specter raised if the Congress takes this action. Actually, the GATT allows countries to retaliate in instances where there is no violation of trade agreements, and in ". . . any other situation."

WHY WE MUST NOT WAIT AND GAIN THIS ACTION BY ADMINISTRATIVE MOVES

USDA is presently conducting a study into casein use and its effect on the Dairy Price Support Program. It has been suggested that it would be better to wait until this is complete and proceed with a Section 22 action administratively.

That study was designed, frankly, to develop arguments for not doing anything. When USDA officials responsible for the work were told this in late 1980, they proceeded with the work anyway. The study is a duplicate of the U.S. ITC study of 1979 which concluded that there is no significant displacement of nonfat dry milk by casein. The Chairman of the Commission argued that there was not enough information to make this conclusion and the point of the entire question is not the displacement of nonfat dry milk, but the displacement of milk.

WHAT IS THE STATUS OF THE MELCHER AMENDMENT?

The Senate debated the Melcher amendment on Tuesday, March 17. At that time, Senator Howard Baker, the Majority Leader, offered a motion to table the amendment, thereby killing it. That motion was defeated 45–53. The record of that vote is included.

Immediately following that vote, further consideration of S. 509 and the Melcher amendment was suspended.

A vote on the amendment and the bill is now set for Tuesday, March 24.

SENATE VOTE ON MOTION TO TABLE THE MELCHER AMENDMENT

Opposed to Melcher amendment:

Armstrong, Baker, Bradley, Chafee, Cochran, Cohen, D'Amato, Danforth, Denton, Dole, Domenici, East, Garn, Goldwater, Gorton.

Hatch, Hatfield, Hawkins, Hayakawa, Helms, Humphrey, Jepsen, Kassebaum, Laxalt, Lugar, Mathias, McClure, Moynihan, Murkowski, Nickles.

Packwood, Percy, Quayle, Roth, Rudman, Schmitt, Simpson, Specter, Stevens, Symms, Thurmond, Tower, Wallop, Warner, Weicker.

Supporting the Melcher amendment:

Abdnor, Andrews, Baucus, Bentsen, Biden, Boren, Boschwitz, Bumpers, Burdick, Byrd, Harry F., Jr., Byrd, Robert C., Cannon, Chiles, Cranston, DeConcini, Dixon, Dodd.

Durenberger, Eagleton, Exon, Ford, Glenn, Grassley, Hart, Heflin, Hollings, Huddleston, Inouye, Jackson, Johnston, Kasten, Kennedy, Leahy, Levin, Long.

Matsunaga, Melcher, Metzenbaum, Mitchell, Nunn, Pell, Pressler, Proxmire, Pryor, Randolph, Riegle, Sarbanes, Sasser, Stafford, Stennis, Tsongas, Williams, Zorinsky.

Mr. MELCHER. Mr. President, there is another point that we have not discussed. Casein has been imported from foreign countries that are still struggling with hoof and mouth disease. Let me list those we are importing casein from: Russia, Poland, Argentina, the Netherlands, West Germany, and France. Why would we be risking this dreadful disease coming into the United States by importation of casein products from these countries that still have hoof and mouth disease? Mr. President, I cannot answer that question, but it does give me great concern. It really does give me great concern.

I think we perhaps all have taken it for granted that, in the process of producing casein, the hoof-and-mouth virus simply cannot live. Well, I want to read excerpts of an article by J. J. Callis and P. D. McKercher entitled "Dissemination of Foot-and-Mouth Disease Virus Through Animal Products." McKercher works at Plum Island Animal Disease Center, northeastern region, the Agricultural Research Service, in the Department of Agriculture. Callis cooperates with him.

Their article, which is about 2 years old, raises a point that hoof-and-mouth disease, prevalent in many countries around the world, is a very grievous and serious threat to this country. Only a portion of their article that I am going to read refers to the danger of casein in the importation of the virus.

Traditionally, meat and livestock products have been produced principally for domestic market. It has been estimated that only about 5 percent of the world's supply of carcass meat enters the international trade. There are, however, wide varieties of meat products and by-products such as hides, glands, casein, etc., on the international market. Any and all of them, when they originate in a country having an animal disease that does not exist in the importing country, could serve as a means of introducing the disease into the latter.[5] The disease agent may be carried in a product from an infected animal (primary contamination) or, in the case of processed items, contamination could even occur after processing (secondary contamination).

Footnotes at end of article.

Mr. President, that is a paragraph out of the article that I am reading into the RECORD to lay the groundwork for my personal concern and, I hope, the concern of all of us, that casein, indeed, could be the vehicle for introducing hoof-and-mouth disease into this country.

Going on, reading further into the article, I read a part of the article under the heading of "milk."

MILK

As indicated above, cattle infected with FMD shed the virus through various pathways. This includes mammillary secretions. As a result, milk and milk products from infected animals are of special concern to animal health authorities. During the 1967–68 outbreak of FMD in Great Britain, observations were made on the involvement of the milk in the spread of the virus. Samples of milk taken from milk collection trucks were shown to contain virus even from premises where the disease had not been diagnosed and from milk on store shelves. This observation led to a study which demonstrated high concentrations of virus in milk from infected cows before the appearance of signs of the disease. In addition, the virus may persist in mammary tissue of convalescent cows.[6]

The inactivation of FMDV in milk has been studied by various workers. This includes milk to which virus is added and milk from infected animals. FMDV in milk from infected animals may be extracellular or intracellular. The majority of the virus in milk is inactivated by Pasteurization, 72° C for 15 seconds; however, there is a small fraction which persists.

Mr. President, for emphasis, let me repeat that:

The majority of the virus in milk is inactivated by Pasteurization, 72° C for 15 seconds; however, there is a small fraction which persists. This resistant fraction is also not inactivated by evaporation, the production of casein or caseinate, or the production of some cheeses.

Now, Mr. President, I am quoting from an article by two of the foremost authorities on control of foot-and-mouth disease virus and preventing it from coming into the United States. I am quoting the best reference that I know of on the subject. What they have stated in their article can be further read in more detail in an article published in 1975 by Callis, Hyde, Blackwell, and Cunliffe, entitled "Survival of Foot-and-Mouth Disease Virus in Milk and Milk Products."

I think it is a rather serious oversight, it is an extremely serious oversight, that we are importing into this country casein from countries that have hoof-and-mouth disease. These are countries from which currently, either this year or last year, or the past several years, we have imported casein which are hoof-and-mouth countries, including Soviet Russia, Poland, Argentina, the Netherlands, West Germany, and France.

Mr. President, why would we take this chance? For the same reason, Mr. President, that we are allowing our domestic milk support price program to be threatened by imports. The imports are simply too loose, absolutely too lose. They just make the deal, the product comes in.

For the same reason that the Department of Agriculture says they want to study the matter some more; they simply have not gotten around to doing the right thing. I do not know what interferes with

them, whether it is the State Department or somebody else in the administration gets in their way, from making a scientific judgment, from making a proper judgment, a commonsense judgment, saying, we have to decrease some of these imports.

Nevertheless, we are taking a chance, a very, very grievous chance, on the importation of casein in light of the fact that some of the casein comes from countries that have hoof and mouth disease.

Turning to a different subject, Mr. President, is there anything wrong in saying to some of our trading partners, "Well, we just do not have as good a market as we have had for you before in terms of casein, so you are going to have to be restricted"; saying to them, "You can sell about half of what you have been selling, or you can sell all of what you have been selling, provided you get the market first. But when that limit is reached, you are out for that year."

Is there anything wrong with saying that? I do not think so. I do not think so at all, for reasons I have established before: We have to protect our own program, we have to save up to $200 million a year in Federal outlays because we cannot afford it any longer, because we have too much surplus. The surplus of our own products is mounting so much that we are going to have between $1.5 billion and $2 billion of dairy products in surplus ourselves, just stored in the Commodity Credit Corporation.

I do not think there is anything wrong in saying that. I think it is only fair for our taxpayers that we do say it, we do enact it, we do agree to the amendment so that we can enhance the President's program, help the President's program find, under this additional savings, $200 to $230 million in Federal outlay.

MELCHER AMENDMENT TO S. 509

● Mr. D'AMATO. Mr. President, let me suggest to my colleagues today, that the amendment offered by the distinguished Senator from Montana, Senator MELCHER, is not an amendment designed to benefit the dairy industry, but, in fact, an attempt to embarrass the Reagan administration as it embarks on the course mandated by the American people last November.

As a Senator from one of the leading dairy States in this Nation, let me assure my colleagues on both sides of the aisle that the dairy industry has vociferously made its views known to me regarding the importation of casein. I have met with leaders of the New York dairy industry in an effort to understand the problems with which they are faced. They have urged me to support the Melcher amendment. I have reviewed the many letters and telegrams that I have been beseiged with for the better part of the past few weeks.

By an overwhelming margin, they have urged me to support the Melcher amendment. Nevertheless, I remain unconvinced that the reduction of casein imports into this country is necessary to protect the dairy industry in New York and throughout the United States. To date, the evidence simply does not support the premise embodied in the amendment before us.

Just over 1 year ago, the International Trade Commission studied the matter and found no evidence of U.S. damage from casein imports. This most recent and extensive study of the issue does not support the contention that casein imports damages our domestic milk industry and should be restricted. The fact of the matter is that casein is not even manufactured in the United States because it is not eligible for price supports, and therefore is not profitable.

I am also concerned with the effects of this amendment on our trade relations. The Senate Agriculture Committee heard testimony from the Deputy Secretary of Agriculture warning that legislation limiting casein imports would risk almost certain action against the full range of U.S. exports under the general agreement on tariffs and trade (GATT). Australia, New Zealand and Ireland have already communicated to us their concern about limiting the importation of casein.

Despite the evidence presented to the Senate which indicates that we should not adopt the Melcher amendment, let me say that I eagerly await the Department of Agriculture's latest study to determine the effects of casein imports, which is to be completed by July 1, 1981. Let me assure the dairy industry in New York, that if the study shows a very definite adverse impact on the surplus of domestic milk, I will carefully consider sponsoring legislation to place some limits on casein imports.

However, as I said earlier, this entire matter of reducing casein imports is not important for the reasons the dairy industry believes. Rather the importance of the vote on this amendment lies in terms of whether or not we can forge a consensus to achieve the task handed us by the people in the last election: fiscal discipline. This vote is a vote of confidence in the Reagan administration's program for economic recovery.

The people of this Nation sent a message to Washington last year; that message was loud and clear. They no longer want the affairs of State to be conducted as "business as usual." We must heed their wishes. Many of us were elected as a result of the fiscal discipline theme which President Reagan articulated so clearly throughout his campaign and which became the heart of the campaigns of many of my freshmen colleagues. Now the President has asked the Congress to take the first step in restoring fiscal discipline to the operation of the Federal Government. The time is now for us to put aside individual concerns for the greater good: bringing fiscal restraint to the Nation.

As I have made clear, New York is a leading dairy State and I have been concerned with the impact of price support cuts. And I want to commend the dairy industry for taking the first step on the long and difficult road to fiscal restraint.

But this amendment is obviously a carefully crafted attempt to embarrass the administration by creating a time-consuming jurisdictional dispute in the House of Representatives. The importation of casein is not really an issue, but if the amendment should pass this body, it could signal the beginning of the end for any hope of bringing fiscal restraint to the United States.

Mr. President, we must have the courage to bring about fiscal discipline. It is not always politically popular to take such a position. We must put an end to the platitudes which have prevailed in recent times and realize that we cannot conduct business as usual. I do not believe that this administration came into office to continue conducting the business of this Nation as it has been done. Certainly, this Senator was not elected to preserve the status quo.

The American public expects us to act. In so doing, let us bear in mind that there is a larger constituency than any one State; that constituency is this Nation. I urge my colleagues to defeat this untimely amendment.●

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOREN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. BOREN. Madam President, I ask unanimous consent that the pending amendment be temporarily set aside so that I might offer an amendment at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 16

(Subsequently numbered amendment No. 13)

(Purpose: To embargo imports of agricultural commodities from the Soviet Union under certain conditions)

Mr. BOREN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BOREN) proposes an unprinted amendment numbered 16.

Mr. BOREN. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, immediately after line 5, insert the following:

"SEC. 2. Notwithstanding any other provision of law, effective April 1, 1981, no agricultural commodities produced in the Union of Soviet Socialist Republics may enter the United States during any period during which the President imposes restrictions on, or prohibits, the export of grain or any other agricultural commodity to the Union of Soviet Socialist Republics (including the restrictions on the exportation of agricultural products to such country initiated on January 7, 1980).".

Mr. BOREN. Madam President, at this time I ask for the yeas and nays on the

amendment and ask that the vote occur after that on the other amendments for which votes have already been scheduled tomorrow.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. BOREN. Very well. I will withdraw the request at this time and renew it at a later time.

Madam President, the amendment which I am offering simply states that we should cease the importation of any agricultural products from the Soviet Union as long as the grain embargo remains in effect.

I am certainly in support of the two amendments which have already been offered to the pending measure, the amendment of the Senator from Montana which would curtail the imports of casein in the United States, saving the taxpayers money, since these imports displace domestically produced milk, particularly skim milk. I am also strongly in support of the amendment of the Senator from Nebraska (Mr. ZORINSKY), which calls upon the President to end the grain embargo and sets up procedures which have to be followed if the grain embargo was continued in the future.

During the discussion of the dairy support program in the Agriculture Committee, I was shocked to learn that we are continuing to import not only casein but other agricultural products as well from the Soviet Union. It is absolutely incredible to me that our Government, on the one hand, denies to our farmers access to the Soviet market, while, on the other hand, we are keeping our markets open to the Soviets.

I am sure that many farmers would raise the question, particularly those who produce wheat and grain, as to whose economic interest the U.S. Government is really looking out for.

During the course of last year, we imported from the Soviet Union approximately 1.3 million pounds of casein at a cost of close to $1 million. This $1 million could have rightly gone to U.S. farmers. Other agricultural products were imported from the Soviet Union as well.

I would like to state a few of those products. The figures which I am citing are drawn from the U.S. Foreign Agricultural Service, which reports that last year we imported from the Soviet Union almost $10 million worth of agricultural products, including $6,479,000 in fur skins; $1,455,000 of tobacco; $979,000 of casein; $334,000 of tea; $175,000 worth of sugar and tropical products, and lesser amounts of fruits and vegetable products, alcoholic beverages, chocolates, seeds and other grain products, and honey.

Again, while the amount of money is not large, I think the principle involved is extremely important. How can we possibly defend the Government's current policy?

I would say that I make these comments not in criticism of the current administration. These policies were begun under the past administration. But as one of the farmers said to me over the weekend when I was in my home State, "We used to refer to the embargo as being the embargo of the last administration, but if these policies which are now being followed are not rapidly reconsidered and changed by the current administration as the months roll on, it will become the policy of this administration."

I think it would be very unfortunate if this administration does not act immediately to correct the policy mistakes of the past.

If the administration is not going to lift the grain embargo—as I hope it will—I believe that we should halt the importation of all Soviet agricultural products for as long as the embargo on the sale of grain produced by American farmers is continued.

This is the least that we can do for our farmers who have already suffered an unfair burden as a result of American foreign policy. Why should we be benefiting Soviet farmers and ignoring our own?

I yield the floor, Madam President.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BOREN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Madam President, at this time I renew my request for the yeas and nays on the amendment I have just offered and ask that the vote on the amendment occur after the votes on the others which have been offered.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 11—EMBARGO ISSUES

Mr. ZORINSKY. Madam President, I would like to deal with several issues raised about my amendment. These questions have been raised in some cases to assure that my amendment is not considered on its merits.

First, we should have a clean bill to send to the House. This approach gives S. 509 the standing of one of the Ten Commandments. We do not know what the House will do with S. 509. They might amend the bill in the House, and my amendment could help them pass the bill.

Second, we should not send a message of any kind to the Soviets regarding the embargo. This attitude would leave the embargo issue completely up to the executive branch, and I do not propose to do that. My embargo amendment would offer three clear options for the President. The Soviets know about this issue, our producers know about it, and it will not go away. We are not fooling anyone by this approach.

Third, we should not try to commit the President or tie his hands. My amendment is flexible, and it offers the President a path to get rid of the embargo if he wants to do so. I point out that 43 Senators, including 33 Republicans, voted last year for the Pressler amendment that was much more restrictive than my amendment.

Madam President, I hope that the President will view this amendment as a flexible approach to get rid of the embargo. It is an issue, and, regardless of the outcome of this amendment, he will at some point have to deal with it. Hiding one's face in the sand will not help it to go away.

Madam President, the adoption of my amendment will not have an adverse effect on S. 509. The purpose of S. 509 is very simple—to reduce the Federal budget for fiscal year 1981. My amendment will not have any effect on the Federal budget.

Under my amendment, if the President decides to extend the Russian grain embargo in a manner that does not discriminate against U.S. farmers, he can do so without any outlay of funds.

If, on the other hand, he chooses to lift the embargo, or to move toward renegotiating the bilateral grains agreement with Russia, it can be expected that grain markets will react positively and grain prices will be stronger. If this happens, the need for farmers to rely on USDA farm programs will be lessened. This, in turn, could result in a reduction in USDA outlays.

Also, it must be remembered that farmers rightly feel that, with the grain embargo, they have been unfairly singled out to bear the sacrifice involved in the President's national policy decision relating to our foreign relations with Russia.

With S. 509, it appears that farmers have once again been singled out—this time to be the first to lose benefits as a result of the President's implementation of the public mandate to reduce the Federal budget.

Because farmers are once again being put first in line to bear the cost of a national policy decision, it is singularly appropriate to include in S. 509 provisions to help farmers cope with problems they already face as a result of being the first, and practically only, group to bear the consequences of the earlier national policy decision.

For these reasons, I urge the Senate to reject the argument that my amendment is not appropriate for inclusion as part of S. 509.

Madam President, I have a copy of a letter from Mr. Jim Billington, president of the National Association of Wheat Growers, to President Reagan dated March 5. The Wheat Growers letter outlines the concern of America's wheat farmers with the continued restriction of wheat sales to the Soviet Union, and urges the President to take immediate steps to negotiate a new grain supply agreement with the Soviet Union.

The National Association of Wheat Growers letter states:

> The lack of any definitive statement by your administration regarding the future of US-Soviet grain trade leaves farmers with no idea of export sales prospects.

I ask unanimous consent, Madam President, that a copy of the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF WHEAT GROWERS,
Washington, D.C., March 5, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The National Association of Wheat Growers urges you to take immediate steps to open negotiations with the Soviet Union which can lead to the successful conclusion of a new Grain Supply Agreement.

U.S. wheat sales to the USSR have been restricted for 14 months, and the nation's farmers have been isolated from Soviet demand while competing export firms have been free to sell third country grain to the USSR through their affiliate organizations. Soviet imports of wheat, notwithstanding the U.S. sales suspension, will reach a record of 16.5 million metric tons (605 Million bushels) during the July-June period of 1980–81, 37 percent more than the 1979–80 level.

The ineffective U.S. sales suspension has produced a shift in world grain trade patterns, and competing nations which have been allowed to displace the U.S. in this important market are expanding their wheat acreage and will strive to maintain their enlarged market share in future years. This means that U.S. farmers will continue to be disadvantaged in world trade, unless they are able to regain access through the renegotiation or extension of the 1975 US-Soviet Grain Supply Agreement which expires on October 1, 1981.

Lifting the Carter Administration embargo is a necessary first step to restoring US-Soviet grain trade, but this promised action will have little value unless it is coupled with clearance of new U.S. wheat sales for shipment before October 1 and initiatives to continue the arrangement between the U.S. and the USSR on grain sales.

Currently, the lack of any definitive statement by your administration regarding the future of US-Soviet grain trade leaves farmers with no idea of export sales prospects. Access to the Soviet market and the potential level of trade figure decisively into wheat farmer income, and we urge you to take prompt action towards re-establishing commercial grain sales.

Sincerely yours,

JIM BILLINGTON,
President.

Mr. ZORINSKY. Madam President, I ask unanimous consent that a copy of a Washington Star article dated March 13, 1981, authored by Representative PAUL FINDLEY, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EMBARGO "PROTECTION" COULD BOOST FARM SUBSIDIES

(By PAUL FINDLEY)

In the back rooms of Capitol Hill, and in lobbying offices throughout the city, one of the linchpins of President Reagan's economic program is slowly being worked loose. Surprisingly, presidential indecision is the instrument of its undoing.

The president's farm program, which is expected to call for massive cuts in federal farm subsidies and a greater emphasis on market economics and self reliance, is in danger. Instead of less federal involvement in the farm sector, we could see more. Making matters worse, the effort could be spearheaded by farm-state congressmen from the president's own party.

Why? Because the president's foreign policy contradicts his domestic policy. And while some members of his cabinet fail to see the contradiction, it is abundantly clear to the many farmers who supported Republicans in 1980.

A critical issue in the 1980 farm vote was the suspension of grain sales to the Soviet Union. During the campaign, President Reagan said that one of his first acts to help the ailing farm economy would be to end the embargo.

Meanwhile, Republican congressmen and senators who went to the wall for candidate Reagan in 1980 are being pushed to the wall in 1981 by President Reagan. It is particularly uncomfortable for congressmen who vocally supported Mr. Reagan prior to the Republican convention.

NOW IT'S HIS

The Carter embargo is fast becoming the Reagan embargo. The president promised to reduce government involvement in agriculture with its attendant protections (and costs), in exchange for more access to markets.

Congressmen on both sides of the aisle are willing to work for programs which reduce government spending—or at least hold the line on it. But in an economic segment like agriculture, where production costs over the past two years have risen twice as fast as prices farmers received, there is tremendous pressure, given the embargo atmosphere, to maintain government programs which keep people on the farm. This is done through price-supports, aggressive market development, or both. If you want a market-oriented domestic policy, you should have a market-oriented foreign policy.

Making matters worse, to date the embargo has done little more than show the Soviets that we're willing to hurt ourselves greatly in order to hurt them a little. Damage to the Soviet economy has been minimal. Soviet grain imports in the year ending July 1981 are expected to total a record 34.5 million tons, Soviet livestock numbers on Jan. 1 of this year stood at near-record levels.

While the growth rate in livestock slowed to its lowest level in at least four years, there was no evidence of the massive herd liquidation predicted when the embargo originally was invoked. In short, the Soviets have managed the embargo well.

That doesn't mean things are rosy in the USSR. The Soviets harvested a poor crop in 1980, the second poor crop in a row. Soviet livestock were slaughtered at lighter weights last year, resulting in a 400,000 ton (2.6 per cent) decline in meat products. Milk production was down; however, poultry production was up.

We also should remember that in 1975, when Under Secretary of State Charles Robinson attempted to link U.S.-Soviet grain sales to discounts on Soviet oil sold to the U.S. Soviet Foreign Trade Minister Nikolaichev responded that the Soviet people would "starve to death" before they succumbed to such political pressure.

The Soviet Union has now issued a public invitation for a new grain agreement. The longer Mr. Reagan delays, the more domestic pressure will arise—and not just from the farmers.

EMBARGOED JOBS

Labor is beginning to realize that American jobs are being embargoed, too. Thousands of man-days of work in trucking, storing, drying, barging, processing and shipping grain are being banned from the United States.

For example, the Soviet Union is now importing dramatic quantities of processed items—mainly flour and soybean meal. The volume of each category will exceed one million metric tons during the current year. And the processing represents an enormous input of labor. Except for the embargo, those jobs would be mostly U.S. jobs. Because of the embargo, Europeans, Canadians and Latin Americans get the work.

So, the issue for the Reagan administration becomes: What now? If the president fails to lift the embargo, farm state congressmen and senators will be under heavy pressure to write an "embargo protection" provision in the 1981 farm bill. This probably would take the form of substantial price support increases. The additional budget outlay could damage the president's economic program. It might even wreck it, if it provided the precedent for other interests to gain funding increases for their pet projects.

On the other hand, lifting the embargo would not necessarily result in additional shipments of U.S. grain to the Soviets during the next six months.

FIVE-YEAR AGREEMENT

Under our five-year grain agreement with the Soviet Union, we are committed to selling up to 8 million tons of wheat and corn to them each year, regardless of the embargo. The Soviets have already purchased the 8 million tons allowed, so if they wish to purchase more, they must consult with us. These consultations could be used to negotiate the conditions that would be associated with increased grain sales as well as any other item of mutual interest.

For this reason, ending the embargo would give nothing to the Soviets. It would not weaken the President's hand in dealing with them.

In the October 1980 Communist Party Plenum, Soviet President Leonid Brezhnev stated that improving the food supply is the first priority is improving the living standards of the Soviet people. This would imply a willingness to negotiate, if the process could be moved from the public arena to private consultations. It should be clear that hard-liners in the Kremlin will never publicly concede U.S. embargo pressures.

That leaves U.S. policy makers facing a stalemate that is hurting the Reagan administration. For the president, the embargo albatross is getting heavier. He should shed it quickly.

● Mr. HUDDLESTON. Mr. President, I have previously during this debate commended the distinguished Senator from Nebraska (Mr. ZORINSKY) for introducing his amendment.

The adoption of the amendment by the Senate would go far in depoliticizing the debate on whether the embargo of U.S. grain sales to the Soviet Union that was imposed more than a year ago by President Carter and renewed by him in January 1981 should be lifted or continued.

Certainly, of all the national security and foreign policy actions taken by the United States to impress the Soviets with the seriousness with which our Nation regarded their breach of international law and world stability in invading Afghanistan, none was more dramatic than the grain embargo.

There are, I am sure, many persons—including Senators on both sides of the aisle—who would agree with the remarks President Reagan made in his major agricultural address of the 1980 campaign. In that address, which was delivered on September 30, 1981, at the Lounsberry farm in Nevada, Iowa, Mr. Reagan stated that the grain embargo—and I quote his exact words—

Has damaged the credibility of American farmers as reliable suppliers of wheat, of corn, of soybeans—of all farm products, by embargoing agricultural exports to the Soviet Union. The result has been costly to American farmers and ineffective in our foreign policy. I am pleased that the U.S. Senate

voted last Friday to shut off funds to implement or enforce the embargo. This Senate action was a vote of no confidence in President Carter's embargo policy. The canceling of our grain contracts was Jimmy Carter's way of sending a "Message to Moscow." All he succeeded in doing was hurting U.S. farmers and the U.S. taxpayer.

Likewise, I am certain that there are many persons—again including Senators on both sides of the aisle—who would disagree with Mr. Reagan's assessment. There are, in fact, many western experts who have concluded that the effects of the U.S. sales suspension—although difficult to isolate from the Soviets' own agricultural shortcomings—presented Soviet planners with a troublesome element, and that the economic impact has been more than trivial.

At his March 6 press conference, President Reagan stated that the administration had not reached a decision on whether to lift the grain embargo. I ask unanimous consent that the text of the question the President was asked and his response be printed at this point in the RECORD.

Q. Mr. President, at your first press conference you were asked about the Soviet grain embargo and you said there were really only two options, either to abandon it or to broaden it. Can you tell us which it's going to be and, if you haven't reached a decision yet, can you tell us what factors are still at play here?

P. We haven't reached a decision. I think all of us would like to lift the embargo. I still think that it has been as harmful to the American farmer as it has been to the Soviet Union. But the situation has changed from the time when it was first installed. I was against it at the time. I didn't think it should have been used as it was, that if we were going to follow that road we should have gone across the board and had a kind of quarantine. We didn't but now we have to look at the international situation the way it is and see what would be the effect, not just on the use of grain, but the whole effect and what would it say to the world now for us to just unilaterally move.

We're hopeful that we can arrive at a settlement and a decision on this and one that will benefit our farmers.

But whatever may be one's views on the effect of the embargo, it is important to note that Senator ZORINSKY's amendment is flexible and gives the President a number of ways to resolve this important issue. The amendment does not in any way force the President to take precipitous action.

Under the amendment, the President is afforded three options:

First, the President could elect to lift the Soviet grain embargo by April 15, 1981; or

Second, the President could continue the restrictions by certifying to Congress that the continuation of such restrictions is necessary to further significantly the national security and foreign policy interests of the United States, and will not have an undue adverse effect nor unfairly impose a discriminatory burden on the agricultural economy and the farmers of the United States; or

Third, the President could delay for a reasonable time the date of expiration of the embargo by certifying to Congress, prior to April 15, 1981, that he intends to negotiate a new bilateral grains agreement with the Soviet Union to replace the agreement that expires September 30, 1981.

It should be noted that if the President elects to lift the embargo, such lifting would not automatically open up additional sales of wheat and corn to the Soviets. Russia has already purchased the 8 million tons authorized this year under the bilateral grains agreement. Any additional sales of wheat and corn above the 8 million tons would have to be negotiated.

The second option offers the President the opportunity to continue the embargo if he feels that it is necessary for national security and foreign policy reasons. But, he would have to first consider the effect of the embargo on farmers. He would have to certify to Congress that continuation of the embargo would not impose a discriminatory burden on farmers and the agricultural economy of the United States.

The third option offers the President the opportunity to continue the embargo in order to negotiate a new bilateral grains agreement with the Soviet Union. No time limitation is set, and the amendment only asks that the President indicate that he intends to negotiate a new bilateral agreement to replace the one that expires September 30, 1981.

I emphasize again that Senator ZORINSKY's amendment does not force the President to take precipitous action. The amendment merely requires the President to resolve the grain embargo issue in a careful and responsible manner.

I urge all my colleagues to support the amendment.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED OR HELD AT THE DESK

As in executive session, the acting president pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees or held at the desk.

Mr. BAKER. Mr. President, I ask unanimous consent that the nomination of Lionel H. Olmer and G. Ray Arnett be held at the desk until the close of business Tuesday, March 24.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON ADVERSE IMPACT ON COMMUNITIES IN AREAS IN WHICH MAJOR NEW MILITARY FACILITIES ARE CONSTRUCTED—MESSAGE FROM THE PRESIDENT—PM 39

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Armed Services:

To the Congress of the United States:

Section 803(b) of the Military Construction Authorization Act of 1980 (PL 96-418) called for "a thorough study of the adverse impact on communities in areas in which major, new military facilities are constructed with a view to determining the most effective and practicable means of promptly mitigating such impact."

I am submitting herewith a preliminary report of this study which is being conducted by an interagency task force of the President's Economic Adjustment Committee. Additional portions of the study are underway, and will be reflected in a final report which I will forward to the Congress as early as practicable. I will defer offering any recommendations on organizational and budgeting approaches to community impact assistance until that time.

The study's initial findings suggest that the near-term local economic benefits of a major new military base may not be sufficient to offset the cost of required additional community facilities and services, and that special Federal assistance to affected States and localities may sometimes be justified. At the same time, States and localities should be expected to meet their share of community facility and service costs in defense growth areas.

As a general proposition, therefore, any special Federal community assistance should be limited to the minimum level required to mitigate the adverse effects of extraordinary growth directly resulting from major new bases. In addition, I would oppose any such assistance taking the form of Federal guarantees of State or municipal indebtedness where the interest is not subject to Federal income tax.

With specific reference to the MX weapon system and the East Coast Trident base, Section 802 of the Military Construction Authorization Act contains a wide range of authorities to provide impact assistance for affected areas. If additional legislation is required, I will request it at a later date.

I am pleased to note that representatives of the States and affected communities of Nevada, Utah, Georgia, and Florida have participated fully in preparation of this report. I am confident that, working together, we can meet legitimate State and local concerns about defense growth impacts, while at the same time satisfying national security requirements.

RONALD REAGAN.

THE WHITE HOUSE, *March 23, 1981.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-613. A communication from the Deputy Secretary of Agriculture transmitting a draft of proposed legislation relating to increasing

the interest rates on loans for water and waste disposal and essential community facilities; to the Committee on Agriculture, Nutrition, and Forestry.

EC–614. A communication from the Deputy Secretary of Agriculture transmitting a draft of proposed legislation to remove the 2 percent interest rate for insured loans under the Rural Electrification Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC–615. A communication from the Deputy Secretary of Agriculture transmitting a draft of proposed legislation to recover costs related to certain commodity inspection and licensing; to the Committee on Agriculture, Nutrition, and Forestry.

EC–616. A communication from the Deputy Secretary of Agriculture transmitting a draft of proposed legislation relating to cost recovery for services by the Federal Grain Inspection Service; to the Committee on Agriculture, Nutrition, and Forestry.

EC–617. A communication from the Clerk of the U.S. Court of Claims, transmitting, pursuant to law, a copy of the Court's judgment order in the case of Caddo Tribe of Oklahoma, et al. v. United States; to the Committee on Appropriations.

EC–618. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report on certain proposed rescissions and deferrals previously transmitted to the Congress by the President; jointly, pursuant to the order of January 30, 1975; to the Committee on Appropriations and the Committee on the Budget.

EC–619. A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, the cumulative report on monthly rescissions and deferrals proposed by the President; jointly, pursuant to the order of January 30, 1975; to the Committee on Appropriations and the Committee on the Budget.

EC–620. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to Saudi Arabia; to the Committee on Armed Services.

EC–621. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a report on a decision made to convert an operation and maintenance function at Nellis Air Force Base, Nev., to performance under contract; to the Committee on Armed Services.

EC–622. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a report on a decision made to convert shelf-stocking and custodial services at Pease AFB, N.H., to performance under contract; to the Committee on Armed Services.

EC–623. A communication from the Acting Under Secretary of Defense for Research and Engineering, transmitting, pursuant to law, data to accompany a report previously submitted (pursuant to law) costs incurred on negotiated and bid and proposal defense contracts; to the Committee on Armed Services.

EC–624. A communication from the Acting Assistant Secretary of the Army for Installations, Logistics, and Financial Management, transmitting, pursuant to law, a report on a decision made to convert laundry and drycleaning functions at Fort Riley, Kans., to performance under contract; to the Committee on Armed Services.

EC–625. A communication from the Acting Assistant Secretary of the Army for Installations, Logistics, and Financial Management, transmitting, pursuant to law, a report on a decision made to convert the laundry and dry cleaning service at Fort Meade, Md., to performance by contract; to the Committee on Armed Services.

EC–626. A communication from the Assistant Secretary of the Air Force for Research, Development and Logistics, transmitting, pursuant to law, a report on a decision made to convert the family housing maintenance function at Moody Air Force Base, Ga., to performance by contract; to the Committee on Armed Services.

EC–627. A communication from the Acting Assistant Secretary of the Army for Installations, Logistics, and Financial Management, transmitting, pursuant to law, a report on a study made regarding conversion of certain in-house functions to performance by contract; to the Committee on Armed Services.

EC–628. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a decision made to convert commissary shelf-stocking and custodial services at Malmstrom Air Force Base, Mont., to performance by contract; to the Committee on Armed Services.

EC–629. A communication from the Assistant Secretary of Defense for Manpower, Reserve Affairs, and Logistics, transmitting pursuant to law, a report on selected reserve recruiting and retention incentives; to the Committee on Armed Services.

EC–630. A communication from the Acting General Counsel of the Department of Defense transmitting a draft of proposed legislation requesting authority for supplemental appropriations for fiscal year 1981 for the Department of Defense; to the Committee on Armed Services.

EC–631. A communication from the Assistant Secretary of the Air Force for Research, development, and Logistics, transmitting, pursuant to law, a report on a decision made to convert the range maintenance at Gila Bend Air Force Auxiliary Field, Ariz., to performance by contract; to the Committee on Armed Services.

EC–632. A communication from the Secretary of Labor transmitting, pursuant to law, a report on exemplary rehabilitation certificates awarded for calendar year 1980; to the Committee on Armed Services.

EC–633. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a report on a decision made to convert commissary shelf-stocking and custodial services at Seymour-Johnson AFB, N.C., to performance by contract; to the Committee on Armed Services.

EC–634. A communication from the Acting Under Secretary of Defense for Research and Engineering, transmitting, pursuant to law, a report on independent research and development and bid and proposal costs; to the Committee on Armed Services.

EC–635. A communication from the Assistant Secretary of the Air Force for Research Development, and Logistics, transmitting pursuant to law, a report on a decision made to convert the ground maintenance function at March Air Force Base, Calif., to performance under contract; to the Committee on Armed Services.

EC–636. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation relative to furnishing of routine port services to visiting naval vessels of friendly foreign countries if same are provided reciprocally to vessels of the United States; to the Committee on Armed Services.

EC–637. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "DOD Participation in the Space Transportation System: Status and Issues"; to the Committee on Armed Services.

EC–638. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Air Force and Navy Plans to Acquire Trainer Aircraft"; to the Committee on Armed Services.

EC–639. A communication from the Chairman of the Federal Deposit Insurance Corporation, transmitting, pursuant to law, the first annual report of the Corporation on the Change in Bank Control Act of 1978; to the Committee on Banking, Housing, and Urban Affairs.

EC–640. A communication from the Chairman of the Board of Governors of the Federal Reserve System, transmitting, pursuant to law, the report of the Board on the administration of the Change in Bank Control Act of 1978; to the Committee on Banking, Housing, and Urban Affairs.

EC–641. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, information on reports to be submitted to the Congress by the Department in the next two months; to the Committee on Banking, Housing, and Urban Affairs.

EC–642. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report with respect to a transaction involving United States exports to Israel; to the Committee on Banking, Housing, and Urban Affairs.

EC–643. A communication from the Executive Director of the Neighborhood Reinvestment Corporation, transmitting a draft of proposed legislation to extend the authorization of appropriations for the Neighborhood Reinvestment Corporation; to the Committee on Banking, Housing, and Urban Affairs.

EC–644. A communication from the Chairman of the Board of Governors of the Federal Reserve System, transmitting, pursuant to law, the sixth annual report of the Board on the Board's functions with respect to Section 18(f) of the Federal Trade Commission Act; to the Committee on Banking, Housing, and Urban Affairs.

EC–645. A communication from the Vice President for Government Affairs of the National Railroad Passenger Corporation, transmitting, pursuant to law, a report on the average number of passengers per day and the on-time performance of each train operated by the Corporation for the month of January 1981; to the Committee on Commerce, Science, and Transportation.

EC–646. A communication from the Vice President for Government Affairs of the National Railroad Passenger Corporation, transmitting, pursuant to law, a report on the average number of passengers per day and the on-time performance of each train operated by the Corporation for November 1980; to the Committee on Commerce, Science, and Transportation.

EC–647. A communication from the Vice President for Government Affairs of the National Railroad Passenger Corporation, transmitting, pursuant to law, a report on the average number of passengers per day and the on-time performance of each train operated by the Corporation for December 1980; to the Committee on Commerce, Science, and Transportation.

EC–648. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–649. A communication from the Acting Chairman of the Interstate Commerce Commission, transmitting, pursuant to law, the annual report of the Commission on the effectiveness of the Rail Passenger Service Act of 1970; to the Committee on Commerce, Science, and Transportation.

EC–650. A communication from the Acting Chairman of the United States Con-

sumer Product Safety Commission, transmitting, pursuant to law, an amended budget estimate for the Commission for fiscal year 1982; to the Committee on Commerce, Science, and Transportation.

EC–651. A communication from the Secretary of Energy, transmitting, for the information of the Senate, that a report of the Department on the Use of Alcohol In Fuel will be submitted on or about May 15, 1981; to the Committee on Energy and Natural Resources.

EC–652. A communication from the Secretary of the Interior, transmitting, pursuant to law, an annual report on the current status or completion or revision of general management plans for each unit of the National Park System for calendar year 1980; to the Committee on Energy and Natural Resources.

EC–653. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report entitled "Report of Review and Revision of Royalty Payments for Fiscal Years 1979 and 1980 for Federal Onshore and Outer Continental Shelf (OCS) Oil and Gas Leases"; to the Committee on Energy and Natural Resources.

EC–654. A communication from the Chief of the Forest Service, Department of Agriculture, transmitting, pursuant to law, a copy of the Development and Management Plan, Legal Description, and Map for the St. Joe River, Idaho; to the Committee on Energy and Natural Resources.

EC–655. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report on the Strategic Petroleum Reserve, dated February 16, 1981; to the Committee on Energy and Natural Resources.

EC–656. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on an application for repayment of excess gas royalties paid by the Phillips Petroleum Company; to the Committee on Energy and Natural Resources.

EC–657. A communication from the Comptroller General, transmitting, pursuant to law, a report entitled "Federal Charges For Irrigation Projects Reviewed Do Not Cover Costs"; to the Committee on Energy and Natural Resources.

EC–658. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, the Report to Congress on Status of Emergency Response Planning for Nuclear Power Plants; to the Committee on Environment and Public Works.

EC–659. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act to clarify that no prior public hearing is required for applications for amendment which involve no significant hazards consideration and for other purposes; to the Committee on Environment and Public Works.

EC–660. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Action Needed To Resolve Problem Of Outstanding Supplemental Security Income Checks"; to the Committee on Finance.

EC–661. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "More Diligent Followup Needed To Weed Out Ineligible SSA Disability Beneficiaries"; to the Committee on Finance.

EC–662. A communication from the Secretary of Labor, transmitting a draft of proposed legislation to amend the Federal-State Extended Unemployment Compensation Act of 1970 to eliminate the national trigger for extended compensation, change the State trigger, to provide for a qualifying requirement, and for other purposes; to the Committee on Finance.

EC–663. A communication from the Acting Secretary of the Treasury, transmitting, pursuant to law, the annual report of the Department of the Treasury's Office of Revenue Sharing for fiscal year 1980; to the Committee on Finance.

EC–664. A communication from the Chairman of the National Commission on Social Security, transmitting, pursuant to law, the final report of the Commission; to the Committee on Finance.

EC–665. A communication from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize appropriations for fiscal years 1982 and 1983 for the Department of State; to the Committee on Foreign Relations.

EC–666. A communication from the Acting Secretary of the Treasury, transmitting, pursuant to law, a request of the Administration for prompt action on two draft bills submitted on January 17, 1981; to the Committee on Foreign Relations.

EC–667. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements, other than treaties, entered into by the United States in the sixty day period prior to March 12, 1981; to the Committee on Foreign Relations.

EC–668. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "U.S. Assistance To Egyptian Agriculture: Slow Progress After Five Years"; to the Committee on Foreign Relations.

EC–669. A communication from the Acting Administrator of the Agency for International Development, transmitting, pursuant to law, the "1980 Women In Development" report; to the Committee on Foreign Relations.

EC–670. A communication from the Acting Director of ACTION, transmitting, pursuant to law, final regulations for certain programs of ACTION; to the Committee on Governmental Affairs.

EC–671. A communication from the Employee Benefits and Risk Manager, Office of Joint Services, Farm Credit Institutions, transmitting, pursuant to law, a report on an amended retirement plan for Farm Credit Institutions in the Fourth District; to the Committee on Governmental Affairs.

EC–672. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a follow-up report and recommendations on the report of the Board of Visitors to the U.S. Naval Academy for September 27, 1978 and September 26, 1979; to the Committee on Governmental Affairs.

EC–673. A communication from the Secretary of the Postal Rate Commission, transmitting, pursuant to law, a report on the implementation of the Sunshine Act during calendar year 1980; to the Committee on Governmental Affairs.

EC–674. A communication from the Deputy Assistant Secretary of Housing and Urban Development (Administration), transmitting, pursuant to law, a report on a proposed amendment to a system of records for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–675. A communication from the Acting Commissioner of Social Security, transmitting, pursuant to law, a notice of a proposed new system of records for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–676. A communication from the Vice President of the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, a statement of receipts and expenditures of the Chesapeake & Potomac Telephone Co. for 1980; to the Committee on Governmental Affairs.

EC–677. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a report detailing the results of an investigation requested by the Office of Special Counsel, Merit Systems Protection Board; to the Committee on Governmental Affairs.

EC–678. A communication from the Chairman of the Federal Deposit Insurance Corporation, transmitting, pursuant to law, the report of the Corporation on compliance with the provisions of the Government in the Sunshine Act for calendar year 1980; to the Committee on Governmental Affairs.

EC–679. A communication from the Chairman of the National Transportation Safety Board, transmitting, pursuant to law, the annual report of the Board on the administration of the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–680. A communication from the Acting Assistant Secretary of Commerce (Administration), transmitting, pursuant to law, the annual report of the Department on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–681. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report and recommendation concerning the claim of Staff Sergeant Anne M. Fisher, United States Army Reserve; to the Committee on the Judiciary.

EC–682. A communication from the Acting Director of the International Communication Agency, transmitting, pursuant to law, the annual report of the Agency on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–683. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, the annual report of NASA on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–684. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting, pursuant to law, the annual report of the Agency on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–685. A communication from the Director of the Administrative Office of the United States Courts, transmitting a draft of proposed legislation to amend section 3006A of title 18 of the United States Code to provide protection against personal liability to the officers and employees of certain defender organizations providing representation under the Criminal Justice Act; to the Committee on the Judiciary.

EC–686. A communication from the General Counsel, Office of the Federal Inspector, Alaska Natural Gas Transportation System, transmitting, pursuant to law, enclosures to accompany the annual report of the Office on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–687. A communication from the Secretary of Health and Human Services, transmitting, for the information of the Senate, notice that the submission of the special report on the impact of the change in the definition of developmental disabilities has been delayed; to the Committee on Labor and Human Resources.

EC–688. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on section 340a of the Public Health Service Act; to the Committee on Labor and Human Resources.

EC–689. A communication from the Chairman of the United States Railroad Retirement Board, transmitting a draft of proposed legislation to repeal the first section of the act entitled "An Act to amend the Railroad Retirement Act of 1974 to extend certain cost-of-living increases"; to the Committee on Labor and Human Resources.

EC–690. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations—Pell Grant Program; Revision in the 1981–82 Family Contribution Schedules; to the Committee on Labor and Human Resources.

EC–691. A communication from the Chairman of the United States Railroad Retirement Board, transmitting, for the information of the Senate, notice of administration support for two drafts of proposed legislation submitted prior to January 20, 1981; to the Committee on Labor and Human Resources.

EC–692. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, a copy of the revised budget request of the Commission for fiscal year 1982; to the Committee on Rules and Administration.

EC–693. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Better Guidelines Could Reduce VA's Planned Construction Of Costly Operating Rooms"; to the Committee on Veterans' Affairs.

EC–694. A communication from the Acting Administrator of the Veterans Administration, transmitting, pursuant to law, a report on certain cases recommended for equitable relief; to the Committee on Veterans Affairs.

EC–695. A communication from the Acting Administrator of the Veterans Administration, transmitting, pursuant to law, a report entitled "Report To Congress On Health Care For Veterans In Puerto Rico And the Virgin Islands"; to the Committee on Veterans' Administration.

EC–696. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals for the month of February 1981; pursuant to the order of January 30, 1975, referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC–697. A communication from the Deputy Assistant Secretary of Defense for Installations and Housing, transmitting, pursuant to law, a report on architect-engineer contracts awarded to the 10 architect-engineering firms receiving the largest dollar total of contracts in the categories of civil works, military construction, and work for foreign governments for fiscal year 1980; to the Committee on Armed Services.

EC–698. A communication from the Chairman of the Federal Home Loan Bank Board, transmitting, pursuant to law, a copy of a study on moving the Federal Home Loan Bank of Little Rock to the Dallas SMSA; to the Committee on Banking, Housing, and Urban Affairs.

EC–699. A communication from the Comptroller of the Currency, transmitting, pursuant to law, the annual report on consumer activities of the Comptroller of the Currency; to the Committee on Banking, Housing, and Urban Affairs.

EC–700. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Urban Mass Transportation Act of 1964 to provide authorizations for appropriations, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs

EC–701. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Federal Capital Budgeting: A Collection Of Haphazard Practices"; to the Committee on the Budget.

EC–702. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Rail Passenger Service Act to authorize additional appropriations for the National Railroad Passenger Corporation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–703. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–704. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, proposed amendments to the previously submitted budget request of NASA for fiscal year 1982; to the Committee on Commerce, Science, and Transportation.

EC–705. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Federal Investment In Amtrak's Assets Should Be Secured"; to the Committee on Commerce, Science, and Transportation.

EC–706. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to authorize the Secretary of the department in which the Coast Guard is operating to establish fees for Coast Guard services and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–707. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, a proposed extension to the deadline on the case "Docket No. 37276 (Sub-No. 1) Coal, Wyoming to Redfield, Arkansas" and "Docket No. 37456, Arkansas Power and Light Co., et al., v. Burlington Northern, Inc., et al."; to the Committee on Commerce, Science, and Transportation.

EC–708. A communication from the Chairman of the National Transportation Safety Board, transmitting, pursuant to law, the annual report of the National Transportation Safety Board for 1980; to the Committee on Commerce, Science, and Transportation.

EC–709. A communication from the Acting General Counsel of the Department of Energy, transmitting, pursuant to law, notices of meetings related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC–710. A communication from the Acting Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report on the study of the effect of the Industrial Cost Exclusion on the construction grants program; to the Committee on Environment and Public Works.

EC–711. A communication from the Chairman of the United States Nuclear Regulatory Commission, transmitting a draft of proposed legislation to amend the Atomic Energy Act of 1954, as amended, to authorize the Commission, upon determination that such action is necessary in the public interest, to issue an interim operating license authorizing fuel loading, low-power operation and testing of a nuclear power reactor in advance of the conduct of a hearing; to the Committee on Environment and Public Works.

EC–712. A communication from the Chairman and Directors of the Board of Directors of the Tennessee Valley Authority, transmitting, pursuant to law, the forty-seventh annual report of the authority for fiscal year 1980; to the Committee on Environment and Public Works.

EC–713. A communication from the Acting Administrator of the United States Environmental Protection Agency, transmitting, pursuant to law, a report to estimate the costs of construction of publicly owned wastewater treatment facilities needed to carry out the provisions of the Clean Water Act and to estimate these costs on a State-by-State basis; to the Committee on Environment and Public Works.

EC–714. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Value-Added Tax—What Else Should We Know About It?"; to the Committee on Finance.

EC–715. A communication from the President of the United States, transmitting, pursuant to law, notice of his intention to issue an Executive order proclaiming all members of the Andean group and of the Association of South East Asian Nations shall be treated, respectively, as one country for purposes of the Generalized System of Preferences; to the Committee on Finance.

EC–716. A communication from the Acting Director of the Office of Personnel Management, transmitting a draft of proposed legislation to amend chapter 83 of title 5, United States Code, to provide for annual cost-of-living adjustments; to the Committee on Governmental Affairs.

EC–717. A communication from the Acting Inspector General of the Department of Health and Human Services, transmitting, pursuant to law, a report of an investigation submitted to the Special Counsel, Merit Systems Protection Board; to the Committee on Governmental Affairs.

EC–718. A communication from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the rate of compensation of the City Administrator; to the Committee on Governmental Affairs.

EC–719. A communication from the Acting Assistant Administrator of the Environmental Protection Agency (Planning and Management), transmitting, pursuant to law, the annual report of the Agency on the disposal of foreign excess property; to the Committee on Governmental Affairs.

EC–720. A communication from the Chairman of the Federal Home Loan Bank Board, transmitting, pursuant to law, the annual report of the Board on activities under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–721. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report stating that NASA did not grant any requests for extraordinary contractural adjustment during calendar year 1980; to the Committee on the Judiciary.

EC–722. A communication from the Secretary of Housing and Urban Deevlopment and the Secretary of Health and Human Services, transmitting, for the information of the Senate, notice that there will be a delay in the submission of the report regarding shelter and basic living needs of chronically mentally ill individuals, due on January 1, 1981, until August 1, 1981; to be Committee on Labor and Human Resources.

EC–723. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Low Productivity In American Coal Mines: Causes and Cures"; to the Committee on Labor and Human Resources.

EC–724. A communication from a member of the Office of Technology Assessment, Congress of the United States, transmitting, pursuant to law, the annual report on the activities of the Office for calendar year 1980; to the Committee on Rules and Administration.

EC–725. A communication from the Acting Administrator of the Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans: to increase the rates of dependency and indemnity compensation for their surviving spouses and children; and for other purposes; to the Committee on Veterans' Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–30. A concurrent resolution adopted by the Legislature of the State of North Dakota; to the Committee on Appropriations:

"SENATE CONCURRENT RESOLUTION No. 4034

"Whereas, there has been a decrease in the amount of federal funds appropriated to the states in the form of grants; and

"Whereas, federal regulations governing the expenditure of those moneys have not decreased; and

"Whereas, moneys dispensed in the form of block grants would reduce federal regulations and allow the state to decide how federal grants can best be utilized in state programs;

"Now, therefore, be it resolved by the Senate of the State of North Dakota, the House of Representatives concurring therein:

"That the Forty-seventh Legislative Assembly urges the United States Congress to appropriate and authorize expenditure of federal moneys in the form of block grants to the several states; and

"Be it further resolved, that copies of this resolution be forwarded by the Secretary of State to the North Dakota Congressional Delegation, the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States, the Office of Management and Budget, and the President of the United States."

POM–31. A petition from a citizen of Baltimore, Maryland, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–32. A petition from a citizen of Culver City, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–33. A petition from a citizen of Burbank, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–34. A petition from a citizen of Edmonds, Washington, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–35. A petition from a citizen of Arleta, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–36. A petition from a citizen of Arleta, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–37. A petition from a citizen of La Canada, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–38. A petition from a citizen of San Marino, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–39. A petition from a citizen of Glendale, California, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–40. A petition from a citizen of Winchester, Massachusetts, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–41. A petition from a citizen of Winchester, Massachusetts, urging congressional support for the efforts of the Reagan Administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–42. A concurrent resolution adopted by the Legislature of the State of Utah; to the Committee on Foreign Relations;

"A CONCURRENT RESOLUTION No. 2

"Whereas, the Governor of Utah and the Utah Legislature fully recognize the importance of international trade, and the benefits accruing to the state from tax revenues, job creation and general economic stimulation that result from bilateral foreign trade;

"Whereas, the production of steel is one of Utah's most important industries, employing some 5,000 men and women at U.S. Steel's Geneva Works, near Provo, and other fellow citizens at coal mines, ore mines and limestone quarries in the state;

"Whereas, Utah steelmakers, management and labor, have achieved a nation-wide reputation for cooperative action and innovation to overcome the disadvantage of distance to major western markets, mainly on the West Coast, and to ensure the future of their industry;

"Whereas, despite this performance, the future operation of Geneva Works, one of only two integrated steel plants west of the Rocky Mountains, is seriously threatened today by imports of foreign steel which have claimed in 1980 nearly 40 percent of the total steel market in the 13 Western States;

"Whereas, the Governor of Utah and the Utah Legislature have received communications from employees, employers, and labor leaders of the Utah steel producing and steel fabricated products industry requesting presidential and congressional action to control the alarming increase of low priced foreign steel imports into the western marketing area;

"Whereas, many foreign producers are owned or subsidized by their home governments, which has enabled them to sell their products on the West Coast for less than the cost to produce and ship them to this country, or below the price charged in their home countries, in violation of the nation's trade laws;

"Whereas, this practice, known as dumping, has had a devastating impact on the competitive position of Geneva Works and other western domestic producers, resulting in a loss of jobs, employment opportunity, modernization and growth potential; and

"Whereas, Utah steelmakers seek no special protectionism or special favors of government, but only the opportunity to compete on an equal footing in cost, quality and service with other producers, foreign and domestic.

"Now, therefore, be it resolved, that the General Session of the 44th Legislature of the State of Utah, the Governor concurring therein, memorializes the Congress of the United States and the new Reagan Administration to take whatever actions may be necessary to strengthen and enforce the Federal laws enacted to ensure fair competition in the international marketing of steel and to prevent unfair trade practices by foreign steel producers in the western market.

"Be it further resolved, that the International Steel Committee, of which the United States is a member nation, be strongly urged to deal forthrightly with the issues involved to firmly establish fair trade among steel producing nations.

"Be it further resolved, that the Lieutenant Governor of Utah forward a copy of this resolution to each member of the state's congressional delegation, to the President of the Senate and the Speaker of the House of the United States Congress, and to the President of the United States."

POM–43. A joint resolution adopted by the Legislature of the State of Montana; to the Committee on the Judiciary:

"HOUSE JOINT RESOLUTION No. 15

"A joint resolution of the Senate and the House of Representatives of the State of Montana calling for the Congress of the United States to propose and submit to the States an amendment to the United States Constitution that would protect unborn children.

"Whereas, the United States Supreme Court has nullified the laws of various states concerning abortion and has interpreted the United States Constitution in a way that permits the destruction of unborn human life; and

"Whereas, millions of abortions have been performed in the United States since the abortion decisions of the Supreme Court of the United States on January 22, 1973; and

"Whereas, the Congress of the United States has not to date proposed, subject to ratification, an amendment to the United States Constitution that would protect unborn children; and

"Whereas, the Montana Legislature endorses the concept of protecting unborn children, except when an unborn child threatens the life of the mother or is the result of rape or incest; and

"Whereas, under Article V of the Constitution of the United States, amendments to the United States Constitution may be proposed by the Congress whenever two-thirds of both Houses consider it necessary.

"Now therefore, be it resolved by the Senate and the House of Representatives of the State of Montana:

"(1) That the Congress of the United States is hereby requested to propose and submit to the states an amendment to the Constitution of the United States which would protect unborn children, except when an unborn child threatens the life of the mother or is the result of rape or incest.

"(2) That copies of this resolution be sent to the Secretary of State and presiding officers of both houses of the Legislatures of each of the several states in the Union, the Speaker and the Clerk of the United States House of Representatives, the President and the Secretary of the United States Senate, and to each member of the Montana Congressional Delegation."

POM–44. A concurrent resolution adopted by the Legislature of the State of South Dakota; to the Committee on the Judiciary:

"HOUSE CONCURRENT RESOLUTION No. 1006

"Whereas, the noble gesture of placing flowers on the graves of the war dead began May 30, 1868; and

"Whereas, the grand patriot General John A. Logan called that day "Decoration Day" to honor the heroes who fell in order that the Union would be preserved; and

"Whereas, the Union veterans of the Civil War continued this tradition until the torch was passed to the American Legion following World War I; and

"Whereas, May thirtieth has become known as Poppy Day since the first World War; and

"Whereas, Memorial Day now serves as a time to remember by parades, floral tributes and lowered flags the brave citizens who gave their lives in defense of democracy; and

"Whereas, this observance took place on the thirtieth day of May for one hundred three years before changing the observance to the last Monday in May:

"Now, therefore, be it resolved, by the House of Representatives of the Fifty-sixth Legislature of the state of South Dakota, the Senate concurring therein, that the Congress of the United States return the observance of Memorial Day to the thirtieth day of May.

"Be it further resolved, that copies of this resolution be sent to the South Dakota Congressional delegation, the Clerk of the United States House of Representatives and the Secretary of the United States Senate."

POM-45. A resolution of the City Council of Youngstown, Ohio, urging the United States Senate and House of Representatives to retain the Urban Development Action Grant Program in support of the distressed areas in the City of Youngstown; to the Committee on Banking, Housing, and Urban Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, with amendments, and with an amendment to the title:

S. Con. Res. 9. Concurrent resolution revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983 (with additional and supplemental views) (Rept. No. 97-28).

JOINT REFERRAL OF BILL S. 682

Mr. BAKER. Mr. President, I ask unanimous consent that S. 682, introduced in the Senate on March 10, be referred jointly to the Committee on the Judiciary and the Committee on Commerce, Science and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HUMPHREY:

S. 755. A bill to revise the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 and the Drug Abuse Prevention, Treatment, and Rehabilitation Act; to the Committee on Labor and Human Resources.

By Mr. HOLLINGS:

S. 756. A bill to amend Military Selective Service Act to provide for the reinstitution of the registration and classification of persons under such act and to reinstate the authority of the President to induct persons involuntarily into the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. JACKSON:

S. 757. A bill to amend title 10, United States Code. to authorize medical and dental care and related benefits for reservists and members of the National Guard who contract a disease or become ill while on duty for 30 days or less, and for other purposes; to the Committee on Armed Services.

S. 758. A bill to amend title 10, United States Code, to authorize medical and dental care for dependents of reservists and members of the National Guard, and for other purposes; to the Committee on Armed Services.

S. 759. A bill to amend titles 10, 32, and 37, United States Code, to authorize medical and dental care and related benefits for reservists and members of the National Guard under certain conditions, and for other purposes; to the Committee on Armed Services.

By Mr. McCLURE:

S. 760. A bill to authorize the Corps of Engineers to assume the responsibility for maintenance of a flood control project, and for other purposes; to the Committee on Environment and Public Works.

S. 761. A bill to authorize a national program to encourage dam safety; to the Committee on Environment and Public Works.

S. 762. A bill to amend the Communications Act of 1934 to prohibit the broadcast of the results or projections of the results of an election to choose the electors of the President and Vice President of the United States until all polling places in the United States are closed; to the Committee on Commerce, Science, and Transportation.

S. 763. A bill to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purposes of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir; to the Committee on Energy and Natural Resources.

S. 764. A bill to provide for protection of the John Sack Cabin Targhee National Forest in the State of Idaho; to the Committee on Energy and Natural Resources.

By Mr. MOYNIHAN:

S. 765. A bill to clarify the definition of the term "local furnishing" in the Internal Revenue Code of 1954; to the Committee on Finance.

S. 766. A bill to amend the Internal Revenue Code to clarify when the costs of maintaining an office at home may be deducted; to the Committee on Finance.

S. 767. A bill to amend the Internal Revenue Code to provide that, for purposes of the Federal estate tax, amounts contributed to certain cemetery companies may be deducted from the gross estate; to the Committee on Finance.

S. 768. A bill to amend the Internal Revenue Code to provide that certain research and development expenditures will not be taken into account for purposes of the "small issue exemption" from the industrial development bond rules; to the Committee on Finance.

S. 769. A bill to amend section 280 of the Internal Revenue Code of 1954 to exclude from the application of such section expenses incurred by an author of a book or similar property in the writing of such book or property; to the Committee on Finance.

S. 770. A bill to amend the Energy Tax Act of 1978 with respect to the manufacturers excise tax on buses; to the Committee on Finance.

S. 771. A bill to amend the Internal Revenue Code to increase the dependent and child care credit and to make it refundable; to the Committee on Finance.

S. 772. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income of an employee the value of public transit passes provided by his employer, to provide a refundable tax credit to an employer in an amount equal to five percent of the cost of public transit passes provided by such an employer to his employee, and for other purposes; to the Committee on Finance.

By Mr. HUMPHREY:

S. 773. A bill for the relief of Edwin S. Greble; to the Committee on the Judiciary.

By Mr. THURMOND (for himself and Mr. HART) (by request):

S. 774. A bill to authorize appropriations for construction at certain military installations for fiscal year 1981, and for other purposes; to the Committee on Armed Services.

By Mr. SCHMITT:

S.J. Res. 52. Joint resolution to authorize and request the President to designate July 4, 1981, as "Honor Our Vietnam Veterans Day"; to the Committee on the Judiciary.

By Mrs. KASSEBAUM:

S.J. Res. 53. Joint resolution to provide for the designation of September 6, 1981, as "Working Mothers' Day"; to the Committee on the Judiciary.

By Mr. HEINZ (for himself, Mr. NUNN, Mr. DURENBERGER, Mr. GOLDWATER, Mr. BOSCHWITZ and Mr. JEPSEN):

S.J. Res. 54. Joint resolution proposing an amendment to the Constitution to protect the people of the United States against excessive governmental burdens and unsound fiscal and monetary policies by limiting total outlays of the Government; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY:

S. 755. A bill to revise the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 and the Drug Abuse Prevention, Treatment, and Rehabilitation Act; to the Committee on Labor and Human Resources.

COMPREHENSIVE ALCOHOL AND DRUG ABUSE AMENDMENTS OF 1981

● Mr. HUMPHREY. Mr. President, today, I am introducing legislation to reauthorize both the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act, and the Drug Abuse Prevention, Treatment and Rehabilitation Act. This proposal calls for a continued Federal presence in the areas of alcohol abuse, alcoholism and drug abuse. A strong Federal presence is appropriate in view of the serious consequences of alcohol and drug abuse, and the negative impact of such abuse on education, work and interpersonal relationships.

Under this proposal, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA) would be maintained as separate entities, and they would focus their resources on research, training, national prevention and education activities, information collection and dissemination, the provision of technical assistance to the States, and the encouragement of demonstration programs.

The Reagan administration has recommended that Federal funding for alcohol and drug abuse health care services be included in the proposed block grant framework, out of the belief that maximum authority and flexibility should be given to the States. Furthermore, block grants promise to reduce significantly Federal regulations, paperwork, and what many have seen as unnecessary Federal interference. Obviously, many details regarding the block grant approach remain to be determined, and I look forward to contributing to this process. The bill introduced today does not, therefore, address the issue of block grants directly. The bill simply assumes a block grant framework for the bulk of the alcohol and drug abuse treatment programs.

The bill focuses current project grants and contracts on model and demonstration programs, and other activities appropriate for the Federal Government. Under this new approach, funds could no longer be accessed by State governments—their funding would come via the block grants—individual grantees could receive awards for a maximum of 5 years, and no award could cover more than 75 percent of the costs of a given project in any year. Furthermore, at least 25 percent of project funds would be channeled to prevention activities.

Finally, the proposal would allow funds received from NIAAA to be used for projects aimed at drug abuse as well as alcohol abuse and alcoholism. Similar flexibility is authorized for NIDA grants. In a society where substance abuse frequently means concurrent abuse of alcohol and other drugs, it seems appropriate that the Federal response be flexible. Nevertheless, alcohol abuse and drug abuse have many unique features, and this fact must not be overlooked.

In the case of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act, the bill maintains separate language authorizing grants to States to encourage passage and implementation of the Uniform Alcoholism and Intoxication Act which decriminalizes public intoxication and commits individual States to providing a continuum of care for those afflicted by the disease of alcoholism. As under current law, a State could receive grants under this program for a maximum of 6 years. The amount of individual grants would be determined by the Secretary of Health and Human Services.

For research aimed at alcohol abuse and alcoholism, a single authorization for the national research centers and all other research activities is provided. In the case of NIDA research, the bill would authorize projects aimed at developing less addictive pain and medications, long-lasting blocking agents for treatment of heroin addiction, and new detoxification agents to ease the physical effects of withdrawal, as well as investigations related to other drug prevention, treatment, and rehabilitation activities.

Mr. President, the Subcommittee on Alcoholism and Drug Abuse has scheduled hearings on Federal drug and alcohol abuse programs. On March 25 at 9:30 a.m. in room 2228 Dirksen Senate Office Building, the subcommittee will consider those programs dealing with alcohol abuse and alcoholism. On March 30 at 9:30 a.m. in room 4232 Dirksen Senate Office Building, the subcommittee will focus on comparable drug abuse programs. At these hearings, comments regarding the proposed block grant framework for the distribution of Federal funds for alcohol and drug abuse health care services will be most welcome. Furthermore, we will be interested in views regarding what is the appropriate Federal role in the area of alcohol and drug abuse, and how NIAAA and NIDA have been performing.

The legislation would reauthorize Federal alcohol and drug abuse programs only through fiscal year 1982. My intent is to hold extensive oversight hearings in the months ahead in order to be in a better position to chart the future course for these Federal programs. A 1-year reauthorization will force us to take a fresh look at Federal alcohol and drug abuse programs next year, and I think this is the best approach to take in view of the tremendous changes brought about by the November elections.

Mr. President, I ask unanimous consent that the text of my bill be inserted in the RECORD following these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Comprehensive Alcohol and Drug Abuse Amendments of 1981".

TITLE I—ALCOHOL ABUSE AND ALCOHOLISM PREVENTION, TREATMENT AND REHABILITATION

REFERENCE

SEC. 101. Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

FINDINGS AND PURPOSE

SEC. 102. Section 2 is amended to read as follows:

"FINDINGS AND PURPOSE

"SEC. 2. (a) The Congress finds that—

"(1) alcohol abuse and alcoholism are serious national problems requiring a Federal response;

"(2) alcohol abuse and alcoholism impair the physical and psychological well-being of individuals, and thereby lead to an unfortunate waste of human talent and energy; and

"(3) alcohol abuse and alcoholism interfere with education, work, and interpersonal relationships, causing great harm to families, communities, and the Nation.

"(b) It is the policy of the United States and the purpose of this Act to provide a Federal response to alcohol abuse and alcoholism which—

"(1) is constructive, cost-effective and well coordinated;

"(2) reserves to the States as much authority and flexibility as practicable;

"(3) encourages the greatest participation by the private sector, both financially and otherwise; and

"(4) concentrates on carrying out functions which are truly national in scope.".

ALCOHOL ABUSE AND ALCOHOLISM AMONG GOVERNMENT AND OTHER EMPLOYEES

SEC. 103. Section 201(b)(2)(B) is amended by striking out "single State agencies designated pursuant to section 303 of this Act" and inserting in lieu thereof "the State agencies responsible for the administration of alcohol abuse prevention, treatment, and rehabilitation activities".

TECHNICAL ASSISTANCE

SEC. 104. (a) Section 301 is amended to read as follows:

"TECHNICAL ASSISTANCE

"SEC. 301. (a) On the request of any State, the Secretary, acting through the Institute, shall, to the extent feasible, make available technical assistance for—

"(1) developing and improving systems for data collection;

"(2) program management, accountability, and evaluation;

"(3) certification, accreditation, or licensure of treatment facilities and personnel;

"(4) monitoring compliance by hospitals and other facilities with the requirements of section 321; and

"(5) eliminating exclusions in health insurance coverage offered in the State which are based on alcoholism or alcohol abuse.

"(b) Insofar as practicable, technical assistance provided under this section shall be provided in a manner which will improve coordination between activities supported under this Act and under the Drug Abuse Prevention, Treatment, and Rehabilitation Act.".

(b) Sections 302 and 303 are repealed.

SPECIAL GRANTS

SEC. 105. (a) Section 310(a) is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(b) The first sentence of section 310(c) is amended to read as follows: "The amount of any grant under this section to any State for any fiscal year shall be determined by the Secretary.".

GRANTS AND CONTRACTS

SEC. 106. (a) The section heading for section 311 is amended to read as follows:

"GRANTS AND CONTRACTS FOR THE DEMONSTRATION OF NEW AND MORE EFFECTIVE ALCOHOL ABUSE AND ALCOHOLISM PREVENTION, TREATMENT, AND REHABILITATION PROGRAMS".

(b) Section 311(a) is amended—

(1) by adding at the end of clause (1) "and with particular emphasis on identifying new and more effective alcohol abuse and alcoholism prevention, treatment, and rehabilitation programs,";

(2) by inserting "and" after the comma the last place it appears in clause (2);

(3) by striking out clauses (3) and (5) and by redsignating clause (4) as clause (3); and

(4) by striking out the comma and "and" at the end of clause (3) (as redesignated by clause (2) of this subsection) and inserting in lieu thereof a period.

(c)(1) Section 311(c)(2)(A) is amended—

(A) by striking out "designated under section 303 of this Act, if such designation has been made" in the first sentence and inserting in lieu thereof "responsible for the administration of alcohol abuse and alcoholism prevention, treatment, and rehabilitation activities";

(B) by striking out "the" before "State comprehensive plan" in the third sentence and inserting in lieu thereof "any"; and

(C) by striking out "under section 303" in the third sentence.

(2) Section 311(c)(3) is amended—

(A) by inserting "and" after the semicolon in clause (B);

(B) by striking out the semicolon and "and" at the end of clause (C) and inserting in lieu thereof a period; and

(C) by striking out clause (D).

(3) Section 311(c)(4) is amended to read as follows:

"(4) The Secretary shall encourage the submission of and give special consideration to applications under this section for programs and projects aimed at underserved populations such as racial and ethnic minorities, native Americans, youth, the elderly, women, handicapped individuals, and families of alcoholics.".

(4) Section 311(c) is further amended—

(A) by redesignating paragraph (5) as paragraph (6);

(B) by inserting after paragraph (4) the following new paragraph:

"(5)(A) No grant may be made under this section to a State or to any entity within the government of a State.

"(B) No grant or contract may be made under this section for a period in excess of 5 years.

"(C) The amount of any grant or contract made under this section may not exceed 75 percent of the cost of carrying out such grant or contract."; and

(C) by adding at the end thereof the following new paragraph:

"(7) Nothing shall prevent the use of funds provided under this section for programs and projects aimed at the prevention,

treatment, or rehabilitation of drug abuse as well as alcohol abuse and alcoholism.".

AUTHORIZATION OF APPROPRIATIONS—PROJECT GRANTS AND CONTRACTS

SEC. 107. (a) The first sentence of section 312(a) is amended by striking out "and" after "1980," and by inserting before the period a comma and "and $20,000,000 for the fiscal year ending September 30, 1982".

(b) The second sentence of such section is amended by striking out "and" after the semicolon the first place it appears and by inserting before the period a semicolon and "and of the funds appropriated under this section for the fiscal year ending September 30, 1982, at least 25 percent of the funds shall be obligated for such grants".

AUTHORIZATION OF APPROPRIATIONS—RESEARCH

SEC. 108. Section 503 is amended by adding at the end thereof the following new sentence: "There are authorized to be appropriated for carrying out the purposes of sections 501, 502, and 504 $25,000,000 for the fiscal year ending September 30, 1982.".

TECHNICAL AMENDMENTS

SEC. 109. (a) Section 101(a) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(b) Section 103(b)(1) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(c) Section 201(e) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(d) Section 334 is amended by striking out "Health, Education, and Welfare" each place it appears and inserting in lieu thereof "Health and Human Services".

TITLE II—DRUG ABUSE PREVENTION, TREATMENT, AND REHABILITATION

REFERENCE

SEC. 201. Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Drug Abuse Prevention, Treatment, and Rehabilitation Act.

CONGRESSIONAL FINDINGS

SEC. 202. Section 101 is amended to read as follows:

"§ 101. Congressional findings.

"The Congress finds that—

"(1) drug abuse is a serious national problem requiring a Federal response;

"(2) drug abuse impairs the physical and psychological well-being of individuals, and thereby leads to an unfortunate waste of human talent and energy; and

"(3) drug abuse interferes with education, work, and interpersonal relationships, causing great harm to families, communities, and the Nation.".

DECLARATION OF POLICY

SEC. 203. Section 102 is amended to read as follows:

"§ 102. Declaration of national policy.

"It is the policy of the United States and the purpose of this Act to provide a Federal response to drug abuse which—

"(1) is constructive, cost effective, and well coordinated;

"(2) reserves to the States as much authority and flexibility as practicable;

"(3) encourages the greatest participation by the private sector, both financially and otherwise; and

"(4) concentrates on carrying out functions which are truly national in scope.".

ADDITIONAL DRUG ABUSE PREVENTION FUNCTIONS

SEC. 204. (a) Section 406(a) is amended—

(1) by inserting "and" after the semicolon in clause (2);

(2) by striking out the semicolon and "and" at the end of clause (3) and inserting in lieu thereof a period; and

(3) by striking out clause (4).

(b) The section heading for section 406 is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(c) The item relating to section 406 in the table of sections for title IV is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

FORMULA GRANTS

SEC. 205. (a) Section 409 is repealed.

(b) The table of sections for title IV is amended by striking out the item relating to section 409.

GRANTS AND CONTRACTS

SEC. 206. (a)(1) The section heading for section 410 is amended to read as follows:

"§ 410. Grants and contracts for the demonstration of new and more effective prevention, treatment, and rehabilitation programs.".

(2) The item relating to section 410 in the table of sections for title IV is amended to read as follows:

"§ 410. Grants and contracts for the demonstration of new and more effective prevention, treatment, and rehabilitation programs.".

(b)(1) The first sentence of section 410(a) is amended to read as follows: "The Secretary acting through the National Institute on Drug Abuse, may make grants to and enter into contracts with individuals and public and private nonprofit entities—

"(1) to provide training seminars, educational programs, and technical assistance for the development, demonstration, and evaluation of drug abuse prevention, treatment, and rehabilitation programs;

"(2) to conduct demonstration and evaluation projects, with a high priority on prevention and early intervention projects, and with particular emphasis on identifying new and more effective drug abuse prevention, treatment, and rehabilitation programs, including improved drug maintenance and detoxification techniques; and

"(3) to determine the cause of drug abuse in a particular geographic area and prescribe methods for dealing with drug abuse in such area.".

(2) Section 410(a) is further amended by adding at the end thereof the following new sentence: "Furthermore, nothing shall prevent the use of funds provided under this section for programs and projects aimed at the prevention, treatment, and rehabilitation of alcohol abuse and alcoholism as well as drug abuse.".

(c) Section 410(b) is amended by adding at the end thereof the following new sentences: "For carrying out the purposes of this section, there are authorized to be appropriated $20,000,000 for the fiscal year ending September 30, 1982. Of the funds appropriated under the preceding sentence, at least 25 percent of the funds shall be obligated for grants and contracts for primary prevention and intervention programs designed to discourage individuals, particularly individuals in high risk populations, from abusing drugs.".

(d)(1) Section 410(c)(1) is amended by striking out ", or to State agencies over local agencies".

(2)(A) The first sentence of section 410(c)(2) is amended by striking out "designated or established under section 409" and inserting in lieu thereof "responsible for the administration of drug abuse prevention activities".

(B) The third sentence of such section is amended—

(i) by striking out "the" before "State comprehensive plan" and inserting in lieu thereof "any"; and

(ii) by striking out "under section 409".

(3) Section 410(c)(3) is amended—

(A) by inserting "and" after the semicolon in clause (B);

(B) by striking out the semicolon and "and" at the end of clause (C) and inserting in lieu thereof a period; and

(C) by striking out clause (D).

(e) Section 412(d) is amended to read as follows:

"(d) The Secretary shall encourage the submission of and give special consideration to applications under this section to programs and projects aimed at underserved populations such as racial and ethnic minorities, native Americans, youth, the elderly, women, handicapped individuals, and families of drug abusers.".

(f) Section 410 is further amended by adding at the end thereof the following new subsection:

"(g)(1) No grant may be made under this section to a State or to any entity within the government of a State.

"(2) No grant or contract may be made under this section for a period in excess of five years.

"(3) The amount of any grant or contract made under this section may not exceed 75 percent of the cost of carrying out such grant or contract project.".

RECORDS AND AUDIT

SEC. 207. Section 411(a) is amended by striking out "409 or".

ENCOURAGEMENT OF RESEARCH DEVELOPMENT

SEC. 208. (a) Section 503(a) is amended—

(1) by striking out "and" after the semicolon in clause (3);

(2) by striking out the period at the end of clause (4) and inserting in lieu thereof a semicolon and "and"; and

(3) by inserting after clause (4) the following new clause:

"(5) drug prevention, treatment, and rehabilitation.".

(b) Section 503(b) is amended by striking out "and" after "1978," and by inserting after the period a comma and "and $50,000,000 for the fiscal year ending September 30, 1982".

TECHNICAL AMENDMENTS

SEC. 209. (a) Section 205 is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(b) Section 302 is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(c)(1) Section 405 is amended by striking out "Health, Education, and Welfare" each place it appears and inserting in lieu thereof "Health and Human Services".

(2) The section heading for section 405 is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(3) The item relating to section 405 in the table of sections for title IV is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(d) Section 408(g) is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".

(e) Section 501 is amended by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services".●

By Mr. HOLLINGS:

S. 756. A bill to amend Military Selective Service Act to provide for the reinstitution of the registration and classification of persons under such act and to reinstate the authority of the President to induct persons involuntarily into the Armed Forces, and for other purposes; to the Committee on Armed Services.

LEGISLATION TO REINSTATE MILITARY DRAFT

Mr. HOLLINGS. Mr. President, I rise today to introduce legislation reinstituting the military draft. We need the draft—we need it in order to field a credible fighting force, and we need it in order to remain true to the ideals which built this country. Early in the 1970's, with America's morale sapped by our involvement in Vietnam, we bought the idea that there was an easy way for America to defend itself without personal sacrifice. Gone was the injunction of John F. Kennedy—"Ask not what your country can do for you: Ask what you can do for your country." In its stead was the barren idea that somehow we could painlessly provide for the defense of freedom. So we instituted the Volunteer Army, and with that problem moved beyond arm's length, we put the whole defense problem beyond arm's length. Now America is caught with its defenses down. That Volunteer Army which no longer touches every neighborhood is forgotten in appropriations, and the families of our service men and women line up for food stamps.

Back when we voted to institute the All-Volunteer Force, I warned that the proposed army would only institutionalize the inequities of the draft—inequities which could have been remedied with much less dislocation. Specifically, the poor, the black, and the disadvantaged who were fighting in Vietnam would constitute the bulk of the Volunteer Force. This is precisely what happened. The decision of 1973 insured that our Nation's defense burden would rest with the poor, the black, and the disadvantaged for years to come. And without a cross-section of representation, we had no cross-section of support. Rather than an equal call on all, we perpetuated the rich man's undemocratic lie: "We will pay for it."

The fact is we can never pay for it. We can appropriate to cure the pay deficiencies, as we did with the Nunn-Warner pay and benefits package, but the fact is that was only a halfway measure that did not address our long-term needs. On one end we have the equivalent of a military Job Corps where our mercenaries are paid subminimum wage and as many as 100,000 of them qualify for welfare. On the other end, we have commissioned officers who will shortly be taking home paychecks larger than those of a U.S. Senator. Now we hear proposals to exempt their first $20,000 in income from Federal taxation, which does nothing to address the fundamental pay and incentive problems of the All-Volunteer Force.

Let us look at our real problem. During fiscal year 1979, armed services recruiting fell short of requirements by about 23,000 people. The Army missed its targets by 17,000. The Marine Corps met its objective only because it accepted a cut in authorized strength. And the Air Force, which during the All-Volunteer period has enjoyed more recruiting success than the other services, fell short by 1,500. There are those who point out that in times like today, with unemployment high and the economy sluggish, we will meet our manpower requirements. I say it is a sad commentary when we have to bank on a recession in the economy to man America's fighting forces. Even bigger problems are just around the corner, for all the demographic indicators warn that the pool of 17- to 21-year-old males—the largest grouping of potential recruits—is going to fall off sharply. The baby boom is history, and the prognosis is for a rapidly shrinking recruiting pot.

In terms of quality, only the Air Force has held its standard at least constant. The quality of recent volunteers in the other services is a matter for grave concern. Fewer Army recruits in recent years have demonstrated reading skills above the eighth-grade level. And the quality of Navy and Marine Corps recruits is not much better. This is especially disconcerting because the military's technical operations and complex equipment demand greater skill and judgment of our servicemen. If we fail to face up to the quality problem today, we will depend more and more on less-educated soldiers to carry the weight of our conventional military force tomorrow.

In a nutshell, the All-Volunteer approach has been a failure. It has failed to provide the necessary number of troops. It has failed to provide a quality defense force. We have failed to appropriate for it. And we have failed, as a people, to fairly and equitably distribute the burden of our national defense. Our Volunteer Forces are sadly unrepresentative of the society they serve. Almost one-quarter of all new recruits are black—double their proportion in the population. The number of other minorities, especially Hispanics, is growing. The minority soldiers are over-represented in combat formations such as tank, artillery, and infantry outfits, raising the specter of disproportionate casualties among minorities in wartime. And, more than a racial problem, it is a class problem. For even the white recruits are drawn from the poorer and less-educated segments of society.

The cross section approach of an equitable draft solves this problem. The burden would be shared by all. Exemptions can and must be kept to a minimum. Just prior to the institution of the All-Volunteer Force, and in response to the inequitable deferment and exemption standards which had been in place, we tightened eligibility standards and greatly limited deferments and exemptions. Under the proposal I am introducing today, we would observe those necessary and tightened standards. Specifically, deferments and exemptions would be limited to: First, persons on active duty, in the Reserves, or in advanced ROTC study; second, surviving sons or brothers of those killed in war or missing-in-action; third, conscientious objectors and ministers; fourth, professions necessary to national health, like doctors; fifth, judges of courts of record and elected officials; and sixth, for students, short-term postponement of their military obligation. Those in high school could be deferred until they graduate, but in no case extending beyond age 20. And those in college could continue studying until the end of the semester or, if in their senior year, until the end of that school year. We all share the benefits of life in America; under my plan, we insure that we all help shoulder the burden of defending it.

Our military manpower is below par. Our sincerity in meeting foreign obligations and our commitments to NATO and to our allies is seriously questioned. In fact, we are one of the few nations in NATO that depends solely on volunteers as the source of military personnel. Most of NATO's other members—excluding Canada and Great Britain—have military conscription and theirs is an equal call on all. That equal call translates into a forceful demonstration of national resolve and willpower. America needs that.

Mr. President, if we are to be taken seriously by our allies and our adversaries, we must have the military wherewithal to meet our commitments and protect our interests. This mandates military conscription. And for that reason, I introduce S. 756, to provide for the reinstitution of registration and classification and to reinstate the authority of the President to induct persons into the Armed Forces.

The direction of our foreign policy, the power of our newest weaponry, and the number of dollars in the defense budget are meaningless unless we, as a people, are committed to the task of protecting our Nation and aiding our allies.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 756

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Military Selective Service Act (50 U.S.C. 453 App.) is amended by inserting "(a)" before "Except" at the beginning of such section and by adding at the end thereof the following new subsection:

"(b) The President shall, at the earliest practicable date, but not later than 180 days after the date of the enactment of this subsection, begin the registration and classification of citizens and other persons described in subsection (a) of this section.".

SEC. 2. Section 17(c) of the Military Selective Service Act (50 U.S.C. App. 467(c)) is amended by striking out "July 1, 1973" and inserting in lieu thereof "September 30, 1986".

Mr. HATFIELD. Mr. President, as much as I am tempted to respond to the Senator from South Carolina on this subject that he has just discussed this morning, I shall exercise all my restraint in doing so and take up one subject at a time. There will be another day in which I will address that subject, and I think the Senator perhaps provided us with a good vehicle upon which to make a rather significant national debate.

By Mr. JACKSON:

S. 757. A bill to amend title 10, United States Code, to authorize medical and dental care and related benefits for reservists and members of the National Guard who contract a disease or become ill while on duty for 30 days or less, and for other purposes; to the Committee on Armed Services.

S. 758. A bill to amend title 10, United States Code, to authorize medical and dental care for dependents of reservists and members of the National Guard and for other purposes; to the Committee on Armed Services.

S. 759. A bill to amend titles 10, 32, and 37, United States Code, to authorize medical and dental care, and related benefits for reservists and members of the National Guard under certain conditions, and for other purposes; to the Committee on Armed Services.

LEGISLATION RELATING TO MEDICAL AND DENTAL BENEFITS FOR MEMBERS OF THE GUARD AND RESERVE

● Mr. JACKSON. Mr. President, today I am introducing three measures which I have sponsored in previous Congresses to provide additional medical and dental benefits to members of the National Guard and Reserve. Previously this legislation has been combined into one bill; however, I believe that it will facilitate consideration of these proposals if they are separated so that each may be considered on its own merits.

The first bill would provide medical and dental coverage for injuries to members during travel to or from a required training assembly. In the past there have been cases of injuries for which there should have been compensation but none was authorized.

The second bill would extend medical and dental benefits under CHAMPUS to the survivors of guardsmen and reservists who are killed in the line of duty during an authorized training period.

The third bill would provide medical and dental care for reservists and guardsmen who become ill while on duty for 30 days or less if the illness is service connected. Current law assumes that any illness contracted by a member during such a brief duty period must be unrelated to service. This is an erroneous assumption and my bill would provide coverage when a connection is established.

Mr. President, the legislation I have proposed would provide guardsmen and reservists with the same benefits which would be available to military personnel on active duty under similar circumstances. I believe that these three bills fill gaps in medical and dental coverage for guardsmen and reservists which represent inequities in the present system. The Guard and Reserve are an important part of our military readiness posture and I hope that the Congress will move to correct these deficiencies which impair our ability to attract the necessary personnel to service in the Guard and Reserve.●

By Mr. McCLURE:

S. 760. A bill to authorize the Corps of Engineers to assume the responsibility for maintenance of a flood control project, and for other purposes; to the Committee on Environment and Public Works.

MAINTENANCE OF A FLOOD CONTROL PROJECT

Mr. McCLURE. Mr. President, I am today introducing legislation that has been passed by the Senate previously; this bill, however, never became law due to the failure of the full Congress to enact an omnibus water resources bill.

The first section of this bill authorizes the Chief of Engineers to assume responsibility for the annual maintenance requirements for a project in Idaho known as Heise-Roberts. This shift in responsibility is justified because maintenance costs have risen far beyond the level anticipated, due to poor project design. Quite simply, the corps failed to recognize the nature of streams and erosion in that area. The result has been regular damage to the flood levees, damage at a rate far greater than was anticipated by local interests.

It is, therefore, my judgment that it is legitimate for the Federal Government to assume these costs over and above the costs anticipated by local interests. This section, therefore, requires that the initial $25,000, in any year—the level anticipated—shall be borne by local interests, but that the added cost shall be paid by the Federal Government.

Section 2 of the bill amends the authorization for Lucky Peak Dam, which is located near Boise, Idaho. This change will allow local interests to go forward and construct a hydroelectric plant there.

Lucky Peak Dam was built with a single water outlet. In 1976, the Congress authorized the construction of a second outlet in order to improve operations. That second outlet has not been built.

This section authorizes any local interests holding a Federal Energy Regulatory Commission permit to construct a second outlet of up to 23 feet in diameter, but directs the corps to reimburse local interests for what it would have paid to construct the smaller, authorized outlet. Thus, the Federal Government will have no expense greater than that envisioned by the 1976 law. But this amendment enables the dam to be operated far more efficiently, producing new energy for the people of Idaho and the Pacific Northwest.

Mr. President, I ask unanimous consent that a copy of this bill be printed at this point in the RECORD.

S. 760

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for flood control for Heise-Roberts, Idaho, approved in section 10 of Public Law 81–516, is hereby modified to provide that the operation and maintenance of the project shall be the responsibility of the Secretary of the Army, acting through the Chief of Engineers, *Provided,* That local interests shall pay the initial $25,000, in cash or materials, of any such costs expended in any one year.

SEC. 2. The project for Lucky Peak Lake, Idaho, authorized by the Flood Control Act of 1946 (Public Law 526–79), as modified by the Water Resources Development Act of 1976 (Public Law 94–587), is further modified to provide for an increase in the diameter of the additional dam outlet, authorized by Public Law 94–587, to twenty-three feet, and provide that the Secretary of the Army shall (1) authorize any entity, having the necessary license from the Federal Energy Regulatory Commission, to construct such outlet in accordance with the said entity's plans, as approved by the Secretary of the Army, and to use such outlet for the generation of electricity, (2) provide that all property rights in such outlet, subject to the provisions of this section, shall be conveyed to and remain with the United States, and (3) reimburse such entity for an amount equal to the estimated cost, as determined by the Secretary of the Army as of the time of the construction of the twenty-three-foot outlet of the outlet authorized by Public Law 94–587.

By Mr. McCLURE:

S. 761. A bill to authorize a national program to encourage dam safety; to the Committee on Environment and Public Works.

DAM SAFETY OF 1981

Mr. McCLURE. Mr. President, I am today introducing legislation that was passed by the Senate during the 95th Congress, was considered favorably in the Committee on Environment and Public Works during the 96th Congress, but has yet to become law. This failure stems from the inability of Congress to enact comprehensive water resources legislation since 1976.

This bill authorizes an ongoing program to assist the States in developing and implementing dam safety programs. The language is nearly identical to what the Senate has passed previously.

Essentially, this bill creates an opportunity for the Federal Government to assist the States in developing effective, continuing dam safety programs. In return, the States must meet certain basic criteria, such as preconstruction safety reviews and inspections every 2 years.

I recognize that modest changes in the bill could prove helpful. For example, this bill adds new sections 9 and 10 to the basic dam safety law. These sections may no longer be as necessary as they were at the time of the original passage of this bill. Yet, a discussion of dam insurance and Federal assistance in upgrading the safety of dams must be a vital component in any discussion of this issue. And I remain convinced that the basic components of the bill are sound, necessary, and essential.

The Federal Government, through the Army Corps of Engineers, has recently inspected 9,000 dams for safety. The corps estimates that 26 percent of these dams are unsafe in varying degrees.

Much of this corps activity was subcontracted to the States, which carried out the work. But the authority for this program expires at the end of this fiscal year. A need exists to continue such a program. This bill achieves that goal, transferring the basic responsibility to the States.

It is appropriate to transfer this responsibility to the States. But it also is appropriate to provide Federal assistance to the States in carrying out this important work.

Mr. President, I believe this bill offers a responsible approach to a difficult challenge. I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

S. 761

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Public Law 92-367 (86 Stat. 506) is amended as follows:

SIZE OF DAMS

(a) Section 1 is amended by deleting the final sentence.

RIGHT OF ENTRY

(b) Section 2 is amended (a) by inserting "(a)" immediately after the words "the Chief of Engineers shall carry out a national program of inspection of dams for the purpose of protecting human life and property.", and by striking the "and" after "inspection" and striking the period after "property" and inserting the following: "and (5) dams located within a State having an approved program under section 8 of this Act," and (b) by adding at the end thereof the following new subsections:

"(b) In order to carry out the purposes of this Act, the Secretary, or his authorized representative, upon presenting appropriate credentials to the owner, operator, or agent in charge is authorized—

"(1) to enter without delay and at reasonable times any damsite, structure, appurtenance, or any work area, or other area used in connection with operation of the dam; and

"(2) to inspect and investigate during regular working hours and at other reasonable times, and within reasonable limits and in a reasonable manner, any such damsite and all pertinent conditions, structures, machinery, apparatus, devices, equipment, and materials therein or thereon; and to require any owner, operator, agent or employee, or designer, contractor or builder, to provide information regarding the design, construction, operation, and maintenance of the same; and to have access to any records, blueprints, plans, or other pertinent documents pertaining to the design, construction, operation, and maintenance of the same.

"(c) Except as to cases the court considers of greater importance, any judicial proceedings involving this Act before a district court of the United States, and appeals therefrom, take precedence on the docket over all cases and shall be assigned for hearing and trial or for argument at the earliest practicable date and expedited in every way.".

CONTRACTOR LIABILITY

(c) Section 6 is amended by inserting a new paragraph (2) as follows, and by renumbering paragraph (2) as paragraph (3):

"(2) to create any liability for agents or contractors for damages caused by such action or failure to act in excess of the amount of the contract entered into pursuant to the Act;".

STATE ASSISTANCE PROGRAMS

(d) Following section 6, add the following new sections:

"SEC. 7. There is authorized to be appropriated to the Secretary of the Army, acting through the Chief of Engineers (hereafter in this Act referred to as the 'Secretary'), $15,000,000 for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985. Sums appropriated under this section shall be distributed annually among those States on the following basis: One-third equally among those States that have established dam safety programs approved under the terms of section 8 of this Act, and two-thirds in proportion to the number of dams located in each State that has an established dam safety program under the terms of section 8 of this Act to the number of dams in all States with such approved programs. In no event shall funds distributed to any State under this section exceed 50 per centum of the reasonable cost of implementing an approved dam safety program in such State.

"SEC. 8(a) In order to encourage the establishment and maintenance of effective programs intended to assure dam safety to protect human life and property, the Secretary shall provide assistance under the terms of section 7 of this Act to any State that establishes and maintains a dam safety program which is approved under this section. In evaluating a State's dam safety program, under the terms of subsections (b) and (c) of this section, the Secretary shall determine that such program includes the following:

"(1) a procedure, whereby, prior to any construction, the plans for any dam will be reviewed to provide reasonable assurance of the safety and integrity of such dam over its intended life;

"(2) a procedure to determine, during and following construction and prior to operation of each dam built in the State, that such dam has been conducted and will be operated in a safe and reasonable manner;

"(3) a procedure to inspect every dam within such State at least once every two years;

"(4) a procedure for more detailed and frequent safety inspections, if warranted;

"(5) the State has or can be expected to have authority to require those changes or modifications in a dam, or its operation, necessary to assure the dam's safety;

"(6) the State has or can be expected to develop a system of emergency procedures that would be utilized in the event a dam fails or for which failure is imminent together with an identification for those dams where failure could be reasonably expected to endanger human life, of the maximum area that could be inundated in the event of the failure of such dam, as well as identification of those necessary public facilities that would be affected by such inundation;

"(7) the State has or can be expected to have the authority to assure that any repairs or other changes needed to maintain the integrity of any dam will be undertaken by the dam's owner, or other responsible party; and

"(8) the State has or can be expected to have authority and necessary funds to make immediate repairs or other changes to, or removal of, a dam in order to protect human life and property, and if the owner does not take action, to take appropriate action as expeditiously as possible.

"(b) Any program which is submitted to the Secretary under the authority of this section shall be deemed approved one hundred and twenty days following its receipt by the Secretary unless the Secretary determines that such program fails to reasonably meet the requirements of subsection (a) of this section. If the Secretary determines such a program cannot be approved, he shall immediately notify such State in writing, together with his reasons and those changes needed to enable such plan to be approved.

"(c) Utilizing the expertise of the Board established under section 11 of this Act, the Secretary shall review periodically the implementation and effectiveness of approved State dam safety programs. In the event the Board finds that a State program under this Act has proven inadequate to reasonably protect human life and property, and the Secretary agrees, the Secretary shall revoke approval of such State program and withhold assistance under the terms of section 7 of this Act until such State program has been reapproved.

"SEC. 9. (a) In order to assure that owners of dams will be able to obtain liability insurance at reasonable rates, and to protect persons located downriver of dams, the Secretary, or the head of any agency of the United States designated by the Secretary, shall provide to any insurer, subject to conditions established by regulation, reinsurance or guarantees of any insurance provided to the owner of a dam to protect such owner from liabilities incurred in the event of the failure of such dam. Reinsurance or guarantees provided under this section shall reimburse an insurer for those liabilities in excess of an amount agreed upon between the Secretary, or his designee, and the insurer.

"(b) Any reinsurance or guarantees provided under this section shall be available only in a State which has an approved dam safety program under the terms of section 8 of this Act.

"(c) Agreements on reinsurance or guarantees under this section shall provide that the failure of the owner of any dam to carry out expeditiously any modification or procedure required by a State under the terms of its dam safety program shall result in the cancellation of any reinsurance or guarantee provided by the Secretary, or his designee.

"(d) There is authorized to be appropriated such sums as may be necessary to carry out this section.

"(e) Not later than eighteen months after enactment of the Dam Safety Act of 1980, the Secretary and the Secretary of the Treasury shall report jointly to the Congress with an analysis of the effects of this section, together with any recommendations for a more comprehensive dam safety insurance program to assure the availability of insurance to owners of dams inspected under a State program approval under section 8 of this Act, in an effort to lessen or eliminate the need for any disaster assistance in the event of the failure of such a dam.

"SEC. 10. There is authorized to be appropriated and remain available the sum of $20,000,000 to be placed in a revolving fund by the Secretary, such funds to be available for loans, on terms established by the Secretary, to any owner for any dam required to make repairs, to replace, or to make other safety improvements in such dam under any safety program approved under section 8 of this Act, if such owner can demonstrate to the Secretary that other funds are not reasonably available, and such owner agrees to repay such funds and at a rate of interest on terms agreed to with the Secretary.

"SEC. 11. (a) There is authorized to be established a Federal Dam Safety Review Board (hereinafter referred to as the 'Board'), which shall be responsible for reviewing the procedures and standards utilized in the design and safety analysis of dams constructed and operated under authority of the United States, and to monitor State implementation of this Act. The Board is authorized to hire necessary staff and shall review as expeditiously as possible the plans and specifications on all dams specifically authorized by Congress prior to initiation of construction of such dam, and file an advisory report on the safety of such dam with the appropriate agency, the appropriate State, and the Congress. The Board is authorized to utilize the expertise of other agencies of the United States and to enter into contracts for necessary studies to carry out the requirements for this section. There is authorized to be appropriated to the Board such sums as may be necessary to carry out this section.

"(b) The Board shall consist of nine members selected for their expertise in dam safety, including one representative each from the Department of the Army, the Department of the Interior, the Tennessee Valley Authority, and the Department of Agriculture, plus five members, appointed by the President for periods of five years, on a rotating basis, who are not employees of the United States. At least two members of the Board shall be employees of the States having an approved program under section 8 of this Act. The Chairman of the Board shall be selected from among those members who are not employees of the United States.

"SEC. 12. The head of any agency of the

United States that owns or operates a dam, or proposes to construct a dam in any State, shall, when requested by such State, consult fully with such State on the design and safety of such dam and allow officials of such State to participate with officials of such agency in all safety inspections of such dam.

"SEC. 13. The Secretary shall, at the request of any State that has or intends to develop a dam safety program under section 8 of this Act, provide training for State dam safety inspectors. There is authorized to be appropriated to carry out this section $1,000,000 for the fiscal year ending September 30, 1982, and $500,000 during each of fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985.

"SEC. 14. The Secretary, in cooperation with the National Bureau of Standards, shall undertake a program of research in order to develop improved techniques and equipment for rapid and effective dam inspection, together with devices for the continued monitoring of dams for safety purposes. The Secretary shall provide for State participation in such research and periodically advise all States of the results of such research. There is authorized to be appropriated to carry out this section $1,000,000 for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985.

"SEC. 15. The Secretary is authorized to maintain and periodically publish updated information on the inventory of dams authorized in section 5 of this Act.".

REPORTING OF DAM SAFETY

SEC. 2. Any report that is submitted to the Committee on Environment and Public Works of the Senate or the Committee on Public Works and Transportation of the House of Representatives by the Secretary of the Army, acting through the Chief of Engineers, or the Secretary of Agriculture, acting under Public Law 83-566, as amended, which proposes construction of a water impoundment facility, shall include information on the possibility of failure of such facility due to geologic or design factors, the potential impact of the failure of such facility, and information on the design features that would prevent, lessen, or mitigate such.

SHORT TITLE

SEC. 3. This Act shall be known as the "Dam Safety Act of 1981".

By Mr. McCLURE:

S. 762. A bill to amend the Communications Act of 1934 to prohibit the broadcast of the results or projections of the results of an election to choose the electors of the President and Vice President of the United States until all polling places in the United States are closed; to the Committee on Commerce, Science, and Transportation.

ELECTION BROADCAST ACT OF 1981

Mr. McCLURE. Mr. President, on the day Congress reconvened after the general election in November, I introduced the Election Broadcast Reform Act of 1980, which would prohibit the broadcast of results or the projection of results of Presidential elections until all the polls across the Nation are closed. Like so many of my colleagues, I had just returned to Washington from having spent the election period in my home State; and while the memories of election night were still fresh in our minds, I wanted to focus attention on the manner in which the major broadcast networks had covered the election results and particularly their unduly early determination and announcement of the winners. The subject is one about which I had felt strongly for some time, but my own experience in voting in Idaho underscored for me the need to do something about it.

My wife and I left our home in McCall, Idaho, by car on the afternoon of November 7 to drive the relatively short distance to Payette, where we have traditionally voted, to cast our ballots. By the time we arrived in Payette, about 5:30 in the afternoon, the networks had already determined the election was decided and President Carter was ready to concede defeat.

Make no mistake about it, Mr. President, I was and am absolutely delighted with the results of the election. I have been and continue to be a strong supporter and admirer of President Reagan, and my friendship and admiration for Vice President Bush go back many years. But I am also concerned, as I know they are, that the right of every American citizen to cast a ballot assured that his or her vote makes a difference, is important, and is worth making the effort for, is protected. I believe people should be free to make a choice based on their own convictions and judgment without the undue influence of what the networks say is going to be the result.

I can think of no better way to reduce voter turnout or to discourage participation in the election process than to allow this practice to continue. Voter turnout was only approximately 53 percent this year, the lowest figure since 1948. The State of California, in the Pacific time zone, was expecting voter participation of 85 percent this year, but a full 13 percent fewer voters showed up at the polls. People in my State, which in the northern part is 3 hours behind the east coast, are angry. I would venture to say the same is true in other Western States.

The Legislature of the State of Idaho recently passed a joint memorial calling on Congress to take action to address this situation.

Mr. President, the right to vote in a free society is so very precious and important. Our elections are so much more than media events or mere television specials. I can see no reason or justification that the election results must be known instantaneously across the land. Really the greatest advantage I see is to the network ratings. I believe the right to vote is more important.

Since the day I introduced my bill last November, I have received many letters about it from virtually every part of the United States. The overwhelming majority of those letters were written from citizens in support of my proposal. Naturally the bill has caused a good deal of interest and concern among those in the broadcast field. I expected that would be the case and I have welcomed their comments. An especially interesting article by Mr. Elmer W. Lower appeared in the January 17 issue of TV Guide. It is well worth reading, and I ask unanimous consent that this article be printed in the RECORD at the conclusion of my remarks.

I am, of course, well aware that my proposal is one of several which have been suggested to address the problem of which I have spoken, but I still believe it presents the most complete solution. There has been some discussion that the way to address this situation is to provide that the polls remain open during the same period of time across the country. But in my judgment, this proposal is bound to lead to inconvenience in one part of the country or another, and would in fact result in even smaller voter turnouts. People naturally want to vote during the time before or after work. Why should the time of voting for millions of Americans be adjusted to meet the demands of the broadcast media? Does it not make more sense that the media adjust its programing for the needs of those voters and the good of the country? It would be well if the networks would take this step on their own initiative, but quite frankly, I do not expect that to happen.

Another suggestion has been to in effect seal all ballot boxes, or to prohibit disclosure of voting results by election officials until a specific time across the country. Perhaps that step should be taken to discourage voting irregularities anyway, but it would not solve the problem of the network projections which are based in large part on surveys of voters as they leave the polls.

My esteemed colleague and friend from California, Senator HAYAKAWA has introduced a series of bills which address the problem from several different approaches, and I certainly compliment and support his efforts in this regard. I am very pleased that some attention is being focused on the problem and as a member of the Senate Rules Committee, I shall encourage our chairman to hold hearings on the subject at some point during the year. It was never my intention to be unalterably tied to the specific terms of my own bill, but rather to encourage Congress to look at the situation with some care.

But I also still believe the matter should be looked at from the standpoint of its being a broadcast problem as well as a Federal election law problem. I am accordingly reintroducing my bill which amends the Communications Act to prohibit the broadcast of results or projections of the results of Presidential elections until all the polls are closed. I sincerely hope the Commerce Committee will also consider holding hearings on the subject.

I recognize that the approach I propose touches on the constitutional guarantees of freedom of the press and freedom of speech, but I believe the proposal would pass constitutional muster. It has been concluded through a long series of decisions that these rights are not absolute, and my proposal does not go so far as to prohibit speech or publication altogether but rather delays it a matter of hours. It entails a reasonable manner of achieving a justifiable purpose with a minimum infringement on the rights in question. I, of course, recognize that the bill I am introducing is in need of some perfecting. It does not, for example, ad-

dress the question of Senate and House races, nor does it anticipate all possible loopholes. But it does focus our attention on the problem.

Something must be done, Mr. President, as difficult as it seems. We must reenfranchise that significant portion of our population living and voting in the later time zones.

I ask unanimous consent that the text of my bill, an article, and a joint resolution of the Legislature of Idaho be printed at this point in the RECORD.

There being no objection, the bill, article, and joint resolution were ordered to be printed in the RECORD, as follows:

S. 762

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that part I of title III of the Communications Act of 1934 (47 U.S.C. 301–330) is amended by adding at the end thereof the following new section:

"Section 331. PROHIBITION AGAINST BROADCAST OF PRESIDENTIAL ELECTION RESULTS UNTIL POLLS ARE CLOSED

On any day in which an election is held to select electors of the President and Vice President of the United States, no station licensee shall broadcast, or permit the broadcast of the results of or any projections of the results of such election prior to the official closing of all polling places (other than those places where only absentee ballots may be cast) at which votes may be cast in such election. Any station licensee which violates this section shall be subject to a fine of not more than $10,000."

INAUGURATION DAY: YOU'LL SEE IT ALL

(By Elmer W. Lower)

Those comments were only three of the hundreds provoked by NBC News when on Election Night it declared Ronald W. Reagan the next President of the United States at 8:15 P.M., Eastern Time. West Coast and Rocky Mountain voters—also those in Alaska and Hawaii—still had from one to three hours in which to cast their ballots. Many believed at that moment that they had lost their votes.

The arguments are certain to continue. Legislation has already been introduced. The questions that have arisen are not easily answered.

How do the networks make projections? What did NBC News do that ABC News and CBS News did not?

What effect do early projections have on Western voters who haven't yet cast ballots? Are projections based on key precincts accurate? What about those based on interviews with voters as they leave the polls?

Should Congress establish a uniform poll-closing time for all precincts in the 50 states and the District of Columbia? Or is there some other solution?

Since the early 1960s the three commercial television networks have projected the results of voting in each state—for President, senator and governor—by using a small sample of precincts that reflects the state's voting behavior. For example, ABC's 66 key precincts in Missouri have mirrored how the state's 4050 precincts vote.

The projections have usually been accurate. In 1976, the networks made only two incorrect calls all year; their records during the 1980 primaries were perfect, but they did make several incorrect projections on Nov. 4.

In 1980, all networks used extensive interviews outside selected polling places in an effort to tell their viewers why voters voted as they did. But NBC News carried these exit interviews one step further. It used them to make its projections of the results in each state, in some cases, reportedly, without waiting for the key precincts and the raw vote tabulated by the cooperative News Election Service.

This enabled NBC to project that Reagan would win Ohio's 25 electoral votes at 7:31 P.M., one brief minute after polls had closed, and to do the same in Missouri (with 12 electoral votes) at 8:02. Other projections were made so quickly that soon NBC anchorman John Chancellor announced—at 8:15—that Reagan would be the next President of the United States, having been projected to win more than the required 270 electoral votes.

NBC News trumpeted its victory in full-page newspaper advertisements, and Les Crystal, senior executive producer for election coverage, argued: "If tonight isn't proof that exit polls are useful, I don't know what is." NBC conceded that it had decided some states on exit polls alone, not waiting for the actual tabulation from key precincts.

ABC and CBS, both fielding exit interviewers at some 400 precincts, had similar information, but delayed their projections until they received the actual vote tallies from their key precincts. ABC called Reagan the winner at 9:52 P.M. and CBS at 10:32.

So what's wrong with being the first to tell American television viewers who their next President will be? The problem is that it may interfere with voting in nine Western states, not only in the Presidential race, but also in lesser—but still important—contests at the bottom of the ballot. Those states were still balloting when NBC announced that it was all over.

"Nobody goes to the ball game in the ninth inning when the score is 100 to 0," remarked Truman Campbell, California Republican chairman. Both he and Clinton Reilly, a California Democratic campaign director, felt that NBC's early call and President Carter's unusually early concession had turned voters from the polls and caused both parties to lose Congressional and state assembly races. A final CBS News-New York time post-election poll reported that 10 per cent of those who didn't vote in the West said they didn't because they had heard either network projections or Mr. Carter's concession.

"What does exit polling do to further the democratic election process?" asked Reilly, arguing that laws should be passed to keep interviewers at least 500 feet away from the polls.

Other critics question the accuracy of exit interviews. In a Reagan landslide they were right on the money. But are they, in a close election? Do voters tell the truth as they leave the polls? Do the interviews represent a true cross section?

Reagan's landslide was not the first in the television era. Eisenhower won big and early in 1952 and 1956, Lyndon Johnson was an early victor in 1964, and so was Richard M. Nixon in 1972. After the networks' early projections of Johnson's 1964 landslide victory over Sen. Barry M. Goldwater, remedial legislation was introduced in Congress, but it died in committee.

So what are the solutions for the 1980s and beyond? Here are some of the proposals that have been made:

That uniform poll-closing hours be established, so that all the 178,000 precincts in the 50 states and the District of Columbia would close simultaneously. Then network projections, however speedy, would no longer have any effect on voting in the West.

That a law be passed requiring that news interviewers be kept at least 500 feet from polls. There is some doubt that such a law would be constitutional, but those who favor it contend that if party workers can be kept from electioneering too close to the polls, news interviewers can be required to keep at least a 500-foot distance. This would make it easier for voters to avoid being interviewed if they wished.

That voting results in states that have finished voting early be withheld, and be released to news organizations only after all polls have closed.

That Election Day be shifted from the first Tuesday after the first Monday in November to the first weekend in November, in an effort to produce a larger turnout; and couple this with a uniform poll-closing time.

That split-day voting be established in the Western states. Polls would open on the first Monday night of November to accommodate persons who vote after work, and then open again on Tuesday. Polls would close at 6 P.M. Tuesday, Pacific Time, to synchronize with 9 P.M. in the East. All polls in every state would close simultaneously.

Congress can take a big step in solving the problem in its next session. It can establish uniform poll-closing hours everywhere. That is the simplest immediate solution.

But even that would not restrain news organizations—notably those of the big television networks—from interviewing voters as they left the polls and making projections based on those results. As one Midwestern newspaper remarked, NBC "could have called the election at 10 o'clock in the morning if it had been brazen enough."

A law restricting the rights of reporters outside polling places might raise First Amendment objections and be bad public policy. Instead of legislation, the answer might be an act of network-news statesmanship: voluntary self-restraint. The networks could abandon the mad race to be first just to boast of it in full-page advertisements; let the voters everywhere cast their ballots without outside influence.

What form should voluntary restraint take? At the very least, all news organizations should withhold projections in states having staggered poll-closing hours until all the states' precincts have completed voting. (Thirteen states still have such staggered hours.)

All news organizations should agree not to use exit-interview polls as the sole basis for projections. They should use them only for developing demographic information about voting patterns.

If any news organization insisted on using exit interviews for projections, it should frankly reveal the precise data on which it based its predictions. An anchorperson might say, for example:

"XYZ News projects that Candidate A will win Missouri's 12 electoral votes. As the Missouri polls closed only 60 seconds ago, we do not yet have actual vote tallies. We base our projection on how 300 Missouri voters *said* they voted during interviews as they left the polls." The public could then decide whether to believe the XYZ News data.

If Congress established uniform poll-closing hours and if news organizations ceased making projections based on exit interviews, there could be no posssible interference anywhere with the voting process. But if voting hours remain the same, the problems will continue—even without projections.

The News Election Service tabulates the raw vote so swiftly that a Presidential winner in a landslide year is almost certain to be known by 8:30 P.M., Eastern Time, an hour at which seven to nine Western states are still balloting. And we have had *five* such races in the eight Presidential elections of the television era.

There are those who believe that neither legislation nor voluntary restraint will work. The solution will come, they say, when some news organization gets badly burned using exit-interview polls. What worked for NBC

News in the Reagan landslide could lead to disaster in a close race.

As Idaho's Sen. James McClure says, "Our elections are much more important than a media event or a mere television spectacular."

IN THE SENATE, SENATE JOINT MEMORIAL NO. 101 BY STATE AFFAIRS COMMITTEE

A joint memorial to the Honorable Senate and House of Representatives of the United States in Congress Assembled, and to the Honorable Congressional Delegation Representing the State of Idaho in the Congress of the United States

We, your Memorialists, the Senate and the House of Representatives of the State of Idaho assembled in the First Regular Session of the Forty-sixth Idaho Legislature, do hereby respectfully represent that:

Whereas, the outcome of the recent election for President and Vice President of the United States was predicted early in the evening of November 4, 1980, by the national broadcast media, before the polls closed in Idaho and other western states; and

Whereas, the broadcast media based their predictions on election returns released by election officials of eastern and midwestern states after the polls closed in those states; and

Whereas, there is strong evidence that the predictions discouraged many citizens in the western states from voting and thus affected the outcome of many important and close state and local issues and contests; and

Whereas, there is a need for national legislation that will lessen the impact of election returns from eastern and midwestern states on voters in the western states and that will recognize and respect the constitutional rights of the media to report the news.

Now, therefore, be it resolved by the members of the First Regular Session of the Forty-sixth Idaho Legislature, the Senate and the House of Representatives concurring therein, that we urge the Congress of the United States to study and consider seriously the effect the release of election returns from eastern and midwestern states has on voting in the western states.

Be it further resolved that we urge the Congress of the United States to enact legislation that will minimize the impact of election returns from eastern and midwestern states but will not discourage any citizen from exercising one of the most precious rights of an American: the right to vote.

Be it further resolved that the Secretary of the Senate be, and she is hereby authorized and directed to forward copies of this Memorial to the President of the Senate and the Speaker of the House of Representatives of Congress, and the honorable congressional delegation representing the State of Idaho in the Congress of the United States.

By Mr. McCLURE:

S. 763. A bill to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purposes of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir; to the Committee on Energy and Natural Resources.

S. 764. A bill to provide for protection of the John Sack Cabin Tarshee National Forest in the State of Idaho; to the Committee on Energy and Natural Resources.

LEGISLATION RELATING TO CERTAIN PUBLIC LANDS IN IDAHO

Mr. McCLURE. Mr. President, today I am reintroducing two bills the 96th Congress began to consider. By the end of the session both had passed the Senate. Time was the limiting factor in the House consideration of these bills. I hope that the early introduction this year will enable both the Senate and House to consider and vote favorably on these bills.

The first is a bill to authorize and direct the Secretary of the Interior to transfer to the city of American Falls, Idaho, title to its city parks. Title which has been mistakenly retained by the Federal Government since 1925. When the original American Falls Dam was constructed by the Bureau of Reclamation in 1925, the old city of American Falls was moved from its low lying location behind the new dam. The new city, which was platted on land purchased from private owners, included a number of city parks.

The city has developed the parks and has used them over the years without knowing they continued to be owned by the Government. American Falls residents have paid taxes to maintain the parks for the past 55 years, and the parks have been treated as city property.

A recent search turned up the fact that the Federal Government apparently owns the city golf course, the central city square, and several other smaller parks. Rather than having to lease the parks from the Government, the Bureau of Reclamation has suggested to the city officials that legislation giving title to the city would be the way to solve the problem.

I am accordingly introducing this measure to accomplish that purpose. I see no reason that it should be controversial; it involves only a small amount of land which has in any case been treated as city property for some time. The Bureau of Reclamation has helped to draft the language I am introducing; and has no objection to its adoption. Correction of this oversight is long overdue.

The second bill I am reintroducing provides for the protection of a unique structure located in the Targhee National Forest in Idaho. Known as the Johnny Sack Cabin, this structure and surrounding smaller structures have become something of a local historic landmark. Constructed about 1932, the cabin is nestled in the trees overlooking Big Springs, a natural springs emitting warm, geothermally heated water year round. The setting of the cabin, the water wheel nearby, and the springs combine to provide a rare esthetic beauty which has been enjoyed by countless thousands over the years. Countless artists and photographers have reproduced the scene many times since 1832.

The esthetic beauty of the area, including the cabin, is not the only reason for seeking its preservation, however. The original builder and owner of this cabin Johnny Sack, was himself a unique individual.

A German immigrant, Johnny Sack stood only 4 feet 11 inches tall. Over the years, following his settlement in the area around 1931, Johnny Sack constructed the main cabin and later the various other structures nearby, including a water-powered pumphouse, built around 1940.

Legend has it that Johnny Sack lived primarily off the land and, during the summer, held a variety of odd jobs. During the winter, he occupied himself with making improvement on the cabin and constructing furniture. Perhaps the cabin is most unique for its interior woodwork, which is of very high quality characterized by an interesting and attractive planed-bark finish. It remains today in excellent condition. Much of the original furnishings were also built by Sack, utilizing the same bark finishing technique. The workmanship exhibits considerable skill, imagination and attention to detail.

While many have seen the cabin from the outside, generally from a parking area located across Big Springs, relatively few have seen the magnificent interior of the structure. It has been the intent to open the inside of the cabin for public use. Since I first introduced this bill in 1979, the John Sack Cabin has been registered on the National Register of Historic Places. Also, interested local residents have established the Island Park Interpretative Association to maintain and operate the cabin. The association has successfully raised the funds needed to maintain the cabin and has more importantly, raised the interest and commitment of many people to carry on with the cabin's operation.

Specifically this bill does nothing more than require the Forest Service to preserve and maintain the Johnny Sack Cabin and associated structures in their present form. It also requires the Forest Service to consult local interest organization, such as the Island Park Interpretative Association, concerning the management and operation of the cabin and immediate area; and in fact, allows the Forest Service to enter into a cooperative agreement for the management and protection of the area for the public use.

Mr. President, both of these bill are still needed, and are noncontroversial. I ask unanimous consent that the text of both bills be printed in the RECORD at the end of my remarks.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 763

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized and directed to convey by quitclaim deed to the city of American Falls, Idaho, without cost, the following real property located within or adjacent to the city limits of said city of American Falls, reserving all right-of-way and oil and gas of in land to the United States:

(a) The area identified as the Campbell Stebbins Park, containing approximately 41.5 acres, including the park area located between the Oregon Trail Highway and the Oregon Short Line Railroad, and the area identified as a Public Square, containing approximately 8.8 acres, all as shown on the official plat of the Reclamation Addition to the city of American Falls approved October 18, 1923, and recorded in the county of Power, Idaho, as instrument No. 32042.

(b) Block 44 of the original townsite of American Falls; containing approximately 3.3 acres,

(c) A tract of land containing 11.7 acres, more or less, described as follows:

Beginning at the northwest corner of the

southwest quarter of section 21, township 7 south, range 31 east, Boise meridian;

thence south 45 degrees 16 minutes east, a distance of 1,870.3 feet, more or less, to the southeast corner of said southwest quarter;

thence north 58 degrees 28 minutes west, a distance of 96.3 feet;

thence north 68 degrees 17 minutes west, a distance of 1,339.2 feet, more or less, to a point on the west section line of said section 21, said point being 548.2 feet north of the southwest corner of said section;

thence north along the west section line a distance of 770.5 feet, more or less, to the northwest corner of the southwest quarter of said section 21, the point of beginning.

(d) A tract of land containing 8.79 acres more or less in the south half of the southwest quarter, section 28, township 7 south, range 31 east, Boise meridian, Idaho, and more particularly described as follows:

Beginning at the southwest corner of said section 28;

thence north 44 degrees and 38 minutes east, 1,868.6 feet to the 16/17 corner of said section;

thence east along the north boundary of the southeast quarter southwest quarter of said section 28, 367.2 feet to a point;

thence south 324.9 feet to a point;

thence north 89 degrees and 59 minutes west, 92.8 feet to a point;

thence south 49 degrees and 23 minutes west, 361.9 feet to a point;

thence south 78 degrees and 34 minutes west, 708 feet to a point;

thence south 26 degrees and 55 minutes west, 333.7 feet to a point;

thence south 61 degrees and 51 minutes west, 271.6 feet to a point;

thence south 43 degrees and 29 minutes west, 280.3 feet to a point on the south boundary of said section 28;

thence south 89 degrees and 59 minutes west along the south boundary of said section 28, 34.9 feet to the place of beginning.

(e) A tract of land containing 8.0 acres, more or less, located in the west half of the southwest quarter, section 28, township 7 south, range 31 east, Boise meridian, Idaho, and more particularly described as follows:

Beginning at the southwest corner of section 28;

thence north 44 degrees 38 minutes east, a distance of 1,886.6 feet to the northeast corner of the southwest quarter southwest quarter, of section 28;

thence north a distance of 1,320 feet to the northeast corner of the northwest quarter southwest quarter of section 28;

thence west, a distance of 30 feet to a point on the east edge of Hillcrest Avenue;

thence southwesterly along a curve on the side of Hillcrest Avenue a distance of 2,955 feet to a point on line between sections 28 and 29;

thence south 65.0 feet to the southwest corner of section 28, the place of beginning.

Such property shall be conveyed subject to the reservation of rights-of-way for ditches, canals, and pipelines constructed by the authority of the United States and to other existing rights-of-way of record. The conveyance of such property shall contain a reservation to the United States of all oil and gas in the land, together with the right to prospect for, mine, and remove the same under such regulation as the Secretary of the Interior may prescribe.

S. 764

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of providing for the public use and enjoyment of the John Sack Cabin, Targhee National Forest, State of Idaho, and to protect and preserve such cabin as a unique example of craftsmanship, the Secretary of Agriculture, in consultation with the Island Park Interpretive Association and other interested organizations, shall take such action as may be necessary in order to provide for the protection and maintenance of the John Sack Cabin and associated structures. In carrying out the requirements of this Act, the Secretary is authorized, in accordance with existing law, to enter into a cooperative agreement with, or to issue a special use permit to, an appropriate person or organization pursuant to which such person or organization shall provide such protection and maintenance.

By Mr. MOYNIHAN:

S. 765. A bill to clarify the definition of the term "local furnishing" in the Internal Revenue Code of 1954; to the Committee on Finance.

LEGISLATION TO CLARIFY THE DEFINITION OF "LOCAL FURNISHING" IN THE TAX CODE

Mr. MOYNIHAN. Mr. President, my bill would let New York City tap the gas that is produced by decomposing garbage, have private companies supply it to city residents, and finance the endeavor with tax-exempt "industrial development bonds." Any other city can do this now. New York City cannot because of its unusual political structure—it has five boroughs.

I introduced the same bill last year. It was S. 2660 then. The Senate Finance Committee held a hearing on it on June 24, but there was no other action.

As a general rule, industrial development bonds are taxable, not tax exempt. However, section 103(b)(4)(E) of the Federal tax code makes an exception for bonds that are used to finance "facilities for the local furnishing of electric energy or gas." The interest an investor earns on such bonds is not taxed.

The question is what is a facility for the "local furnishing"? Section 103 was placed in the code in 1968. But nowhere in the committee reports, in the transcript of the floor debate, or in the statement of the conferees is the term "local furnishing" defined.

The Internal Revenue Service takes the position that the facility must serve an area no larger than two contiguous counties. According to its regulations—

(t)he term "facilities for the local furnishing" . . . means property which . . . is part of a system providing service . . . in one or more communities or municipalities, but in no event more than two contiguous counties (or a political equivalent).

But the service area may be one city and one contiguous county where the city is an independent entity, like Baltimore, Md.:

For purposes of this subdivision, a city which is not within, or does not consist of, one or more counties (or a political equivalent) shall be treated as a county.

In 1978, Congress added a new sentence to the code. In effect, the new sentence defines local furnishing as either two contiguous counties or one city and one contiguous county, whether the city is an independent entity, like Baltimore, or not. But the statutory definition applies only to facilities for the furnishing of electricity. The bill I am introducing today would extend it to gas.

Under the present rules, Mr. President, every city, except New York, can build a facility to supply gas to its residents, and finance it with tax-exempt "industrial development bonds." Every city, except New York, is either a municipality within a county, or an independent unit. New York is disqualified because it has five boroughs, or "counties."

The present rules make a mockery of the word "local." It is a "local furnishing," for example, to supply gas to Jacksonville (766 square miles) or to Oklahoma City (636 square miles), but not to New York City (300 square miles), a city much smaller in geographic size.

I submit that local jurisdiction should be treated the same, whatever their political arrangements.

In addition, the term "local furnishing" should have the same meaning for plants that generate electricity and for ones that produce gas. The phrase is used once, in one sentence, as an adjective for both.

The Treasury Department supported the electricity amendment in 1978, after agreeing that furnishing power to a city and one contiguous county is sufficiently "local" that whatever bonds are issued should be tax exempt. As Don Lubick, the Assistant Secretary for Tax Policy, wrote me at the time—

(s)ince a city is a single governmental unit, even if it embraces more than one county, the requisite local character of the furnishing is as much met by the standard you propose as by the current two-county standard. For reasons of consistency in the treatment of local jurisdictions for purposes of the "local furnishing" test, we therefore support your amendment.

I hope that the Treasury will look favorably on a second, similar amendment to cover facilities that produce gas. I ask unanimous consent, Mr. President, that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 765

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. 103(b) of the Internal Revenue Code of 1954 (relating to projects for which tax-exempt "industrial development bonds" may be issued) is amended by inserting the words "or gas" between "energy" and "from" in the last sentence of paragraph (4).

SEC. 2. The amendment made by this Act shall apply to obligations issued after the date of enactment.

By Mr. MOYNIHAN:

S. 766. A bill to amend the Internal Revenue Code to clarify when the costs of maintaining an office at home may be deducted; to the Committee on Finance.

LEGISLATION RELATING TO TAX DEDUCTIONS FOR MAINTAINING AN OFFICE AT HOME

Mr. MOYNIHAN. Mr. President, one of the bills I am introducing today would clarify when a taxpayer may deduct the cost of maintaining an office at home.

I believe the Internal Revenue Service is misinterpreting the law.

At present, a taxpayer's expenses are deductible only if his office at home is used exclusively and on a regular basis as the taxpayer's "principal place of business." The law on this subject is at

section 280A of the Internal Revenue Code. There are other requirements, as well. But what I am most concerned about is the rule that the office must be the taxpayer's "principal place of business."

It is not clear what that means. For instance, where is the principal place of business of a university professor who has an office on campus for teaching, and an office at home for private consulting?

The IRS says that it is the office on campus, if teaching is how the professor earns most of his income. The IRS looks for the principal place of the taxpayer's principal business. According to it—

A taxpayer may have only one principal place of business regardless of the number of business activities in which the taxpayer is engaged. When a taxpayer engages in business activities at more than one location, it is necessary to determine the principal place of the taxpayer's overall business activity.

I am reading from proposed regulations that the IRS issued on August 7.

I do not think that is what Congress intended. Rather, I believe we felt that a taxpayer would have a principal place of business for each trade or business in which he is engaged. I am using the phrase "trade or business" as it is used in Code section 162.

My bill, therefore, would rewrite the statute so that there is no longer any ambiguity or room for misunderstanding.

There are three reasons why I think my interpretation of the law is correct. First, it is consistent with what Congress was trying to accomplish. Congress enacted section 280A because it wanted to provide a set of definitive rules to guide taxpayers on the deductibility of their home office expenses. The law at the time was unclear. The IRS understood the existing statute to mean one thing and the tax court understood it to mean another.

Congress also had as its aim keeping the tax deduction from being abused. Deductions were being claimed by individuals whose only business use of the home was to work occasionally at the kitchen table or in the den. What these people were writing off, however, were some of their living expenses and not business expenses, since their rent, their property taxes, and their gas and electricity bills were no higher because of the occasional work being done at home than they would have been otherwise. There was no incremental business expense.

In section 280A, Congress spelled out what elements must be present before one can say with certainty that a business use of the home has produced an incremental expense.

This was done primarily by requiring that the home office be used exclusively and on a regular basis for business. If a room is used exclusively for business, there can be no disguising living expenses as business costs. If the room also is used on a regular basis for business, one guarantees that no taxpayer will be able to claim a tax deduction for an empty room merely by taking his work there once or twice.

Nothing much is gained by insisting, in addition, that the room serve as the taxpayer's principal place of business. It does help to insure, however, that the business use is significant, which it is if the home office is the base for a trade or business.

Another reason why I think Congress meant "principal place of a trade or business" is that the Joint Tax Committee staff suggested that as the standard in a pamphlet it prepared for the Ways and Means Committee in 1975.

The pamphlet spoke of the need to limit taxpayers with offices at home to deductions for incremental business expenses. It added that—

In the case of certain business uses of the home, it is more readily demonstrated that incremental costs are incurred by reason of the business use, e.g., where a portion of the home is exclusively used as a shop or business office in actively conducting a trade or business.

The standard proposed was a trade or business. It was not, as the IRS has suggested, the principal place of the taxpayer's overall business activity.

Finally, the U.S. tax court has said the IRS is wrong. Judge Tannewald, writing for the court in the *Curphey* v. *Commissioner*, 73 T.C. 61 (1980), said the IRS—

* * * approach of requiring that the home office be the principal place at which the taxpayer's principal business is conducted would disallow otherwise allowable deductions in connection with the use of a home office which is a principal place of business. We do not believe that Congress intended such a result.

According to the judge, what Congress wanted was for the IRS to inquire—

whether, with respect to a particular business conducted by a taxpayer, his home office was his principal place for conducting that business.

My bill would rewrite section 280A to make that clear.

The other fact that I should mention about my bill is that it also would clarify what is meant by the phrase "exclusively used."

The office at home must be "exclusively used" as the taxpayer's principal place of business. Does that mean, for example, that the taxpayer must use the office only for the business he runs at home?

The IRS has said no, that the office may be used for more than one business purpose. I believe that is the correct interpretation. My bill would change the order of several words to rule out future misunderstandings.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 766

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Subsection (c) of section 280A of the Internal Revenue Code of 1954 (relating to exceptions for certain business or rental use) is amended by striking out paragraph (1) and inserting in lieu thereof the following—

"(1) CERTAIN BUSINESS USE.—Subsection (a) shall not apply to any item to the extent such item is allocable to a portion of the dwelling unit which is exclusively used on a regular basis by the taxpayer as a place of business and—

"(A) is the principal place of a trade or business of the taxpayer,

"(B) is used by patients, clients, or customers in meeting or dealing with the taxpayer in the normal course of his trade or business, or

"(C) is a separate structure which is not attached to the dwelling unit.

In the case of an employee, the preceding sentence shall apply only if the use referred to in the preceding sentence is for the convenience of his employer."

SEC. 2. The amendments made by this Act shall apply to taxable years beginning after December 31, 1975.

By Mr. MOYNIHAN:

S. 767. A bill to amend the Internal Revenue Code to provide that, for purposes of the Federal estate tax, amounts contributed to certain cemetery companies may be deducted from the gross estate; to the Committee on Finance.

LEGISLATION TO PERMIT A TAX DEDUCTION FOR MONEY LEFT TO A NONPROFIT CEMETERY ASSOCIATION

Mr. MOYNIHAN. Mr. President, I am introducing legislation today to permit a tax deduction to be taken by the estate of anyone who has left money in his will to a nonprofit cemetery association.

Let me say that I am prompted to do this by a decision by the second circuit court of appeals in the case *Child* v. *United States*, 540 F.2d 579 (1976).

In Child, a woman, Elizabeth Haas, had died in 1966 and had left a significant portion of her estate to two nonprofit cemeteries. The Grove Cemetery was given $25,000, partly for the perpetual care of a family burial plot. Another $2.5 million went to the Watertown Cemetery as a general bequest.

The executor tried to deduct both sums from Ms. Haas' estate before paying the estate taxes, on grounds that the cemeteries were charitable or religious organizations. Gifts to such organizations are tax deductible under section 2055(a) of the Federal Tax Code.

But the court said the cemeteries were neither charitable nor religious and denied the deductions.

The important point is this. Had Ms. Haas made the gifts during her lifetime, they probably could have been deducted from her income taxes. The income tax laws make contributions to charitable or religious organizations deductible, just as gifts to those groups are deductible for estate tax purposes. Such groups are known as 501(c)(3) organizations.

Gifts to "cemetery companies owned and operated exclusively for the benefit of their members or which are not operated for profit" also are deductible for income tax purposes. Specific provision is made for them in section 501(c)(13). But nothing is said about such groups in the estate tax laws.

The court noted this and said it would leave "to congressional wisdom the apparent anomaly establishing different treatment of nonprofit cemetery associations for income and estate tax purposes."

I see no reason for such an anomaly.

Indeed, I see good reason why there should not be one. I believe we deny individuals equal protection of the law if we permit one person to leave money, free from estate taxes, to the church-run cemetery where he wants to be buried, but deny this to another person who wants to be buried in a private, nonprofit cemetery, instead.

My bill would make bequests to a nonprofit cemetery company tax deductible for estate tax purposes, provided the cemetery company is either owned and operated exclusively for its members or prohibited by its charter from engaging in any business other than burials. The bill would do this for bequests made by individuals who die after December 31, 1980. I ask unanimous consent, Mr. President, that the text of the measure be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 767

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Subsection (a) of section 2055 of the Internal Revenue Code of 1954 (relating to transfers for public, charitable, and religious uses) is amended by striking out "or" at the end of paragraph (3), by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or", and by inserting after paragraph (4) the following new paragraph:

"(5) to or for the use of—

"(A) a cemetery owned and operated exclusively for the benefit of its members, or

"(B) any corporation chartered solely for burial purposes as a cemetery corporation and not permitted by its charter to engage in any business not necessarily incident to that purpose,

"if such company or corporation is not operated for profit and no part of the net earnings of such company or corporation inures to the benefit of any private shareholder or individual."

SEC. 2. Subsection (e) of section 2055 of such Code is amended by adding at the end thereof the following new paragraph:

"(4) No deduction shall be allowed under this section for any amount of any bequest, legacy, devise, or transfer to or for the use of any organization described in subsection (a)(5) to the extent such amount is allowable as a deduction under section 2053."

SEC. 3. The amendments made by this Act shall apply to estates of decedents dying after December 31, 1980.

By Mr. MOYNIHAN:

S. 768. A bill to amend the Internal Revenue Code to provide that certain research and development expenditures will not be taken into account for purposes of the "small issue exemption" from the industrial development bond rules.

LEGISLATION TO AMEND THE INTERNAL REVENUE CODE WITH RESPECT TO CERTAIN RESEARCH AND DEVELOPMENT EXPENDITURES

Mr. MOYNIHAN. Mr. President, we have heard a great deal recently about venture capital firms and how the United States needs more of them if we are to compete with the Japanese and West Germans. These are small companies, set up by individuals who have worked for high-technology giants like IBM and ITT, but who have ideas of their own that they want to develop and market. Venture capitalists started the microchip boom in the 1970's. They are already heavily involved in the next growth industry, biotechnology. In short, they are terribly important to the American economy.

That this is the case is well understood. But what is not generally known is that the Federal tax laws discriminate against venture capitalists. We let cities borrow money, at tax-exempt rates, for small stores and small factories, but not for venture capital firms or, for that matter, for any small business that spends a large part of its budget on research and development.

This difference in treatment arises because of the way the Internal Revenue Service has interpreted section 103 of the Tax Code. I am, therefore, proposing legislation that would change the code. If cities can borrow for small manufacturers, they should also be able to borrow for venture capital firms.

Technically, the question is how two words used in the "small-issue exemption" for industrial development bonds should be defined. IDB's are a type of municipal bond, but they have certain distinctive features. For one, a city issues a municipal bond to borrow money for itself to build a hospital, school, or other public project. But it issues an IDB to borrow for someone else, usually a private company. In this way, the city can induce a company to set up shop nearby and to provide jobs for local workers.

Another difference is that municipal bonds are tax exempt. IDB's are not, although there are exceptions, one of which is the "small-issue exemption." The exemption is very complicated. Unfortunately, it can be stated only in mathematical terms. I will say it slowly. IDB's issued by a city are tax exempt if the face amount of the bond issue plus the "capital expenditures" of the company in the 3 years preceding and the 3 years following the issue date do not exceed $10 million.

Venture capital firms rarely, if ever, can take advantage of the exemption. Other small businesses can. The reason is the IRS has defined the term "capital expenditures" in a way that excludes venture capitalists. "Capital expenditures" are obviously such items as the cost of land, buildings, machinery, and other depreciable assets. But the IRS maintains that research and development expenses also are covered.

This makes it difficult, if not impossible, for companies in rapidly changing, high-technology fields to take advantage of IDB financing. It is not unusual for even small venture capital firms to spend millions of dollars in research over a period of several years. These companies must develop their own products. Companies that merely buy their inventory from others have no problem. Since they can ignore the money invested in product development by others, they are less likely than venture capital firms to exceed the $10 million limit on "capital expenditures."

Surely this is an oversight by Congress. If not, it is appalling economic policy. My bill would correct for it by making clear that research expenses are not "capital expenditures." I ask unanimous consent, Mr. President, that the measure be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 768

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that—

(a) Paragraph (6) of section 103(b) of the Internal Revenue Code of 1954 (relating to exemption for certain small issues) is amended by adding at the end thereof the following new subparagraph:

"(J) RESEARCH AND EXPERIMENTAL EXPENDITURES NOT TAKEN INTO ACCOUNT.—For purposes of applying subparagraph (D)(ii), research and experimental expenditures (within the meaning of section 174) shall not be taken into account."

(b) The amendment made by subsection (a) shall apply—

(1) to obligations issued after the date of the enactment of this Act in taxable years ending after such date, and

(2) with respect to capital expenditures made after December 31, 1980.

By Mr. MOYNIHAN:

S. 769. A bill to amend section 280 of the Internal Revenue Code of 1954 to exclude from the application of such section expenses incurred by an author of a book or similar property in the writing of such book or property; to the Committee on Finance.

LEGISLATION TO AMEND THE INTERNAL REVENUE CODE WITH RESPECT TO EXPENSES INCURRED BY AN AUTHOR

Mr. MOYNIHAN. Mr. President, the bill I am introducing today would clear up a misunderstanding about section 280 of the Tax Code.

Section 280 requires the production costs associated with "films, sound recordings, books, and similar property" to be capitalized. That is to say, such costs must be deducted over the period when the property is generating income, rather than in the year they are incurred.

Production costs are capitalized according to a special formula. The formula requires that one keep a separate account for each movie, record, or book, and estimate how much income will be made from it. One's costs are deducted at the same rate the income is received. Thus, if 75 percent of the income from a movie is to be received in year one, then 75 percent of the production costs may be deducted in the same year.

The section was put in the Tax Code in 1976. It was supposed to shutdown so-called production company tax shelters, a form of shelter favored by wealthy individuals investing in movies. In such shelters—

> A limited partnership is formed to produce a film. . . . The partnership enters into an agreement with a studio, with a distributor or with an independent producer to produce a particular film. The partnership uses the cash method of accounting and writes off the costs of production as they are paid. Typically, the partnership is heavily leveraged and significant costs are paid with borrowed funds. The principal elements of this form of motion picture shelter are . . . deferral and leverage.

I am reading from the Senate Finance Committee's report on the 1976 Tax Reform Act.

The committee said it had evidence that "the production company shelter

may be expanding into other areas, such as the publishing field." Hence, it wrote a provision that applied to books and records, and not just to movies. The conferees agreed to what the Finance Committee proposed, with one change. They wanted production costs to be capitalized, but not the "distribution costs" associated with movies.

One thing is clear. Section 280 was aimed at the tax shelter investor; it was not aimed at the bona fide writer or author.

Yet, that is not how the IRS has interpreted it. The IRS stated its position in a letter ruling on October 30.

A retired attorney had asked whether he can claim that his "trade or business" is writing. Expenses connected with a "trade or business" are deductible; those connected with a hobby are not.

The attorney had written a chapter in a law manual and he was in the process of writing an entire book. He had received an advance for the book from a publisher.

The IRS reviewed the facts. It concluded that the attorney was now a professional writer. But it added—

While expenses incurred in connection with your writing are deductible, these expenses are subject to the provisions of section 280(a) of the Code.

This disturbs me—for several reasons. First, the IRS has misconstrued the statute. A careful reading of the legislative history should persuade anyone that section 280 does not apply to writers and authors. Their expenses are not the sort of "production costs" that Congress had in mind.

Second, this is only sensible. Figuring out one's taxes is difficult enough without having to keep segregated accounts for each writing project. One tolerates a certain amount of complexity in our tax laws where it is needed to prevent tax avoidance. But to extend section 280 to bona fide writers is to require complicated rules for no good reason.

Third, writers should be treated in the same way as members of other professions. A lawyer need not capitalize his expenses with respect to each case. Think of the administrative nightmare. An individual whose trade or business is writing should not have to do so with respect to his articles or books.

My bill is easy to describe. I view it as a technical correction. It would state plainly that section 280 does not apply to the production costs that a writer or author incurs in the creation of his own works.

The measure would take effect retroactively to tax years beginning after December 31, 1975. That was the effective date of section 280.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 769

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 280 of the Internal Revenue Code of 1954 (relating to deductibility of certain expenditures incurred in production of films, books, records, or similar property) is amended by adding at the end thereof the following new subsection:

"(d) CERTAIN PRODUCTION COSTS OF AUTHORS EXCLUDED.—The provisions of this section shall not apply to amounts attributable to the production of a book, article or similar property to the extent such amounts are expenses incurred by the author of such property in the research for, or writing of, such book, article, or similar property.".

SEC. 2. (a) The amendments made by the first section of this Act shall take effect as if included in the amendment made by section 210(a) of the Tax Reform Act of 1976.

(b) Notwithstanding any other provision of law—

(1) the period for filing a claim for refund for any taxable year to which the amendment made by the first section of this Act applies shall, to the extent such claim for refund is attributable to such amendment, not expire before the date which is 1 year after the date of the enactment of this Act, and

(2) the period for assessing a deficiency with respect to any taxable year shall, to the extent such deficiency is attributable to a claim for refund filed as a result of the extension of any period under paragraph (1), not expire before the date which is 1 year after the date of the filing of the claim for refund.

By Mr. MOYNIHAN:

S. 770. A bill to amend the Energy Tax Act of 1978 with respect to the manufacturers excise tax on buses; to the Committee on Finance.

PROPOSED AMENDMENT TO ENERGY TAX ACT OF 1978

Mr. MOYNIHAN. Mr. President, the bill I am introducing today is an amendment to the Energy Tax Act of 1978.

The Energy Tax Act repealed the manufacturers excise tax on buses. Until 1978, buses were subject to a 10-percent tax; this tax was collected when the bus was sold by the manufacturer to the dealer or to the bus company that was going to use it. Generally speaking, the repeal applied only to buses sold after November 9, 1978.

But there were several special rules. And one of these explained what happens when a bus was actually purchased before November 9, but the buyer was still paying for it by installment and had not yet acquired title to the vehicle when the Energy Tax Act became law.

In that case, one was to assume that the tax was being paid ratably as part of each installment. And that part of the tax that was paid after November 9 was to be refunded to the manufacturer, on condition that he pass it along to the dealer or ultimate purchaser.

Congress wanted to encourage people to buy more buses or, for those who had already bought them, to keep paying the installments. The theory was that this would save fuel.

Unfortunately, the statute has a technical flaw. The following case is a good example.

Holland Industries, a bus company in New York City, purchased new buses direct from the MCI Corp., the manufacturer. However, immediately after Holland Industries bought the buses, MCI sold the installment contract to its subsidiary, the MCI Acceptance Corp. Both events took place before November 9, 1978.

By law—section 4216(d) of the Tax Code—the excise taxes immediately fell due, in full, when the installment contract was sold.

The 1978 Energy Tax Act, meanwhile, said that taxes associated with installment payments would be refunded only when they are "due and payable" after November 9, 1978. And these taxes were not, even though Holland Industries continued to pay installments that were partly for the buses, partly for interest, and partly for taxes. MCI Corp. could not get a refund. And as a result, it had nothing to pass through to Holland Industries.

This is not what Congress intended. MCI Corp. merely transferred the installment contract on its books to a subsidiary. In the process, Holland Industries lost its refund. We simply did not foresee this sort of technical problem.

The bill I am introducing today would rewrite subsection 231(g) of the Energy Tax Act. My purpose is to make that subsection easier to understand. The only substantive change I would make is the addition of a sentence at the end:

Finally, that portion of the tax that is computed on payments made after November 9, 1978 shall be considered "due and payable" after that date, even though the installment account, on which the payments are made, was sold or otherwise disposed of on or before that date.

This would give the MCI Corp. a refund for the excise taxes that were computed on installment payments the company received after November 9, 1978. However, this refund would have to be passed along to Holland Industries and to MCI's other customers.

If the bill passes, an injustice will have been undone. Mr. President, I ask unanimous consent that the complete text of it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 770

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 231(g) of the Energy Tax Act of 1978 (relating to the effective date for removal of the excise tax on buses) is amended by striking paragraph (3) and inserting in lieu thereof the following new paragraph:

"(3) In the case of—

"(A) a lease,

"(B) a contract for the sale of an article providing that the price shall be paid by installments and title to the article sold does not pass until a future date notwithstanding partial payment by installments,

"(C) a conditional sale, or

"(D) a chattel mortgage arrangement providing that the sale price shall be paid in installments,

entered into on or before November 9, 1978, payments made after that date shall be considered payments made for an article sold after that date, if the lessor or vendor establishes that the post-November 9 payments have been reduced in amount by the share of the tax that is due or payable after November 9, 1978. If the lessor or vendor does not establish that the payments have been reduced, then the payments shall be treated as if made for an article sold on or before November 9, 1978. Finally, that portion of the tax that is computed on payments made after November 9, 1978, shall be considered 'due and payable' after that date, even

though the installment account, on which the payments are made, was sold or otherwise disposed of on or before that date."

(b) The amendment made by this Act shall apply to payments (and the taxes computed thereon) made after November 9, 1978.

By Mr. THURMOND (for himself and Mr. HART) (by request):

S. 774. A bill to authorize appropriations for construction at certain military installations for fiscal year 1981, and for other purposes; to the Committee on Armed Services.

SUPPLEMENTAL MILITARY CONSTRUCTION AUTHORIZATION ACT, 1981

Mr. THURMOND. Mr. President, by request, for myself and the senior Senator from Colorado (Mr. HART), I introduce for appropriate reference, a bill to authorize appropriations for construction at certain military installations for fiscal year 1981, and for other purposes.

I ask unanimous consent that a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD immediately following the listing of the bill.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 774

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Supplemental Military Construction Authorization Act, 1981."

(a) The following amount is authorized in addition to the amounts specified for the public works projects authorized by Title I of the Military Construction Act, 1981 (Public Law 96-418, 94 Stat. 1561):

UNITED STATES ARMY, EUROPE

Various locations, $1,800,000.

(b) There is authorized to be appropriated for the purpose of this section an amount not to exceed $1,800,000.

SEC. 2. (a). The following amount is authorized in addition to the amounts specified for the public works projects authorized by Title II of the Military Construction Authorization Act, 1981, (Public Law 96-418, 94 Stat. 1752):

UNITED STATES MARINE CORPS

Marine Corps Air Station, El Toro, California, $2,000,000.

(b) There is authorized to be appropriated for the purpose of this section an amount not to exceed $2,000,000.

SEC. 3. (a) The following amounts are authorized in addition to the amounts specified for public works projects authorized by Title III of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1757):

AIR TRAINING COMMAND

Laughlin Air Force Base, Texas, $4,700,000.

STRATEGIC AIR COMMAND

K. I. Sawyer Air Force Base, Michigan, $540,000.

SPECIAL PROJECT

Various locations, Special Project, $50,000,000.

(b) The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $860,000 in addition to the amount specified for minor construction projects by section 303 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1759).

(c) There is authorized to be appropriated for the purposes of subsection (a) an amount not to exceed $55,240,000.

SEC. 4. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $900,000 in addition to the amount specified for minor construction projects by section 403 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1761).

SEC. 5. In addition to the funds authorized to be appropriated by section 510(a)(2) of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1767), there is hereby authorized to be appropriated for use by the Secretary of Defense, or the Secretary's designee, an amount not to exceed $16,022,000, authorized by law for suppport of military family housing, including operating expenses, leasing maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act (12 U.S.C. § 1715).

SEC. 6. The Secretary of Defense may establish or develop facilities for Air National Guard of the United States in an amount not to exceed $6,500,000 in addition to the amount specified in section 701(3)(A) of the Military Construction Authorization Act, 1931 (Public Law 96-418, 94 Stat. 1774).

SEC. 7. Authorizations contained in this Act shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1749), in the same manner as if such authorizations had been included in that Act. For the purposes of the limitations set forth in section 603 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1768), the amounts authorized to be appropriated, by title, in that Act shall be deemed to be increased by the additional amounts authorized to be appropriated by this Act.

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE,
Washington, D.C., March 19, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation to authorize supplemental appropriations for military construction for Fiscal Year 1981. The additional construction is required to increase readiness, to improve our ability to recruit and retain personnel, and to modernize military facilities. The Office of Management and Budget has advised that the enactment of this bill would be in accordance with the program of the President.

This bill would authorize an additional $67,300,000 for military construction needs, of which $1,800,000 is for the Department of the Army, $2,000,000 for the Department of the Navy, $56,100,000 for the Department of the Air Force, $900,000 for the Defense Agencies, and $6,500,000 for the Air National Guard. In addition, this bill would authorize $16,022,000 for essential operations and maintenance of the military family housing inventory.

Your support of this supplemental military construction requirement is requested.

Sincerely,

L. NIEDERLEHNER,
Acting.

By Mr. SCHMITT:

S.J. Res. 52. Joint resolution to authorize and request the President to designate July 4, 1981, as "Honor Our Vietnam Veterans Day"; to the Committee on the Judiciary.

HONOR OUR VIETNAM VETERANS DAY

● Mr. SCHMITT. Mr. President, in 1921 an American soldier—his name "known but to God"—was buried in Arlington National Cemetery on a site overlooking the Potomac River. Burial of this unknown World War I soldier was in recognition of the high esteem which the people of this Nation held for all of the American men and women who answered the call of their country. Similar ceremonies took place after World War II and the Korean War.

This Nation was built by the continuing sacrifice of brave men and women, from the Revolution through the Vietnam era, who responded to the call for service to this Nation.

Some years ago this Nation ended America's direct involvement in the Southeast Asian conflict. More than 2½ million veterans served in Vietnam and another 6 million served elsewhere during those years. Many made enormous personal sacrifices and many suffered injuries that will disable them for the rest of their lives. In all, 57,414 Americans died in Southeast Asia. All these brave men and women deserve our utmost respect and admiration for their service to this country.

Veterans' Day is one way Americans demonstrate their respect for those men and women who have endured hardship and sacrifice in serving this country so ably. However, it has painfully been called to our attention that the returning Vietnam veteran was not accorded the honors and recognition for his or her service in a manner similar to that given to previous military service personnel. On every Veterans' Day we reflect on the past and celebrate the hopes and promises of the future. We are reminded that no one abhors war more than those who have been called to fight, and that none have a greater right to enjoy the freedoms and benefits of American citizenship than those individuals who have taken up their country's arms.

We are at peace today. Our gratitude for that blessing is owed in part to those veterans who have served in the past to make peace accessible.

In keeping with our national tradition of honoring those brave citizens who served their country, I am introducing today a joint resolution authorizing and requesting the President to designate July 4 of this year as "Honor Our Vietnam Veterans Day."

A law passed in 1973 provides for the interment of an unknown American who lost his or her life in Southeast Asia during the Vietnam era. I feel it would be particularly fitting to carry out this special recognization, if possible, on July 4 of this year.

Admittedly, Vietnam was an unpopular war which created sharp divisions among many of our people, but the GI who served in Vietnam has the right to hold his head just as high as any serviceman who answered the call of this great Nation. This special day of recognization is a long overdue acknowledgement by the American people of the sacrifice and service of the Vietnam veteran.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 52

Whereas the people of the United States have a long-standing commitment to honor and care for individuals who have borne arms in defense of their country;

Whereas during the period of the Vietnam conflict 8,500,000 individuals served in military service, and 2,800,000 of those individuals served in the Vietnam theater;

Whereas the 2,800,000 individuals who served in the Vietnam theater honorably performed their duty to their country in a long and divisive conflict;

Whereas the veterans of the Vietnam conflict were not accorded the same recognition that has been accorded to veterans of earlier wars;

Whereas although the Vietnam conflict has become part of history for most Americans, some veterans continue to bear the physical, emotional, and psychological scars of that conflict; and

Whereas it is appropriate to honor the patriotism and sacrifice of all the individuals who faithfully and honorably served their country during the Vietnam conflict: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating July 4, 1981, as "Honor Our Vietnam Veterans Day" and to call upon Federal, State, and local government agencies, and the people of the United States to demonstrate with appropriate programs, ceremonies, and activities the appreciation of the American people for the men and women who honorably served their country in the Vietnam conflict.●

By Mrs. KASSEBAUM:

S.J. Res. 53. Joint resolution to provide for the designation of September 6, 1981, as "Working Mother's Day"; to the Committee on the Judiciary.

WORKING MOTHER'S DAY

Mrs. KASSEBAUM. Mr. President, today I am introducing a joint resolution to designate the Sunday before Labor Day as "Working Mother's Day." I am pleased to join Representative CARDISS COLLINS in this effort to provide special recognition to the millions of American women who are serving double duty as homemakers and as participants in the paid labor force.

For a number of reasons, female participation in employment outside the home has undergone dramatic and steady increases in the recent past. By all indications, this trend will continue. Last year, 56.6 percent of all mothers with children under age 18 worked in paid employment. Although most working mothers are married, it is significant to note that approximately 20 percent of all working mothers are household heads. In fact, it comes as no surprise that mothers in one-parent families have a much higher rate of labor force participation—67 percent—than those in two-parent families.

As women move into the work force, they continue to assume primary responsibility for child rearing. The demands on the time and energy of these women are tremendous. Making the adjustments necessary to establish an appropriate balance between home and work responsibilities is a constant struggle. To the extent that these women are able to operate in a supportive environment, their ability to successfully cope with their multiple roles is substantially enhanced.

It is appropriate that we recognize the unique contributions made by working mothers to both the growth of the economy and the strength of the American family. I see "Working Mothers Day" as an excellent opportunity to show our appreciation to these dedicated women and invite my colleagues to join me in extending this expression of thanks.

Mr. President, I ask unanimous consent that the text of my joint resolution be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S.J. RES. 53

Whereas more than sixteen million American women are employed outside the home and have children under the age of eighteen;

Whereas these working mothers are making unique and substantial contributions, to both the growth of the economy and the strength of the American family; and

Whereas working mothers deserve special recognition for fulfilling their exceptional responsibilities in the home and in the world of commerce: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating September 6, 1981, as "Working Mothers' Day," and calling upon families, individual citizens, labor and civic organizations, the media, and the business community to acknowledge the importance of the working mother and to express appreciation of her role in American society.

By Mr. HEINZ (for himself, Mr. NUNN, Mr. DURENBERGER, Mr. GOLDWATER, Mr. BOSCHWITZ, and Mr. JEPSEN):

S.J. Res. 54. Joint resolution proposing an amendment to the Constitution to protect the people of the United States against excessive governmental burdens and unsound fiscal and monetary policies by limiting total outlays of the Government; to the Committee on the Judiciary.

PROPOSED CONSTITUTIONAL AMENDMENT TO LIMIT FEDERAL SPENDING

Mr. HEINZ. Mr. President, because of a drafting error not picked up in final proofreading, I am today reintroducing in modified form the Heinz-Nunn constitutional amendment limiting Federal spending. I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 54

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE

"SECTION 1. (a) Total outlays of the Government of the United States during any fiscal year shall not rise more than the rate of increase in gross national product in the last calendar year that ended before such fiscal year.

"(b) For purposes of subsection (a), total outlays includes both budget and off-budget outlays, but does not include redemptions of the public debt or emergency outlays authorized under section 3 of this article.

"SEC. 2. When, for any fiscal year, total revenues received by the Government of the United States exceed total outlays, the surplus shall be used to reduce the public debt of the United States until such debt is eliminated.

"SEC. 3. Following declaration of an emergency by the President, the Congress may authorize, by a two-thirds vote of both Houses of Congress, a specified amount of emergency outlays in excess of the limit prescribed by section 1 for the current fiscal year.

"SEC. 4. The limit on total outlays prescribed by section 1 may be changed by a specified amount by a three-quarters vote of both Houses of Congress. The change shall become effective for the fiscal year following approval.

"SEC. 5. The Congress may not by law require or authorize any agency of the Government of the United States to require, directly or indirectly that State or local governments engage in additional or expanded activities without compensation equal to the necessary additional costs."

ADDITIONAL COSPONSORS

S. 267

At the request of Mr. DECONCINI, the Senator from New Jersey (Mr. WILLIAMS), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 294

At the request of Mr. GLENN, the Senator from Georgia (Mr. NUNN), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 294, a bill to establish an Interagency Committee on Arson Control to coordinate Federal antiarson programs, to amend certain provisions of the law relating to programs for arson investigation, prevention, and detection, and for other purposes.

S. 574

At the request of Mrs. KASSEBAUM, the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 574, a bill to amend the Internal Revenue Code of 1954 to allow the estate of a decedent a deduction for certain bequests of interests in property used in farms or other trades or businesses, and for other purposes.

S. 732

At the request of Mr. NUNN, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 732, a bill to insure the confidentiality of information filed by individual taxpayers with the Internal Revenue Service pursuant to the Internal Revenue Code and, at the same time, to insure the effective enforcement of Federal and State criminal laws and the effective administration of justice.

SENATE JOINT RESOLUTION 38

At the request of Mrs. KASSEBAUM, the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of Senate Joint

Resolution 38, a joint resolution to provide for designation of the first Friday of March as "Teacher Day, United States of America."

SENATE CONCURRENT RESOLUTION 10

At the request of Mr. HATFIELD, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of Senate Concurrent Resolution 10, a concurrent resolution expressing the sense of the Congress concerning the continuing permanent conversion of productive agricultural lands to nonagricultural uses.

SENATE RESOLUTION 44

At the request of Mr. MOYNIHAN, the Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. JEPSEN), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of Senate Resolution 44, a resolution relating to the convening of an international conference to amend certain international agreements concerning the privileges and immunities of diplomatic and consular agents.

AMENDMENT NO. 8

At the request of Mr. RIEGLE, his name was added as a cosponsor of amendment No. 8 proposed to S. 509, a bill to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

AMENDMENTS SUBMITTED FOR PRINTING

DELETION OF REQUIREMENT THAT SUPPORT PRICE OF MILK BE ADJUSTED SEMIANNUALLY

AMENDMENT NO. 13

(Ordered to be printed.)

Mr. BOREN proposed an amendment to the bill (S. 509) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

NOTICES OF HEARINGS

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, on March 17 I announced a hearing before the Energy Conservation and Supply Subcommittee. At this time, I would like to reschedule the hearing at 9 a.m. rather than 9:30 a.m. as previously announced. The hearing will be held on April 6, 1981, in room 3100 of the Dirksen Senate Office Building.

SUBCOMMITTEE ON JUVENILE JUSTICE

Mr. SPECTER. Mr. President, the Subcommittee on Juvenile Justice of the Committee on the Judiciary will hold a hearing on April 1, 1981, at 9 a.m. in room 2228 Dirksen Senate Office Building to discuss the proposed phaseout of the Office of Juvenile Justice and Delinquency Prevention of the U.S. Department of Justice.

Persons wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on the Judiciary, Subcommittee on Juvenile Justice, room 253 Russell Senate Office Building, Washington, D.C. 20510. For further information regarding the hearing, please contact Jonathan Levin at 224–4254.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON SMALL BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Small Business be authorized to meet today until 12:30 p.m. to consider the nomination of Michael Cardenas to be the Administrator of Small Business Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources, Subcommittee on Energy Research and Development, be allowed to meet today as scheduled while the Senate is in session to hold a hearing on the Department of Energy's fiscal year 1982 authorization request.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate today to hear testimony from witnesses regarding the 1981 farm bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE EXPORT TRADING COMPANY ACT OF 1981

● Mr. HEINZ. Mr. President, on Thursday, March 12, the Committee on Banking, Housing, and Urban Affairs marked up S. 144, the Export Trading Company Act of 1981, and ordered reported an original bill embodying the amendments to S. 144 approved by the committee. The committee report, along with the original bill, S. 734, were filed March 18.

In its markup, the committee did not change the basic provisions of S. 144. but it did adopt 24 amendments, most of them technical, a few of which make substantive changes in particular parts of the bill. For those who have been following this legislation closely, I would like to list briefly the more substantive changes in S. 144 made by the committee.

First. The committee reduced the amount of money authorized in section 106 of the bill for EDA and SBA loans and loan guarantees from $20 million per year to $10 million per year for 5 years.

Second. The committee added a new section 108, proposed by Senator RIEGLE, creating a program which would help small businesses not previously significantly involved in exporting hire an export manager by providing for Federal payment of half the manager's salary for the first year. The cost of this amendment is $2 million per year for 3 years. It is the same amendment which the Senate adopted on the floor last year in its consideration of S. 2718, the predecessor of S. 144.

Third. The committee adopted two amendments initially proposed by Senator CHAFEE which would: (a) Permit a trading company to have the same name as its banking organization investor if the latter owns a majority of the stock of the trading company; and (b) provide the bank regulatory agencies greater flexibility in dealing with violations of section 105(c)(3) of the bill relating to taking positions in commodities, securities or foreign exchange. Both these amendments were recommended by the Comptroller of the Currency.

Fourth. With respect to title II of the bill, the antitrust provisions the committee agreed to an amendment which would permit existing Webb-Pomerene Associations to continue to operate under current law if they so chose rather than being forced to seek certification under the new system created by this bill. Such associations, of course, would also retain the option of seeking certification under the same standards and procedures applicable to everyone else.

The other amendments, Mr. President, were technical in nature, correcting typographical or reference errors or making other minor changes in language, in most cases at the reqeust of the administration. So that all these changes are clear to everyone concerned, Mr. President, I shall ask that the complete text of S. 734, the original bill reported by the Banking Committee, be printed in the RECORD at the conclusion of my remarks.

Reporting this bill represents another important step in our progress toward enacting this legislation and thereby giving American businesses interested in exporting another set of tools to use to successfully market and sell abroad. The committee held 3 days of hearings on this bill this year, in addition to the many days held in 1979 and 1980, and I anticipate that the printed record of the 1981 hearings will be available to Senators and the public shortly. I am also pleased to see that the House is also moving forward with this legislation, the House Judiciary Committee having scheduled hearings on it and other related measures for March 26. The next step should be Senate floor action, which I hope will come soon.

The bill follows:

S. 734

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EXPORT TRADING COMPANIES

SHORT TITLE

SEC. 101. This title may be cited as the "Export Trading Company Act of 1981".

FINDINGS

SEC. 102. (a) The Congress finds and declares that—

(1) tens of thousands of American companies produce exportable goods or services but do not engage in exporting;

(2) although the United States is the

world's leading agricultural exporting nation, many farm products are not marketed as widely and effectively abroad as they could be through producer-owned export trading companies;

(3) exporting requires extensive specialized knowledge and skills and entails additional, unfamiliar risks which present costs for which smaller producers cannot realize economies of scale;

(4) export trade intermediaries, such as trading companies, can achieve economies of scale and acquire expertise enabling them to export goods and services profitably, at low per unit cost to producers;

(5) the United States lacks well-developed export trade intermediaries to package export trade services at reasonable prices (exporting services are fragmented into a multitude of separate functions; companies attempting to offer comprehensive export trade services lack financial leverage to reach a significant portion of potential United States exporters);

(6) State and local government activities which initiate, facilitate, or expand export of products and services are an important and irreplaceable source for expansion of total United States exports, as well as for experimentation in the development of innovative export programs keyed to local, State, and regional economic needs;

(7) the development of export trading companies in the United States has been hampered by insular business attitudes and by Government regulations; and

(8) if United States export trading companies are to be successful in promoting United States exports and in competing with foreign trading companies, they must be able to draw on the resources, expertise, and knowledge of the United States banking system, both in the United States and abroad.

(b) The purpose of this Act is to increase United States exports of products and services, particularly by small, medium-size, and minority concerns, by encouraging more efficient provision of export trade services to American producers and suppliers.

DEFINITIONS

SEC. 103. (a) As used in this Act—

(1) the term "export trade" means trade or commerce in goods produced in the United States or services produced in the United States, and exported, or in the course of being exported, from the United States to any foreign nation;

(2) the term "goods produced in the United States" means tangible property manufactured, produced, grown, or extracted in the United States, the cost of the imported raw materials and components thereof shall not exceed 50 per centum of the sales price;

(3) the term "services produced in the United States" includes, but is not limited to accounting, amusement, architectural, automatic data processing, business, communications, construction franchising and licensing, consulting, engineering financial, insurance, legal, management, repair, tourism, training, and transportation services, not less than 50 per centum of the sales or billings of which is provided by United States citizens or is otherwise attributable to the United States;

(4) the term "export trade services" includes, but is not limited to, consulting, international market research, advertising, marketing, insurance, product research and design, legal assistance, transportation, including trade documentation and freight forwarding, communication and processing of foreign orders to and for exporters and foreign purchasers, warehousing, foreign exchange, and financing, when provided in order to facilitate the export of goods or services produced in the United States;

(5) the term "export trading company" means a company, whether operated for profit or as a nonprofit organization, which does business under the laws of the United States or any State and which is organized and operated principally for the purposes of—

(A) exporting goods and services produced in the United States; and

(B) facilitating the exportation of goods and services produced in the United States by unaffiliated persons by providing one or more export trade services;

(6) the term "United States" means the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands;

(7) the term "Secretary" means the Secretary of Commerce; and

(8) the term "company" means any corporation, partnership, association, or similar organization, whether operated for profit or as a nonprofit organization.

(b) The Secretary is authorized, by regulation, to further define such terms consistent with this section.

FUNCTIONS OF THE SECRETARY OF COMMERCE

SEC. 104. The Secretary shall promote and encourage the formation and operation of export trading companies by providing information and advice to interested persons and by facilitating contact between producers of exportable goods and services and firms offering export trade services.

OWNERSHIP OF EXPORT TRADING COMPANIES BY BANKS, BANK HOLDING COMPANIES, AND INTERNATIONAL BANKING CORPORATIONS

SEC. 105. (a) For the purpose of this section—

(1) the term "banking organization" means any State bank, national bank, Federal savings bank, bankers' bank, bank holding company, Edge Act Corporation, or Agreement Corporation;

(2) the term "State bank" means any bank or bankers' bank which is incorporated under the laws of any State, any territory of the United States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Virgin Islands;

(3) the term "State member bank" means any State bank which is a member of the Federal Reserve System;

(4) the term "State nonmember insured bank" means any State bank which is not a member of the Federal Reserve System, but the deposits of which are insured by the Federal Deposit Insurance Corporation;

(5) the term "bankers' bank" means any bank insured by the Federal Deposit Insurance Corporation if the stock of such bank is owned exclusively by other banks (except to the extent directors' qualifying shares are required by law) and if such bank is engaged exclusively in providing banking services for other banks and their officers, directors, or employees;

(6) the term "bank holding company" has the same meaning as in the Bank Holding Act of 1956;

(7) the term "Edge Act Corporation" means a Corporation organized under section 25(a) of the Federal Reserve Act;

(8) the term "Agreement Corporation" means a corporation operating subject to section 25 of the Federal Reserve Act;

(9) the term "appropriate Federal banking agency" means—

(A) the Comptroller of the Currency with respect to a national bank or any bank located in the District of Columbia;

(B) the Board of Governors of the Federal Reserve System with respect to a State member bank, bank holding company, Edge Act Corporation, or Agreement Corporation;

(C) the Federal Deposit Insurance Corporation with respect to a State nonmember insured bank; and

(D) the Federal Home Loan Bank Board with respect to a Federal saving bank.

In any situation where the banking organization holding or making an investment in an export trading company is a subsidiary of another banking organization which is subject to the jurisdiction of another agency, and come from of agency approval or notification is required, such approval or notification need only be obtained from or made to, as the case may be, the appropriate Federal banking agency for the banking organization making or holding the investment in the export trading company;

(10) the term "capital and surplus" shall be defined by the appropriate Federal banking agency;

(11) an "affiliate" of a banking organization has the same meaning as an "affiliate" of a member bank under section 2 of the Banking Act of 1933, and, with respect to a bank holding company, includes any bank or other subsidiary of such company, the term "subsidiary" has the same meaning as in section 2 of the Bank Holding Company Act of 1956;

(12) the terms "control" and "subsidiary" shall have the same meanings assigned to those terms in section 2 of the Bank Holding Company Act of 1956, and the terms "controlled" and "controlling" shall be construed consistently with the term "controlled" as defined in section 2 of the Bank Holding Company Act of 1956, except that for purpose of the Export Trading Company Act of 1981, the determination of control as provided in section 2(a)(2) of the Bank Holding Company Act of 1956 shall be made by the appropriate Federal banking agency; and

(13) for the purposes of this section, the term "export trading company" means a company which does business under the laws of the United States or any State and which is exclusively engaged in activities related to international trade, whether operated for profit or as a nonprofit organization: *Provided, however,* That any such company must also either meet the definition of export trading company in section 103(a)(5) of this Act, or be organized and operated principally for the purpose of providing export trade services, as defined in section 103(a)(4) of this Act: *Provided further,* That any such company, for purposes of this section, (A) may engage in or hold shares of a company engaged in the business of underwriting, selling, or distributing securities in the United States only to the extent that its banking organization investor may do so under applicable Federal and State banking law and regulations, and, (B) may not engage in manufacturing or agricultural production activities.

(b)(1) Notwithstanding any prohibition, restriction, limitation, condition, or requirement of any law applicable only to banking organizations, a banking organization, subject to the limitations of subsection (c) and the procedures of this subsection, may invest directly and indirectly in the aggregate, up to 5 per centum of its consolidated capital and surplus (25 per centum in the case of an Edge Act Corporation or Agreement Corporation not engaged in banking) in the voting stock or other evidences of ownership of one or more export trading companies. A banking organization may—

(A) invest up to an aggregate amount of $10,000,000 in one or more export trading companies without the prior approval of the appropriate Federal banking agency, if such investment does not cause an export trading company to become a subsidiary of the investing banking organization; and

(B) make investments in excess of an aggregate amount of $10,000,000 in one or more export trading companies, or make any investment or take any other action which causes an export trading company to become a subsidiary of the investing banking orga-

nization or which will cause more than 50 per centum of the voting stock of an export trading company to be owned or controlled by banking organizations, only with the prior approval of the appropriate Federal banking agency.

Any banking organization which makes an investment under authority of clause (A) of the preceding sentence shall promptly notify the appropriate Federal banking agency of such investment and shall file such reports on such investment as such agency may require. If, after receipt of any such notification, the appropriate Federal banking agency determines, after notice and opportunity for hearing, that the export trading company is a subsidiary of the investing banking organization, it shall have authority to disapprove the investment or impose conditions on such investment under authority of subsection (d). In furtherance of such authority, the appropriate Federal banking agency may require divestiture of any voting stock or other evidences of ownership previously acquired, and may impose conditions necessary for the termination of any controlling relationship.

(2) If a banking organization proposes to make any investment or engage in any activity included within the following two subparagraphs, it must give the appropriate Federal banking agency ninety days prior written notice before it makes such investment or engages in such activity.

(A) any additional investment in an export trading company subsidiary; or

(B) the engagement by any export trading company subsidiary in any line of activity, including specifically the taking of title to goods, wares, merchandise, or commodities, if such activity was not disclosed in any prior application for approval.

During the notification period provided under this paragraph, the appropriate Federal banking agency may, by written notice, disapprove the proposed investment or activity or impose conditions on such investment or activity under authority of subsection (d). An additional investment or activity covered by this paragraph may be made or engaged in, as the case may be, prior to the expiration of the notification period if the appropriate Federal banking agency issues written notice of its intent not to disapprove.

(3) In the event of the failure of the appropriate Federal banking agency to act on any application for approval under paragraph (1)(B) of this subsection within a period of one hundred and twenty days, which period begins on the date the application has been accepted for processing by the appropriate Federal banking agency, the application shall be deemed to have been granted. In the event of the failure of the appropriate Federal banking agency either to disapprove or to impose conditions on any investment or activity subject to the prior notification requirements of paragraph (2) of this subsection within the ninety-day period provided therein, such period beginning on the date the notification has been received by the appropriate Federal banking agency, such investment or activity may be made or engaged in, as the case may be, any time after the expiration of such period.

(c) The following limitations apply to export trading companies and the investments in such companies by banking organizations.

(1) The name of any export trading company shall not be similar in any respect to to that of a banking organization that owns any of its voting stock or other evidence of ownership except where a majority of the outstanding voting stock or other evidences of ownership of the company is owned or controlled by such banking organization.

(2) The total historical cost of the direct and indirect investments by a banking organization in an export trading company combined with extensions of credit by the banking organization and its direct and indirect subsidiaries to such export trading company shall not exceed 10 per centum of the banking organization's capital and surplus.

(3) A banking organization that owns any voting stock or other evidences of ownership of an export trading company may be required, by the appropriate Federal banking agency, to terminate its ownership or shall be subject to limitations or conditions which may be imposed by such agency, if the agency determines that the company has taken positions in commodities or commodities contracts, in securities, or in foreign exchange, other than as may be necessary in the course of its business operations.

(4) No banking organization holding voting stock or other evidences of ownership of any export trading company may extend credit or cause any affiliate to extend credit to any export trading company or to customers of such company on terms more favorable than those afforded similar borrowers in similar circumstances, and such extension of credit shall not involve more than the normal risk of repayment or present other unfavorable features.

(d)(1) In the case of every application under subsection (b)(1)(B) of this section, the appropriate Federal backing agency shall take into consideration the financial and managerial resources, competitive situation, and future prospects of the banking organization and export trading company concerned, and the benefits of the proposal to United States business, industrial, and agricultural concerns (with special emphasis on small, medium-size and minority concerns), and to improving United States competitiveness in world markets. The appropriate Federal banking agency may not approve any investment for which an application has been filed under subsection (b)(1)(B) if it finds that the export benefits of such proposal are outweighed in the public interest by any adverse financial, managerial, competitive, or other banking factors associated with the particular investment. Any disapproval order issued under this section must contain a statement of the reasons for disapproval.

(2) In approving any application submitted under subsection (b)(1)(B), the appropriate Federal banking agency may impose such conditions which, under the circumstances of such case, it may deem necessary (A) to limit a banking organization's financial exposure to an export trading company, or (B) to prevent possible conflicts of interest or unsafe or unsound banking practices. With respect to the taking of title to goods, wares, merchandise, or commodities by any export trading company subsidiary of a banking organization, the appropriate Federal banking agencies may, by order, regulation, or guidelines, establish standards designed to ensure against any unsafe or unsound practices that could adversely affect a controlling banking organization investor. In particular, the appropriate Federal banking agencies may establish inventory-to-capital ratios, based on the capital of the export trading company subsidiary, for those circumstances in which the export trading company subsidiary may bear a market risk on inventory held.

(3) In determining whether to impose any condition under the preceding paragraph (2), or in imposing such condition, the appropriate Federal banking agency must give due consideration to the size of the banking organization and export trading company involved, the degree of investment and other support to be provided by the banking organization to the export trading company, and the identity, character, and financial strength of any other investors in the export trading company. The appropriate Federal banking agency shall not impose any conditions or set standards for the taking of title which unnecessarily disadvantage, restrict, or limit export trading companies in competing in world markets or in achieving the purposes of section 102 of this Act. In particular, in setting standards for the taking of title under the preceding paragraph (2), the appropriate Federal banking agencies shall give special weight to the need to take title in certain kinds of trade transactions, such as international barter transactions.

(4) Notwithstanding any other provision of this Act, the appropriate Federal banking agency may, whenever it has reasonable cause to believe that the ownership or control of any investment in any export trading company constitutes a serious risk to the financial safety, soundness, or stability of the banking organization and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the banking organization, after due notice and opportunity for hearing, to terminate (within one hundred and twenty days or such longer period as the appropriate Federal banking agency may direct in unusual circumstances) its investment in the export trading company.

(5) On or before two years after enactment of this Act, the appropriate Federal banking agencies shall jointly report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives their recommendations with respect to the implementation of this section, their recommendations on any changes in United States law to facilitate the financing of United States exports, especially by small, medium-size, and minority business concerns, and their recommendations on the effects of ownership of United States banks by foreign banking organizations affiliated with trading companies doing business in the United States.

(6) The appropriate Federal banking agency may, by regulation or order, exempt from the collateral requirements of section 23A of the Federal Reserve Act any loan or extension of credit made by a national or State bank to an export trading company affiliate if the agency determines such exemption is necessary to finance the operating expenses of an affiliated export trading company and does not expose the bank to undue financial risks. This paragraph does not apply to bank affiliates currently exempt from the requirements of section 23A.

(e)(1) Any party aggrieved by an order of an appropriate Federal banking agency under this section may obtain a review of such order in the United States court of appeals within any circuit wherein such organization has its principal place of business, or in the court of appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the appropriate Federal banking agency. The appropriate Federal banking agency shall promptly certify and file in such court the record upon which the order was based. The court shall set aside any order found to be (A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law; (B) contrary to constitutional right, power, privilege or immunity; (C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right; or (D) without observance of procedure required by law.

(2) Except for violations of subsection (b)(3) of this section, the court shall remand for further consideration by the appropriate Federal banking agency any order set aside solely for procedural errors and may remand for further consideration by the appropriate Federal banking agency any order set aside for substantive errors. Upon remand, the appropriate Federal banking agency shall have no more than sixty days from date of issuance of the court's order

to cure any procedural error or reconsider its prior order. If the agency fails to act within this period, the application or other matter subject to review shall be deemed to have been granted as a matter of law.

(f)(1) The appropriate Federal banking agencies are authorized and empowered to issue such rules, regulations, and orders, to require such reports, to delegate such functions, and to conduct such examinations of subsidiary export trading companies, as each of them may deem necessary in oder to perform their respective duties and functions under this section and to administer and carry out the provisions and purposes of this section and prevent evasions thereof.

(2) In addition to any powers, remedies, or sanctions otherwise provided by law, compliance with the requirements imposed under this section may be enforced under section 8 of the Federal Deposit Insurance Act by any appropriate Federal banking agency defined in that Act.

(g) Nothing in this section shall at any time prevent any State from adopting a law prohibiting banks chartered under the laws of such State from investing in export trading companies or applying conditions, limitations, or restrictions on investments by banks chartered under the laws of such State in export trading companies in addition to any conditions, limitations, or restrictions provided under this section.

INITIAL INVESTMENTS AND OPERATING EXPENSES

SEC. 106. (a) The Economic Development Administration and the Small Business Administration are directed, in their consideration of applications by export trading companies for loans and guarantees, and operating grants to nonprofit organizations, including applications to make new investments related to the export of goods or services produced in the United States and to meet operating expenses, to give special weight to export-related benefits, including opening new markets for United States goods and services abroad and encouraging the involvement of small, medium-size and minority business or agricultural concerns in the export market.

(b) There are authorized to be appropriated as necessary to meet the purposes of this section $10,000,000 for each of the fiscal years 1982, 1983, 1984, 1985, and 1986. Amounts appropriated pursuant to the authority of this subsection shall be in addition to amounts appropriated under the authority of other Acts.

GUARANTEES FOR EXPORT ACCOUNTS RECEIVABLE AND INVENTORY

SEC. 107. The Export-Import Bank of the United States is authorized and directed to establish a program to provide guarantees for loans extended by financial institutions or other private creditors to export trading companies as defined in section 103(5) of this Act, or to other exporters, when such loans are secured by export accounts receivable or inventories of exportable goods, and when in the judgment of the Board of Directors—

(1) the private credit market is not providing adequate financing to enable otherwise creditworthy export trading companies or exporters to consummate export transactions; and

(2) such guarantees would facilitate expansion of exports which would not otherwise occur.

The Board of Directors shall attempt to insure that a major share of any loan guarantees ultimately serves to promote exports from small, medium-size and minority businesses or agricultural concerns. Guarantees provided under the authority of this section shall be subject to limitations contained in annual appropriations Acts.

ASSISTANCE FOR SMALL BUSINESS EXPORT MANAGEMENT

SEC. 108. (a) The Secretary is authorized to make grants to subsidize the employment of export managers by small business manufacturing firms which have not previously been exporters in substantial amounts. The amount of such a grant may not exceed the lesser of (1) 50 per centum of the salary and other expenses related to the employment of a full-time export manager for a period of one year, or (2) $40,000.

(b) To be eligible under this section, each firm must submit to the Secretary an application which—

(1) demonstrates that the firm has not derived more than an average of five per centum of its sales volume (in monetary terms) from exports during the 5 most recent years and does not currently employ an export manager;

(2) demonstrates that the firm is a small business manufacturing firm, as defined by the Secretary after consulting with the Administrator of the Small Business Administration;

(3) describes the qualification of a person proposed to be hired as the firm's export manager on a full-time basis for a period of at least one year, and describes the terms and conditions of that person's employment by the firm and the amount of the grant applied for to subsidize the costs of that employment; and

(4) describes the products and services considered by the firm to be suitable for export and the general outlines of the export program to be undertaken under the direction of the export manager.

(c) In selecting firms to receive grants under this section, the Secretary shall consider the desirability of determining the feasibility of this approach to export promotion in each of the regions of the Department of Commerce and in relation to a variety of products and services which, in the opinion of the Secretary, have export potential.

(d) There are authorized to be appropriated to the Secretary not to exceed $2,000,000 for each of the fiscal years 1982, 1983, and 1984, to carry out the program established by this section.

(e) The Secretary shall develop a plan to evaluate the cost-effectiveness of the program of export promotion established by this section and its effectiveness as compared with other export promotion programs, including the amount of export sales generated by small businesses assisted under this section. For the purpose of the evaluation the Secretary is authorized to require any firm receiving assistance under this section to furnish such information as is deemed appropriate to complete the required evaluation. The Secretary shall make recommendations concerning continuation or expansion of the program and improvements in the program structure. Such evaluation and recommendations shall be submitted to the Congress prior to October 1, 1983.

TITLE II— EXPORT TRADE ASSOCIATIONS

SHORT TITLE

SEC. 201. This title may be cited as the "Export Trade Association Act of 1981."

FINDINGS: DECLARATION OF PURPOSE

SEC. 202. (a) FINDINGS.—The Congress finds and declares that—

(1) the exports of the American economy are responsible for creating and maintaining one out of every nine manufacturing jobs in the United States and for generating $1 out of every $7 of total United States goods produced;

(2) exports will play an even larger role in the United States economy in the future in the face of severe competition from foreign government-owned and subsidized commercial entities;

(3) between 1968 and 1977 the United States share of total world exports fell from 19 per centum to 13 per centum;

(4) trade deficits contribute to the decline of the dollar on international currency markets, fueling inflation at home;

(5) service-related industries are vital to the well being of the American economy inasmuch as they create jobs for seven out of every ten Americans, provide 65 per centum of the Nation's gross national product, and represent a small but rapidly rising percentage of United States international trade;

(6) small and medium-sized firms are prime beneficiaries of joint exporting, through pooling of technical expertise, help in achieving economies of scale, and assistance in competing effectively in foreign markets; and

(7) the Department of Commerce has as one of its responsibilities the development and promotion of United States exports.

(b) PURPOSE.—It is the purpose of this Act to encourage American exports by establishing an office within the Department of Commerce to encourage and promote the formation of export trade associations through the Webb-Pomerene Act, by making the provisions of that Act explicitly applicable to the exportation of services, and by transferring the responsibility for administering that Act from the Federal Trade Commission to the Secretary of Commerce.

DEFINITIONS

SEC. 203. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out the first section (15 U.S.C. 61) and inserting in lieu thereof the following:

"SECTION 1. DEFINITIONS.

"As used in this Act—

"(1) EXPORT TRADE.—The term 'export trade' means trade or commerce in goods, wares, merchandise, or services exported, or in the course of being exported from the United States or any territory thereof to any foreign nation.

"(2) SERVICE.—The term 'service' means intangible economic output, including, but not limited to—

"(A) business, repair, and amusement services;

"(B) management, legal, engineering, architectural, and other professional services; and

"(C) financial, insurance, transportation, informational and any other data-based services, and communication services.

"(3) EXPORT TRADE ACTIVITIES.—The term 'export trade activities' means activities or agreements in the course of export trade.

"(4) METHODS OF OPERATION.—The term 'methods of operation' means the methods by which an association or export trading company conducts or proposes to conduct export trade.

"(5) TRADE WITHIN THE UNITED STATES.—The term 'trade within the United States' whenever used in this Act means trade or commerce among the several States or in any territory of the United States, or in the District of Columbia, or between any such territory and another, or between any such territory or territories and any State or States or the District of Columbia, or between the District of Columbia and any State or States.

"(6) ASSOCIATION.—The term 'association' means any combination, by contract or other arrangement, of persons who are citizens of the United States, partnerships which are created under and exist pursuant to the laws of any State or of the United States, or corporations, whether operated for profit or organized as nonprofit corporations, which

are created under and exist pursuant to the laws of any State or of the United States.

"(7) EXPORT TRADING COMPANY.—The term 'export trading company' means an export trading company as defined in section 103 (5) of the Export Trading Company Act of 1981.

"(8) ANTITRUST LAWS.—The term 'antitrust laws' means the antitrust laws defined in the first section of the Clayton Act (15 U.S.C. 12), sections 5 and 6 of the Federal Trade Commission Act (15 U.S.C. 45, 46), and any State antitrust or unfair competition law.

"(9) SECRETARY.—The term 'Secretary' means the Secretary of Commerce.

"(10) ATTORNEY GENERAL.—The term 'Attorney General' means the Attorney General of the United States.

"(11) COMMISSION.—The term 'Commission' means the Federal Trade Commission.".

ANTITRUST EXEMPTION

SEC. 204. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out section 2 (15 U.S.C. 62) and inserting in lieu thereof the following:

"SEC. 2. EXEMPTION FROM ANTITRUST LAWS.

"(a) ELIGIBILITY.—The export trade, export trade activities, and methods of operation of any association, entered into for the sole purpose of engaging in export trade, and engaged in or proposed to be engaged in such export trade, and the export trade, export trade activities and methods of operation of any export trading company, that—

"(1) serve to preserve or promote export trade;

"(2) result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of such association or export trading company;

"(3) do not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by such association or export trading company;

"(4) do not constitute unfair methods of competition against competitors engaged in the export trade of goods, wares, merchandise, or services of the class exported by such association or export trading company;

"(5) do not include any act which results, or may reasonably be expected to result, in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the association or export trading company or its members; and

"(6) do not constitute trade or commerce in the licensing of patents, technology, trademarks, or knowhow, except as incidental to the sale of the goods, wares, merchandise, or services exported by the association or export trading company on its members

shall, when certified according to the procedures set forth in this Act, be eligible for the exemption provided in subsection (b).

"(b) EXEMPTION.—An association or an export trading company and its members are exempt from the operation of the antitrust laws with respect to their export trade, export trade activities and methods of operation that are specified in a certificate issued according to the procedures set forth in this Act, carried out in conformity with the provisions, terms, and conditions prescribed in such certificate and engaged in during the period in which such certificate is in effect. The subsequent revocation or invalidation in whole or in part of such certificate shall not render an association or its members or an export trading company or its members, liable under the antitrust laws for such export trade, export trade activities, or methods of operation engaged in during such period.

"(c) DISAGREEMENT OF ATTORNEY GENERAL OR COMMISSION.—Whenever, pursuant to section 4(b)(1) of this Act, the Attorney General or the Commission has formally advised the Secretary of disagreement with his determination to issue a proposed certificate, and the Secretary has nonetheless issued such proposed certificate or an amended certificate, the exemption provided by this section shall not be effective until thirty days after the issuance of such certificate.".

AMENDMENT OF SECTION 3

SEC. 205. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended—

(1) by inserting immediately before section 3 (15 U.S.C. 63) the following:

"SEC. 3. OWNERSHIP INTEREST IN OTHER TRADE ASSOCIATIONS PERMITTED.", and

(2) by striking out "Sec. 3. That nothing" in section 3 and inserting in lieu thereof "Nothing".

ADMINISTRATION: ENFORCEMENT: REPORTS

SEC. 206. (a) IN GENERAL.—The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out sections 4 and 5 (15 U.S.C. 64 and 65) and inserting in lieu thereof the following sections:

"SEC. 4. CERTIFICATION.

"(a) PROCEDURE FOR APPLICATION.—Any association or export trading company seeking certification under this Act shall file with the Secretary a written application for certification setting forth the following:

"(1) The name of the association or export trading company.

"(2) The location of all of the offices or places of business of the association or export trading company in the United States and abroad.

"(3) The names and addresses of all of the officers, stockholders, and members of the association or export trading company.

"(4) A copy of the certificate or articles of incorporation and bylaws, if the association or export trading company is a corporation; or a copy of the articles, partnership, joint venture, or other agreement or contract under which the association or export trading company conducts or proposes to conduct its export trade activities, or contract of association, if the association or export trading company is unincorporated.

"(5) A description of the goods, wares, merchandise, or services which the association or export trading company or their members export or propose to export.

"(6) A description of the domestic and international conditions, and factors which show that the association or export trading company and its activities will serve a specified need in promoting the export trade of the described goods, wares, merchandise, or services.

"(7) The export trade activities in which the association or export trading company intends to engage and the methods by which the association or export trading company conducts or proposes to conduct export trade in the described goods, wares, merchandise, or services, including, but not limited to, any agreements to sell exclusively to or through the association or export trading company, any agreements with foreign persons who may act as joint selling agents, any agreements to acquire a foreign selling agent, any agreements for pooling tangible or intangible property or resources, or any territorial, price-maintenance, membership, or other restrictions to be imposed upon members of the association or export trading company.

"(8) The names of all countries where export trade in the described goods, wares, merchandise, or services is conducted or proposed to be conducted by or through the association or export trading company.

"(9) Any other information which the Secretary may request concerning the organization, operation, management, or finances of the association or export trading company; the relation of the association or export trading company to other associations, corporations, partnerships, and individuals; and competition or potential competition, and effects of the association or export trading company thereon. The Secretary may request such information as part of an initial application or as a necessary supplement thereto. The Secretary may not request information under this paragraph which is not reasonably available to the person making application or which is not necessary for certification of the prospective association or export trading company.

"(b) ISSUANCE OF CERTIFICATE.—

"(1) NINETY-DAY PERIOD.—The Secretary shall issue a certificate to an association or export trading company within ninety days after receiving the application for certification or necessary supplement thereto if the Secretary, after consultation with the Attorney General and Commission, determines that the association and, its export trade, export trade activities and methods of operation, or export trading company, and its export trade, export trade activities and methods of operation meet the requirements of section 2 of this Act and will serve a specified need in prompting the export trade of the goods, wares, merchandise, or services described in the application for certification. The certificate shall specify the permissible export trade, export trade activities and methods of operation of the association or export trading company and shall include any terms and conditions the Secretary deems necessary to comply with the requirements of section 2 of this Act. The Secretary shall deliver to the Attorney General and the Commission a copy of any certificate that he proposes to issue. The Attorney General or Commission may, within fifteen days thereafter, give written notice to the Secretary of an intent to offer advice on the determination. The Attorney General or Commission may, after giving such written notice and within forty-five days of the time the Secretary has delivered a copy of a proposed certificate, formally advise the Secretary and the petitioning association or export trading company of disagreement with the Secretary's determination. The Secretary shall not issue any certificate prior to the expiration of such forty-five day period unless he has (A) received no notice of intent to offer advice by the Attorney General or the Commission within fifteen days after delivering a copy of a proposed certificate, or (B) received any noticed formal advice of disagreement or written confirmation that no formal disagreement will be transmitted from the Attorney General and the Commission. After the forty-five day period or, if no notice of intent to offer advice has been given, after the fifteen-day period, the Secretary shall either issue the proposed certificate, issue an amended certificate, or deny the application. Upon agreement of the applicant, the Secretary may delay taking action for not more than thirty additional days after the forty-five day period. Before offering advice on a proposed certification, the Attorney General and Commission shall consult in an effort to avoid, wherever possible, having both agencies offer advice on any application.

"(2) EXPEDITED CERTIFICATION.—In those instances where the temporary nature of the export trade activities, deadlines for bidding on contracts or filling orders, or any other circumstances beyond the control of the association or export trading company which have a significant impact on its export trade, make the ninety-day period for application approval described in paragraph (1) of this subsection, or an amended application approval as provided in subsection (c) of this

section, impractical for the association or export trading company seeking certification, such association or export trading company may request and may receive expedited action on its application for certification.

"(3) AUTOMATIC CERTIFICATION FOR EXISTING ASSOCIATIONS.—Any association registered with the Federal Trade Commission under this Act as of January 19, 1981, may file with the Secretary an application for automatic certification of any export trade, export trade activities, and methods of operation in which it was engaged prior to enactment of the Export Trade Association Act of 1981. Any such application must be filed within 180 days after the date of enactment of such Act and shall be acted upon by the Secretary in accordance with the procedures provided by this section. The Secretary shall issue to the association a certificate specifying the permissible export trade, export trade activities, and methods of operation that he determines are shown by the application (including any necessary supplement thereto), on its face, to be eligible for certification under this Act, and including any terms and conditions the Secretary deems necessary to comply with the requirements of section 2(a) of this Act, unless the Secretary possesses information clearly indicating that the requirements of section 2(a) are not met.

"(4) APPEAL OF DETERMINATION.—If the Secretary determines not to issue a certificate to an association or export trading company which has submitted an application for certification, or for an amendment of a certificate, then he shall—

"(A) notify the association or export trading company of his determination and the reasons for his determination, and

"(B) upon request made by the association or export trading company, afford it an opportunity for reconsideration with respect to that determination.

"(c) MATERIAL CHANGES IN CIRCUMSTANCES; AMENDMENT OF CERTIFICATE.—Whenever there is a material change in the membership, export trade activities, or methods of operation, of an association or export trading company then it shall report such change to the Secretary and may apply to the Secretary for an amendment of its certificate. Any application for an amendment to a certificate shall set forth the requested amendment of the certificate and the reasons for the requested amendment. Any request for the amendment of a certificate shall be treated in the same manner as an original application for a certificate.

"(d) AMENDMENT OR REVOCATION OF CERTIFICATE BY SECRETARY.—

"(1) The Secretary on his own initiative shall, upon a determination that the export trade, export trade activities or methods of operation of an association or export trading company no longer comply with the requirements of section 2 of this Act, revoke its certificate or make such amendments as may be necessary to comply with the requirements of such section.

"(2) Prior to revoking or amending a certificate, the Secretary shall—

"(A) notify the holder of the certificate in writing of the facts or conduct which may warrant the action, and

"(B) provide the holder of the certificate an opportunity for such hearing as may be appropriate in the circumstances.

"(3) Before revoking or amending a certificate pursuant to this subsection the Secretary may in his discretion provide the holder of the certificate an opportunity to achieve compliance within a reasonable period of time not to exceed ninety days, except that nothing in this paragraph shall affect any action under section 4(e) of this Act.

"(e) ACTION FOR INVALIDATION OF CERTIFICATE BY ATTORNEY GENERAL OR COMMISSION.—

"(1) The Attorney General or the Commission may bring an action against an association or export trading company or its members to invalidate, in whole or in part, its certificate on the ground that the export trade, export trade activities or methods of operation of the association or export trading company fail or have failed to meet the requirements of section 2 of this Act. Except in the case of an action brought during the period before an antitrust exemption becomes effective, as provided for in section 2(c), the Attorney General or Commission shall notify any association or export trading company or member thereof, against which it intends to bring an action for invalidation, thirty days in advance, as to its intent to file an action under this subsection. The district court shall consider any issues presented in any such action de novo and if it finds that the requirements of section 2 are not met, it shall issue an order declaring the certificate invalid or any other order necessary to effectuate the purposes of this Act and the requirements of section 2.

"(2) Any action brought under this subsection shall be considered an action described in section 1337 of title 28, United States Code. Pending any such action which was brought during the period any exemption is held in abeyance pursuant to section 2(c) of this Act, the court may make such temporary restraining order or prohibition as shall be deemed just in the premises.

"(3) No person other than the Attorney General or Commission shall have standing to bring an action against an association of export trading company or their respective members for failure of the association of export trading company or their respective export trade, export trade activities or methods of operation to meet the eligibility requirements of section 2 of this Act.

"(f) COMPLIANCE WITH OTHER LAWS.—Each association and each export trading company and any subsidiary thereof shall comply with United States export control laws pertaining to the export or transshipment of any goods on the Commodity Control List to controlled countries. Such laws shall be complied with before actual shipment.

"(g) JUDICIAL REVIEW.—Final orders of the Secretary under this section shall be subject to judicial review pursuant to chapter 7 of title 5, United States Code.

"SEC. 5. GUIDELINES.

"(a) INITIAL PROPOSED GUIDELINES.—Within ninety days after the enactment of the Export Trade Association Act of 1981, the Secretary, after consultation with the Attorney General, and the Commission shall publish proposed guidelines for purposes of determining whether export trade, export trade activities and methods of operation of an association or export trading company will meet the requirements of section 2 of this Act.

"(b) PUBLIC COMMENT PERIOD.—Following publication of the proposed guidelines, and any proposed revision of guidelines, interested parties shall have thirty days to comment on the proposed guidelines. The Secretary shall review the comments and, after consultation with the Attorney General, and Commission, publish final guidelines within thirty days after the last day on which comments may be made under the preceding sentence.

"(c) PERIODIC REVISION.—After publication of the final guidelines, the Secretary shall periodically review the guidelines and, after consultation with the Attorney General, and the Commission, propose revisions as needed.

"(d) APPLICATION OF ADMINISTRATIVE PROCEDURE ACT.—The promulgation of guidelines under this section shall not be considered rulemaking for purposes of subchapter II of chapter 5 of title 5, United States Code, and section 553 of such title shall not apply to their promulgation.

"SEC. 6. ANNUAL REPORTS.

"Every certified association or export trading company shall submit to the Secretary an annual report, in such form and at such time as he may require, which report updates where necessary the information described by section 4(a) of this Act.

"SEC. 7. OFFICE OF EXPORT TRADE IN DEPARTMENT OF COMMERCE.

"The Secretary shall establish within the Department of Commerce an office to promote and encourage to the greatest extent feasible the formation of export trade associations and export trading companies through the use of provisions of this Act in a manner consistent with this Act. The Office of Export Trade in the Department of Commerce shall report to the congressional committees of appropriate jurisdiction on an annual basis, all East-West trade transactions requiring validated licenses, and any other relevant information on the role of United States export trading companies or subsidiaries thereof in East-West trade.

"SEC. 8. CONFIDENTIALITY OF APPLICATION AND ANNUAL REPORT INFORMATION.

"(a) GENERAL RULE.—Portions of applications made under section 4, including amendments to such applications, and annual reports made under section 6 that contain trade secrets or confidential business or financial information, the disclosure of which would harm the competitive position of the person submitting such information shall be confidential, and, except as authorized by this section, no officer or employee or former officer or employee, of the United States shall disclose any such confidential information, obtained by him in any manner in connection with his service as such an officer or employee.

"(b) Disclosure to Attorney General or Commission.—Whenever the Secretary believes that an applicant may be eligible for a certificate, or has issued a certificate to an association or export trading company, he shall promptly make available all materials filed by the applicant, association or export trading company, including applications and supplements thereto, reports of material changes, applications for amendments and annual reports, and information derived therefrom, to the Attorney General or Commission, or any employee or officer thereof, for official use in connection with an investigation or judicial or administrative proceeding under this Act or the antitrust laws to which the United States or the Commission is or may be a party. Such information may only be disclosed by the Secretary upon a prior certification that the information will be maintained in confidence and will only be used for such official law enforcement purposes.

"SEC. 9. MODIFICATION OF ASSOCIATION TO COMPLY WITH UNITED STATES OBLIGATIONS.

"At such time as the United States undertakes binding international obligations by treaty or statute, to the extent that the operations of any export trade association or export trading company, certified under this Act, are inconsistent with such international obligations, the Secretary may require the association or export trading company to modify its respective operations, and in so doing afford the association or export trading company a reasonable opportunity to comply therewith, so as to be consistent with such international obligations.

"SEC. 10. REGULATIONS.

"The Secretary, after consultation with the Attorney General and the Commission, shall promulgate such rules and regulations as may be necessary to carry out the purposes of this Act.

"SEC. 11. TASK FORCE STUDY.

"Seven years after the date of enactment of the Export Trade Association Act of 1981, the President shall appoint, by and with the advice and consent of the Senate, a task force to examine the effect of the operation of this Act on domestic competition and on United States international trade and to recommend either continuation, revision, or termination of the Webb-Pomerene Act. The task force shall have one year to conduct its study and to make its recommendations to the President.".

(b) Redesignation of Section 6.—The Act is amended—

(1) by striking out "Sec. 6." in section 6 (15 U.S.C. 66), and

(2) by inserting immediately before such section the following:

"SEC. 12. SHORT TITLE.".

EFFECTIVE DATE WITH REGARD TO EXISTING ASSOCIATIONS

SEC. 207. (a) GENERAL RULE.—The amendments to the Webb-Pomerene Act set forth in sections 203, 204, 205, and 206 of this Act shall become effective with regard to an existing association described in subsection (b) only at such time as the association may elect to be certified pursuant to subsection (c).

(b) Election to Continue Under Prior Law.—Application of the antitrust laws to any association which as of January 1, 1981, had filed with the Commission the information specified under section 5 of the Webb-Pomerene Act as in effect immediately prior to the date of enactment of this Act shall continue to be governed by the standards set forth in that Act, unless such association elects to seek certification under subsection (c).

(c) Election to Apply for Certification.—Any association to which subsection (b) applies may, at any time after the effective date of this Act, file an application for certification with the Secretary containing the information set forth in section 4(a) of the Webb-Pomerene Act, as amended by section 206 of this Act. The Secretary shall consider and act upon such application in the manner provided in section 4(b) of the Webb-Pomerene Act, as amended by section 206 of this Act. The association filing an application pursuant to this subsection shall continue to be subject to subsection (b) of this section until the Secretary issues a certificate and such certificate has been accepted by the association; the association must decide whether or not to accept such certificate no later than thirty days after the Secretary's determination with respect thereto has become final.●

EXPORT TRADING COMPANY LEGISLATION—VII

● Mr. HEINZ. Mr. President, the Export Trading Company Act, ordered reported by the Banking Committee last Thursday, should play a significant part in revitalizing our Nation's ailing position in the international marketplace. By facilitating the establishment of export trading companies, the bill would provide for a mechanism through which small- and medium-sized manufacturers could sell their products abroad. I would like to call my colleagues' attention to the testimony of Mr. W. Paul Cooper, chairman of the Board of the Acme-Cleveland Corp. before the Subcommittee on International Finance and Monetary Policy.

The Acme-Cleveland Corp. is a medium-sized manufacturer of machine tools. As Mr. Cooper explains in his testimony, Acme-Cleveland serves as an example of a company whose exports plummeted in the past decade and one whose exports stand to surge in the next if this legislation is enacted. Mr. Cooper provides firsthand evidence of how individual enterprises and ultimately the U.S. economy in general will benefit from the Export Trading Company Act. Mr. Cooper also provided a comprehensive and compelling discussion of the need for bank participation in or control of export trading companies.

Mr. President, I ask to have printed in the RECORD Mr. Cooper's testimony.

STATEMENT OF W. PAUL COOPER

I. INTRODUCTION

Good morning, my name is W. Paul Cooper. I am Chairman of the Board of Acme-Cleveland Corporation. Accompanying me today is Mr. James H. Mack, Public Affairs Director of the National Machine Tool Builders' Association (NMTBA), the national trade association of which Acme-Cleveland is one of over 400 member companies.

Although we are of course pleased to be of service to this Subcommittee, we are here today with somewhat mixed emotions in that it was nearly a year ago that we appeared before a similar panel in the other house. At that time, we conveyed nearly the same message that we will convey to you today. Improved export policy is an area of vital interest to both my own corporation and the U.S. machine tool industry as well as the U.S. economy generally.

The legislation which we will be commenting on today, Senator Heinz's bill, S. 144, is very similar to the legislation which this Subcommittee reported last year, S. 2718. We strongly supported that legislation, and we strongly support this year's bill. At this time we would like to address some of the objections raised to last Congress' legislation, S. 2718, in the hopes of allaying the fears of those who attempted to block export trading company legislation during the 96th Congress.

To some extent this may be preaching to the choir. The Senate passed S. 2718 during last Congress by an overwhelming vote of 77–0. Nevertheless, we believe it is important to reiterate the reasons why export trading companies are of vital importance to our national interest, in order that a strong and complete record might be built upon which to base passage of export trading company legislation early in the first session of the 97th Congress. Specifically, we would like to particularly emphasize the importance of drafting this legislation so as to allow U.S. banking institutions to become directly involved as integral parts of export trading companies. Of course, as we are all aware, it was the inclusion of such direct banking involvement provisions in last year's bill which unfortunately blocked passage of ETC legislation in the House of Representatives, even after the Senate had overwhelmingly passed S. 2718. For this reason, we believe it is even more imperative this session of Congress that the Senate take as early an aggressive lead in developing and passing export trading company legislation, in order that the objections raised to S. 2718 last year, which will undoubtedly again be raised to S. 144 this year, will be addressed so as to develop a consensus which will ultimately lead to enactment into law of this vitally needed export trading company legislation.

Again, for the sake of completeness of the record, before proceeding with my comments, we would first like to briefly outline Acme-Cleveland's activities in the metalworking manufacturing industry, as well as the corporation's recent experience in the export market.

Acme-Cleveland, a New York Stock Exchange listed corporation, has existed in its present form since 1968. However, several of its predecessor companies and present major components have long histories in the industry, dating back over one hundred years in some cases. The corporation is in the business of manufacturing the tools of metalworking productivity: machine tools, cutting and threading tools, foundry tooling and equipment, electrical and electronic controls, and automated production systems. Currently, these products, including replacement parts, are manufactured by six operating divisions, supported by two service companies with a combined domestic employment of approximately 5,700 workers.

In addition to these domestic U.S. operations, Acme-Cleveland also consists of a number of foreign subsidiaries. Finally, relationships with several foreign licensees and one overseas joint-venture round out the corporation's worldwide business activity.

Acme-Cleveland views foreign trade as an extremely significant part of what has come to be recognized as a worldwide machine tool market. Even prior to Acme-Cleveland's worldwide expansion, several of its predecessor companies enjoyed long and active involvement in foreign trade. A high point of this foreign activity occurred in 1975 when over one fifth (21.5 percent) of Acme-Cleveland's domestic production had its destination in the export market. Unfortunately, however, even with an overall increase in total business volume there has been a steady decline in export sales, until in 1979 only 6.0 percent of domestic production was shipped overseas, for an annual average of 10.3 percent for the years 1975 through 1979.

Shifting from my own corporation's experience to that of the industry generally, it is important to point out that while the domestic U.S. machine tool market has been oscillating with very little real growth since the middle 1960's, the world market has grown substantially. Unfortunately, most of this worldwide expansion has been absorbed by our foreign competitors, eroding our market share.

In the middle 1960's, the American machine tool industry supplied approximately one-third of the total global market. In other words, one out of every three machine tools consumed in the world was produced by an American machine tool builder. However, according to American Machinist, as of the end of 1979, that portion had fallen to only 17.1 percent. In short, over the past 13 years, our share of the world market has plummeted by almost 50 percent.

This dramatic decline is the result of two factors. First, our domestic market has been invaded by foreign competitors on a scale never before dreamed of. For example, since 1964, America's imports of foreign machine tools have more than tripled, growing from 7% of total consumption 15 years ago to over 25% in 1980. It is obvious that, because the United States is the largest open machine tool market in the world, our foreign competitors have pulled out the stops and are aiming their export marketing efforts directly at America.

Second, and this is the aspect that we wish to focus on at this time, our share of the export market has also declined. When we look at the dollar value of our exports, the results of our efforts look encouraging. But if we look at American exports as a percentage of all of the machine tool exports in the world, the results are indeed very discouraging. We have been losing export market share at an alarming rate. Our share of the world's machine tool exports fell from 21% in 1964 to just 7% last year, placing us well behind West Germany and Japan as a machine tool exporting nation.

Finally, and perhaps most alarmingly, in

1978 the United States suffered its first machine tool trade deficit in history, with imports exceeding exports by some $155 million. And, to make matters even worse, this deficit trend continued through 1980. Even though our exports grew by 15.8% over 1978 levels, imports soared by more than 45% to produce an even larger trade deficit of almost $400 million in 1980.

The National Machine Tool Builders' Association is a national trade association representing over 400 American machine tool manufacturing companies, which account for approximately 90% of United States machine tool production. Although the total machine tool industry employs approximately 110,000 people with a combined annual output of around four billion dollars, most NMTBA member companies are small businesses with payrolls of 250 or fewer employees.

While relatively small by some corporate standards, American machine tool builders comprise a very basic segment of the U.S. industrial capacity, with a tremendous impact on America. It is the industry that builds the machines that are the foundation of America's industrial-military strength. Without machine tools, there could be no manufacturing; there would be no trains, no planes, no ships, no cars; there would be no power plants, no electric lights, no refrigerators and no agricultural machinery.

II. NATIONAL MACHINE TOOL BUILDERS' ASSOCIATION EXPORT PROMOTION ACTIVITIES

NMTBA and its member companies have devoted considerable time and effort to increasing exports.

NMTBA, on behalf of the American machine tool industry is devoting its own resources to the development and maintenance of international markets everywhere in the world. The Association has two people who spend virtually their full time overseas promoting United States machine tool exports with considerable assistance from the Department of Commerce.

NMTBA develops seminars and workshops to train our members' people on international financing, export licensing, or any other subject that will benefit a machine tool builder. We conduct market research to locate new and promising markets for industry development. We have conducted roughly thirty Industry Organized, Government Approved (IOGA) trade missions to help gain a foothold in these new markets, and approximately half a dozen are planned for 1982 and 1983. We sponsor foreign exhibitions so that our members will have more opportunities to display their products overseas. In addition, we often work in close conjunction with the Commerce Department on such activities as recruiting exhibitors for export promotion events such as catalog shows, video tape shows and technical seminars. We organize reverse trade missions to bring foreign buyers to our plants. And we bring large groups of foreign visitors to the International Machine Tool Show in Chicago every two years. The Commerce Department has worked closely with us in the development and implementation of these programs, as have the commercial officers in our embassies and trade centers around the world.

III. BANK INVOLVEMENT IN EXPORT TRADING COMPANIES

In an economy which has until only recently been primarily oriented to the domestic market, it is not hard to understand why export trade has been deprived of significant financial resources. Because of such an overwhelmingly domestic orientation, the investment and entrepreneurship to establish export trading companies on an economical scale has been difficult.

With a gigantic domestic market to produce for, many American businessmen have shied away from what they often perceive to be the complex world of international trade. While countries like Canada export 25% of their gross national product, Germany 22.6%, and the United Kingdom 23%, the U.S. consumes all but 7.5% of domestic production. Recent statistics indicate that only 8% of this country's 250,000 manufacturers ship their goods abroad and, of those, a mere 100 industrial giants account for more than half of all U.S. exports. And while it is true that our enormous trade deficit is caused primarily by oil imports, it is striking to note that had we maintained the share of manufactured exports that we enjoyed in 1960 we could be paying for our oil bill in 1981 without a trade deficit. Since 1960, the U.S. share of manufactured exports has slid from 22.8% to 17.4% of the world total.

We, therefore, commend you Mr. Chairman for your sponsorship of S. 144, a bill designed to stimulate exports, by spurring the creation of large scale American trading companies that would provide a much needed export vehicle for small and medium-sized businesses, and also facilitate joint-ventures and barter deals by already big exporters. To accomplish these goals, S. 144 attempts to stimulate initiative from at least three possible sources: (1) accelerated internal growth by existing U.S. export management or export trading companies; (2) formation of independent export trading companies fostered by major corporations with international trade experience; and (3) investments by U.S. banking institutions in new or existing export trading companies. This third source of increased stimulus—specifically the provision that banks may have ownership participation in export trading companies—is the aspect of the bill which has been the most controversial and has drawn the criticism of those who believe that commerce and banking should continue to remain separate activities.

Presumably, this legislation was inspired to some extent by Japanese "sogo shosha," multi-billion dollar trading conglomerates with huge asset bases and close ties to government, bankers and manufacturers. These "sogo shosha" in addition to their trading companies, each have numerous subsidiaries in such areas as auto, steel and textiles. The trading arm in turn has its own subsidiaries in manufacturing, farming and resource development, and it draws on the entire conglomerate organization for products to sell and for assistance in financing them.

Moreover, the trading company isn't limited to its organization. It will also buy or sell products from any other source wherever it finds the opportunity. With some 80,000 employees spread around the globe drumming up billions of dollars worth of business, the "sogo shosha" as a group account for more than 50% of Japan's exports and imports, and 30% of GNP.

Because fundamental differences between our two societies should discourage the belief that America can or should attempt to duplicate the Japanese model for its own economy, we concur in the belief of most trade experts that the U.S. must develop its own brand of trading company that is consistent with our nation's tradition of competitiveness rather than consensus. This, we believe, is what S. 144 is designed to do.

We believe that banks can bring not only financial resources, but almost all of the supporting facilities and services which U.S. exporters now most lack by contrast with their foreign competitors. They will make it possible for American companies to combine their resources in a variety of ways and configurations in the interest of more competitive overseas marketing of American products and services. More importantly, banks can encourage and help exporters develop a long term view of, and presence in, export markets. Moreover, bank affiliated trading companies would have special effect on encouraging more medium and small exporters who are now discouraged by the remoteness and strangeness of foreign markets and buyers, exchange risks, and by the complexity and expense of documentation.

Although NMTBA supports the general principal of separation of banking and commerce, we believe there is good, sufficient, and, indeed, compelling reason to make an exception on a controlled basis for limited and conditional bank ownership of export trading companies in order to strengthen U.S. capacity to meet non-traditional international trade competition. Moreover, we further believe that as drafted, S. 144 contains prohibitions, restrictions, limitations, conditions and requirements more than ample to meet each of the objections raised concerning bank ownership of export trading companies.

In our view, any legislation purporting to encourage U.S. exports through the facility of export trading companies, which does not permit bank participation and (in some cases) the right of bank control is only a half step. Adequate financing is one of the most critical elements of export promotion. To continue to prohibit bank participation in export trading companies is to continue a halfway policy of half steps leading to halfway results.

In this regard, the following comments are addressed to the specific requirements of S. 144 which we believe are the most advantageous provisions concerning direct bank involvement in export trading companies.

A. Provisions designed to protect the financial integrity of banks participating in ETCs

Title I of S. 144 contains numerous provisions which are specifically designed to safeguard the financial integrity of banks. By definition, the bill precludes export trading companies from being used as vehicles for investment in domestic industries. Furthermore, U.S. government banking regulatory agencies would have clear authority to prevent ETCs from violating this restriction, since any significant investment by bank-owned ETCs would require prior approval from these agencies.[1]

Additionally, the many safeguards against undue risks by bank-owned ETCs will insure against the type of public policy concerns which have traditionally been associated with bank involvement in non-banking activities. Moreover, S. 144 has adopted the specific recommendations of the Federal Reserve by incorporating the same restrictions contained in Sec. 23A of the Federal Reserve Act.[2]

---

[1] Senate Bill 144, Sec. 103(a)(9) states: the term "appropriate Federal banking agencies" means—(A) the Comptroller of the Currency with respect to a national bank or any District bank; (B) the Board of Governors of the Federal Reserve System with respect to a State member bank, bank holding company, Edge Act corporation, or Agreement Corporation; (C) the Federal Deposit Insurance Corporation with respect to a State non-member insured bank, except a District bank; (D) the Federal Home Loan Bank Board with respect to a Federal savings bank.

Moreover in any situation where the bank organization holding or making an investment in an export trading company is a subsidiary of another banking organization which is subject to jurisdiction of another agency, and some form of agency approval or notification is required, such approvals or notifications need only be obtained from or made to, as the case may be, the appropriate Federal Banking agency for the banking organization making or holding the investment in the export trading company.

[2] Sec. 23A of the Federal Reserve Act generally prohibits member banks from lending or investing more than 10% of their capital and surplus in any one affiliate, and more than 20% of their capital and surplus in all affiliates.

Specifically, Sec. 105 of S. 144 contains the following general guidelines for bank involvement in ETCs:

(1) Banks may invest up to an aggregate amount of $10 million in one or more export trading companies without prior approval of the appropriate federal banking agency, if such investment does not cause an export trading company to become a subsidiary of the investing bank.

(2) Banks may make investments in excess of an aggregate amount of $10 million in one or more export trading companies or make any investment which would cause an export trading company to become a subsidiary or which would cause more than 50% of the voting stock of the export trading company to be owned or controlled by the bank only with the prior approval of the appropriate federal agency.

(3) The total cost of the direct and indirect investment by a bank in an export trading company combined with extensions of credit by the bank to the trading company shall not exceed 10% of the bank's capital and surplus.

(4) Appropriate federal banking agencies may impose such conditions as they deem necessary to limit a banking organization's financial exposure to an export trading company or to prevent possible conflicts of interest or unsound banking practices.

(5) And finally, nothing in this bill would in any way prevent any state from adopting a law prohibiting banks chartered under the laws of such state from investing in export trading companies or applying conditions, or restrictions on investments by banks chartered under the laws of such state in export trading companies in addition to any conditions, limitations, or restrictions provided under the federal law itself.

B. Provisions designed to protect against unfair competitive advantages by bank-owned ETCs

In addition to expressing concerns about the potential for impairment of the financial integrity of banking institutions, critics of direct bank involvement in ETCs also expressed the fear that bank-owned ETCs will have unfair competitive advantages over ETCs owned by non-banking firms. Additionally, there is the worry that big banks and big companies would form joint-ventures, increasing what some perceive as an already dangerous trend toward concentration of economic power. However, to allay these fears S. 144 contains provisions which will specifically ensure that such unfair competitive circumstances will not develop.

Under S. 144 bank-owned ETCs will be much more heavily regulated than ETCs owned by non-banking firms. The legislation specifically prohibits banks and their affiliates from making preferential loans to any ETC in which they have an equity interest, including customers of any such ETC. Specifically incorporating the request of the Federal Reserve, S. 144 prohibits a banking organization or any of its affiliates from extending credit "to an export trading company or to customers of such company on terms more favorable than those afforded similar customers under similar circumstances, and such extension of credit shall not involve more than the normal risk of repayment or present other unfavorable features." [3]

Moreover, prohibitions on direct bank involvement in ETCs will put banks (of all sizes) at a serious disadvantage with so-called "near banks" (such as money market mutual funds), since under such restrictions near banks would be allowed to invest directly in ETCs while regular banks would not. And perhaps most importantly from a competitive perspective, with over 1,400 banks in the United States (certainly not all of which will be investing in ETCs) there will be more than ample financing alternatives for non-bank owned ETCs.

Certainly, if the risks of direct bank involvement in ETCs were so great there should be an experience of foreign failures resulting from unwise operation of trading affiliates. Instead, the reverse appears to be true. Therefore, we see no reason why if foreign banks can manage these risks, U.S. banks, which would be under the close scrutiny and supervision of numerous federal regulatory agencies, would not be able to do so also.

C. Currrently existing export management firms and financing alternatives are inadequate to compete effectively with foreign based export trading companies

Finally, opponents of direct bank participation in export trading companies have alleged that such vehicles as are proposed by S. 144 are not needed, because there are already existing export management firms or brokers which can adequately handle the needs of U.S. exporters. More specifically, it has also been argued that there is no need for direct bank participation in ETCs because the Export-Import Bank of the United States (Eximbank) already is capable of meeting the financial needs of U.S. exporters. In response to these two erroneous contentions we would point out that although the Department of Commerce estimates that there are about 3,800 export management firms or brokers in the United States, most are quite small (92 percent employing fewer than 5 people). Moreover, these firms normally limit themselves to a specific product line for a geographic area. Additionally, it is also very important to note that one of the major reasons these firms have not continued to grow is that they are normally severely under-capitalized. Banks as a result are unwilling to give them substantial lines of credit. While Japanese trading companies have debt/equity ratios of 15 or 20 to 1, small U.S. companies cannot operate anywhere near that level.

Addressing the argument that bank-owned ETCs are not necessary, because the Eximbank is already capable of providing sufficient export financing assistance, we begin by pointing out that Eximbank is an independent agency of the U.S. Government that works in cooperation with commercial banks to provide special financing services for U.S. exporters. In contrast, bank-owned export trading companies, as foreseen by S. 144, would be private entities with the internal ability to both finance and market goods in foreign commerce. While in no way depreciating the important role that Eximbank plays in furthering U.S. exports in world markets, it is obvious from the above two descriptions that the Eximbank and bank-owned ETCs are generically dissimilar entities with different goals and objectives. Simply stated, Eximbank is designed to offer targeted government financial assistance in special exporting circumstances, whereas bank-owned ETCs would provide U.S. exporters with a one-stop financing and marketing package designed to address a much broader range of export trade opportunities.

However, one response to this position has been to suggest that many, if not all, of these advantages are already currently available via Eximbank assistance, with the supposedly logical conclusion being that there is no need currently unfulfilled by Eximbank to be met by bank-owned ETCs.

Admittedly, Eximbank has a financing network with hundreds of U.S. and foreign financial institutions. Nor is there disagreement that these close working relationships have made it possible to further extend Eximbank's resources in cases where it is critical for American exporters to be able to offer financing which is competitive with that available to government-leveraged foreign sellers. However, although Eximbank may to some extent have access to the financial resources of private banking institutions, a critical factor governing the utilization of these resources is the funding level of Eximbank. Indeed, in the two most recent years for which complete data is available (1978 and 1979) Eximbank financed exports have amounted to only 1.5% of total U.S. exports. These figures clearly point out the limited, albeit vital, role Eximbank is designed to serve. Indeed, Eximbank's statutory authorization itself states that "the Bank in the exercise of its functions should supplement and encourage, and not compete with private capital." [4]

Moreover, although Eximbank is primarily a self-sustaining U.S. corporation required to provide adequate earnings to cover costs—just like any other business—it is, nevertheless, also a government institution subject to official United States policy and regulations in a variety of spheres ranging from foreign policy to economic concerns to environmental considerations. Given these additional considerations, Eximbank is therefore inherently less flexible than bank-owned ETCs would be in similar commercial circumstances.

As a matter of fact, the very future of Eximbank and its ability to promote U.S. exports is under serious attack as we meet here today. Even if the proposed cuts in Eximbank's lending authority (cuts, which, I might add, will effectively shut down the Bank's role as a major player in the export process) are not enacted, the projected needs of Eximbank are almost certain to go unfilled. Thus, to expect an under-financed (or perhaps even an *un*-financed) Eximbank to provide a major source of credit for U.S. exports is but a fool's dream. Many of S. 144's strongest opponents are also the strongest and loudest critics of the Eximbank. How do they expect to finance U.S. exports?

Finally, it appears almost self-evident that the major resource available to Eximbank is the very resource that bank-owned ETCs would tap one step closer to the original source, the financing capacity of private banking institutions. But just as important, bank-owned ETCs would also be able to provide the critical export marketing services necessary for successful export trade. Such export marketing services, which are beyond the capacity and purpose of Eximbank, would be an integral and vital part of bank-owned ETCs

To reiterate, the Eximbank is a very important effort by the United States Government to give targeted official assistance furthering U.S. overseas trade, and as such is highly commendable. Its lending authority should be increased, not cut back, as some have proposed. However, there remain vast export trade opportunities which for the reasons already stated would be much more effectively pursued via privately operated bank-owned export trading companies.

D. Reasons for bank ownership of ETC's

Mr. Chairman, to this point in our testimony we have to a great extent been on the defensive, that is attempting to rebut arguments of the opponents of direct bank participation in export trading companies. At this point we believe it is important to state affirmatively some of the benefits that we see accruing to the United States by virtue of export trading companies as envisioned under S. 144.

We would begin by emphasizing that our domestic laws separating banking and commerce are designed to preserve domestic competitive equality, not to meet the relatively recent challenge of foreign competition. However, because of this new foreign

[3] Senate Bill 144, Sec. 105(c)(4).

[4] The Export-Import Bank Act of 1945, as amended through November 10, 1978, 12 U.S.C. 635(b).

competition direct bank involvement in ETCs is absolutely necessary for American business to be competitive abroad.

In this regard, S. 144 would alter the laws separating banking and commerce only as they apply to the area of export trade, an area where the United States has always recognized the need for special rules to meet foreign competition (e.g., the Eximbank, Commodity Credit Corporation, Webb-Pomerene and DISC legislation, etc.). Thus, S. 144, rather than unnecessarily involving banks in commercial activities, actually follows the long tradition in U.S. law of not applying domestic rules to export trade activities, when to do so would only impede U.S. competitiveness in world markets.

Clearly, bank expertise would be both transferable and important to ETC management, organization and operation. Indeed, banks, with their international offices, experience in trade financing, business contacts at home and abroad, and international marketing knowledge are the most likely source of leadership in forming export trading companies.

Currently, a number of European banks operate some of the largest trading companies, and are able to supply those ETCs with almost all of the supporting facilities and services which U.S. exporters now most lack by contrast with these competitors.

What often happens is that foreign ETCs employ U.S. banks as intermediaries in arranging and financing initial transactions with U.S. exporters. However, after the initial contact with these American firms has been made, the foreign ETCs substitute their own internal financing for that of the original U.S. bank intermediary. The result of this procedure is a short term profit, but a long term loss for both the U.S. bank and America generally. Although more American-made goods are exported (a result we obviously support as highly desirable) export service fees are needlessly being shipped overseas along with U.S. products, with a resulting loss in income and jobs to American financial institutions.

Therefore, NMTBA strongly urges the direct involvement of U.S. banks in U.S. export trading companies. Such direct bank participation is the fuel needed to power the ETC vehicle. Direct incorporaton in U.S. ETCs of the many export services that American banks are able to offer would be of great competitive assistance to U.S. exporters who now incur additional delays and expense in obtaining similar service. Furthermore, certain services now either unprofitable or illegal (e.g., putting buyers in touch with sellers for a fee, or providing credit and political risk insurance to U.S. manufacturers) would also be available under this approach.

For all of these reasons, we strongly urge support for the banking provisions of S. 144 in comprehensive U.S. export trading company legislation.

IV. ANTITRUST LAW MODIFICATION PROPOSALS

The Webb-Pomerene Act, enacted in 1918, allows American companies to join together in developing foreign sales while enjoying limited immunity from the U.S. domestic antitrust laws. The current statute is administered by the Federal Trade Commission (FTC).

Unfortunately, the role of Webb associations has declined drastically over the years. From a high-water mark of about 19% of total U.S. exports between 1930 and 1935, Webb associations have slipped to less than a 2% share today.

Within the past year the merits of the Webb-Pomerene Act have been reexamined by the National Commission for the Review of Antitrust Laws and Procedures. At the conclusion of this study it was the Commission's recommendation that Congress reexamine the Act, and modify it where necessary.

In enacting the Webb-Pomerene Act, Congress envisioned an eager American business community availing itself of the opportunity to pool its facilities, resources, and expertise in such a fashion as to implement an ambitious joint exporting program. As we have seen that vision never materialized. One of the major reasons for the lack of development of export trading companies under the existing Webb-Pomerene Act has been the continuing uncertainty of the American business community as to what would or would not be within the scope of the Webb-Pomerene antitrust exemption.

Throughout the history of the Webb Act there have been a number of advisory opinions issued by the Federal Trade Commission, which in a case by case fashion have attempted to draw the parameters of the law's antitrust exemption.

Further clarification as to the parameter of the antitrust exemption provided under the Webb Act has been gained through adjudication of a number of cases brought by the Department of Justice.

The opinion of the court in the case of United States v. Minnesota Mining Mfg. (District Court, Massachusetts, 1950) provides the most authoritative interpretation of the scope and rationale of the antitrust exemption under the Webb-Pomerene Act. As stated by the Court:

"Now it may very well be that every successful export company does inevitably affect adversely the foreign commerce of those not in the joint enterprise and does bring the members of the enterprise so closely together as to affect adversely the members' competition in domestic commerce. Thus every export company may be a restraint. But if there are only these inevitable consequences, an export association is not an unlawful restraint. The Webb-Pomerene Act is an expression of Congressional will that such a restraint shall be permitted."

Title II of the Export Trading Company Act of 1981, S. 144, modifies the Webb-Pomerene Act in a way that will permit many more American firms to make use of its update provisions to promote exports. Title II does the following:

(1) It makes the provisions of the Webb-Pomerene Act explicitly applicable to the exportation of services. (The National Commission for the Review of Antitrust Laws and Procedures made this same recommendation in its report to the President.)

(2) It expands and clarifies the Act's antitrust exemption for export trade associations, and provides an antitrust exemption for export companies formed under Title I of the Act.

(3) It requires that the antitrust immunity be made contingent upon a preclearance procedure.

(4) It transfers the administration of the Act from the FTC to the Department of Commerce.

(5) It creates within the Department of Commerce an office to promote the formation of export trade associations and trading companies.

(6) Finally, it provides for the establishment of a task force whose purpose will be to evaluate the effectiveness of the Webb-Pomerene Act in increasing U.S. exports and to make recommendations regarding its future to the President.

We note that, as pointed out by Senator Danforth in his comments upon introduction of this legislation, with the exception of the requirements in paragraphs (1), (4), and (6), of section 2(a) of the Act (provisions which impose additional criteria for eligibility in addition to those found in the standards of the current Webb-Pomerene Act) the substantive law of antitrust as modified by the amended Webb-Pomerene Act has not been altered by S. 144. Instead, these amendments are simply a codification of court interpretations of the Webb-Pomerene exemption to the domestic antitrust laws. Also, according to testimony by a spokesman for the Antitrust Division of the Justice Department during hearings on last Congress' legislation, these amendments are consistent with the present enforcement policy of both the Department of Justice and the Federal Trade Commission.

However, we are aware that during debate on S. 2718 last year critics questioned the needs for amending this section of the Webb Act if, as we have just stated, these amendments are nothing more than a codification of not only current judicial understanding of Sec. II of the Webb Act but also the enforcement intent of both the Department of Justice and the Federal Trade Commission.

In response to this criticism, we would point out that the record clearly evidences that these amendments are necessary in order to provide certainty to the business community in their international trade activities, assuring them that their activities do not run afoul of domestic antitrust laws. This we believe will alleviate as a deterrent to broader utilization of the Webb-Pomerene Act what has previously been perceived by the business community as the Department of Justices', as well as the Federal Trade Commission's thinly veiled hostility toward Webb-Pomerene associations.

Closely allied with the issue of certain antitrust law exemption for export trading companies formed under the auspices of S. 144 is the question of who would be able to bring an antitrust complaint against such an export trading company. Sec. 4(e)(3) of the Act provides that only the Department of Justice or Federal Trade Commission has standing to bring a cause of action in court against a trading company or Webb association for violation of sec. 2 of the Act. Therefore, apart from the complained against activity being ultravires to the certification, a private party has no standing to bring suit. We fully support these provisions.

Additionally, Sec. 205 of S. 144 authorizes the Secretary of Commerce, with the concurrence of the Attorney General and the Chairman of the Federal Trade Commission, and after a period of public comment, to formulate and publish proposed guidelines to be applied in determining whether an association, its members, and its export trade meet the statutory requirements that would be established by this bill.

Additionally, we strongly support the expanded export trading company concept embodied in S. 144. We believe that S. 144's expansion of the scope of export trading companies current activities under Webb-Pomerene to include both goods and services is a major and significant improvement. It is apparent from this provision that the sponsors of this legislation have recognized that a greater and greater portion of the U.S. economy deals in the service sector, and, therefore, it is entirely appropriate that such service activities be included under the provisions of this legislation.

Finally, we commend and strongly support the requirement of confidentiality for applications and annual reports required under S. 144.

V. CONCLUSION

In conclusion, we commend you Mr. Chairman, as well as the other cosponsors of S. 144 for your legislative initiative in this area.

The expansion of currently permissible activities under Webb-Pomerene to include services in addition to goods is of vital importance if the U.S. is to remain an aggressive and effective competitor in the ever expanding global economy. Additionally, clarification of the antitrust laws in this area, specifically those concerning which government agencies will be empowered to enforce such laws, will remove the legal uncertain-

ties which heretofore have posed significant, and for many insurmountable, barriers to active involvement in the export market.

As we have stated, by restructuring the contours of export trading company activities, this legislation will provide the vehicle for increased export activity. However, the active and integral involvement of banks and other financial institutions in export trading companies is the absolutely essential element needed to power this vehicle. We believe that these two elements working together are the necessary and sufficient requirements of an effective export trading company bill.

We have noted that earlier versions of this legislation contained a third title which would have extended the tax deferral available under the DISC (Domestic International Sales Corporation) provisions of the tax code to exports of export trading companies, including exports of services. Moreover, it would also have allowed in some cases the use of the subpart S of the tax code which permits certain passthroughs to shareholders to closely held corporations. However, we understand that the sponsors of S. 144 have for jurisdictional reasons this time decided not to include Title III in this particular piece of legislation, instead apparently anticipate introducing a revised version of Title III as a separate bill. In our testimony on these provisions during last Congress' hearings on S. 2718 we for the most part felt very favorably toward the addition of such provisions to the Internal Revenue Code and continue to do so.

Finally, we thank this subcommittee for affording us the opportunity to relate the experiences of Acme-Cleveland and the U.S. machine tool industry in the export market. We believe that the proposals contained in the bills we have addressed today, in conjunction with the improved export administration controls and executive branch international trade reorganization plan will do much to encourage and promote overseas trade by both experienced and new exporters. We thank the Subcommittee for its attention and would be happy to respond to questions.

EXPORT COAL: THE GREAT LAKES ALTERNATIVE

● Mr. GLENN. Mr. President, the world coal study recently concluded that even moderate economic growth worldwide over the next 20 years will require tripled world coal use and a tenfold to fifteenfold increase in world steam coal trade in order to meet energy needs.

At present, however, America's ability to meet heightened demand for coal exports is being impaired by congestion at U.S. coastal ports and by competitive disadvantages caused by excessive delays in the loading of coal onto ships.

The recent surge in steam coal exports has created severe problems. With demurrage charges ranging upward from $10,000 to $20,000 daily, the cost of delaying a vessel for days or weeks can be enormous. Let me stress that these are not future problems; they are with us today. We continue to receive reports of dozens upon dozens of ships—often totaling 100 or more—waiting their turn to load export coal at major east coast ports.

This situation is more than just unfortunate; at a time when our coal industry has unused capacity and numerous unemployed workers, it is completely unacceptable. The demand for coal is clearly growing. But if we are to meet that demand, we must upgrade our transportation infrastructure and be better able to move our coal to ports with sufficient capacity. Successfully marketing U.S. coal overseas requires that we be able to convince potential buyers that the problems of congestion and inadequate facilities can and will be resolved.

Unfortunately, previous efforts to upgrade our coal-loading capacity have overlooked the substantial contribution that can be made through the ports of the Great Lakes and the St. Lawrence Seaway.

A recent study prepared by the Maritime Administration's Great Lakes Region states:

The demand for export U.S. steam coal is increasing. Consideration should be given to alternative U.S. coastal routes in order to meet this increased tonnage and to maintain the U.S. competitive position in the world market place. As the market for steam coal increases the most logical first step in meeting that demand is to use all competitive existing port facilities and transportation routes including the Great Lakes-St. Lawrence Seaway System.

Mr. President, Seaway Review is the excellent magazine of the Great Lakes-St. Lawrence Seaway transportation system. In the winter 1981 issue, there appears an excellent article by D. Ward Fuller, executive vice president of the American Steamship Co. Mr. Fuller presents an alternative solution to our present problems—the Great Lakes-St. Lawrence Seaway alternative. I ask that Mr. Fuller's article be printed in the RECORD, and I commend it to the attention of my colleagues.

The article follows:

EXPORT COAL: THE GREAT LAKES ALTERNATIVE

(By D. Ward Fuller)

The United States presently exports more coal than any other country in the world, and with over 30 percent of the worldwide reserves, it is well positioned to maintain its leadership position far into the next century.

In 1980 we witnessed an explosion in demand for steam coal to Europe and Far Eastern utilities brought upon by a combination of circumstances including the Iranian crisis, a doubling of OPEC oil prices, growing concerns over nuclear power, as well as a commitment by the free world to shift away from imported oil.

But as demand has accelerated, numerous questions have been raised about the ability of America's domestic transportation system and its port facilities to handle current export coal traffic, let alone the anticipated growth in this valuable export commodity. From Forbes to Fortune we have read about the congestion at our Atlantic ports, and numerous task forces and studies have analyzed the East and West Coast and the Gulf, searching for solutions to meet this growing demand and alleviate the current pressures. However, one viable solution has been largely overlooked by those seeking answers to this transportation bottleneck, i.e., the Great Lakes/St. Lawrence Seaway alternative.

It is a transportation system that is in place today, well experienced in the movement of coal, and capable of moving millions of tons to foreign buyers at meaningful cost savings over comparable movements in 1980.

The long-awaited demand for this frequently overlooked energy resource finally surfaced in 1930. The National Coal Association forecast for overseas exports of U.S. coal in 1980 stands at 70 million tons, an increase of over 50 percent over 1979. By 1990, this figure is estimated to be between 125 and 150 million tons annually.

And according to the Director of the International Energy Agency, the U.S. could be exporting 300 million tons of coal annually by the year 2000. A European Economics Community report issued in 1980 said the community's coal consumption would double by the year 2000 while its coal imports would reach 280 million tons annually by the year 2000, or quadruple the 1980 imports.

Finally, the World Coal Study, compiled by 16 nations, estimated that even moderate economic growth worldwide over the next 20 years would require tripled world coal use and a 10 to 15 fold increase in world steam coal trade to fulfill energy needs. Thus it would appear that the growing demand for steam coal is real and here to stay.

Inability to transport. But just as real is the large number of colliers lying at anchor at East Coast ports collecting demurrage fees upwards of $20,000 per day.

The impact has been not only to stifle the free flow of export coal but also to unnecessarily raise its price in the world marketplace. During the fall of 1980, it was reported that well over 100 colliers were waiting in line to load export coal at East Coast ports. And the average waiting time was not days, but weeks, and in a number of instances as long as one and one-half to two months with average demurrage rates amounting to $10 per ton and up.

That is a sad commentary for an industry that currently has excess capacity, hundreds of mines shut down and thousands of workers unemployed—all at a time when our country is striving to improve its national economy and its foreign balance of payments.

The barrier is certainly not demand but the inability to transport the coal once it is sold. The problems of the traditional East Coast and Gulf exporting ports appear to be a combination of limited drafts, lack of ground storage and, by modern standards, relatively slow and antiquated coal loading equipment.

A number of industrial and governmental groups have actively sought solutions to overcome the deficiencies in our transportation infrastructure and port facilities so as to alleviate this bottleneck for export coal. The International Energy Agency set up a Coal Industry Advisory Board.

The White House organized an Interagency Coal Export Task Force. The American Coal Exchange was formed by the investment community and the Senate Energy and Natural Resources Committee held hearings throughout the summer. Legislation has been sponsored, books have been written and a plethora of articles have appeared in a wide array of publications.

Unquestionably, progress has been made and numerous investment plans have been announced for St. Louis, New Orleans, Savannah, Moorehead City, Hampton Roads, Baltimore and Philadelphia. Unfortunately, these plans will require large amounts of both time and capital to bring them to fruition.

An alternative and an opportunity. But in spite of all the research, the studies, the task force groups and the discussions, one very logical remedial alternative has largely been overlooked—the Great Lakes/St. Lawrence Seaway alternative.

SUMMARY DELIVERED PRICES—ESTIMATED PRICE OF U.S. EXPORT COAL TO WESTERN EUROPE

Great Lakes port	Origin State	Rail route	Ocean-port	Maximum vessel size (dead-weight tons)	Delivered price[1]
Western coal:					
Superior, Wis.	Wyoming	Burlington Northern	Quebec City	100,000	[2] $44.56
			Direct ocean top-off	33,000	[2] 44.77
(St. Louis)	do	do	New Orleans	45,000	48.35
Appalachian coal:					
	Pennsylvania	B. & L. E. /Chessie	Baltimore	60,000	51.36
	Ohio	do	do	60,000	52.68
	do	do	Newport News	60,000	54.18
Erie, Pa.	Pennsylvania [5]	(Truck)	Quebec City	100,000	[2] 55.38
	Ohio	N. & W	Norfolk	80,000	55.47
Conneaut, Ohio	do	B. & L. E	Quebec City	100,000	[2] 56.65
Toledo, Ohio	do [5]	Chessie	do	100,000	[4] 57.72
Sandusky, Ohio	do [5]	N. & W	do	100,000	[2] 58.26
Ashtabula, Ohio	do [5]	Conrail	do	100,000	[3] [4] 58.46
	do [5]	B. & L. E./Conrail	Philadelphia	35,000	60.10
Toledo	do	Chessie		33,000	[2] 60.70
Conneaut	Pennsylvania	B. & L. E.		33,000	[2] 60.86
	Ohio	Conrail	Philadelphia	33,000	[2] 61.47
Sandusky	do	N. & W		33,000	[2] 62.47
Ashtabula	do	Conrail		33,000	[3] [4] 62.67

[1] Includes price f.o.b. mine, inland transportation, and water carriage to destination.
[2] 33,000 dwt top-off at Quebec.
[3] Lake feeder (25k dwt) to Quebec 100k dwt.
[4] Proposed rail rate.
[5] Proposed service.

As Carl Bagge, President of the National Coal Association, so candidly acknowledged last December to a group of Great Lakes port directors, "We have made a study of the port problem, but frankly, we never looked at the potential of the Great Lakes. We simply haven't; its been off our radar scopes."

Perhaps it would be easy to criticize Mr. Bagge for having such a limited range on his radar scope, but we would be remiss if we did not accept a large part of the responsibility ourselves.

Those of us within the Great Lakes shipping community know the advantage and capabilities of the system to move Eastern, Midwestern and Western coal to Europe in a reliable and cost effective manner—we must now begin to do a better job of imparting this information to the foreign buyers and coal exporters, as well as our own coal producers and transportation specialists.

One of the principal advantages of the Great Lakes/St. Lawrence Seaway System for the movement of coal to Europe is that it is in place today, capable of moving steam coal to Europe in 1981. It may come as something of a surprise to many people that Toledo, the most westerly coal port on Lake Erie, is closer to most North European ports than Baltimore and over 1,000 miles closer than the Port of New Orleans.

The standard Great Lakes vessel is a self-unloading, dry bulk vessel that provides the least expensive mode for moving bulk material available in the United States. It is also the most fuel-efficient and environmentally clean mode of transportation. Additionally, a number of traditional oceangoing vessels come into the System each season.

The Great Lakes has a wealth of experience in the storage, transshipment and transportation of coal—a commodity moved within the system since the turn of the century. And the Great Lakes takes great pride in its innovative transportation concepts. Contained within the system is the world's most modern, automated and sophisticated intermodal transportation system for the movement of coal.

This system encompasses the intermodal movement of Western coal from Decker, Montana to Superior, Wisconsin, by Burlington Northern's 110-car unit trains and then from Superior to Detroit Edison's St. Clair, Michigan, power plant by American Steamship Company's specially designed supercolliers that automatically unload themselves at 10,000 net tons per hour.

The entire 1,700 mile rail-water movement from Montana to Michigan takes less than five days. To effect the rail-water transfer at Superior, Dr. Tobey Yu of Orba Corporation designed the Midwest Energy Coal Terminal that has the world's largest and fastest underground feed-reclaim system and a shiploader rated at 11,000 net tons per hour.

It is a coal transportation system that has proven itself to be both a conceptual and operational success.

And what about transporting clean burning Western coal to Europe? A recent Maritime Administration study concluded the Superior-Great Lakes-St. Lawrence Seaway route to be the lowest cost route when compared to the St. Louis-New Orleans-Gulf route.

Six coal handling facilities in operation. Superior is only one of six coal handling facilities on the Great Lakes. Rail-to-Water at East Chicago on Lake Michigan serves the Midwestern coal market which includes Northern Indiana, West Kentucky and Southern Illinois.

They can accommodate over five million tons annually and currently have available capacity. Lake Erie has four coal receiving ports including Toledo, Sandusky, Ashtabula and Conneaut which serve the Ohio, Pennsylvania, Kentucky, Tennessee, Virginia and West Virginia coal producing regions. Coal handling capability has recently been added at Erie, Pennsylvania, and Buffalo, New York which can handle limited amounts of coal and is studying the feasibility of a major coal transshipment facility.

Toledo has been a major coal port for over 25 years, reaching an annual peak of over 34 million net tons in 1965. There are two coal docks in Toledo, the larger, Presque Isle Docks operated by the Chessie System, can handle 20 million tons of coal annually but operated at only 55 percent capacity in 1980.

This facility provides for direct transfer of coal from hopper cars to vessel. It is served by the Chessie, C&O, B&O and Conrail, all of which have "catch all" rates similar to export rates.

The modern Conneaut facility is owned by the Bessemer & Lake Erie Railroad and provides over five million net tons of ground storage with a maximum annual throughput of 14 million net tons. B & LE serves the Appalachian coal trade between Conneaut and interior points in the State of Pennsylvania and connects with Conrail in Ohio and Pennsylvania.

Supporting its aggressive marketing effort to export Eastern coal, last summer the B & LE published a reduced level of export rates from B & LE origins and Conneaut became the first Great Lakes facility to ship coal for export to Europe.

The B & LE's export rates have been further enhanced by support from Conrail in publishing joint rates with the B & LE from Conrail origins in Ohio and Pennsylvania. B & LE has also indicated a willingness to design rail rates to meet the customers' needs through long range contracts. In addition to ground storage and blending capabilities, Conneaut has a high speed shiploader as well. All of the Great Lakes coal ports have available throughput capacity and stand ready to serve the export market.

Once the coal arrives at a Great Lakes receiving port, the coal can be transported to Europe via two transportation alternatives.

The first alternative would be to ship the coal in a self-unloading Seaway size vessel (between 21,000 and 27,000 net tons) to one of the deep water ports at the Northern end of the St. Lawrence Seaway system.

Quebec City is the only St. Lawrence River port that is currently involved in the movement of export U.S. coal. It has 1.5 million tons of ground storage with plans to expand to 3 million tons. The port can load a 100,000 dwt. vessel at a 50 ft. draft and has available throughput capacity.

Contrecour offers 60,000 tons of active ground storage and can accommodate a Panamax size vessel.

Both Montreal and Sept Iles could potentially participate in the export coal market if warranted by demand. In addition to these existing St. Lawrence ports, consideration is being given for major new transshipment facilities to be located at Gross Cacouna and Pointe Noire in Quebec.

The second alternative would be to ship coal received on the Great Lakes directly to Europe in a major Seaway-size collier or have an ocean vessel take on a partial load at a Great Lakes port and then "top off" at a St. Lawrence River port to its maximum capacity.

The advantage of running direct to Europe would be the elimination of the St. Lawrence transshipment fee as well as a European transshipment fee for coal destined for one of the 49 European ports receiving coal with restrictions similar to the St. Lawrence Seaway or ports unable to receive the jumbo colliers. At this time, only four European ports can accept colliers whose drafts exceed fifty feet—Rotterdam, Hamburg, LeHavre and Fos Sur Mer. The economic advantage of the first alternative versus the second would depend on the particular European destination.

Distinct savings via Lakes. Exactly what are the economics of the Great Lakes/St. Lawrence Seaway alternatives? To help answer this question, the Port of Toledo prepared a comparative economic analys's using both alternatives, i.e., transshipping in the lower

St. Lawrence versus sailing direct to Europe from Toledo.

In analyzing the first alternative, comparisons were made of an annual movement of 660,000 net tons of coal to Antwerp moving over Toledo for transshipment at Quebec City versus moving the same tonnage through Hampton Roads.

Both scenarios presumed use of 63,200 dwt. ocean bulker carrying 60,000 net tons at $15,000 per day excluding fuel. A delay factor of 30 days was used at Hampton Roads versus two days at Quebec City, a realistic assumption based on 1980 operating experience. Due to the excessive delay time and longer distance from Hampton Roads (over 500 miles), the vessel in our example could only make six round trips in a year out of Hampton Roads compared to 11 round trips from Quebec City.

Thus, while the vessel could carry the full 666,000 net tons out of Quebec City, the same vessel could only carry 360,000 net tons out of Hampton Roads, necessitating the use of a second vessel for five more trips.

After calculating in the cost of moving the coal from Toledo to Quebec City in a self-unloading vessel, the Seaway tolls, and the transshipment fee at Quebec City, the movement out of Toledo would effect a savings to the coal purchaser in excess of $7.50 per net ton or almost $5 million on the entire movement in our example.

In analyzing our second alternative, direct to Europe from Toledo, actual cost figures were made available from a shipper after he became aware that his vessel could have been loaded at Toledo rather than Norfolk. The small spot contract shipment from Norfolk to Leghorn in a 19,400 dwt. bulker could have been loaded at Toledo effecting a savings in excess of $10 per ton after factoring in the actual amount of demurrage paid.

Although the amount of savings may vary one way or another depending on the actual delay experience of a particular vessel, these examples do strongly indicate that the Great Lakes/St. Lawrence Seaway is a viable alternative for transporting coal to Europe. The findings of these examples are supported by a recent Maritime Administration study which indicated that if a $5 to $10 per ton vessel demurrage charge was to be added to the East Coast delivered price, the Great Lakes would be extremely cost competitive in all cases analyzed. Additionally, the Maritime Administration concluded that Great Lakes ports could be even more competitive if a lower level of export coal rail rates were established from origin mines to Great Lakes ports.

This is not to suggest that the Great Lakes/St. Lawrence Seaway System replace the East Coast or Gulf ports; they are needed as are the proposed improvements and modifications.

It is intended to suggest, however, that the Great Lakes/St. Lawrence Seaway System can be an active and beneficial participant in the export coal movement. With the projected forecasts for export coal, there should be enough demand for all of our port facilities to participate. And logic would seem to dictate that the more efficiently and effectively we can transport our coal to foreign buyers, the lower the ultimate cost.

And the lower the ultimate cost, the greater the likelihood that the international market will purchase more of our coal. In short, everybody wins if we utilize all of our port facilities—the coal industry, the railroads, the ports, the shippers and the buyers.

The System is now functional, it is experienced in handling coal, and the economic incentives are apparent. 1980 was the year the media and our elected officials rediscovered export coal; hopefully, 1981 will be the year they rediscover America's Fourth Seacoast.

MAJOR COAL IMPORTING COUNTRIES

Coal, Algeria, Argentina, Australia, Belgium, Brazil, Canada, Chile, Denmark, Egypt, France, Guatemala, Indonesia, Ireland. Italy, Japan, Lazaro Cardenas Mx, Netherlands, Netherlands Antilles, New Caledonia, Norway, Peru.

Philippines, Port Talbot, Rep. of South Africa, Republic of China, Republic of Korea, Romania, Spain, Sweden, Turkey, United Kingdom, Venezuela, West Germany, Yugoslavia.

COKE

Balboa, Brazil, Canada, Colombia, Denmark, France, Ghana, India, Italy, Jamaica, Japan, Mexico, Netherlands, Norway, Romania, United Kingdom, Venezuela, West Germany, Yugoslavia.

WHY NOT A GREAT LAKES TRADE COMMISSION ON COAL?

The Great Lakes/St. Lawrence Seaway System may just be the best kept international transportation secret in the world today.

Perhaps now is the appropriate time to form a Great Lakes Export Coal Trade Commission comprised of port directors and vessel operators to put together a detailed presentation delineating the entire system and its many fine advantages and attributes.

Special attention could be given to its existing capability to accommodate the movement of Eastern, Midwestern and Western coal to Europe in an economical and expedient manner. After initial presentations to our domestic coal producers, our elected representatives and appropriate agencies in Washington, D.C.—not to mention those brokers and exporters in Manhattan—could travel to Europe to meet with foreign coal buyers in Sweden, Norway, Denmark, the Netherlands, West Germany, Belgium, France, England, Ireland, Portugal, Spain and Italy.

We have a good story to tell and the Trade Commission just may find a number of interested listeners, both at home and abroad.

COPING WITH TERRORISM

Mr. SCHMITT. Mr. President, the Reagan administration has put the world on notice that the United States will not tolerate terrorism against our citizens. This Senator supports that policy. The danger, however, is that we may not be prepared to effectively prevent or deal with terrorist acts.

We have become accustomed to classifying hostage taking, skyjackings, and the bombing of buildings as major terrorist activities. The fact is that terrorism spans a whole spectrum of activities, many of which are far more extensive in their damage and far more difficult to control. As time passes, these types of terrorist activities will become more and more possible and attractive to terrorist groups.

Robert Kupperman, executive director of the Georgetown University Center for Strategic and International Studies, discusses some of these possibilities and the need for contingency planning in this area in an article which appeared in the March 18 issue of the New York Times. Mr. Kupperman is eminently qualified in this field and is the coauthor of "Terrorism—Threat, Reality, Response" and served as director of the Reagan transition team for the Federal Emergency Management Agency (FEMA).

Mr. Kupperman argues that we are entering into a period of what he calls low-intensity warfare. While a tough policy is needed to deter terrorism, just as important is the need to understand the motivation of terrorists and to have the necessary tools to combat them. The last thing we want to do is to provide a President with only the options of giving in to terrorists or responding with a major military action. FEMA, our intelligence community, law enforcement authorities, and various other agencies of Government must begin planning for the possibilities of terrorism being used against U.S. citizens on American soil.

The article in the New York Times serves to initiate a discussion of these various issues. It is now the responsibility of the administration and the Congress to begin formulating policies in this area.

Mr. President, I submit for the RECORD the article by Robert Kupperman entitled "Coping With Terrorism."

COPING WITH TERRORISM

(By Robert H. Kupperman)

WASHINGTON.—The United States has not yet experienced anything like the full potential of international terrorism. And we are quite unprepared to absorb that impact because of our current attitudes, lack of organization, and lack of contingency planning.

Terrorist operations are becoming more sophisticated and, at times, more technologically oriented. While nuclear or biological terrorism may be discounted in the near future, it is difficult to ignore the possibility that Palestinian terrorists or other groups will attack highly vulnerable networks, such as an electric-power grid, and darken a large metropolitan area for weeks. The United States Government has given little thought to preventing or dealing with extraordinary acts of terror.

Toughness is the generic prescription but no dogmatic policy is feasible. Proffering a magical remedy merely increases the risk of terrorists' accepting the Government's challenge, changing the nature of their tactics, and placing the United States in an untenable situation.

It may be painful but correct to say that the United States never again will pay tribute to hostage-takers—and, as a result, write off the lives of future hostages. However, it is foolhardy to believe that a rigid, no-concessions, punitive policy would succeed if terrorists were threatening a large city with a nuclear weapon or biological agent.

The principal security problem of this decade is low-intensity warfare, especially terrorism. President Reagan and Secretary of State Alexander M. Haig Jr. have made terrorism a crucial issue. They have correctly taken a tough line, promising swift retribution against nations or groups taking Americans hostage, and indicting the Soviet Union for sponsoring international terrorism.

Whatever the degree of Soviet support of terrorist groups, there is no question that the Soviet Union has for years sought to destabilize Western governments, and that now terrorism has proved cost-effective in achieving that end. While Americans should be outraged, moral indignation about well-known Soviet practices is of marginal value. Rather, the United States must recognize terrorism for what it is and deal with it realistically.

If the United States and other Western democracies are to cope with terrorism, they

must understand that it cannot be eradicated without the prospect of inflicting serious self-injury. Terrorism is a theatrical, well-choreographed drama exploiting the mass media in order to disrupt government and generate fear.

What can be done? Part of the prescription lies in attitudes—the United States must deal with international and domestic terrorist attacks as national-security problems, not just isolated acts of violence.

Good intelligence-gathering appears fundamental. Yet, even timely information may not be enough by itself to avoid situations with only two choices: to turn the other cheek, or take a disproportionately large military action. No President should be faced with such extremes and have no intermediate course of action.

It has been suggested by various Government officials, present and past, that the United States must have an agile special-operations force, as well as reliable diplomatic and logistical support, in order to take covert action against terrorist camps in any part of the globe and to deal adroitly with other proxy-warfare operations such as insurgencies. Such operations must be undertaken with the utmost discretion and care. For example, they must signal regimes aiding terrorists that the United States will take drastic action if they support terrorism within the United States.

Contingency planning is basic if America is to meet the challenges ahead. Despite our best efforts, the United States may be assaulted. More hostage situations could occur, a commercial jetliner might be shot down with a rocket, or a city's electrical power might be attacked, as was attempted in Rome after the Red Brigades' slaying of Aldo Moro, the former Prime Minister.

Paranoia about terrorism need not prevail, for coping with the consequences of a major terrorist act is analogous to dealing with those arising from other emergencies, such as natural disasters and large industrial accidents. At present, the United States is prepared to deal effectively only with terrorist incidents of little consequence.

We need to overhaul our counterterrorism effort. A small task force of experts outside of the Government should review the program and make practical recommendations. If, as the Carter Administration did, President Reagan were to ask the antiterrorism bureaucratic machinery to review itself, we would receive a pablum-like report suggesting that nearly all is well. Unfortunately, it is not.●

COMMENDATION OF DR. ERNST WYNDER

● Mr. D'AMATO. Mr. President, I rise to commend Dr. Ernst Wynder, who because of distinguished accomplishments in medical research is the recipient of the first annual New York State Health Education and Illness Prevention Award. Dr. Wynder was accorded this great honor on February 25 of this year by Gov. Hugh Carey of my State.

Currently, Dr. Wynder is serving as president of the American Health Foundation in New York, and as professor of clinical medicine at New York Medical College. Over the years he has distinguished himself as a pioneer in cancer research and preventive medicine, and has written more than 300 publications on those subjects.

Thirty-one years ago, Dr. Wynder carried out the first epidemiological study which linked lung cancer with cigarette smoking, and also was a leader in studying the relationship between nutritional deficiencies and cancer and heart disease.

We owe a great debt to men such as Dr. Wynder. Because of the advances they have made in preventive medicine, Americans are living longer and healthier lives. Preventive medicine is our best hope to hold down the spiraling costs of health care to our people and our Government.

Mr. President, it is with great pride that I recognize the accomplishments of this fellow New Yorker and pay tribute to this outstanding American physician for all he has done to help our people.●

REAGAN SHOULD ADD GOVERNMENT CORRUPTION TO HIS HIT LIST

● Mr. DECONCINI. Mr. President, I would like to call the Senate's attention to an article which appeared in the February 26, 1981, edition of the Boston Herald American. Authored by Clark Mollenhoff, a journalism professor at Washington and Lee University and former national correspondent for the Des Moines Register well known to most of us, and Greg Rushford, a Washington-based freelance writer, the article makes a succinct and convincing argument in favor of President Reagan adopting a strong policy toward combating organized crime and, in particular, government corruption.

Without question, and I am sure my colleagues will agree with this assessment, a forceful policy against organized criminal activity in the United States has been absent from the Federal Government since the days of Attorney General Robert F. Kennedy. I would like to echo the sentiments contained in this article, and strongly urge the President to adopt this battle as a top priority. With that in mind, I ask that the article be reprinted in the RECORD.

The article follows:

REAGAN SHOULD ADD GOVERNMENT CORRUPTION TO HIS HIT LIST

(By Greg Rushford and Clark Mollenhoff)

If Lincoln Steffans, the pioneering investigative reporter who muckraked American cities at the turn of the century were to return today, he would feel right at home. Steffans could update his "shame of the cities" series to include entire states and the federal government.

Where politicians and public building contracts have been concerned, the Massachusetts special corruption commission report convincingly demonstrated that the state has long been "for sale." This is only a small part of a disturbing national pattern.

In recent years there have been equally convincing exposes of entrenched corruption, ranging from the traditional "mob" to crooked political and business establishments, in such states as New York, New Jersey, Pennsylvania, Louisiana, Arizona and California.

These are more than isolated local problems.

Specialists in organized crime and political corruption investigations see many nationwide links. To show how the mob operates in California, last year the San Francisco Bay Guardian took readers on a whirlwind national tour of swindles and shakedowns from Boston to Honolulu—and even across the Pacific to the Philippines.

In recent years organized crime has moved into dominant positions in segments of major industries that touch the lives of all Americans: trucking, food, banking, clothing, perhaps 10,000 businesses, according to some estimates. Illicit drug profits alone are estimated at $40 billion and considerably higher, making narcotics more profitable than any major oil company.

To compound the above dismal portrait, cynicism has been fostered when local reform efforts have been frustrated by politicians, lawyers, reluctant prosecutors and judges.

Massachusetts citizens have watched the slow pace of reforms in the aftermath of the latest blue ribbon commission. They could exchange knowing glances with their counterparts in places like New York and Pennsylvania, where special prosecutors have been openly fired by frightened politicians and corrupt legislatures. While all these exposes gather dust, corruption continues.

The answers to these frustrated reform efforts ultimately depend upon a myriad of local struggles. But there is much that could be done at the national level to help spark effective reforms.

President Reagan, if he sees the opportunity and decides that organized crime is an issue worth spending presidential time on, could make a difference.

Consider the situation the new President inherits.

The Federal Government Services Administration is riddled with corruption. The Justice Department, as Sen. Orrin Hatch, R.-Utah, has pointed out, has mishandled a long string of criminal prosecutions. Sen. Dennis DeConcini, D.-Ariz., has exposed serious weaknesses in the drug enforcement agency. Sen. Sam Nunn, D.-Ga., has done likewise in the Labor Department, which has a long track record of being unwilling to crack down on organized crime in labor unions.

None of these legislators has been able to create the kind of nationwide concern about corruption as did the late Sen. Estes Kefauver and Robert Kennedy in their crime probes of the 1950s and '60s.

But a President, particularly one with the flair for seizing an issue like Ronald Reagan, can make himself heard. If Reagan speaks out—and follows through by initiating a housecleaning in the tarnished federal agencies—he could set off a wave of reforms coast to coast. The recent flurry of attention when Chief Justice Warren Burger aired his ideas concerning the criminal justice system would pale by comparison.

Any President's time is limited. There are only so many broad themes that even a President can address and hope to be reasonably effective. President Reagan has made a good start by focusing attention on the bloated federal budget and wasteful social expenditures.

It remains to be seen whether the President will recognize how deep-seated and important the corruption issue really is, and speak and act forcefully.●

CONCORD, N.H., HONORS VIETNAM VETERANS

● Mr. HUMPHREY. Mr. President, I rise today to express my support for a resolution introduced by my esteemed colleague from Michigan, Senator RIEGLE, to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era." I am proud to be a cosponsor of this resolution.

As a country, we have never appropriately recognized the contributions and sacrifices of those men and women who served their country during a difficult period in our history. Many of them con-

tinue to suffer both the physical and emotional scars of that era. While there are still serious issues for the Congress to address which affect the Vietnam veteran such as the yet unresolved question of those listed as missing in action, the GI bill, and the agent orange, perhaps this gesture of a day of recognition will help to relieve some of the feelings of abandonment and resentment.

Such a day will provide an excellent opportunity for Americans to show to the Vietnam veterans their support and understanding. We should all be proud of our Vietnam veterans.

As one indication of the widespread local recognition of the need to honor our Vietnam veterans, I would submit for the RECORD a series of resolutions passed by the city of Concord, N.H., earlier this year.

The resolutions follow:

RESOLUTIONS

Resolution relative to recognizing Vietnam era veterans.—

Now therefore be it resolved, That the City Council of Concord wishes to thank the three million men and women who served their Country during a very trying time in our history.

Be it further resolved, That the City Council wishes to give special thanks to the men and women of Concord and New Hampshire for their service to our Country in its time of need.

Resolution relative to the possibility that North Vietnam still has American Prisoners of War.—

Now therefore be it resolved, That the City Council of Concord respectfully requests the Congress of the United States to: Investigate and insure that no Americans are presently held by the North Vietnamese. If at all possible to resolve the Missing in Action question. (1,359 still unaccounted for)

Resolution relative to Thanking Vietnam era Prisoners of War.—

Now therefore be it resolved, That the City Council of Concord recognizes the extreme suffering and deplorable conditions under which these Brave Men survived.

Be it further resolved, That the City Council wishes to express its sincere thanks for the services these Brave Men rendered at a very difficult time in the history of our Great Land. By the following:

Declaring March 29 as a special day to commemorate the release of the last group of Prisoners of War from North Vietnam, and that henceforth on said date all flags in the control of the City of Concord shall be lowered to Half-Staff for five minutes at noon.●

SENATOR CRANSTON'S EFFORTS ON BEHALF OF NUCLEAR NONPROLIFERATION

● Mr. PELL. Mr. President, on March 17 the distinguished senior Senator from California, Mr. CRANSTON, made an important statement in the Senate outlining his concerns about the nuclear programs of Iraq and Pakistan. In that statement, Senator CRANSTON called upon the administration to seek cooperation from our European friends and allies in placing more effective safeguards on nuclear cooperation with Iraq and Pakistan. I support this recommendation and hope that others of my colleagues will as well.

Today's issue of the Los Angeles Times contains a very thoughtful editorial on this subject, and I commend it to my colleagues. In order that my colleagues may have an opportunity to be made aware of the views of the Los Angeles Times on this subject, I ask that the full text of today's editorial be printed in the RECORD.

The editorial follows:

THE FRIGHTENING FUTURE

Sen. Alan Cranston (D-Calf.) warned the other day that Iraq has launched a crash program to develop nuclear weapons and that Pakistan will be able to produce a nuclear arsenal by the end of 1982.

The prospect is frightening. The Indians would react to a Pakistani A-bomb by building a nuclear arsenal of their own. And, if the Iraqi program results in giving a nuclear cast to the Arab-Israeli confrontation, the dangers to world peace are obvious.

Although the timetable that Cranston described is a bit shorter than most earlier projections, the Iraqi and Pakistani nuclear programs have been a matter of deep concern for some time. But little has been done about them, and probably won't be now.

An official of the Nuclear Regulatory Commission has confirmed the thrust of Cranston's remarks about Iraq.

It has obtained stockpiles of uranium from Portugal weapons-grade reactor fuel from France and sensitive equipment from Italy. France and Italy are training large numbers of Iraqi scientists in Europe, and the two countries have several hundred skilled technicians working on nuclear research projects in Iraq.

Iraq does not even have the excuse of needing all this for a commercial nuclear power program; it has none. The French reactor under construction is a research facility.

Cranston, who indicated that his information came mostly from U.S. government sources, acknowledged that Iraq has only a theoretical capability of building a single A-bomb this year; for several years Iraq would not be able to do much more.

However, Pakistan—which has also depended on the overt and covert importing of key materials and technology from Europe for its nuclear program—is about five years further along. Some analysts believe that the Pakistanis already have designed a nuclear weapon and are moving rapidly toward the capability to produce them.

Cranston, putting the finger on European suppliers for being dangerously careless in their nuclear aid and export programs, repeated a charge that these countries hotly deny: that Iraq successfully "blackmailed" them into trading sensitive nuclear materials and technology for oil.

The California senator urges the Reagan Administration to seek cooperation from the Europeans in placing more effective safeguards on nuclear cooperation with Iraq and Pakistan. He argues that if such cooperation is not forthcoming, American nuclear fuel and hardware should be withheld from the Europeans.

Considering the perils that would be posed by a nuclear arms race in Southwest Asia and the Middle East, it is not an unreasonable proposal. But the Administration, though worried by the situation, is in no mood to pick a serious quarrel with its NATO allies over this issue. U.S. leverage may not be strong enough at this late date to assure that such tactics would work, anyway.

The dangers spotlighted by Cranston are frightening real, nonetheless. If President Reagan and Secretary of State Alexander M. Haig Jr. are as worried about the problem of terrorism as they say, they cannot avoid the responsibility for making a major new effort to avert the catastrophe that would be posed by the spread of nuclear weapons in one of the world's most volatile areas.

If friendly coercion isn't practical, it's up to the Administration to come up with something that will work.●

REPORT OF THE SELECT COMMISSION ON IMMIGRATION AND REFUGEE POLICY: A SHORTSIGHTED EFFORT

● Mr. SCHMITT. Mr. President, The Select Commission on Immigration and Refugee Policy has recently issued its final report to the President and Congress. Unfortunately when reviewing the problems caused by illegal migration, the Commission focused almost exclusively on enforcement of existing law without any substantive analysis of what that would mean. The Select Commission failed to discuss the impact of a strict immigration policy on Mexico and the strategic implications that would flow from such a policy. The Commission's report also refused to seriously treat the issue of domestic labor shortages for certain types of employment. These are complex issues and the short shrift given to them in the Commission's report—2½ pages out of a 453-page report—does not do justice to the arguments on either side.

During this statement, I am going to discuss the section of the report which discusses the temporary worker program alternative and amplify the discussion, where appropriate, with particular reference to S. 47, the United States-Mexico Good Neighbor Act of 1981, which I introduced on January 5, and now cosponsored by Senators GOLDWATER, HATFIELD, LAXALT, LUGAR, and MCCLURE. Furthermore, over 60 percent of undocumented workers in the United States emigrate from Mexico, the discussion will deal solely with workers from that country.

I. THE SELECT COMMISSIONS' REPORT

The Select Commission stated—

The Commission has heard testimony in favor of and opposed to the introduction of a new temporary worker program as a solution to undocumented/illegal migration. Some persons have argued that an expanded temporary worker program would help ensure the success of the proposed legalization and enforcement programs and even that a large scale temporary worker program could substitute for them. They have reasoned that a large-scale program would give employers access to a supply of low-skilled, seasonal workers, and would cushion the impact of enforcement on major sending countries whose nationals would no longer have access to the U.S. labor market through illegal channels.

This does describe some of the major reasons why a temporary worker program should be adopted. The Commission, however, then went on to state arguments against such a program saying—

Others who testified before the Commission have maintained, however, that a large-scale temporary worker program would still fail to satisfy the pressures for migration in these countries. Some experts have pointed to the failures of the bracero program, the United States previous experience with a large-scale temporary worker program. This program employed between four and five million Mexican agricultural workers over a 22 year period. Although the program was instituted with strict provisions guaranteeing worker rights and privileges, these provisions fre-

quently were violated. In addition, the existence of a large-scale temporary worker program did not stop employers from hiring undocumented workers. The flow of these migrants continued until a massive repatriation program—Operation Wetback—was begun and the bracero program was greatly expanded. Experts have further testified that temporary workers in European countries—so called questworkers—who were brought in during times of economic growth often became permanent additions to the host societies, even when their labor was no longer needed. They argue that temporary worker programs have often precipitated additional illegal movement when families tried to reunite in the host country and that these programs have also created internal, political and social problems. In general, these opponents find any large-scale temporary worker program, especially when entry is limited by marital status, geography and the nature of the proposed employment, an ineffective means of reducing undocumented/illegal migration.

This analysis, which is intended to negate the policy behind S. 47, fails for three reasons:

First. S. 47 is not structured like the often abused bracero program. No employee-employer contract is required by S. 47.

Second. S. 47 does not resemble European plans disregarding cultural differences.

Third. Most importantly, the present-day illegal aliens are already conforming to the migratory incentives of the temporary worker program without threat of enforcement. This final issue will be discussed in more detail later.

Finally, the report presented socio-economic arguments as follows:

The Commission has also heard arguments that the economic and social effects of temporary worker programs must be weighed apart from their effects on illegal migration. Supporters of such programs have testified that U.S. workers are not readily available for many jobs and that the employment of foreign workers is the only alternative to labor shortages. In response, their opponents have argued that U.S. sources of labor do exist, but employers prefer foreign workers because they are more docile and will accept lower wages and/or inferior working conditions. Large-scale temporary worker programs have also been criticized by those who believe that such programs tend to identify some kinds of work, generally perceived to be undesirable, with certain foreign nationals or particular ethnic groups. The Commission has carefully weighed these arguments. Most Commissioners has concluded that the Commission should not recommend the introduction of a large-scale temporary worker program.* Some oppose the concept of such a program under any circumstances. Others believe that until the precise effects of the proposed recommendations to deal with undocumented/illegal migration are known, the institution of a new temporary worker program would be inadvisable.

To control illegal migration, the Commissioners proposed:

Better border and interior controls;

Economic deterrents in the workplace; and

Once new enforcement measures have been instituted, legalization of certain undocumented/illegal aliens who are already in this country.

*See Recommendation VI.E. for Commission proposals regarding changes in the current H–2 program.

These proposals are, in my opinion, shortsighted for they are:

Unnecessarily expensive; projected to cost in excess of $60 million, but in fact would need to be far greater;

Will cause great harm to many small businesses who will be without labor and then forced out of business;

Employer sanctions will cause an increased regulatory/enforcement burden on American businesses at a time when the Reagan administration is attempting to reduce that burden;

The sanctions approach will probably fail since the undocumented workers will use counterfeit identity documents; and

The Commissioners completely ignore the foreign policy implications of stringent enforcement at this time on Mexico.

II. MIGRATORY CAUSES AND EFFECTS

Nowhere else in the world does such an industrialized nation as the United States share such a lengthy land border with a significantly less developed country like Mexico. This naturally has a decided impact on the migration problem. Because of a very young population and unequal opportunity at home, Americans tend to emphasize the fact that many Mexicans are "pushed" to leave home in search of work. Those who view this so-called push factor as the primary cause of illegal migration believe Mexico should do more to relieve its internal problems and not use migration as a "safety valve."

Mexican policymakers, however, believe that migration would not take place if there was no need for the migrants labor. Thus they are "pulled north" by the promise of better jobs. Like most policy arguments, both factors undoubtedly contribute to the migratory problem. Poor economic conditions do "push" many Mexicans to look elsewhere for work and better unfilled jobs in the United States "pull" them in our direction.

The most unusual fact revealed by modern research on this subject—notably, "Mexican Migration to the United States: Causes, Consequences and U.S. Responses," by Dr. Wayne Cornelius, now of the University of California at San Diego—is that most migrants do not come to stay. Recent studies indicate the return rate is very close to 90 percent (see Cornelius at p. 25). The typical migratory worker is a young male with a sixth grade education who comes alone. These young men are the group most likely to attempt to evade increased enforcement efforts. Thus migration should not be viewed as a steady increase in permanent residents, as the Commission does, but more realistically as an ebb and flow with some returning, some coming. The difficulty in recrossing the border undoubtedly causes part of the permanence problem, that is, migrants becoming permanently but illegally located in the United States.

The Commission did corroborate what a number of other studies have previously confirmed; namely, that illegal aliens do not place a substantial burden on social services. The Commission noted that the undocumentados have a high rate of taxpayment and pay for medical services in generally the same percentage as the domestic population.

Finally, the Commission notes that economists are divided on whether the presence of illegal aliens depresses domestic wages or displaces U.S. workers. As stated earlier, some economists maintain that the illegal alien often preserves some business' success, thus assisting in job maintenance. Certainly, products are introduced into the consumer system which otherwise would not be or would cost far more to produce.

III. S. 47 THE UNITED STATES-MEXICO GOOD NEIGHBOR ACT OF 1981

The viability of S. 47 is enhanced by the fact that it reflects reality and would, in large part, be self-enforcing. Since most migrants return home now after an average stay of 5½ months, there is no demonstrated reason to doubt that visa holders would unduly abuse their 240-day legal stay in this country any more than as illegals.

By freeing workers to seek work nationwide—except in those areas certified by the Secretary of Labor to have adequate domestic workers—the abuses prevalent under the bracero program would be eliminated. A legal status would guarantee the visa holder full protection of U.S. law, especially important in wage rates and safety conditions. Such workers would be free to unionize as well. The legal status would thus insure no adverse domestic wage depression or job displacement effects. By diverting an illegal stream of migrants into a legal program, scarce enforcement assets could be more efficiently utilized. Along with other Immigration and Naturalization Service improvements, such a program over the next 10 years would, in my opinion, do a better job of controlling illegal migration with far less of a negative strategic impact than the Commissions proposals.

Finally, some have argued that a temporary worker program creates a permanent underclass of cheap labor degrading U.S. citizens of that ethnic background. Such a view of S. 47 would be a mistake. The bill has a 10-year sunset provision so that it would automatically expire. This section gives Mexico fair notice that the migration safety valve will end soon. Meanwhile, a decade is given to cushion the adverse domestic and international impact certain to flow from a decision to terminate the use of Mexican nationals in the U.S. economy.

Mr. President, I request that S. 47 and a factsheet explaining the bill be printed in the RECORD.

S. 47

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That this Act may be cited as the "United States-Mexico Good Neighbor Act of 1981.

FINDINGS

SEC. 2. The Congress finds that—

(a) strong economic and political cooperation between the United States and Mexico will benefit not only the people of these countries, but will also help to eliminate western hemisphere tensions;

(b) the root cause of illegal migration from Mexico into the United States is the lack of reasonable alternatives for economic well-being in Mexico relative to those in the United States;

(c) the mutual benefit of past economic cooperation through legal work programs and investment opportunities is well documented;

(d) in order to eliminate the present large and uncontrolled influx of undocumented workers a system of temporary legal admissions should be established;

(e) the vast majority of jobs that will be taken by Mexicans are in the agricultural and service industries where jobs are not now greatly in demand by American workers;

(f) many of the short-term economic needs of Mexicans and the short-term labor needs of American agricultural and service industries can be met by a temporary worker visa program for Mexicans seeking temporary employment in the United States;

(g) the value to Mexico of temporary employment of Mexican workers in the United States is in the direct flow of dollars into its economy and in the increase in skills within its labor force;

(h) a program of temporary worker visas would encourage the existing temporary nature of most Mexican migration into the United States;

(i) attempts to seal our vast border with Mexico to the flow of migrants are doomed to failure and only increase the exploitation of such workers by smugglers and unscrupulous employers;

(j) employer sanctions against the hiring of illegal Mexican migrants could result in discrimination against Hispanic Americans and/or in an unprecedented national identification system; and

(k) it is necessary to establish a legal framework for Mexican labor in the United States in order to harmonize the use of such workers, to prevent abuse of them by smugglers and unscrupulous employers, to better protect American workers from unfair competition, to reduce the flow of illegal migrants, and to permit a better understanding of the scope of the opportunities and problems related to Mexican workers in the United States and Mexico.

ESTABLISHMENT OF VISA PROGRAM

SEC. 3 Section 214 of the Immigration and Nationality Act is amended by adding the following new subsection at the end thereof:

"(e)(1) The Attorney General, in consultation with the Secretary of State, shall by regulation establish a program for the admission as nonimmigrants into the United States under section 101(a)(15)(M) of Mexican nationals who desire to temporarily perform services or labor in the United States. The regulations shall establish methods for establishing monthly and annual numerical quotas for the issuance of temporary worker visas in accordance with subsection (g). Visas shall be made available on the basis of such quotas to qualified applicants in the chronological order for which they are applied. Such visas shall permit each alien to temporarily perform services or labor within the United States for a period not to exceed 240 days during any calendar year, such period not necessarily a 240 day consecutive period. Such aliens shall not be required to obtain a petition of any prospective employer within the United States in order to obtain such a visa. Such visas shall not limit the geographical areas within which the alien may be employed nor set any limitations on the type of employment for which the alien may be employed, except as provided in subsection (f).

"(2) Any alien who obtains a visa under the program established under paragraph (1) who (A) violates the restrictions with respect to the amount of time for which the alien is allowed to remain in the United States, or (B) violates any restriction required under subsection (f), shall be ineligible to obtain another visa under such program for a period of 5 years. Any alien who, after the inception of this program, enters the United States unlawfully shall be prohibited from obtaining a visa under such program for a period of 10 years.

"(f) The Attorney General, upon request from the Secretary of Labor, shall place specific restrictions on employment of aliens holding temporary work visas under this program at a specific business or agricultural site if employees or employers demonstrate that such aliens will displace available, qualified, and willing domestic workers. The Secretary of Labor shall establish the criteria under which such restrictions may be requested.

"(g) When appropriate, the Attorney General shall seek the assistance of the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of Labor in establishing the regulations under subsection (e), and in computing the annual and monthly numercial quotas for temporary worker visas, based upon the number of seasonal or cyclical workers sought by employers in the United States. In computing such quotas, the Attorney General shall also consider historical needs, availability of domestic labor, and the projected needs of prospective employers.".

UNITED STATES CONSULATES IN MEXICO

SEC. 4. (a) The Secretary of State is authorized to take such steps as are necessary in order to establish and expand the United States Consulates in Mexico in order to implement the program established in section 214 (e), (f), and (g) of the Immigration and Nationality Act, as added by section 3 of this Act.

(b) The Secretary of State shall coordinate with appropriate officials of Mexico in order to insure maximum awareness in Mexico of the nature and restrictions of the program established in section 214 (e), (f), and (g) of the Immigration and Nationality Act, as added by section 3 of this Act.

(c) The Secretary of Labor shall undertake to insure, to the extent practicable, that the nature and restrictions of the programs established in section 214 (e), (f), and (g) of the Immigration and Nationality Act, as added by section 3 of this Act are known to aliens of Mexican citizenship residing in the United States.

NONIMMIGRANT CATEGORY

SEC. 5. Section 101(a)(15) of the Immigration and Nationality Act is amended by adding at the end thereof the following:

"(M) a Mexican national who has no intention of abandoning his or her residence in Mexico who is coming to the United States for a period of not to exceed 6 months during any calendar year, for an indefinite number of such periods, to temporarily perform services or labor.".

EFFECT OF DEPORTATION

SEC. 6. Section 212(a) is amended—

(1) by inserting before the semicolon at the end of paragraph (16) a comma and the following: "except that the Attorney General shall not consent to the reapplying for admission of an alien described in section 101(a)(15)(M)"; and

(2) by inserting before the semicolon at the end of paragraph (17) a comma and the following: "except that the Attorney General shall not consent to the applying or reapplying for admission of an alien described in section 101(a)(15)(M)".

PROHIBITION ON ADJUSTMENT OF STATUS UNDER TEMPORARY WORKER VISA PROGRAM

SEC. 6. Section 245(c) of the Immigration and Nationality Act is amended—

(1) by striking out "or", and

(2) by inserting immediately after "section 212(d)(4)(C)" a semicolon and the following: "or (4) any alien described in section 101(a)(15)(M)".

REPORT TO CONGRESS

SEC. 8. The Attorney General shall report semiannually to the Congress on the temporary worker visa program established in section 214 (e), (f), and (g) of the Immigration and Nationality Act, as added by section 3 of this Act, and shall include in that report a summary of the number of visas issued under the program, the effectiveness of the program, enforcement problems related to the program, and any recommendations for legislative change in the program.

BILATERAL ADVISORY COMMISSION

SEC. 9. It is the sense of the Congress that the President should negotiate with the appropriate officials of the government of Mexico to establish an Advisory Commission on the Mexico-United States Temporary Worker Visa Program to consult with and advise the Attorney General in establishing the regulations, and in computing the monthly and annual numerical quotas, for the temporary worker visa program established under section 214 (e), (f), and (g) of the Immigration and Nationality Act, as added by section 3 of this Act.

AUTHORIZATIONS

SEC. 10. There are authorized to be appropriated such sums as are necessary to carry out the provisions of this title.

TERMINATION

SEC. 11. This program shall terminate ten years after the date of enactment.

THE UNITED STATES-MEXICO GOOD NEIGHBOR ACT OF 1979

This bill would amend the Immigration and Nationality Act to establish a temporary worker visa program between the United States and Mexico. Under the program, workers would be issued six month visas which would allow them to enter the United States to seek employment.

THE CURRENT IMMIGRATION SITUATION

The United States shares a 2,000 mile border with Mexico. In no other part of the world does a developing country with severe economic problems border such a technologically advanced country. The combination of unfilled jobs in this country and substantial unemployment and underemployment in Mexico has created a massive migration to the United States. Changes in the immigration law have caused much of this migration to become illegal. From 1942 to 1964, the bracero program admitted large numbers of Mexican workers to perform agricultural work in the United States. The end of this program and the imposition of a ceiling of 20,000 immigrant visas per year in 1976 have contributed to the problem.

Most illegal workers enter this country to seek temporary employment. They come for short periods of time, work to meet specific economic needs and then return to Mexico. They have no intention of permanently migrating to the United States.

The workers normally take jobs which are unattractive to American workers who have unemployment compensation and welfare as an alternative. While over two-thirds of illegal aliens contribute to Social Security and pay income taxes, fewer than one-tenth collect unemployment or welfare benefits, enroll their children in public schools or receive free medical assistance in the United States.

This illegal migration benefits Mexico by absorbing workers who would otherwise be unemployed or underemployed. It also helps slow migration to the overcrowded cities. Finally, Mexican workers in the United States send large portions of their income home, providing income for their families and improving Mexico's balance of payments.

PROVISIONS OF THE BILL

Findings. This section recognizes the necessity of establishing a legal framework for Mexican labor in the United States and points out the advantages of this program over other proposals.

Establishment of Visa Program. Section (e)(1). This section directs the Attorney General to establish the program in consultation with the Secretary of State. The section specifically mandates that the visas shall "permit each alien to temporarily perform services or labor within the United States for a period not to exceed 240 days during any calendar year". Further, the section disallows the requirement of a petition from a prospective employer. Finally, the section prohibits any limitations on geographical area or type of employment.

Section (e)(2). This section sets a penalty for violation of the visa restrictions of ineligibility for five years. It also sets a ten year ineligibility as a penalty for illegal entry into the United States.

Section (f). This section allows the Attorney General to put specific restrictions on employment under this program at the request of the Secretary of Labor. This request would follow a demonstration by employers or employees that aliens would displace domestic workers at a specific site.

Section (g). This section directs the Attorney General to set numerical quotas for visas, considering such factors as the number of workers sought, the availability of domestic labor and the projected needs of prospective employers.

United States Consulates in Mexico. This section authorizes the Secretary of State to expand the Consulates to implement the program (paragraph A) and act with Mexican officials to insure awareness of the program (paragraph B). It also directs the Secretary of Labor to take steps to inform Mexican aliens in the United States about the program (paragraph C).

Nonimmigrant Category. This section amends the classes of nonimmigrants in the definitions section of the Immigration and Nationality Act, 8 U.S.C. 1101 (15).

Effect of Deportation. This section amends 8 U.S.C. 1182 to prohibit the Attorney General from consenting to the readmission of an alien deported for violating provisions of this program.

Prohibition on Adjustment of Status under Temporary Worker Visa Program. This section amends 8 U.S.C. 1255 to prohibit the Attorney General from adjusting the status of a temporary worker to that of a permanent resident.

Report to Congress. This section requires the Attorney General to report to Congress semi-annually about the program.

Bilateral Advisory Commission. This section proposes the establishment of an Advisory Commission to advise the Attorney General in establishing the program.

Authorization. This section authorizes the necessary appropriations.

Termination. This program would terminate 10 years after enactment.

THE EFFECT OF THE PROGRAM

This program will bring a large proportion of Mexican labor within the law, increasing the credibility of the immigration law. As legal workers, Mexicans can insist on adequate wages and decent working conditions. By eliminating the need for smugglers and dangerous border crossings, the program will attract those workers who are currently entering the country illegally.

The program will allow U.S. employers to obtain needed workers in a free market system. At the same time, it will benefit domestic workers by changing an exploitable competitor into a legal work force, competing on equal terms. The restriction of certain worksites will insure that domestic workers are not displaced by the temporary workers, while avoiding the abuses of a prearranged contract system.

This bill recognizes that a significant number of Mexicans supplement their income by temporary work in the United States and that this country has need for such short term labor. The temporary worker visa program provides a legal framework for this situation.●

ORDER OF BUSINESS

Mr. BAKER. Madam President, is there an order for the convening of the Senate on tomorrow?

The PRESIDING OFFICER. Yes, there is; 11 a.m.

Mr. BAKER. I thank the Chair.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Madam President, in view of the fact that there are a number of requests for special orders in the morning, I ask unanimous consent that the time of the convening of the Senate on tomorrow be changed to 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATORS ON TOMORROW

Mr. BAKER. Madam President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, that there be special orders of 15 minutes each in favor in the following Senators in the following order: Senator PACKWOOD, Senator BOSCHWITZ, Senator BAKER, Senator STEVENS, Senator MCCLURE, Senator TOWER, and Senator ROBERT C. BYRD.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Madam President, I observe that the distinguished minority leader is in the Chamber.

I inquire of him if the minority is in a position to consider the two nominations on today's Executive Calendar.

Mr. ROBERT C. BYRD. Madam President, those two nominations are cleared on this side of the aisle.

Mr. BAKER. I thank the distinguished minority leader.

EXECUTIVE SESSION

Mr. BAKER. Madam President, I ask unanimous consent that the Senate proceed into executive session for the purpose of considering the nominations appearing on today's Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

The legislative clerk read the nomination of Donald I. Hovde, of Wisconsin, to be Under Secretary of Housing and Urban Development.

(By request of Mr. ROBERT C. BYRD the following statement was ordered to be printed in the RECORD:)

● Mr. PROXMIRE. Mr. President, I am pleased the nomination of Donald I. Hovde is now before the Senate. He has been very successful in all of his endeavors, including establishing his own real estate firm in Madison, Wis., and serving as president of the National Association of Realtors. I support this nomination and urge my colleagues to vote for his confirmation.

The Banking, Housing, and Urban Affairs Committee has completed a thorough review of Mr. Hovde's background and suitability to be Under Secretary of HUD, and its members also conclude that his nomination should be confirmed. I took it upon myself to contact Madison residents who know Mr. Hovde's work in order to get their impressions of his suitability for the No. 2 job at HUD. They spoke highly of his civic consciousness and commitment to local fair housing.

My constituents' approval of Mr. Hovde and his own responses to questions I put to him at the banking hearing were very important to alleviating a single concern I had about his nomination. HUD's Under Secretary must have a clear commitment to furthering fair housing. Mr. Hovde's statement that "we need an amendment to the Civil Rights Act * * * a way in which the aggrieved party can seek redress in the court system" is something to which I will hold him as we work to get a fair housing enforcement bill passed early in this session.●

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OFFICE OF PERSONNEL MANAGEMENT

The legislative clerk read the nomination of Donald J. Devine, of Maryland, to be Director of the Office of Personnel Management.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Madam President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Madam President. I ask unanimous consent that the President be immediately notified that the Senate has given consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Madam President, I ask unanimous consent that the Senate re-

turn to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Madam President, on tomorrow the Senate will convene at 9:30 a.m.

After the recognition of the two leaders under the standing order, seven Senators will be recognized under special orders for not to exceed 15 minutes each, as previously outlined and provided for.

After the recognition of the seven Senators under the special orders just mentioned, it is the intention of the leadership to provide for a period for the transaction of routine morning business.

I inquire of the Chair: After the close of routine morning business is provided for, assuming that the same is disposed of as I have just suggested, what will be the business before the Senate?

The PRESIDING OFFICER. The business before the Senate will be S. 509.

Mr. BAKER. I thank the Chair.

Madam President, the Senate then, of course, will resume the consideration of that measure. The milk price support bill will still be open to amendment. It is my understanding that a number of amendments have been stacked and will occur beginning at 2:30 in the afternoon on tomorrow. Am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Will the Chair advise me as to the number of amendments that have been provided for in that way?

The PRESIDING OFFICER. There are four amendments that have been provided for at this time.

Mr. BAKER. And rollcall votes have been ordered in each instance?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. So on tomorrow there will be rollcall votes on at least four amendments, unless the order for the yeas and nays is vacated by unanimous consent.

I fully expect that on tomorrow there will be a call for the yeas and nays on final passage of this bill, if indeed we reach final passage tomorrow, as I hope we will. There may be other amendments as well.

After the disposition of that measure the Senate will turn to such other business as may come before it by unanimous consent or which may be done without objection and in a routine way.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Madam President, it is clear to me now that there are no further amendments that can conveniently be offered this afternoon to the pending bill; and since provision already has been made for the further disposition of the amendments thus far debated, I know of no useful purpose to be served by the Senate remaining in session further this afternoon.

So, in accordance with the order previously entered, I move that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 3:02 p.m. the Senate recessed until tomorrow, Tuesday, March 24, 1981, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate March 23, 1981:

DEPARTMENT OF COMMERCE

Joseph Robert Wright, Jr., of New York, to be Deputy Secretary of Commerce, vice Luther H. Hodges, Jr., resigned.

Lionel H. Olmer, of Maryland, to be Under Secretary of Commerce for International Trade, vice Robert E. Herzstein, resigned.

DEPARTMENT OF STATE

Robert D. Hormats, of Maryland, to be an Assistant Secretary of State, vice Deane R. Hinton.

DEPARTMENT OF THE INTERIOR

G. Ray Arnett, of California, to be Assistant Secretary for Fish and Wildlife, Department of the Interior, vice Robert L. Herbst, resigned.

FEDERAL AVIATION ADMINISTRATION

J. Lynn Helms, of Connecticut, to be Administrator of the Federal Aviation Administration, vice Langhorne McCook Bond.

U.S. ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Robert Gibbons Gard, Jr., 449–36–3971 (age 53), Army of the United States (major general, U.S. Army).

U.S. AIR FORCE

The following named officer for promotion in the United States Air Force, under the appropriate provisions of Chapter 839, Title 10, United States Code, as amended.

LINE OF THE AIR FORCE

Major to lieutenant colonel

Wiles, James K., xxx-xx-xxxx.

The following officers for appointment in the Regular Air Force, in the grades indicated, under the provisions of section 8284, Title 10, United States Code, with dates of rank to be determined by the Secretary of the Air Force:

To be captain

Clymer, Gregg N., xxx-xx-xxxx.
Fowler, Donald R., xxx-xx-xxxx.
Gerhardt, Robert L., xxx-xx-xxxx.
Higgins, Kevin S., xxx-xx-xxxx.
Mandros, Harry R., xxx-xx-xxxx.

The following officer for appointment in the Regular Air Force, in the grade indicated, under the provisions of section 8284, Title 10, United States Code, with a view to designation under the provisions of section 8067, Title 10, United States Code, to perform the duties indicated, and with dates of rank to be determined by the Secretary of the Air Force:

NURSE CORPS

To be first lieutenant

Bishop, Stephanie S. xxx-xx-xxxx.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 23, 1981.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Donald I. Hovde, of Wisconsin, to be Under Secretary of Housing and Urban Development.

OFFICE OF PERSONNEL MANAGEMENT

Donald J. Devine, of Maryland, to be Director of the Office of Personnel Management for a term of 4 years.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

DAVID KEARNS OF XEROX SPEAKS ON PRODUCTIVITY

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. OBEY. Mr. Speaker, I am inserting in the RECORD today a speech delivered by David T. Kearns, president and chief operating officer of the Xerox Corp. before the National Governors Association Conference on Technological Innovation. Although the speech is lengthy, I strongly recommend it to the Members because it cuts through a great deal of the rhetoric on both sides of the productivity issue and focuses attention on some of the basic problems we face as a society.

There is no question that we must save more and invest more if we are to survive as a viable competitor on world markets. We must have a government that regulates intelligently and avoids regulation wherever possible. But those issues should not obscure all other aspects of the productivity question. We must develop a far more constructive attitude between labor and management about issues involving efficiency. We must get corporate managers to look past the next quarters profit margin, 5 to 10 years into the future. Perhaps more important than all of the above, we must break out of our current obsession with confrontation politics at every level and on every issue. If Americans view each other as their No. 1 enemy on one issue after another, there will be little energy left to make this country more efficient and productive. It will be impossible if we are not prepared to shed the rhetoric on both and left and the right which simply blames the other guy for the problem.

David Kearns makes a significant contribution toward developing the kind of dialog in which all Americans can participate without rancor and with serious thought about a future which belongs to all of us.

The speech follows:

A SPEECH BY DAVID T. KEARNS

Few of us can translate the Latin inscription on the back of our dollar bill: Annuit coeptis—be favorable to bold enterprises.

Benjamin Franklin chose the seal, and that motto for the seal. Franklin was a man of many marvelous talents . . . statesman . . . businessman . . . scientist . . . inventor. He knew that new ventures, new enterprises, were the basis of a healthy American economy. He was at heart an innovator. He knew that a good idea doesn't keep. Something has to be done with it.

It has been said that before America was a country, it was an idea. It is said, now, that time is running out on that idea, and something has to be done with it soon.

We all, now, confront the most dangerous economic crisis since President Roosevelt took office 48 years ago. What the great depression was to the 1930's, says economist Walter Heller, the great inflation is to the 1980's.

That's a bold challenge. But we are a bold people. We have turned some of the toughest challenges in history into the most successful nation on earth.

And with all our frailties, and all our faults, there is still no nation on earth that is our equal.

I detect a new mood of renewed hope, now, across the country. But there is a residue of lost hope in still too many Americans who have forgotten—or worse, have lost their conviction—that progress is our natural condition.

The old idea of progress was nothing less than a faith in our own ability to think our way out of our problems, to think of new ways to solve them. It was reaching out to shape the future, not waiting passively to see how it all turns out.

Somebody once said that even the future isn't what it used to be. Well, I'm more optimistic than that. I want to talk to you, today, about solutions, which obviously are not going to be found in the problems of our economy, but in its restoration to full health.

To begin with, let us once and for all rid ourselves of the notion that we are not as rich a country as we once were, and we're all going to have to settle for less.

It's true that natural resources are finite, and some of ours are beginning to run low. But I've been trying to remind people for some time, now, that we aren't a wealthly nation just because we were lucky enough to be blessed with rich farmlands and vast stores of oil, gas and coal.

The wealth of this nation isn't in the ground. It's in our hearts and minds—and that's a renewable source.

Certainly, we should be less wasteful of our natural resources and conserve more. But what troubles me more than that is the way we waste our real wealth—the power to generate new ideas. Instead of looking for solutions, we look for excuses to make and villains to blame.

There seems to be something in our national attitude that encourage us, every time a new problem is discovered, to look at least as hard for villains as we do for solutions.

If the problem is productivity, there is the automatic inclination to blame it on lazy workers—this despite the fact that more and more people are working at two jobs so they can support their families.

If the problem is a dirty environment, the convenient villain is corporate irresponsibility.

And if the problem is inflation, you get a choice, depending on your perspective. The villain is either greedy labor unions making unreasonable wage demands or greedy businesses raising prices unconscionably.

A certain amount of contention is both natural and healthy. It seems to be a part of the American character. We even built it into our constitutional structure and its federalism, with checks and balances between the three branches of the central government.

But we may have carried it too far.

As a nation, we can't afford to take it for granted any more that management and labor are natural enemies. We're competing with countries that hold the exact opposite view, and whose economies are growing stronger relative to ours every day.

In the same way, we should stop accepting the idea that the environmentalist and the industrialist must make war on each other. The great battleground of that war is in this city, and the soldiers of that battle are the legions of lawyers and lobbyists. The founding fathers would be appalled at the degree to which we suffer legislation and define our progress by the standards of pressure groups.

But our biggest battle is not with each other. Above all, we must come to grips with inflation, which is both the prime cause and the chief effect of virtually all of our economic problems, most notably, our sagging productivity. Or in reverse, our sagging productivity is causing and fueling inflation.

The steady decline in American productivity in the last 20 years endangers our ability to generate new wealth at home and undermines our competitive position abroad. No longer can the poor and disadvantaged count on working their way to a better life. And no longer do Americans share the great expectations of generations past.

Our children may well be the first generation of Americans who will not live better than their parents. We've never had to deal with that kind of political and societal problem.

The economist, Barry Bosworth, says that this society has never had a consensus on anything except the notion that, "I'm doing better than I did before." And that, he says, is what's kept the system together.

So, if the system is falling apart, who's going to fix it? Clearly, it will take a new coalition of business, labor and government. But let's not lose sight of one thing. The system is based on business. And management runs businesses. So, let's look there.

In business, management's first responsibility to its employees, stockholders and customers is good management. Yet, the United States is strewn with sad evidence of wholesale managerial failure.

Whole industries—automobiles, steel, consumer electronics and others—have fallen victim to more aggressive, more efficient and better managed overseas competitors.

Don't look in the stores for an American-made radio or tape recorder. We don't make them any more.

One-half of all the automobiles in California showrooms this year will be imports, mainly Japanese.

More than half of our exports to Japan are food, fuel and crude materials. More than two-thirds of our imports from Japan are finished high-technology goods.

Until 1970, the United States had not run a deficit in foreign trade for 50 years. In 1978, our deficit with Japan alone was $13.5

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

billion. In our entire history, we have never grown even half as fast as the Japanese.

Those economic realities represent a major management challenge. The chairman and co-founder of the Sony Corporation, Akio Morita, says the trouble with American management is that we worry too much about short-term profits . . . and too little about our employees.

The Japanese approach to innovation and labor management is not a cultural eccentricity. Sony's U.S. plants—with Californians in San Diego and Alabamans in Dothan—are now almost as productive as they are in Japan.

Our problem is that American businessmen have grown up with a short-sighted mentality tied to the quarterly earnings report instead of the future. Risk—the very cornerstone of our capitalistic system—has become too risky. So long as American corporate boardrooms avoid risks, America's use of capitalism will remain weak and troubled.

We might all learn something from the experiences of the four young authors who wrote the new book, "The Official Preppy Handbook." They never dreamed that their little guide to Eastern preppiness would become the number one paperback best seller. But listen to this. Only one of the four is earning any royalties. She took a chance and signed a royalty contract. She got no money upfront. The others took the safe way out and got a flat fee of $1,000 each.

I think American management is stuck on that same safe way out. Playing it safe does nothing for productivity or the cooperative spirit we're trying to bring about in this country. Playing it safe is not in the best interest of the employees, the stockholders or the customers. Playing it safe is in management's selfish interest, and that sure hasn't gotten us very far.

The almost wholesale refusal of American business to invest in its own future has depressed productivity growth, raised our operating costs and pushed inflation higher. The safe way out leads nowhere.

Every single business in trouble in this country today has been devoid of surprises for years. Without question, American business has to come up with ways to recognize and reward the intelligent risk—totally apart from the success or failure that attends that risk.

Taking risks, however, is only one aspect of improving overall business productivity.

This is a conference on technology and innovation, and James Brian Quinn of Dartmouth has described the important role of new technology in sustaining our growth:

"It will be impossible to live as well tomorrow as we do today," he says, "without significant inventions, innovations and institutional changes."

Yet, according to the National Science Foundation, investment in research and development in the United States from 1968 to 1978 increased—in constant dollars—only four per cent.

We clearly have a problem sustaining technological advances, and we have to increase our national investments in that area.

That means greater investment in research and development. That means greater investment in modern, productive systems and machinery. That means more plowback, and an effort to show our employees, stockholders and customers that their real interests lie in the long term health of our technical base.

However, if we are to be the leading technological country at the end of the decade—and I believe we can be—we must face the problem, now, of how to apply our technology in an intelligent way to restore productivity growth.

Government officials have a special obligation to help lead the nation in finding new solutions—and implementing them—to help restore productivity.

Government, itself, is a major example of a large, contemporary institution, struggling to improve its productivity. Americans want more accountability from government. They want their governments—state, local and federal—to tighten up operations, improve services and put an end to useless bureaucratic paper shuffling.

It follows, then, that a government that is responsive, as well as responsible, ought to be actively looking at new ways to streamline its daily operations. Whether you realize it or not, most of the work in government is in the information sector. The biggest percentage of government employees are office workers whose jobs are to collect, manipulate, create and disseminate information—they are information workers. To give you an idea of how many people that is, in the federal government, there are 2.5 million civilian workers—and 80 percent are in the information sector.

That's an extreme example of a general trend in this country. The number of Americans employed in the manufacturing sector has fallen from 65 percent in 1950 to less than 35 percent today. During that same period, the number of people in the information sector of the economy rose from just 17 percent to over 55 percent—a staggering increase.

Now, information is my business, too, and before I go any further, I want to make it clear that I'm not here to sell you a Xerox office system. But new office technology is here. It can improve productivity and you should implement it. There's no question in my mind about that.

But I believe technology is far less important than how you apply it. There is a tendency in government, and in many parts of private industry, as well, to look at the wrong thing. Most people have put the bulk of their office automation expenditures into mechanizing routine operations. But the object is not to improve the output of clerks. It is to change the poorly structured work of managers, professionals and administrators—because they represent 78 percent of office labor costs.

That's one caution. But there's another that's equally important. Office technology is developing so rapidly that traditional boundaries are disappearing. Many pieces of equipment that once served a single purpose are giving way to multi-purpose machines that do several jobs at once. So, offices will need to be restructured . . . and so will jobs. New attention will have to be given to interpersonal relationships, work habits, promotion paths and job satisfaction.

That's a difficult bridge to cross. It will require unique sensitivity by management to the resistance to change that lies within all of us. From labor, it will require a new sense that there is new purpose in the public interest.

I do not pretend to be an expert on government management. But as a private citizen, who is deeply concerned about the health of the republic, I would recommend this to you:

As you consider new technology, look very hard at how you can streamline the process at the points it comes into contact with the general public. By all means, study and improve your own management processes. Look at your internal systems, assess all of your regulations and consider what it will take to procure major new innovative systems. But do so looking outward at how you can serve people better when they come to your agencies for help.

It seems to me that in a time of declining confidence in government performance, it would be important for the states to set up more responsive systems for dealing with their customers . . . to treat the public as if they were clients.

I really believe you could make tremendous improvements in productivity—as well as your own standing with the public—by pushing your efforts in that direction. It would be an important example of how technological innovation contributes to the productivity of government—as a business.

George Gilder, who wrote "Wealth And Poverty," says capitalism justifies itself, not merely by its unrivaled ability to create new wealth, but by its investment of that wealth back into society.

I believe capitalism has always regarded the American working man and woman as the sinew of our economic system. I am not sure, however, that labor and management have made capitalism work for each other.

There are a number of companies in this country that have gone under, because labor and management couldn't accommodate each other. Innovation will not take hold in Amercian corporations until managment understands something that labor already knows. Employees have a lot to contribute.

Without that basic assumption, management is denying itself its most important resource—its people. Problems on the manufacturing floor will be solved quicker and better if the people on the manufacturing floor are involved in the solution.

Lester Thurow of MIT suggests that improving productivity requires fundamental changes. Giving up coffee breaks isn't important, he says. What is important is an interest by employees in ferreting out more efficient production processes, and a willingness by them to embrace technical change.

But employees have to know that they're not going to innovate themselves out of their jobs. Here, I can draw from experience inside my own business.

Our North American Manufacturing Division just outside Rochester, New York produces our copiers and duplicators.

By the end of the year, we'll have 600 employees there involved in groups designed to improve quality—groups knows as quality circles. Every one of those persons goes through a formal course on how to solve problems, analyze data and test the results. It's a 40-hour course, and 12 of those hours are donated by the employees. Now, I'm talking about employees on the manufacturing floor. I'm not talking about management.

A new suggestion program for hourly employees has saved us $1 million in 18 months. But my favorite example is the one about the 37 employees who suggested a number of improvements in their own manufacturing operation.

Their suggestions eliminated five of their jobs. They could do that . . . they could look for ways to make themselves more productive . . . because they knew they would eliminate jobs—not each other. Accommodation between management and labor is not an unnatural act.

There has to be a fundamental understanding on employment security. Otherwise, there will be no motivation from within to drive productivity as high as we have to. And I'm not talking about two or three percent higher. We have to set our sights at productivity improvements 40 or 50 per cent—perhaps even 100 per cent—higher than our current levels.

I heard a story the other day about what the Japanese automobile companies think about American automobile companies. They think General Motors is well run, and that the billions of dollars GM is investing will result in low-cost, high-quality automobiles for Americans.

Having no doubt that GM will succeed, the Japanese have now set new goals on how to compete—not with the GM that exists today, but with the new GM they'll have to face tomorrow.

Former Labor Secretary and U.S. Ambassador to Japan James Hodgson says that in Japan, adversary is out. Consensus is in, and it has been for centuries. The Japanese, he says, do not consider 51 per cent a majority, at least not a workable majority.

The have a well-developed process that permeates their politics, their economics and their society. It involves everyone in the development of policy.

In business, labor gets involved in management decisions, and management works closely with labor. Leadership becomes, not a personality cult, but a genuine process in which allegiances are developed to the institutions that foster it. For the Japanese, productivity is not a problem—it is one of their great achievements.

Labor and management in this country must begin to look at each other differently. Our houses need not be divided. Automatic animosity by labor toward management—and vice versa—is outdated and destructive in every sense. The belief each of us should have in our systems is a belief each of us can express in our actions.

Recently, Ken Ohmae of McKinsey and Company in Japan wrote about the unusual role of Japan's government as the mind setter. That is, government policies and actions promote one set of shared values—one mind-set that contributes to economic development.

You have to be very cautious when drawing inferences from the Japanese experience. But there are some useful lessons.

To begin with, the educational system plays a key role. In the first three years of school, the children mainly learn how to play and work together—building a tradition of harmony and teamwork. Very bright Japanese students do not skip ahead to the next class. Instead, their extra brainpower is used to work out interpersonal relationships and help slower-moving classmates.

Second, the Japanese government also serves as a mind-setter in outlining national industrial strategies. In the early 50's, the government declared that "steel is the nation." We all know how successful they were building their steel industry. And once revitalized, that steel industry contributed to the growth of a host of related industries—particularly ship building and automobiles.

Just as steel was a key component in building up heavy industry, Japan has now identified a new technology as the next key ingredient—very large scale intergrated circuits, or VLSI. It's the next rich frontier of electronic technology. In Japan, they call it the new "rice industry."

At a major technical conference on solid circuits being held this month in New York, one-half of the papers have been contributed by Japanese authors.

They're coming on, and they're coming on faster than any of us realize. They have set VLSI as a national priority. The sectors of their economy will now start to move, in step, in one unified direction, knowing that their government will support them.

Thirdly, the government of Japan serves as a mind-setter in establishing international trade as a way of life. And as we all know, since the second world war, much of Japan's growth has been through trade—promoted and supported throughout government and industry.

The Japanese understand that the productivity battle is worldwide. I believe more of us in this country are beginning, now, to understand that.

The embattled farmer was the first to fire a shot for America. Now, the embattled American worker must fight a tough new fight of international competition for trade.

But we have trapped the American worker between the proverbial rock and a hard place.

American goods no longer meet the test of quality in the world market—and the future belongs to those who sell quality products to the world.

We now see foreign manufacturers moving into our country in precisely the way we used to move into undeveloped countries. Professor William Barret of New York University says that, "in a sense, we are now like an undeveloped country."

But this is no time to close our borders to foreign goods. Trade barriers—however well intentioned—don't make U.S. goods any better. Like it or not, the U.S. domestic market is part of the global market. It does not stand apart.

Cries for trade barriers constitute an admission of failure, because they say the only way we can compete is to eliminate the competition. I don't want to provoke our trading partners into putting up impassable trade barriers. Competition leads to better products at lower prices. Competition will force us to move ahead faster.

A Japanese executive told The New York Times that American managers are now beginning to realize that we're in a war of survival. He offered this analogy.

When Japan attacked Pearl Harbor, the United States had the seventh largest navy in the world. By the end of World War II, the American Navy was the biggest in the world.

"Americans can respond vigorously," he said. "Ultimately, that is what your nation will probably do about its current economic problems."

And then be offered this bit of advice. "Your corporate managers must lead that vigorous response."

He's right, but we can't do it alone. We need labor's full cooperation—and government's, as well.

Let me turn to government and its direct relationship with business. And let me say immediately what I believe. Much has been said—too much, I think—about the pros and cons of excess regulation. For too long, now, we've been making big government the big excuse for our business failures.

I have written, and I'll restate it here today, that American businessmen are hiding behind government regulations.

Some of the complaints are valid, there's no doubt about that. But I'm tired of hearing about them, and I don't think we should keep using them to get ourselves off the hook.

If all government and regulations were eliminated tomorrow, most companies would face the same problems they face today.

Having said that, I don't think we ought to let bureaucracy and over-regulation off the hook, either.

Before Nelson Rockefeller left the vice presidency in 1977, he talked about how the government's attitude had changed since he put in his first tour of federal service in 1940 as President Roosevelt's Latin American aide.

Back then, he said, government people considered themselves partners, friends, helpers of the private sector. But in our time, he complained, many government agencies seem to view the private sector as the enemy. It's all out of whack, he said, and America faces no more important task than to straighten it out.

Governor Brown commented on the same theme—the need to improve relations between business and government, in the public interest.

He observed last week that, "the normal idea is that you just slash away at government and government regulation without regard to the social order. But I reject that notion," he went on, suggesting that, "partnership between government and industry is inevitable."

I share that view, and I hope this conclave is more than just another step in the right direction. It is, indeed, that, but we need more than that. We need action, and we need action now.

I'm reminded of a story about Pope John XXIII.

Shortly after his installation in 1958, he gave word that he wanted to have a Vatican council by 1963, just five years away. An aide told Pope John about all the tremendous difficulties ahead in organizing such a conference. He said, "we can't possibly have a Vatican council by 1963." Pope John answered, "then, we will have one by 1962." And they did.

To those who say, we can't possibly turn our economy around in four or five years, let's tell them we'll do it in two or three. And we can, if we do it together. Government, business, labor. Our individual goals will only be met in the spirit of cooperation.

That shouldn't be hard. It's the same spirit that raised barns, plowed the prairies, founded cities, built bridges and highways and defended our shores.

Let's put it to work again.

Together.●

MEDICARE IMPROVEMENT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. LEHMAN. Mr. Speaker, on March 18, I introduced H.R. 2598, a bill which would expand medicare coverage and make medical care more affordable for the elderly.

In recent years, we have gradually liberalized the medicare program, but I believe we must go further still. Adequate health care must not be denied our elderly poor, many of whom are already forced to choose between food and medicine.

This legislation would eliminate deductibles, coinsurance, and medicare taxes so that all benefits would be financed from general revenues.

Eye and dental care would be covered under medicare as well as items such as hearing aids, prescription drugs, and prosthetics. Certain psychological services and services provided by registered nurses would also be included.

H.R. 2598 also gives preventive care a high priority. One physical examination per year would be covered by medicare, and tests such as those used for detecting breast cancer would be provided free of charge to the patient.

I recognize that during these budget-cutting times, it will be difficult to broaden the medicare program in the way I have proposed. This bill, however, represents what medicare can and should become in the future, a comprehensive Government-sponsored program of health care for the elderly.●

WHICH ECONOMIC ROAD DO WE TAKE?

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. MICHEL. Mr. Speaker, you may have noticed, as I have, that there are increasing attacks being made on the supply-side economics at the heart of the Reagan economic program. You do not have to be a born-again supply sider to realize many of these attacks are self-serving since they seem to be based on assumptions left over from the kind of policies that got us into economic difficulty in the first place. Paul Craig Roberts, Assistant Secretary of the Treasury for Economic Policy believes that the first thing we have to do is to understand that the economic assumptions of the Keynesians are no longer relevant.

I need not remind you, Mr. Speaker, that although we are speaking of theories, we are not dealing with what most of us would call theoretical problems. The inflation, unemployment, high interest rates, and general economic deterioration we are enduring are a result of the very real failures of Keynesian economics. Those failures have brought this country to a deplorable state. Mr. Roberts suggests that the Keynesians now criticizing supply-side theory either have not learned the tragic economic lesson of the past 10 years or that they refuse to.

At this point I insert in the RECORD, "The Keynesian Attack on Mr. Reagan's Plan" by Paul Craig Roberts, the Wall Street Journal, March 19, 1981:

THE KEYNESIAN ATTACK ON MR. REAGAN'S PLAN

Every morning when I pick up my New York Times I expect to read in Steven Rattner's reports that I have abandoned supply-side economics. After all, he even reported that Jack Kemp himself had abandoned his own bill in disagreement over an inconsequential detail.

Mr. Rattner has established himself as leader of a corps of reporters trying to drive permanent wedges into any crack of disagreement that policy discussion inevitably generates. The object is to isolate the supply-siders. Last week Hobart Rowen, a Washington Post commentator long identified with the liberal Keynesians, said it wouldn't be long before supply-side economics is back on the shelf. Critics sense that if they can blunt and deflect the intellectual cutting edge of the Reagan program, the rest of it can gradually be chopped up with the familiar interest-group and income-redistribution arguments.

But in spite of all the journalistic smoke, the supply-siders still have on their side the Office of Management and Budget, Treasury, and the President—not exactly what you would call a hunkered-down position. And the Reagan tax bill is still very much alive. The problem isn't in controlling the policy but in controlling the explanation of it.

While supply-siders have been busy making the policy, stalwart representatives of the status quo like Walter Heller and other leftover economists from a bygone era have been busy explaining the policy in Keynesian terms. When you hear supply-side economics interpreted by a demand-side economist, it sounds scary indeed.

EXPLAINING INFLATION

The policy will be "actively inflationary," warns Otto Eckstein of Data Resources Inc., an economic consulting firm. Supply-side analysis, chimes in Mr. Heller, is a "fairy tale." The true story, he charges, is that supply-siders are unleashing the wolf of inflation to devour the country. Because both these demand-siders have been so thoroughly associated with the policies that have inundated us with inflation, people think they must be inflation experts.

It is nevertheless a fact that neither Mr. Eckstein nor Mr. Heller has ever been able to explain why it is inflationary when people spend their own money, but not when the government spends it for them. Yet it is easy enough to understand why supply-side tax cuts aren't inflationary. All you have to do is to stop thinking like a Keynesian.

The administration wants to cut personal income tax rates, not in order to give people more money to spend, but in order to increase incentives to earn more taxable income. Today people are taxed at unprecedented high rates on any additional income that they earn, either from work effort, saving or upgrading their skills. The inevitable results of little reward for extra effort are worsening work attitudes, high absenteeism rates, reluctance to work overtime and to assume risks, and the lowest personal saving rate in anyone's memory.

For the supply-side policy to work, taxpayers don't have to respond to lower marginal tax rates by giving up vacations, going on a double-shift and saving all of their income. When you have a work force of more than 100 million people, small individual responses result in a large aggregate effect. If the average number of hours worked per week rises from 35 to 35.5, GNP rises by $24 billion. If the absentee rate declines by one-half percentage point, GNP rises by about $10 billion. If the personal savings rate rises from about 5.5 percent about 7.5 percent as it did after the Kennedy tax rate reductions, private savings increase by $42 billion annually at current income levels. The increased savings together with the revenue "reflows" and the budget cuts more than pay for the tax cuts, thus making possible "crowding in," or increased capital formation.

If you are a Keynesian, however, you don't think about any of this, because in the Keynesian model tax cuts have only a single purpose—to increase demand. Therefore, Keynesians focus only on the question: What are people going to do with the tax refunds that they get back on their existing earnings? The answer is that what they do with them is much less important than how they respond to the changed incentives. If savings, investment and work effort do not respond to higher after-tax rewards, then the policy will have no effect on the economy, and the downside risk is simply: no change.

Keynesians, however, should have their question answered, even if it is irrelevant. Polls indicate that people plan to use more than half the tax refund to build savings and pay off debts. But suppose they spend it all. Keynesians would say that total spending has increased and, therefore, the tax cuts are inflationary. But the government is spending less, so how has total spending increased?

At this point the critics claim that Congress will cut taxes, but not spending. Surely then the tax cut would be inflationary. No, not unless the Federal Reserve prints more money.

A tax cut without a spending cut can result in a budget deficit, but a deficit is not inflationary unless the Fed monetizes it. If the Treasury finances the deficit by selling bonds to the public, it recovers by borrowing what it handed back in tax refunds, and total spending does not change. That's why supply-siders insist that it is not necessary to offset a tax cut with a budget cut in order to avoid inflation. The supply-side rationale for the budget cut is to prevent the increase in private savings from being used up financing the growth in government spending. Supply-siders want the increased savings to go into private capital formation and not into government bonds.

Tax cuts are associated in people's minds with higher demand and inflation because that is the way it works in the Keynesian policy to which they are accustomed. In the Keynesian policy the purpose of a tax cut is not to alter incentives but to create a budget deficit. The Fed is then pressured to monetize the deficit in order to increase aggregate demand. But since the Reagan administration is not cutting taxes in order to stimulate demand, it will apply no pressure on the Fed to monetize debt.

Indeed, it is applying the opposite pressure, which has confused some of the Keynesians in the Fed. Your policy will have no effect at all, they say. The fiscal stimulus you are providing with the tax cut will be offset by the tight monetary policy you are urging on us, and the policy will be a wash. We hope the Fed catches on sooner rather than later that we are not trying to provide a fiscal stimulus.

PERSONAL VS. BUSINESS

Once people catch on to the supply-side, they will realize that the old categories of personal versus business tax cuts don't make any sense. The proposed reduction in the personal income tax rates is a business tax cut too. It automatically reduces the

maximum capital gains tax from the present 28 percent. It increases the rate of return to investment income across the board. It lowers the tax rates on partnerships and unincorporated business income. It increases savings. It improves work attitudes, lowers wage demands and contributes to better labor productivity. What "business tax cut" does more?

People will learn also that supply-side economics doesn't have a "Phillips Curve"—the idea that you can't have higher economic growth without higher inflation. To get a "Phillips Curve" you have to mix together demand stimulus and supply disincentives like high marginal tax rates and inadequate capital cost recovery. Thus when The Washington Post charges that President Reagan's "scenario lies far beyond the limits of any past experience in this country or any other industrial democracy" it is wrong for two reasons. It ignores the policy context of the past experience in this country, and it overlooks Japan. In 1974 the Japanese had a real economic growth rate of −0.2 percent and an inflation rate of 24.5 percent. Five years later real growth was 6.1 percent and inflation was 3.6 percent.

Now that's what I would call a real rosy scenario. President Reagan's is a piker by comparison. Do the "prestige press" and congressional Democrats really believe that the U.S. economy can't perform even half as well as the Japanese? Supply-siders see nothing to be gained from writing off America at the start.●

ACCURATELY JUDGING THE SOVIETS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. OTTINGER. Mr. Speaker, I am today inserting in the RECORD an excellent analysis of recent Russian actions and their implications for U.S. policy which recently appeared in the New York Times. It was written by the foremost American Russian expert and former U.S. Ambassador to the U.S.S.R., George Kennan.

Mr. Kennan eloquently comments on the need for sound judgments of Soviet intentions based on realistic considerations of their society. Too often our perceptions of Moscow are based on oversimplification and exaggerations, and this could be extremely dangerous.

I commend Mr. Kennan's analysis to the attention of my colleagues:

EXAGGERATION PLUS OVERSIMPLIFICATION EQUALS TROUBLE WITH MOSCOW

(By George F. Kennan)

"Take but degree away, untune that string, And, hark! what discord follows. . . .—"Troilus and Cressida"

These deeply perceptive words by Shakespeare have their relevance to a sizeable section of United States opinion, official and private, on the Soviet Union.

It is not that there is no truth in many of the things that people say and believe about the Russians; it is rather that what they say and believe involves a great deal of exaggeration and oversimplification. And this is serious, because there are times when exaggeration and oversimplification, being harder than falsehood to spot, can be fully as pernicious.

We are told that the official Soviet outlook is one of total cynicism and power-hungry opportunism. Is this view wrong? Not entirely. But it is overdrawn. The way in which the outlooks of the present Soviet leaders, tempered as these outlooks are by the discipline of long political experience and responsibility, relate to the sanguine ruthlessness of the pure Leninist doctrine as conceived some 60 years ago in the heat of the revolutionary struggle is complicated. There is traditional lip service to established doctrine; there is also considerable inner detachment.

The Soviet leadership, we are told, is fanatically devoted to the early achievement of world revolution. Is this allegation wrong? Partly, and it is certainly misleading. It ignores the distinction between what Soviet Communists think would be ideally desirable and what they see as necessary or possible to try to achieve at the present moment. It also ignores the distinction between what they claim they believe will ultimately occur and what they actually intend to bring about by their own actions.

We hear much about the menacing scale of Soviet military programs and the resulting tilting of the arms balance in our disfavor. Wrong? Again, not entirely, but often exaggerated. Part of this view rests on "worstcase" calculations, particularly regarding conventional armaments. Often, it ignores our own contribution to the adversely developing balance—by our unrestrained inflation and by the various unnecessary deficiencies of our conventional forces. Much of it is corrupted by the fundamental error of measuring armaments, weapon for weapon, against another country's armaments instead of against one's own needs, as though the needs of any two great countries were identical and any statistical disparity between their arsenals was a mark of somebody's superiority or inferiority.

We hear of the menace of Soviet expansionism or "adventures" in the third world. Is this all wrong? No, not all. The Soviet presence in Cuba, in which we should never have tacitly acquiesced in the first place, is not indefinitely compatible with our vital interests. Soviet collaboration with, and support for, Col. Muammar el-Qaddafi, the Libyan leader, is a signal disservice to the stability of the Near East. The occupation of Afghanistan has created serious international complications. Yet, in general such Soviet efforts have not been very successful. The Soviet Union's position in the third world is actually weaker than it was years ago, before the disruption of Moscow's relationships with Peking, Cairo, and Jakarta. And the methods by which Moscow recently has been trying to gain influence in the third world, primarily the dispatch of arms and military advisers, resemble too closely our own for us to indulge gracefully in transports of moral indignation.

It is alleged that the Soviet leaders never respect international agreements. Right? Mainly not. Their record in the fulfillment of clear and specific written obligations, especially those that avoid questions of motivation and simply state precisely what each side will do and when, has not been bad at all. Vague assurances of high-minded general purpose, on the other hand, such as those embedded in the Helsinki agreements, are viewed by them with the same cynicism they attribute to the other party who signs such documents.

It is asserted that no useful collaboration with the Soviet Union is possible. True? Not really. There is indeed an extensive area within which what we would consider normal and intimate relations are not possible, their being precluded by Soviet ideological commitments, procedural habits, and other oddities, not to mention a few of our own. But there is another area, admittedly limited, involving certain forms of travel, trade, scholarly exchange, and collaboration in cultural and other nonpolitical fields, where things are different. And it is important that this area not be neglected, for interaction of this sort, in addition to increasing our knowledge and understanding of Soviet society, serves as an indispensable cushion, absorbing some of the shock of the misunderstanding and conflicts that may occur in other fields.

In a relationship of such immense importance as the Soviet-American one, there should be no room for such extremisms and oversimplifications. Not only do they produce their counterparts on the other side, but they confuse us. They cause us to see as totally unsolvable a problem that is only partly so.

Soviet society is made up of human beings like ourselves. Because it is human, it is complex. It is not, as many of the oversimplifications would suggest, a static, unchanging phenomenon. It too evolves, and the direction in which it evolves is influenced to some degree by our vision of it and our treatment of it.

What is needed on our part is not an effort to prove our own virtue by dramatizing Soviet iniquities, but rather a serious effort to study Soviet society in all its complexity and to form realistic, sophisticated judgments about the nature and dimensions of the problem it presents for us. If we do this, there is no reason to suppose that the conflicts of interest that divide these two great countries, so different in geography, in history, and in tradition, should lead to the sort of disastrous climax that modern weapons, most tragically, now make possible.●

BLUEPRINT FOR NATO COOPERATION

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. FINDLEY. Mr. Speaker, Deputy Secretary of Defense Frank Carlucci delivered, on February 21, 1981, in Munich, Federal Republic of Germany, an important address on threats to NATO and the steps the alliance must take to meet those threats. Mr. Carlucci's remarks provide a clear blueprint for alliance responsibilities not only in Europe and the United States but also in the Persian Gulf. As the Deputy Secretary stated:

The threat to vital Western interests in key areas, such as the Persian Gulf, can be met only if all concerned share the burden and find new ways to make greater contributions in support of our common interests. Western Europe's stake in the security and stability of the Persian Gulf is enormous and well-recognized. What is perhaps less

well understood is the great contribution the Western European members of the Alliance could make to help protect the security of this region so vital to them.

In the coming year, a U.S. dialog with its allies on shared responsibilities in assuring their common interests in the Persian Gulf will be critical. I believe that Deputy Secretary Carlucci's address contributes significantly to that dialog and would like to call it to the attention of my colleagues.

REMARKS OF HON. FRANK C. CARLUCCI, DEPUTY SECRETARY OF DEFENSE, TO THE 18TH ANNUAL WEHRKUNDE CONFERENCE, MUNICH, GERMANY, SATURDAY, FEBRUARY 21, 1981

I am honored and pleased to be here today. Honored to address so distinguished an assemblage. Pleased to return in an official capacity to Europe, where I spent some of the most interesting and satisfying years of my career in public service.

Europe holds a special place in the hearts of Americans. We draw from you much of our cultural heritage, our language, even our religious traditions. In this century, peace and security in Europe have become inseparable from peace and security for the United States. Three decades ago, we joined with our European friends in an unprecedented alliance of free peoples, an alliance whose raison d'etre is as clear and persuasive today as it was when the North Atlantic Treaty was signed.

Our common commitment to the goals of the Alliance is undiminished. As allies, we believe now, as we did then, that an attack against one of us is an attack against us all. We believe now, as we did then, that we must maintain and develop our individual and collective capacity to resist armed attack.

Some of the challenges that confront us in the 1980s are those that forged our Alliance in the 1940s—the menacing and continuing growth of Soviet military power in Europe. Yet, in many ways, the context for even these familiar challenges has changed. The Soviet buildup in Europe clearly exceeds any rational requirement for defense. It bears all the marks of an offensive military capability, consistent with Soviet military doctrine. This steady and cumulative expansion of conventional, chemical, and theater nuclear forces has been accompanied by a long-term and major shift in the strategic nuclear balance, from one of unquestioned U.S. superiority to essential equivalence, and the prospect, if appropriate steps are not taken, of possible inferiority. The twin results of this shift are that the United States no longer enjoys a strategic edge to compensate for other deficiencies and that Soviet ability to use the threat of conventional force for political purposes could be significantly enhanced. On all levels of military capability, the trends are ominous.

The United States must recognize its responsibilities in this mature alliance. All too often in the past we have talked of consultation and acted on our own. Too frequently we have urged the need for consistency, yet presented our allies with what at times must have seemed like annual changes in priorities and programs. The new Administration is aware of these dangers. We are determined to avoid them.

Europe, too, should recognize its responsibilities. Like the East-West balance, the relationship between the United States and Western Europe also has shifted dramatically over 30 years. The United States no long produces and consumes 50 percent of the world's GNP. Europe is no longer shattered, impoverished, and disunited. Indeed, Western Europe's total GNP exceeds that of the United States. In this situation, the United States cannot be expected to improve and strengthen U.S. forces in Europe, unless other Allies increase their own contribution to the combined defense effort. Nor can the United States, unaided, bear the burden of promoting Western interests beyond Europe.

There is, I might add, great concern in the U.S. Congress over the issue of burden-sharing, concern that was brought home quite clearly and explicitly to Secretary Weinberger and to me in our confirmation hearings. This concern is a political fact of life for us, and that should be understood by all concerned.

An integral element of this mature Alliance is an expanded concept of European security. Only by meeting and mastering Soviet challenges both inside Europe and in areas of critical interest beyond, can European security be maintained. Only then can the possibility of a more constructive East-West relationship in Europe be held open.

Let me suggest three areas for concentrated effort.

First, what the United States can do.

Second, what we as Allies can do in Europe.

Third, what the United States and Europe can do outside Europe.

WHAT THE UNITED STATES CAN DO

This Administration's agenda is as clear as the results of last November's election.

We are unequivocally committed to a major and sustained increase in military capability and therefore in defense spending. We will use these resources to ensure the following objectives:

We will increase confidence in our strategic nuclear forces.

We will maintain momentum behind theater nuclear force modernization.

We also need to continue the progress we have made in rationalization, standardization, and interoperability of weapons and munitions production. These programs have resulted in elimination of much duplication, reduction in costs, and increases in overall capability. As part of our family of weapons concept, we reached an agreement in August 1980 whereby the Europeans would produce a short-range air-to-air missile and the United States would build a medium-range air-to-air missile. Dual production of weapons systems reduces duplication in research and development. We are currently dual producing the F-16 fighter, the ROLAND Air Defense System, as well as other important weapon systems.

Again, we want to work closely with Europe in developing common arms control positions in areas of special concern to you. As in other areas of common interest, we must not let the Soviets benefit from any appearance of disunity, or let them gain leverage as a result of European pressures on the United States to proceed before we are ready, to pursue unrealistic objectives, or to make unnecessary concessions.

WHAT EUROPE AND THE UNITED STATES CAN DO OUTSIDE EUROPE

Generally, we all understand well what needs to be done within Europe. The challenge there is to marshall the political will to generate the resources required to get on with the job. But it will require fresh vision, as well as renewed political will, to come to grips with the threats to European security from outside this continent.

What is needed first is an expanded private and public dialogue on these issues. We have begun the process of consultations at senior levels of allied governments, and this will take on new intensity in coming weeks. I also hope that this conference and many other efforts in the months ahead can promote wider public awareness of the threats to European security in regions outside of Europe and will generate new understanding and new motivation to deal with these threats.

The threat to vital Western interests in key areas, such as the Persian Gulf, can be met only if all concerned share the burden and find new ways to make greater contributions in support of our common interests. Western Europe's stake in the security and stability of the Persian Gulf is enormous and well-recognized. What is perhaps less well understood is the great contribution the Western European members of the Alliance could make to help protect the security of this region so vital to them. For obvious reasons, I am not speaking here of a formal role by NATO. I have in mind individual, but complementary, efforts by the members of our Alliance.

Close political relations with nations throughout Southwest Asia can be activated to strengthen understanding of Western objectives in the region and of our common interest in resisting Soviet aggression.

Security arrangements between European Allies and countries in Southwest Asia can help our friends in that region to strengthen their capability for self-defense.

The hard truth is that none of us can have social welfare and economic prosperity unless our Alliance is strong enough to maintain the peace and to protect our access to vital energy sources and raw materials. And those of you here in this meeting know full well that the relative military strength of the Alliance has been declining for far too long.

Let us face the facts honestly and begin now to take the necessary action together.●

INTEREST RATES

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. HUBBARD. Mr. Speaker, as the Congress continues to deal with spiraling inflation, I would like to share the thoughts of my constituent, Frank R. Mitchell, Mitchell Equipment Co., Clay, Ky., about interest rates and curbing inflation.

Mr. Speaker, I submit the following:

Interest is the key to curbing inflation! There are some secondary things like foodstamps, welfare to people who don't deserve it, grants, etc., but I think President Reagan will take care of these in time.

My plan on interest is as follows, the Congress or the President should place a freeze on interest rates that the government will pay on any further issues of bonds, federal funds, etc. First, start out at the highest rate they are paying at the present time and reduce it each month until we get back down to where inflation is only four or five per cent per year. By making a gradual de-

cline, the banks, the people, and the world will have time to adjust to the decrease.

There are several advantages to this plan:

1. Our tax dollars would go further because our interest debt would be less. The savings in interest could be spent on defense without raising taxes.

2. Large corporations, like Chrysler, General Motors, Ford, International Harvester, etc., and small businesses, like car dealers, farm equipment dealers, or *anyone* who borrows money would not have to raise prices to cover the extra cost of interest. This would curb inflation, stimulate business and help unemployment.

3. This would increase the buying power of the dollar at home and overseas. Rather than a decline of buying power, it would be a turn-around and headed back in the right direction. An example of this is in buying foreign oil. The only reason this oil goes up is because the U.S. dollar will not buy what it did in the past. We are only kidding ourselves if we think the price of oil goes up because there is a scarcity with the OPEC nations.

There are many more advantages, but they would be similar to the ones listed above.

The only disadvantages would be to the people or companies to whom the interest is being paid. They would have less money, but it would be worth more.

I know the United States should not default on the obligations it has already made, but this plan would be only on new borrowing. If this were put before the general public, as a vote, for, or against, it would pass by approximately 95% margin. It would help the majority of the people, the tax payer, the working man, the consumer, our country, our dollar and you could go on and on and on.

Very truly yours,

FRANK R. MITCHELL.●

PROVIDING SAFETY AND SECURITY WHILE CONTROLLING MONEY AND INTEREST: ROLE OF THE MONEY MARKET INSTRUMENT

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. FAUNTROY. Mr. Speaker, I am pleased to introduce legislation which would amend the Federal Reserve Act to further facilitate the control of the money supply and the regulation of interest rates by authorizing the imposition of reserve requirements only on those money market funds which offer their investors the use of a transaction account.

The legislation would also address several other issues which many believe are associated with the sudden rise in the popularity of these money market funds. There is, first of all, the issue of whether or not these funds are safe for investors. While all of the funds do appear to be well managed, one must always be concerned with whether or not they have adequate liquid assets to redeem their shares when such redemptions may be made through a third-party negotiable instrument. The legislation which I have introduced addresses this concern by imposing a liquidity requirement on any fund which has a transaction account. As a part of my concern for the safety and security of these funds, I have authorized the Federal Reserve Board to appoint examiners who shall examine each money market fund not less than twice each year.

The purchase of commercial paper, anticipation notes, and other short-term corporate debt, while encouraged, do have substantial risks of which less sophisticated investors may be unaware. Examination and liquidity requirements are appropriate measures to meet these risk in money market acounts.

Another issue which has been raised concerns whether or not these funds are investing in our communities. As you know, substantial asset shifts have taken place from the local thrifts and small banks into these funds. Potentially, this result has been to jeopardize the ability of small and rural financial institutions to meet the investment and credit needs of their communities and remain prudently managed. In addressing this concern, I have required that every fund which offers an investor the use of a transaction account to disclose the name and home office location, by city and State, the number and dollar amount of investments which have been purchased. I do not suggest that these funds should not make any investment which the fund believes is safe and sound. I am only requesting that they allow their customers to decide whether or not they wish to place their assets into a fund which may not be investing substantially in their own communities. In conjunction with that concern, I have provided in my bill certain exemptions for those funds which invest in the general obligations of local governments. I want to encourage our local governments to seek out these funds and I want to encourage, consistent with prudent management, that these funds invest in local obligations.

Finally, I am concerned with the investment yields of these funds. Each fund has various advisors and managers who are paid a fee. While these fees are disclosed in the prospectus, there is no continuing monitoring of the activities such as might be provided by oversight through the Depository Institutions Deregulation Committee. I have accordingly, provided for such oversight and amended the membership of DIDC to include, as a nonvoting Member, the Chairman of the Securities and Exchange Commission.

The Nation's money market funds have expanded to a record $101.21 billion which represents a 90-percent increase since December 1979. Their present average yields of 15.7 percent make them immensely more popular than the passbook accounts with which they often compete. They have small purchase requirements, they are liquid, and they do not impose withdrawal penalties. As a result, for many people, particularly the elderly and others who have limited cash assets, these funds enable them to pool their resources to participate in the higher yields that a communal investment can achieve. I applaud and support this innovation. Nothing in this bill—and nothing which might be reported by the committee, I am sure—will diminish the ability of an individual to buy the securities of such a fund. Neither do I believe that anything would be done which would substantially change the ease with which one can withdraw his assets.

I do, however, believe that similar kinds of accounts should receive similar treatment. Thus, if one invests in these accounts with the intent to use it as a transaction account, that person is entitled to all of the protections which are applied to the transaction accounts managed by the federally insured depository institutions. The present discriminatory treatment which allows MMMF's to offer transaction accounts without abiding by the requirements for reserves, liquidity, and community investment, simply tends to promote both inflation and high interest rates. Responsibility for control of our economy then falls disproportionately to the smaller and more traditional depository institutions. That is unfair; it is also unwise. Thus, I have authorized the Federal Reserve to impose a reserve requirement.

Our financial institutions are fundamentally sound. They must, however, be given the opportunity to compete more fully and equitably. When the Congress passed the Depository Institutions Deregulation and Monetary Control Act of 1980, it was intended that similar accounts be treated in a similar fashion. This bill achieves that without changing any of the decisions reached in deregulating various depository institutions. If we fail to act responsibly in meeting this challenge to our financial systems, the potential costs of failing institutions will far outweigh any momentary gain we receive.

My bill meets that challenge. It does not impose any additional requirements on anyone or any fund which offers an excellent and well-managed investment. It does, however, impose requirements which are similar to those imposed on other institutions where a fund offers a transaction account. Hearings are scheduled to begin on April 8, 1981.●

CONGRESSMAN TONY P. HALL SPEAKS AGAINST OFFENSIVE EQUIPMENT FOR SAUDI F-15 JETS

HON. TONY P. HALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. HALL of Ohio. Mr. Speaker, I am greatly disturbed by the administration's intention to sell to Saudi Arabia AIM-9L air-to-air missiles and Fuel and Sensor Tactical (FAST) packs for the 62 advanced F-15 aircraft purchased by Saudi Arabia from the United States in 1978. The F-15 is our firstline fighter aircraft, and the AIM-9L is the most improved version of the Sidewinder air-to-air missile. The FAST pack more than doubles the combat radius of an F-15 and permits the plane to carry a heavier bomb load to distant targets.

Such sales would violate the original understanding made in 1978 when the F-15 sale was proposed. In a letter to Chairman John Sparkman of the Senate Foreign Relations Committee, Secretary of Defense Harold Brown wrote:

> The aircraft can carry three external fuel tanks, but the plane requested by Saudi Arabia will not be equipped with special features that could give it additional range.

The letter of understanding further stated:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F-15.

Now it appears that the assurances and commitments made in 1978 are going to be abandoned.

I do not understand why this sale of offensive equipment for the F-15 to Saudi Arabia is being sought at this time. I would ask what Saudi Arabia has done recently to be less of a threat to Israel now than 3 years ago.

Indeed, Saudi Arabia continues to be a leading opponent of the Camp David accords and the ongoing peace process that has flowed from the accords. Moreover, Saudi Arabia has even called recently for a "jihad" or holy war against Israel. It is not clear what Saudi Arabia means by its use of this concept. What is clear is that Saudi Arabia continues to be an intransigent and unpredictable foe of Israel.

The latest Saudi request seems to be yet another test of American friendship. But do real friends force each other to undercut their friendship with other trusted and close friends? If we acquiesce to this request, what form will the next "test" take? A genuine friendship should not have to be subjected to repeated trials and probings.

It also should go without saying that friendship is a two-way street. It is not proper for one friend to arbitrarily test the other and set new standards for redefining the friendship. It should be clear, too, that true friendship and lasting support cannot be acquired through arms shipments.

Peace and stability in the Middle East are not served by an arms race in the region. It would not be a sensible foreign policy for the United States to fuel the escalation of such an arms race.

Given Israel's triple-digit inflation, the United States should avoid forcing Israel into additional defense spending to provide countermeasures to offensively equipped Saudi F-15's. As Israeli Foreign Minister Yitzhak Shamir has warned:

> The State of Israel will not be able—if for economic reasons alone—to stand up to this terrible race.

Although there has been some confusion in the media lately about the Israeli position on the F-15 equipment sale to Saudi Arabia, both the Begin government and the opposition Labor Party have issued statements in opposition to this proposed arms shipment.

I would urge the administration to reconsider moving forward with this sale. However much we might value Saudi friendship, we should not allow ourselves to be maneuvered into a policy decision that could pose a threat to the security of Israel and renew the arms race in the Middle East. We must make it understood that we will not be pressured into compromising the original terms of the Saudi F-15 sale in 1978.

For the benefit of my colleagues, the full text of Secretary Brown's letter of May 9, 1978, to Chairman Sparkman follows:

SECRETARY OF DEFENSE,
Washington, D.C., May 9, 1978.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During recent conversations with you and other members of your Committee, a number of questions have been raised regarding the characteristics of the F-15 aircraft we propose to sell to Saudi Arabia and reassurances as to the purposes for which Saudi Arabia will use the aircraft. I would like to respond to these questions and attempt to resolve any uncertainties that members may have felt regarding the proposed sale.

I. THE F-15 AIRCRAFT

The F-15 we plan to sell to Saudi Arabia will have the same configurations as the interceptor model approved for the United States Air Force. During the developmental phase of the F-15, initial plans called for giving the aircraft a ground attack capability. However, the availability of other aircraft with superior strike capabilities led the Air Force to alter its plans and to limit the role of the F-15 to that of an air superiority fighter. Consequently, the development of new ground attack systems for the F-15 was discontinued in 1975.

Saudi Arabia chose the F-15 because of its extended patrol capability and superior air defense characteristics (including an advanced, all-weather air-to-air radar system). The F-15 best meets Saudi Arabian requirements for the air defense of a vast territory. In choosing the F-15, Saudi Arabia rejected aircraft with powerful ground attack capabilities such as the F-16.

As Saudi Arabia has selected the F-15 to defend its national territory, it would be folly, as the Chairman designate of the JCS, General David Jones, USAF, observed in testimony, to use the F-15 offensively against neighboring countries. This is particularly so vis-a-vis Israel, whose air strength is, and will be, so much greater. Not only would the F-15 be relatively ineffective in an offensive mode, and the risk of loss of the aircraft high, but its use away from Saudi Arabia would leave vital oil facilities, urban centers and military installations without necessary air defense cover. From the standpoint of military planning, it would make no sense whatsoever for Saudi Arabia to acquire an aircraft with the characteristics of the F-15 with an idea of using it as a ground attack aircraft. I am confident the Saudis have no such intention.

Like the USAF model, the F-15 for Saudi Arabia will be equipped with air defense armament, namely four AIM-9 Sidewinder air-to-air missiles, four AIM-7 Sparrow air-to-air missiles and a 20 mm gun.

The aircraft can carry three external fuel tanks, but the plane requested by Saudi Arabia will not be equipped with special features that could give it additional range. Specifically, the planes will not have conformal fuel tanks ("fast packs") i.e., auxillary fuel tanks that conform to the body of the plane, and Saudi Arabian KC-130 tankers do not have equipment for air refueling of the F-15.

Saudi Arabia has not requested that the plane be outfitted with Multiple Ejection racks (MER 200) which would allow the plane to carry a substantial bomb load. The U.S. will not furnish such MERs, and testing and certification of a MER system for the F-15 would not be feasible by another country without U.S. authorization. While aircraft could conceivably carry three standard MK 84 bombs, they would each replace an external fuel tank; this would greatly shorten the aircraft's range and increase its vulnerability. Moreover, in contrast to the F-16, the F-15 does not have a radar system designed for bombing.

Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F-15.

Pursuant to our national security disclosure policy, certain highly sensitive subcomponents of the U.S. Air Force version of the F-15 (e.g., cryptologic equipment and some special electronic capabilities) will not be sold to Saudi Arabia.

In sum, it is clear that the F-15 will help Saudi Arabia deter and defend against those nations that are hostile to its role as a leading moderate Arab state.

II. ASSURANCES

The Government of Saudi Arabia has assured us that it has no aggressive intentions against any state, that it will use the F-15 aircraft only in furtherance of its legitimate self-defense, and that it will not employ the aircraft offensively. The Saudi Arabian Government has similarly assured us that it will not transfer the F-15 aircraft to any third country or permit the nationals of such country to train on the F-15 aircraft, serve as pilot, or otherwise to have access to

the aircraft without the authorization of the United States.

We have specifically discussed these restrictions on use and prohibitions on transfer with the Government of Saudi Arabia. They have assured us that they intend scrupulously to comply with these prohibitions and restrictions. The record of Saudi Arabia in this respect is excellent. However, should the assurances be violated, the United States can take appropriate action, including suspension of services and of delivery of spare parts and other military equipment. Without such services the usability of the F-15 would degrade rapidly.

It is also important to note that the sales agreement reserves to the United States the right to suspend or cancel deliveries at any time "when the national interest of the United States so requires." Further, under Section 21(c) of the Arms Export Control Act, no U.S. person employed under Foreign Military Sales contracts in Saudi Arabia or any other country would be permitted to perform services in support of combat operations.

Questions have been raised concerning the possible basing of the F-15 aircraft at Tabuk Air Base. I would like to repeat to you the assurance given to me and other United States officials by the Saudi Arabian Government that Saudi Arabia will base the F-15 aircraft, not at Tabuk, but at Dhahran, Taif and possibly at Riyadh or Khamis Mushalt. Basing the F-15 at the vulnerable Tabuk base could place in needless jeopardy these vital aircraft which will form the heart of the Saudi Arabian air defense system. In addition, Tabuk is not equipped to serve as an operating base for the F-15, and could not be so equipped without extensive U.S. assistance which would not be provided. These practical considerations, of which Saudi Arabia is well aware, strengthen the assurance that the F-15s will not be based at Tabuk.

The question has also been raised whether the Government of Saudi Arabia intends to acquire additional combat aircraft from other countries. The Saudi Arabian Government has assured us that it does not intend to add to its inventory any combat aircraft from other countries while it is preparing for and receiving the sixty F-15s. The shortage of trained personnel in Saudi Arabia would severely constrain Saudi Arabia's ability to utilize any additional new aircraft beyond the F-15 during this period.

With respect to the security of the aircraft the Government of Saudi Arabia has expressed its determination to provide carefully for the physical protection of the aircraft, manuals and other material related to it. Prior to the delivery of the aircraft, we will work with the Government of Saudi Arabia to ensure that adequate safeguards are in place to prevent unauthorized persons from obtaining access to the aircraft or information about it.

The proposal with respect to Saudi Arabia, like all such proposals, stands on its own merits, and I hope the foregoing information will be helpful to you and that you and the members of your Committee will join in support of the Administration's proposals to sell aircraft to Israel, Egypt and Saudi Arabia.

Sincerely,

HAROLD BROWN.●

MAKE RAOUL WALLENBERG AN HONORARY CITIZEN

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. SCHUMER. Mr. Speaker, the disappearance of Raoul Wallenberg behind the Soviet Iron Curtain over 36 years ago still weighs heavily on the conscience of the entire world. We witness today renewed efforts to determine the fate of this brave man, who time and time again risked his life in saving countless thousands of Jews during the final days of the Nazi terror. Fresh reports continually surface that he was seen years after the official Soviet report of his death, and may still be alive somewhere in the depths of that country's vast prison system. His case is of great concern to the residents of my district, many of whom are survivors of the Holocaust. One of them, Mr. Benjamin Steinberg of Brooklyn, has offered a poem dedicated to the spirit of justice which Raoul Wallenberg represents, and to the hope that he might yet one day be freed:

Why were you imprisioned, man of compassion and peace?
Does the Soviet Union deem yours the unpardonable crime,
For rescuing Jews from Hitler's police,
From his ovens and pits of lime?
These, the despised, were then to live,
Because you, a Christian, prevented their purge.
When will your warders understand and forgive
Your innate humanitarian urge?
The years have passed and still not a word
From your far-off prison and your lonely cell.
Though a non-person, unseen and unheard,
Survive you must, this silent hell!
Take heart! One day soon, you will bide
With us anew, unshackled and unbowed. For then,
When Heaven's command dare not be denied,
Raoul Wallenberg will be free again!
The world with great honors will greet
You, with speeches and noble phrases employ,
And those whom you saved, will lay at your feet,
Their countless tears of joy!

The case of Raoul Wallenberg touches not only those who directly experienced the unimaginable horror of the holocaust, but to all who seek to protect human dignity and freedom. I urge my colleagues to join with me in supporting the bill which will be introduced this week by the Honorable TOM LANTOS to make Raoul Wallenberg an honorary American citizen. Such action on the part of Congress will help to keep worldwide attention focused on his case, and to pressure the Soviet Union to make a full accounting of the fate of Raoul Wallenberg.●

REAGAN'S ASSAULT ON SALT

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an excellent article by Mr. Arthur Macy Cox, a policy consultant to the American Committee on East-West Accord, which appeared in the New York Times. Mr. Cox addresses U.S. attitudes and misconceptions that have obstructed negotiations to limit nuclear arms.

I commend this article to the attention of my colleagues:

REAGAN'S SALT GOAL

(By Arthur Macy Cox)

WASHINGTON.—President Reagan has criticized the SALT II treaty because it does so little toward reducing nuclear weapons. In a White House interview with five reporters last week, he again stated his position on strategic arms limitation talks with the Russians: "Anytime they want to sit down and discuss a legitimate reduction of nuclear weapons, I'm willing to get into such negotiations." What is interesting about this is that Leonid I. Brezhnev also has been seeking a substantial reduction in the two countries' nuclear arsenals for many months. One of the great myths about SALT is that the Soviet Union is opposed to deep cuts in strategic weapons.

This myth got started when the Russians rejected the so-called comprehensive SALT proposal that Jimmy Carter sent to Moscow in March 1977, shortly after he took office. The proposal was rejected, not because it called for deep cuts but rather because it was heavily weighted to the advantage of the United States. It called for significant cuts in the numbers of land-based intercontinental ballistic missiles with multiple warheads. Seventy-five percent of the Soviet strategic capability is in ICBM's; the United States has less than 30 percent of its nuclear capability in ICBM's. The comprehensive proposal also called for a 50 percent cut in the Soviet Union's heavy ICBM's; the United States has no heavy ICBM's. Thus, there should have been no surprise when the Soviet Union rejected the Carter package on the spot.

The comprehensive proposal was a hastily designed scheme for reducing the looming vulnerability of the United States' ICBM force. It would have accomplished that objective by limiting Soviet ICBM's to a point where they could not seriously threaten our Minuteman missiles by a first strike. But the proposal did not contain equal benefits for the Soviet Union by offering to cut or restrain those strategic systems where the United States has the advantage.

What is not generally known is that the former Secretary of State, Cyrus R. Vance, had a fallback position that would have authorized him to discuss controls on the B-1 bomber, cruise missiles, and the Trident submarine missiles. That never came to pass because the United States proposal was so

one-sided that it was not even considered by the Soviet Union as a basis for negotiation.

The SALT process was nearly destroyed by the clumsy United States maneuver, and the possibility for deep cuts was never explored.

The Soviet Union, however, has made it clear that it is interested in equitably deep cuts. When President Brezhnev signed the SALT II agreement in Vienna on June 18, 1979, he also signed the joint statement of principles and basic guidelines for subsequent SALT negotiations.

Those guidelines call for negotiations based on "the principle of equality and equal security." They establish the following objectives for the next round of negotiation: "(1) significant and substantial reductions in the numbers of strategic offensive arms" and "(2) qualitative limitations on strategic offensive arms, including restrictions on the development, testing, and deployment of new types of strategic offensive arms and on the modernization of existing strategic offensive arms."

These objectives and principles provide the basis for negotiating a genuine reduction in strategic arms.

President Reagan says he wants "to reduce the numbers of nuclear weapons to a point that neither side threatens the survival of the other."

The Soviet Union has stated that it has the identical goal.

The Russians would have preferred to have the SALT II treaty ratified by the Senate, but if President Reagan agrees to adhere to the SALT II terms while negotiations proceed, it should be possible to cut the two countries' nuclear forces by as much as 50 percent, over a period of five years. Such a cut combined with qualitative controls would eliminate the threat of counterforce (the capability of destroying the other side's nuclear weapons) and of fighting a so-called limited nuclear war.

The opportunity to make deep cuts exists now, but it won't after the next round of strategic weapons has been deployed. Today, as the former Secretary of Defense, Harold Brown, says, the two strategic forces are "essentially equivalent." The best approach would be to agree to a freeze at current levels and start negotiations for deep cuts based on the principles of equality and adequate verification of compliance.

Such a negotiation should not take long because all of the technical work has been completed during the exacting talks of the last seven years. In addition, all of the details have been worked out for reaching agreement on a comprehensive nuclear-test ban.

A deep-cut SALT agreement combined with a test ban would accomplish the goal that Mr. Reagan says he wants, thus advancing considerably the security of the United States, while saving tens of billions of dollars.●

THE TRANSFER OF THE STUTTGART FISH FARMING STATION

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. BETHUNE. Mr. Speaker, today I am introducing legislation to effect the transfer of the Stuttgart Fish Farming Experimental Station in Stuttgart, Ark., from the Fish and Wildlife Service of the Department of the Interior to the Department of Agriculture. This facility was established under Public Law 85-342, and is currently operated by the U.S. Fish and Wildlife Service with FWS resource funds and with Department of Commerce National Marine Fisheries Service contract funds.

Mr. Speaker, this facility has provided invaluable assistance to the fish-farming industry of this country in the development of warm-water fish farming. It is time to recognize this contribution and transfer this program to the Department of Agriculture for administration with other aquaculture programs presently at USDA.

The legislation which established the fish farming experimental Station, as introduced, provided for the program to be administered by the Department of Agriculture in recognition of the special nature of the program in the development of the aquaculture industry. However, because the Department of the Interior had an already-established fisheries program, Congress placed the program under the U.S. Fish and Wildlife Service. Now that USDA has aquaculture programs. I believe it is time to place this facility where it belongs.

Mr. Speaker, this facility truly is a national facility. Persons or agencies in 22 States are consulting with the station on a regular basis. Additionally, the facility receives many requests from foreign countries for information that is otherwise unobtainable.

Mr. Speaker, warm-water fish farming has not always been a viable industry. In the early sixties, the fish-farming industry tried to grow, but the producers found that husbandry methods and ancillary support did not exist. To provide the necessary and needed research, extension, and diagnostic services to the commercial fish-farming industry, the Stuttgart facility was established.

Some of the accomplishments of the facility include the determination of nutritional requirements of several commercial fishes, and development of efficient, low-cost feeds for those fishes; development of practical spawning and far-reaching techniques that provide sufficient low-cost seed stocks for the growing industry; pond management techniques to insure good water quality, fish quality, and profitable production; fish disease prevention, techniques, and the drugs for treatment; efficient harvest and processing techniques; and nationally known extension and diagnostic assistance to the new and practicing farmer.

A national laboratory for warm-water fish farming—aquaculture—research/development/technical services is needed for full development of this industry. This facility should be located near the industry so that user needs and technical findings can be freely exchanged. A national laboratory with its stability of personnel and funds would offer the continuity of a program so essential for many research studies such as selective breeding, nutrition, drug identification and registration, and others. It would also offer to planners a facility at which programs for long range/future needs could be studied before these became imminent problems. Obviously, it would permit research and development on national problems that confront all fish farmers to some degree, but for which the research is too expensive for any one State facility to assume alone. Other advantages of a national laboratory will be apparent to others.

The Fish Farming Experimental Station has much to offer the commercial fish-farming industry. With adequate fiscal support, personnel, and facilities, the laboratory—and various cooperators—can go far in expanding fish farming to a degree adequate to meet our Nation's needs for fishery production. Besides providing much-needed food, we can maintain managed/intensively farmed recreational fisheries near population centers. It goes without saying that the $2 billion deficit of payments for fishery products would be diminished with the availability of adequate amounts of good quality fish produced in the United States.

Mr. Speaker, it is clear that this facility is providing needed services to the Nation's fish farmers. It is essential that we provide the support necessary for his facility. I strongly urge my colleagues to join me in transferring the administration of this facility to the Agriculture Department where it rightfully belongs.●

STARMAN 50TH WEDDING ANNIVERSARY

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. ECKART. Mr. Speaker, I wish to pay special tribute to Bertha and Charles Starman who recently celebrated their golden wedding anniversary on February 28.

Their marriage exemplifies the true meaning of the marital vows and stands as a stabilizing force in American society. The foundation of their marriage has weathered the storms and remains durable, strengthened by their mutual dedication and commitment.

I share with their family and friends in saying thank you for the love and support they have given over the years. We extend our heartiest con-

gratulations on this joyous occasion. May they continue to accumulate the momentos and keepsakes of life together.●

A FARMER WHO WISHES TO BE FREE OF GOVERNMENT CONTROLS

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. McDONALD. Mr. Speaker, Mr. Gene Miller, a peanut farmer of Lumpkin, Ga., appeared before the Senate Committee on Agriculture, Nutrition, and Forestry on March 10, 1981, and made a ringing plea for freedom from Government controls and a bid for independence. He wants the free enterprise system to determine the price of peanuts. I could not agree more. May his number increase. His statement should be read by every thoughtful Member of both bodies as we consider the future of the Federal Government in farming. Therefore, I commend it to the attention of my colleagues.

I am Gene Miller, peanut farmer from Stewart County, Ga. Although I plant soybeans, milo, corn, wheat, oats, rye and sorghum as cash flow crops, and have engaged in the cattle and hog business, my primary farming endeavor is peanuts.

My purpose in appearing before you is to present a positive position from an actual dirt farmer—someone who is actively engaged in the day to day, week to week, month to month, and year to year business of growing peanuts, basically to make a profit.

With no disrespect to those others who have appeared earlier concerning the peanut program, I came to Washington of my own accord, paying my own way without any financial backing from any of the various lobbying groups interested in peanuts. It is my contention that it is time for farmers as individuals to speak to you, so that our unique concerns and our individual positions and opinions might be transmitted directly to our duly elected officials, specifically those in charge of our livelihood.

I ask you to Free Float Peanuts as you did cotton some years past. Do away with peanut allotments, poundage, quotas, government pricing, the various curtailments and restrictions of honest individual enterprise and the hundreds of do's and don'ts in the present peanut program.

Let the free enterprise system have a go at peanuts. Let the market place determine the various ramifications of peanut production. Government serves best when it simplifies rather than complicates.

It is clearly apparent that the last several years of government controlled peanut production and marketing have been anything but satisfactory to the actual peanut farmer.

The peanut farmer, beset with the jigsaws and complications of the awesome rules and regulations of the present government program, and subject to the evils of an escalating inflation in production costs, peanut rents, and also fully at the mercy of a controlled and seemingly immovable price ceiling on his peanut poundage, has found himself in the worst financial bind ever. Of course, some of this was brought about by poor crop years, but not altogether. The inequities of the 1977 Peanut Program caused many peanut farmers to be in poor financial position even before last year's drought. Everything the peanut farmer buys for the making of his crop is on an escalator. He never knows what will happen to fuel prices throughout the year—or to the prices of seed, fertilizer and necessary chemicals. Everything the peanut farmer must have is on an escalator going up, up, up, during the crop year, and from crop year to crop year. Everything is on an escalator except me, and I feel that as a poor peanut farmer burdened with a fixed price ceiling for my crop, I am holding up the whole price escalator on my shoulders.

To me, it appears that past peanut programs were not designed for the benefit of the peanut farmer. Rather, they benefited peanut shellers, peanut handlers and buying points. The farmer, who planted the seed, prayed for rain, labored beyond belief, paid the production costs (including the excessive annual rent for allotment acres), agonized over his growing or not growing crop, fought the onslaught of insects as well as fungus and mold, sweated out the multitudinous losses that can occur at harvesting, and finally struggled to market with his crop, was the "forgotten man" in the government peanut program.

Let us take a look at the so-called peanut price support. For years it hovered at around $400 to $420 per ton. Then, last year it was moved to $455. There was never an inflation factor fed into the peanut price—never even a cost of living factor fed into the computer for peanut farmers. Everything the farmer used, everything he bought, everything in farming advanced ten, fifteen, twenty, twenty-five percent and more—that is, everything except the government's price ceiling on his ton of peanuts. That is what today's government peanut price is—not a support price, but a price ceiling—a price cap with the middleman in the peanut business receiving some three to four times more per ton than the farmer—as much as $1400 to $1600 per ton. In fact, the last releases from the GFA in Camilla, Georgia, indicated that they had not sold any 1980 crop Seg 1 peanuts for less than $1400 per ton.

Remove this OPA ceiling from the peanut farmer's crop and let the market place seek its level. Do citrus, lettuce, celery, tomatoes or soybeans have a government OPA price ceiling on them?

What a charade! I do all the gambling, take all the risk in peanut farming (and it is a gambling game bigger than any at Reno, Las Vegas or Atlantic City), make a crop, sell some of my peanuts for $455 a ton with the "additional additional" peanuts bringing only $250 a ton and the middleman selling my same crop for $1400 to $1600 a ton.

There is also irony in the fact that the dirt farmer has to pay an absentee land owner from $100 to $300 for one year's use of a peanut allotment acre. The allotment acreage system now in force is so formulated that approximately seventy percent of the peanut allotment acres are owned by persons or entities sometimes far removed from peanut farming except for the annual rent they collect from the peanut farmers.

Furthermore, in Georgia certain remnants of the feudal system remain in effect, wherein middlemen in the peanut business (the buyers, handlers or shellers) have gained control of many of the allotment acres in an area. They then dole out these allotments to the dirt farmer, charging him through the nose and implying rather strongly that he had better bring his harvested crop back to the dispenser of allotted acres. Of course, along with such feudal systems comes the sale of fertilizer and lime, farm supplies, seeds and other agri-supply items, all tied in to the allotment provider.

In addition to the jigsaw puzzles of peanut rules and regulations which beset the farmer, there is also the astronomical expense of administration which the taxpayers assume. Most ASCS offices in the peanut belts devote nearly full time to the peanut program with more different forms, maps, measurements, poundage quota cards and peanut red tape than one can imagine. And if an error is made at the peanut buying point, inadvertently or otherwise, the peanut farmer is subject to severe penalties. I fail to understand the logic of fining a poor farmer for an error made at the peanut buying point without his knowledge and without any malice or deviousness. It is somewhat like being fined or put in jail for someone colliding with your properly parked vehicle and you're not even in it. If peanuts were free floating, all of the awesome penalties for a simple error in addition or computation would become null and void.

The peanut program has resulted in a massive maze and the dirt farmer and the taxpayer are both caught up in its complicated channels and avenues. There is just no way to estimate what it costs the government in paper work alone to administer the present peanut program. Why, the government even furnishes the farmer with ten to twenty plastic cards (similar to an American Express Card) but you can't charge a soft drink on one or sell a peanut without one.

Here is one example of the inequities of the peanut paper work complications. This year (1981) the owners of allotted acreage received a seven percent increase in allotment. However, the poundage quota was reduced some five percent from last year. This means there will be more of the farmer's peanuts sold for $250 a ton unless you and the Secretary of Agriculture take some corrective steps. What a deal? Give me more allotment acres on one hand to plant, making more peanuts, then reducing my peanut poundage quota so I'll have more peanuts to pass on to the middleman at $250 a ton, who perhaps can then ship them up here to the Washington ball park for $2,000 a ton.

It is time for the government to get its expensive hand out of the peanut program. The sad plight of most peanut farmers is proof positive that the past and present government peanut programs were dismal failures insofar as being of help to the man behind the plow. I honestly believe it to be best for America to get the government out of all farm programs except for food purity inspection, research, conservation and farmer education. I believe it certainly will be best for the peanut farmer.

I do not need to tell you that the farmer is disappearing. He is tired of being the low man on the price totem pole all over the world for the food he has worked so hard to produce. The big profit middlemen are going to eliminate the producing farmer. Farm land in America is also fast disappearing. The urban sprawls, planted pine trees and other varied land uses are reducing the total acres in cultivation each year.

Take away the hard working farmer—take away the farm land—where is the food for the hungry millions in these United States

and the hungry millions of the world going to come from? Unless the farmer starts making more of a living soon, realizing a profit from his labor, then in my opinion we'll be in an extremely tight belt situation regarding food come 1990.

Won't you please give the free enterprise system a chance? it made this nation great. I sincerely believe it can keep all of us from going hungry.

I ask you most respectfully to free float peanuts. Take off the government hamstrings. Remove the peanut OPA price cap or ceiling. Rid the dirt farmer of all the red tape and plastic cards of the peanut program. Release us from quotas, additionals and "additional additionals," allotments, ceilings, and get rid of the government gobbledygook and the administrative costs thereof.

Save the taxpayers money. Turn the farmers loose. Let free enterprise and the supply and demand of the market place hold forth.●

ALCOHOL FUELS IMPERATIVE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. FINDLEY. Mr. Speaker, the U.S. National Alcohol Fuels Commission recently published its final report, "Fuel Alcohol, An Energy Alternative for the 1980's." After 18 months of study, the Commission concluded that gasohol can help to decrease petroleum consumption in the United States, and that the Nation must proceed to develop available domestic resources to produce both ethanol and methanol.

Shortly afterward, the Reagan administration proposed that Congess rescind loan and loan guarantee funding for the construction of alcohol fuels plants.

This news has caused great concern among the citizens of this country who already have committed substantial resources toward feasibility studies, plant designs, and acquisition of land and capital for the construction of alcohol plants. One of the Nation's leading proponents of alcohol fuels and a very good friend of mine, Alvin Mavis, felt compelled to come to Washington to visit with me in person about his concerns.

Among the points Al raised was that the mountains of nonfat dry milk now in Government storage could be used to produce alcohol. This could substantially reduce Government expenditures for the milk price support program.

To give Members of the House a chance to review some of the information on alcohol, I insert excerpts of a recent article in Smithsonian magazine in the RECORD.

There is no reticence in the soul of Alvin M. Mavis. During the Bicentennial festivities, he rode a horse for 83 days from Springfield, Illinois, to Valley Forge, Pennsylvania, and he doesn't think that refueling America is going to be much more strenuous than that ride. He sits in his small office (near a framed proclamation praising him for "unquenchable enthusiasm" and "unsurpassed fervor"), a phone in one big hand and a flyswatter in the other, listening to the sweet hum of the machine in the next room as it makes corn into the juice that runs his car, and he conjures up a glorious future.

"If we don't get a lot of liquid fuel, America will have to change its way of life and that means going backward," he says. "But we want big cars, we want them air-conditioned, we want a market for agriculture, and we can have it all."

Alvin Mavis, retired cavalry colonel, farmer and executive director of Agri Stills of America, based in Springfield, Illinois, is talking about alcohol. To Mavis, alcohol is the magic fuel that will wash away America's oil blues, replacing dependence on Arabs with independence for U.S. farmers.

"We can put one or more of these stills in every town in the country," he asserts. (Once started, he runs along without prompting as enthusiastically as one of his 500-gallons-per-day stills.) "We can get this thing decentralized and get our hands on that liquid fuels situation, and we're going to have more meat at a better price, and more food than we've ever had. We'll have real economic growth, we can completely eliminate our deficit balance of payments, and we'll reduce our inflation rate. It's like going West!"

Al Mavis owns a big, air-conditioned car—a 1975 Ford LTD—which runs entirely on 190-proof alcohol. The car is not perfectly adapted yet; on a recent promotional drive the car zipped along vigorously, like its owner, then stalled without warning at the corner of Walnut and Monroe streets in Springfield. But such occasional proofs of the uncertainties that loom ahead for alcohol proponents don't bother Mavis at all.

"You'll find contradictions to what we say all over the country," he acknowledged, "but we don't care because we're right."

On at least one point Mavis is right: the whole brew of the alcohol fuels' future is turbulent with contradictions. Although it is obvious a new industry is being born, no one yet agrees on its future size, shape, speed of development or how much it can really do to free us from dependence on oil. The only thing most authorities agree on is that it is taking off.

"There is a boom factor here," says Lloyd Costley, general counsel with a Congressional/Presidential organization called the U.S. National Alcohol Fuels Commission. The Commission has compiled a list of 300 proposed large-scale alcohol production plants which, if all were built, would produce a total of approximately three-and-a-half billion gallons every year. The Bureau of Alcohol, Tobacco and Firearms reports that more than 100 of the builders of these proposed facilities have already applied for the necessary permits, while some 8,600 permits have been issued for small stills (under 10,000 gallons per year). Several major oil companies, among them Texaco and Ashland Oil, have recently announced plans to begin producing alcohol with which to make gasohol, a fuel which in the past couple of years has gone on the market in almost every state in the Union. A year ago a government-set goal of 500 million gallons of alcohol fuel per year by the end of 1981 looked hopelessly optimistic; now that quantity appears likely to be exceeded. "In the gasoline business," an oil marketing newsletter reports, "alcohol is perhaps the fastest comer since unleaded took off in the early Seventies."

However, 500 million gallons of alcohol, which might be enough to fill a few swimming pools in Beverly Hills if they ran out of champagne, is a thimbleful compared to our gasoline habit, which consumes more than 100 billion gallons a year. And expert opinions on alcohol's potential beyond that amount differ so widely they might refer to different planets.

A recent study by the Gasohol Study Group of the Department of Energy's Energy Research Advisory Board (ERAB) concluded gloomily last spring that agricultural alcohol production could displace less than one percent of U.S. gasoline consumption after 1985. But the force of ERAB's report was somewhat tempered by controversy over the fact that one of the seven members was a research manager with a major oil company more committed to synthetic fuel than alcohol. At about the same time Dr. Barry Commoner, noted environmentalist and erstwhile Presidential candidate, testified before the National Alcohol Fuels Commission that with a restructuring of agricultural production similar to that which integrated soybeans into a corn-dominated system, American farmers could produce 50 billion gallons of fuel alcohol per year "without reducing food or feed production," and without increasing soil erosion (see p. 120). While the ERAB report leans toward coal as a better source for the fuels of the future, Commoner suggested that with the development of alcohol production from woody plants and waste the United States could produce the fuel equivalent of 150 percent of the present annual gasoline consumption, and nutritive material as well.

Other reports are similarly varied. The General Accounting Office cautiously observed that "it appears entirely feasible for the nation's vehicle fleet to be operating on a ten-percent ethanol, 90-percent gasoline blend (gasohol) by the year 2000," which would mean an annual ethanol production of about ten billions gallons. And even the Department of Energy is a house divided on this issue: in contrast to ERAB's gloomy views, the Department's Office of Alcohol Fuels (OAF) is only slightly less buoyant than Alvin Mavis. After the November elections, a spokesman for the OAF, William Holmberg, who likes to talk about the "revitalization of rural America," waved the banner of alcohol with all the fervor of a born-again cold warrior:

"From a national security point of view," he said, "in dealing with international Communism or Soviet imperialism, there is no stronger defense than a peaceful offense involving prosperous farmers, vitalized rural communities and free-enterprise-driven community businesses."

Although Mavis, Commoner and Holmberg are obviously not political comrades, their shared zeal for this source of energy is typical of the broad reach of the alcohol enthusiasm.●

WHO IS MOST HURT BY TAX CUTS?

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. GINGRICH. Mr. Speaker, when my colleagues vote on the President's proposed tax cuts and spending cuts, I hope they will do so based on fact rather than fantasy.

The current myth that has been circulating is that spending cuts will primarily affect programs that help the poor. There are many who believe programs that help businesses and people of middle to upper incomes will go untouched.

That is just not true. The fact is that far more is being cut from programs that help the well-to-do.

Many of the people who are criticizing the President's program apparently have not studied it in detail. However, Robert Akerman, a columnist for the Atlanta Journal, has studied the proposals.

The text of his conclusions, printed in the Journal March 10, 1981, follows:

WHO IS HURT BY THE CUTS?

(By Robert Akerman)

I have done something that very few critics of President Reagan's proposed federal budget cuts have bothered to do—that is, go through all 83 programs he wants to cut in an attempt to judge how much of the burden will fall upon poor people.

The charge is that most of it does. To some extent it is a matter of how you define aid to the poor and aid to the rich, but I think that if you look objectively at programs in which the impact can be clearly allocated to one group or the other, you may be in for a surprise.

One way to get at it is to group those programs which make having a relatively low income the main key to receiving federal help. President Reagan proposes to cut the following programs in fiscal 1982 by the amounts indicated: food stamps, $1.822 billion; Aid to Families with Dependent Children, $520 million; Medicaid, $1.013 billion; subsidized housing rentals, $232 million.

That's a total of $3.587 billion to be trimmed from programs in which low income is the principal criterion for eligibility. In none of these programs does the President propose to spend less than was spent in the previous year by President Carter; he only proposes not to raise them as much for the next year as Carter proposed. You cannot honestly include as a count against Reagan the cuts in disability insurance and a few other programs which Carter also had proposed but had not been able to get through Congress; in any event, they do not necessarily impact on the poor.

Now compare that total of $3.587 billion to the list of cuts in programs that primarily benefit middle- and upper-income people. Eliminating the subsidy now given to airport and airways users (by taxing them for services now financed out of general revenue) would save $1.882 billion in fiscal 1982—in itself more than the amount to be cut from the food stamp program. I consider this airport and airway users subsidy to be one that principally benefits middle- and upper-income people because poor people fly only occasionally, in an emergency, whereas affluent people fly regularly on business or vacation trips.

Ending the subsidy of $100 million to boat and yacht owners clearly affects upper-income people. That would be done by charging user fees for Coast Guard and other government services.

The only transportation-related cut which hurts poor people more than the affluent is the one proposed in mass transit operating subsidies, and I oppose that one.

Ending the subsidy to so-called rural electric cooperatives would save some $1.142 billion in fiscal 1982. Today most of the beneficiaries of this subsidy are relatively affluent people in the surburbs; no means test is involved. I know, because I get my electricity through an REMC. I'm not a member of the nearby country club, but most of my neighbors are and I doubt that anybody in this subdivision is eligible for food stamps.

President Reagan proposes to cut the following amounts in fiscal 1982 from programs that directly aid big business interests: $410 million from the Export Import Bank, $258 million from waterways subsidies, $300 million from Conrail, $29 million from Amtrak (plus $114 million from it in fiscal 1981), $50 million in direct airline subsidies, $95 million from the Northeast Corridor Improvement Project (to speed up train service), $864 million from subsidies to synthetic fuel projects, $361 million from fossil energy development, $365 million from solar energy development, $156 million from alcohol fuel development and $149 million from solar energy trax credits.

The point, at this moment, is not whether all these cuts are wise. I have doubts, for example, about cutting Amtrak. But the point is that it is aid to business, and to argue that aid to private corporations in the development of products or services will eventually help the general public is to adopt the very "trickle-down" theory which critics of Reagan profess to reject. That also applies to most urban development plans.

Now these cuts which primarily affect business groups and upper-income people amount to a total of more than $6 billion—quite a bit more than the $3.587 billion to be cut from programs which primarily aid the poor.

The proposed cut in the school lunch program would not affect the truly poor, those below 130 percent of the poverty level. But if you still want to throw some of the $1.575 billion to be cut from that in on the side of cuts that hurt the poor, then you have to throw in on the other side most of the $1.095 billion to be cut from dairy subsidies, since most of it will go to big operators. And so it goes. Indeed, in all the 83 programs there is little beyond the $3.587 billion I have cited that will impact primarily on the poor.

We can argue about whether overall policies of the Reagan administration will help the rich more than the poor, but judgments about this really should be postponed. As far as the budget cuts are concerned, the balance looks much more even to me than Reagan's critics would lead us to believe.●

TRIBUTE TO WES UNSELD

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. MAZZOLI. Mr. Speaker, I would like to commend to the attention of my colleagues in the House of Representatives the outstanding achievements of one of Louisville's most accomplished native sons, Wes Unseld.

Wes, a hero of the Washington Bullets basketball team, has announced his retirement after 13 years of all-star caliber play in the National Basketball Association.

That Louisville is proud of Wes is no secret. He is indeed someone for all Americans to admire. His determination and drive, his ability to control his position against men several inches taller, are examples of the qualities of the American spirit universally admired by the American people.

I wish Wes and his wife, Connie, the best of health and happiness in the years to come.●

HELPING THE YOUNGER GENERATION

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. MICHEL. Mr. Speaker, at the heart of President Reagan's philosophy of government is the belief that those who need help benefit most when private initiative replaces, or at least supports, tax-supported services. Recently, Michael L. King, a reporter of the Wall Street Journal, wrote an article that suggests President Reagan's philosophy if not, perhaps, every aspect of his program is in tune with what many thoughtful Americans believe. Mr. King suggests that his generation of black Americans should get involved with the current college generation of black youth. He finds this generation cynical, dispirited, and suspicious. His solution to this problem is that successful black Americans who fought the civil rights battles of the 1960's should take time to encourage and help today's black students.

I ask unanimous consent to insert "An Alienated Generation of Black Students" by Michael L. King, from the Wall Street Journal, March 9, 1981, in the RECORD.

[From the Wall Street Journal, Mar. 9, 1981]

AN ALIENATED GENERATION OF BLACK STUDENTS?

(By Michael L. King)

TUSKEGEE, ALA.—If the students here at Tuskegee Institute are typical, young blacks

preparing for professional careers are astonishingly alienated.

This alienation stems partly from the disparity between black America and white America. Black youths resent hearing whites talk about how much progess blacks have made, because they don't think racism has lessened. They fear—no, they are almost convinced—that racism will prevent them from finding a meaningful job in American business.

Despite what the students think, there has of course been progress, and one of its more obvious signs in the emergence in recent years of a black professional class. Trouble is, that class seems as inaccessible to the students as the master's mansion on a Mississippi plantation once did to the field hands.

I discovered this recently when I spent three days talking to students here at predominantly black Tuskegee Institute. I was here as part of a youth motivation task force organized by the National Alliance of Business. The program matches black, Chicano and American Indian professionals with college students who are members of those same minority groups. NAB is financed cooperatively the federal government and industry. Expenses of taskforce participants are paid by their employers.

THE SAME QUESTIONS

I talked to more than 200 students here, individually, in large classes and in small groups. Many asked the same questions: Why would Dow Jones let you come here to talk to us? How did you get your job? Are the people you work with racists? What kinds of questions will a job interviewer ask me? Last summer I couldn't find any other job, so I took a job sweeping floors; did I make a mistake? Should I have gone to summer school instead?

My answers were honest, if predictable: Take advantage of every opportunity to get work experience. An employer will want to know how well you will handle responsibility, and college grades and previous work experience are good indicators. Don't wear a party dress or disco shoes to a job interview. Yes, there are some racists in business and you will run into racism in your careers. Life isn't easy or fair but with hard work others have managed to succeed and you can, too.

Most of these students seemed bright and ambitious, but lacking in the social skills they need to get and keep a professional-class job in white America. To attain any measure of success, blacks typically must learn two distinct cultures—their own, and that of the white majority.

But the young blacks I met think learning the majority culture is a waste of time. They are convinced that America has hardened its heart towards them. They dream, but don't make much effort toward realizing their dreams because they fear it is futile. They feel despised by whites and spurned by black professionals.

On a plane back to Atlanta I sat next to Patricia Blackmon, a district staff manager with American Telephone & Telegraph Co.'s Southern Bell unit. She was on the Tuskegee task force, too, and she came away with similar feelings. "I am really afraid when I think what's going to happen when they graduate," she said sadly. "When they apply for jobs and don't get them they'll think it's racism. But I wouldn't hire most of them either."

Ms. Blackmon and I puzzled about how and why these students—only 10 to 15 years younger—are so different from those of us who came of age in the 1960s. We ruminated about our own experiences growing up black and poor—she in Newnan, Ga., and I in Greenville, Miss.

Our generation, we agreed, had grown up with little television and much responsibility. From our earliest years we'd been actively involved in everything around us. We had chores to do after school, but there was never a hint of getting paid for them. Ms. Blackmon's father was a storekeeper, and after school she was required to work in the store.

I recalled to her that on Sunday nights my sister Esther would play the organ, while my father, my sister Helen, my two brothers and I served as the church choir. "That was us," she said excitedly, also remembering. "That was me playing the organ."

But the students' memories are sparser and paler. For some reason—too much television, I suspect—they are passive in many ways. Without that bent toward active participation, they have little sense of origination, conclusion or accomplishment.

My generation always seemed to have a sense of purpose, even when—as frequently occurred—we charged off in the wrong direction. We spend our days demonstrating against racial injustice, and our nights boning up on revolutionary rhetoric by studying the writings of Jomo Kenyatta and Frantz Fanon. Reading was a joy, because to wrestle successfully with such concepts as colonialism and nationalism gave us a sense of accomplishment and precluded feelings of isolation.

We even managed to pass our college courses. We were too onery to flunk. Administrators told us that failure was certain for students who committed such vile acts as imprisioning the chancellor's family in their own residence at the University of Mississippi, or taking school trustees hostage at Tuskegee. We were determined to prove them wrong, and we did.

By contrast, the students I met seemed to have no clear sense of purpose and no unswerving determination to accomplish anything.

Most important, we who grew up in the Sixties felt a sacred indebtedness to those who had gone before us. Our successes, we believed, occurred in large part because we'd been hoisted high atop the shoulders of the generations past. When my mother was a small girl, my grandparents lived and worked on a plantation in the Mississippi delta. They ran afoul of the plantation boss when my grandmother decided my mother should attend school. The plantation boss felt that children of the field hands also owed him a day's work. My grandparents disagreed. So they crammed their meager possessions in a broken-down wagon and moved on. If my grandparents had done otherwise, I thought years later, my own career goals and life accomplishments would have been far lower.

That today's black college students seem to feel cut off from their predecessors, rather than linked to them, says much about the shortcomings of my generation. We haven't done very well by younger blacks. To many of us, social responsibility has come to mean a yearly contribution to the United Fund, an every-other-year contribution to the United Negro College Fund, and an occasional trek into the inner city for ribs. Evidence of our aloofness is that the eight persons who traveled here for the youth motivation task force were less than half of those the NAB asked to participate.

Both Ms. Blackmon and I were adults before we met blacks who hold the kind of jobs we now hold. In those days there weren't many black professionals and most of them were physicians.

MORE INTERACTION NEEDED

Now, there are many. But we haven't interacted with black youth as we should have. In the white culture there is much interaction between youth and professionals. Often this interaction—around the neighborhood, in churches, family get-togethers—is unintentional and simply is part of the milieu in which white youths grow up. In much of the black community, such coincidental interaction isn't possible. It must be planned. And thus far, we've failed to do that.

I don't worry about the Tuskegee students I met. Most of them will make it. But I am deeply worried about the students who have no encouragement and no one with whom to share their plans.

Once, at Tulane University, I spent the better part of a Saturday in the library sweating over chemistry books. By evening, I had resigned myself to failing the exam the following Monday. I walked downstairs in the University Center to get a glass of beer. Before I entered the Rathskeller I was approached by a janitor whom I knew only as Joe. "How's it going?" Joe asked.

"Bad," I groaned. "This chemistry course is getting the best of me."

Joe wrapped his arm around my shoulder. "It ain't bad as you think," he said. "You know, when I was a boy they wouldn't let me near this place. If I crossed Jefferson Street they'd put me in jail. It ain't that hard. You'll make it. You gotta."

I was too choked up to drink beer. I went back to my room and studied for the remainder of the weekend. I made an A on that exam—partly, I think, because someone was there to encourage me and to keep me from quitting.

I'm glad I participated in NAB's program at Tuskegee. I believe such programs change lives, and I wish that other black professionals would recognize this and find a way to get involved.●

RED CROSS MONTH—100 YEARS OF SERVICE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. RITTER. Mr. Speaker, May 21, 1981, marks the 100-year anniversary of the American Red Cross and, since this month is Red Cross Month, I would like to pay tribute to the magnificent service that the people of the American Red Cross have rendered to their fellow citizens during the past century.

In a nation with a fine tradition of citizens helping each other, the work of the American Red Cross has come to represent the very best in unselfish and effective volunteer service.

Indeed, the range of different services provided by the Red Cross is so vast that most citizens have only a limited appreciation of just how incredibly diverse is the role of the Red Cross. The more than 1.4 million U.S. Red Cross workers serve not only on

the commonly known context of disaster assistance, when people who have lost everything desperately need emergency help, but also in such daily activities as health and safety education, community services, and, of course, the vitally important Red Cross blood drives. In fact, the Red Cross collects, processes, and distributes more than half the Nation's total volunteer blood supply.

In my own district in Pennsylvania, Red Cross workers have become a trusted, needed, and well-respected part of our communities. The half million people of the Lehigh Valley have good reason to be deeply grateful for them. Today, I join in paying a much-deserved tribute to the wonderful people of the Red Cross.

We can only hope, as we pass through the 1980's and beyond, that our families may continue to support and rely on the American Red Cross—an organization based on the volunteer spirit which eases suffering, teaches, serves, and, above all, cares for fellow human beings in need.●

PROGRAM FOR ECONOMIC RECOVERY

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. BLILEY. Mr. Speaker, support for the President's program for economic recovery has been overwhelming among my constituents, I am confident that Members on both sides of the aisle, as well as in the other body, have found a similar response from their constituents. On March 4, one of my constituents, a member of the Richmond City Council and one who will have to directly confront the problems of reduced Federal spending at the local level, placed a letter in the Richmond News Leader strongly endorsing the President's program and criticizing those who would tear it apart. I would like to share that letter with you:

DEAR CONCERNED CITIZENS: I am tired of Americans who do nothing but critized American leaders!

I am tired of hearing that my country "oppresses" its women, its minorities, and its poor. I am tired of hearing that my county "neglects" its cities, "abuses" its environment, and "endangers" the peace of the world through its "war-mongering."

But, most-of-all, I am tired of all those special-interest, self-serving Americans who have endlessly harped on these themes—and who conveniently forget that no other nation in all of history has offered as many Freedoms, as much Abundance, as many Opportunities to its peoples as has America!

But the fact is, that this great America—not perfect, but the most perfect this world has yet seen—is now in serious trouble.

Our new President, a man of rare perception, ability, and courage, sees the problem, evidently knows what to do about it, and has the plain old country guts to go out and do it! His recently-announced programs are the beginning of Ronald Reagan's remedy for our country's problems. But these programs are already running into heavy fire.

The same selfish self-serving special-interest groups which have pushed America down the road to external weakness and internal ruin are pushing again. They don't want the Reagan programs. They're grabbing the feet of every Senator and Congressman in Washington and holding them to the hot fire of misrepresented public opinion, exerting all the pressure they can to force the gutting or the killing of our President's proposals. Do you want * * * reduced Government spending * * * reduced personal income taxes * * * controlled, then reduced, rate-of-inflation * * * stronger national defense?

Then you want the enactment as presented of Ronald Reagan's proposals! So tell him so! And tell your Senators and Congressmen, the members of the President's cabinet, and the Press! Tell them so! Use the telephone, the Postal Service, Western Union! But tell them so! Tell them now! Tell them often! Join me and say

"I am tired * * * tired of self-servers running my country for their own special interests! I want my country run by its elected leaders for all of its people! And, furthermore,

I am tired * * * of waiting! I want it to begin to happen now! And I believe it will through the immediate enactment of all of the President's programs! Work for them! Vote for them! And I will work and vote for you!"

If, like me, you are tired, you'll write, phone, or wire today. And, I, and our posterity, will thank you!

CAROLYN C. WAKE.

Mr. Speaker, I too am tired, as are my constituents, and the vast majority of Americans of special interest groups running our Nation. The people have spoken. It is now up to us to act. I urge my colleagues to join me in wholeheartedly supporting the President's program. Let us return government to the people. That is what they want and that is what they deserve.●

IN TRIBUTE TO THE LATE HONORABLE JACOB H. GILBERT

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 18, 1981

● Mr. ROSTENKOWSKI. Mr. Speaker, it is with a sense of great loss and sorrow that I now pay tribute to the late Honorable Jacob H. Gilbert. On February 27, Jack lost his private struggle with cancer.

Having served for 10 years in the New York State Legislature prior to coming to Washington, Jack was a man who dedicated his life to public service. He was a true statesman who in an undramatic, workman-like manner accomplished much. In his 10 years of service to this body, Jack was highly successful in promoting legislation which bettered the lives of the elderly, poor, handicapped, and disadvantaged.

I would like to make special mention that Jack and I were neighbors on the seventh floor of the Longworth Building. There I had a chance to realize that Jack Gilbert was not only a helpful, but also, a genuinely kind individual. I also had the pleasure of serving with Jack on the Ways and Means Committee and on the committee he demonstrated ability as a capable participant in the often complicated environment of tax policy.

Jack Gilbert—a dedicated public servant, a man of integrity, a dear friend—will long be missed by this Member of Congress.●

SISTERS OF ST. JOHN THE BAPTIST

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. RODINO. Mr. Speaker, this Sunday, March 22, in my home city of Newark I joined the parishioners of St. Lucy's Church at Mass to celebrate the 75th anniversary of the Sisters of St. John the Baptist in the United States.

The first Sisters of St. John the Baptist in America arrived in Newark from Italy in 1906. They came with several orphan girls, and the parish of St. Lucy's Church welcomed them. Since then the Sisters have tended to the needs of the Newark community with saint-like dedication. I am a lifetime member of St. Lucy's parish and I can remember as a boy benefiting from the Sisters' personal acts of kindness.

For over three generations, the Sisters have provided friendship to the lonely and hope to the despondent. They have sheltered the homeless, taught in our schools, nursed our sick, comforted those in prison, helped the elderly and the handicapped, and assisted immigrants in adapting to American life.

The Sisters run St. Lucy's Grammar School and St. John's Girls Residence in Newark. They are among 160 Sisters serving in 16 communities in America, under American Provincial Sister Margaret Mary.

The history of the Sisters of St. John the Baptist dates back to 1878 in the small town of Angri in southern Italy where a group of religious women and a local priest pooled their resources to buy a horse stable and converted it into an orphanage. The Sisters of St. John the Baptist have continued to support and operate the orphanage ever since. Right now, the orphanage is providing vital help to children left homeless by the recent earthquake.

This constant service to God and mankind is exemplified by the Sisters at St. Lucy's parish in Newark. Their record of dedication was recognized in 1978 when a lifetime member of St. Lucy's parish, Sister Alberta Stango, was chosen Mother General for the entire order of the Sisters of St. John the Baptist. Sister Alberta Stango is now stationed in Rome, but the other Sisters who have meant so much to the Newark community continue to serve at St. Lucy's Church. Sister Vincent is 80 years old and has been at St. Lucy's for 60 years; Sister Celeste has spent over 40 years helping children at St. Lucy's; and Sister Francis Marie, who is principal at St. Lucy's School, is carrying on this tradition of caring and commitment to young people.

On Sunday I joined the other parishioners of St. Lucy's to pay tribute to this tradition. Father Joseph Granato, pastor of St. Lucy's concelebrated Sunday's Mass with Bishop Pechillo, vicar for Hudson County who is representing Archbishop Gerety; Bishop Marconi, vicar for Union County; Bishop Pernicone, retired Auxiliary Bishop to Cardinal Cooke in New York; and Father Joseph Nativo of St. Lucy's Church.

It was a time for us to give thanks for all that the Sisters of St. John the Baptist have meant to the families of Newark. I join with the countless others who have been blessed by their kindness, and I am thankful for their continued role in our community.●

CETA PROGRAMS CAN WORK PROPERLY

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. SHANNON. Mr. Speaker, I would like to share with my colleagues an article on CETA which appeared in the Lowell Sun recently. With all of the criticisms of CETA, it is refreshing to know that such programs can work when properly administered:

MOTHER STRUGGLED TO GET OFF WELFARE—NOW SHE'S CHILDREN'S LIBRARIAN

(By Ann Shaw)

LOWELL.—Lela Boykins has proved that things can be changed if you're determined enough to make them. One might say this young woman had three strikes against her only five years ago: She was an unwed mother of two children, lacked a high school diploma and was black.

Today as the children's librarian at Lowell City Library, Lela has completely changed her life around and now looks forward to her future with all the enthusiasm of a first draft choice for the major leagues.

Lela is another example of today's woman in transition. She knew she didn't want to be a welfare mother the rest of her life and realized the change would depend entirely on herself.

Things began to materialize for her in January 1975 when she became a CETA (Comprehensive Employment Training Act) employee at the City Library. By that time she had returned to high school and was graduated. Her baby was only three months old while her other daughter was still a tot.

But she knew things had to be done. She also knew she had a lot of pride. Her family was very supportive and helped out in many ways, both materially and emotionally. She did minor typing and clerical work for the first couple of months, moving on to the children's department under the guidance of former children's librarian Louise Dunn.

"It was Louise Dunn's birthday," recalls Lela, "and she told me kiddingly that she didn't know if she'd keep her birthday present or not."

That's when Lela began to really enjoy her job. Dunn was an excellent teacher and Lela soaked-up what she was taught like a star student. "Miss Dunn accepted me for what I was, not what some may have thought I should be. Sometimes society forces people to accept roles they're given. Then you become society's child. Miss Dunn helped me realize I was living below my capabilities," reasons Lela.

Lela says her old philosophy was that a single black mother can't make it in Massachusetts. That was before she realized she wasn't "created" by society—that she had her own mind and could set her own goals. "You have to be determined to be successful before you can be," she smiles.

In those early days at the library she grossed $122 for 35 hours. She could barely make ends meet, having an apartment at the Northern Canal complex. Lela wasn't accustomed to providing for her two daughters, she confesses, saying it's difficult to give-up the support your family has provided. As one of 10 children, the family ties remain strong, but she has grown to be an independent woman who is instilling the importance of family and achievement in her own children.

In 1977 she started attending night school at Northern Essex Community College, borrowing cars from friends like Louise Dunn and others to get there. She received an associate's degree in library science for her efforts.

Lela was a CETA worker until November of 1977 when she was laid off for three months. When she returned it was as the assistant children's librarian, being approved for the job by the library board of trustees.

She is now attending the University of Lowell for her degree in criminal justice as another tool for the future. "The only thing I've ever wanted to do is work with children," she says.

Her next goal is to earn her master's degree in library science from Simmons College in Boston.

Lela takes her job at the library extremely seriously and believes her role here can have a great impact on a child's future. She said her aim is to help every boy and girl who uses the library in some way.

"Their young minds hunger for knowledge, otherwise they wouldn't be here. I want to satisfy that need," she explains.

She views Lowell as having many underprivileged children and many with special needs. She strives to reach out to such young people. One of her work-related goals is to establish an outreach program with nearby Lowell Day Nursery. She has already established one with CTI (Community Teamwork, Inc.) that she coordinated last year.

She believes children should be given "reasonable" responsibilities and rewarded for their efforts, through praise or an award of sorts without making them materialists.

Lela remembers a lot of the prejudice she encountered over the years, both while living as a child in North Carolina and in Lowell when she was subjected to such things as using the basement toilet facility at the library that was earmarked for transients. She preferred leaving the building and going to her French Street apartment instead. She is determined that her children will be given the opportunities she was denied because of the color of her skin. She is also instilling in them a deep respect for education, in many ways using herself as a role model.

"I want my daughters to be able to express themselves, and not afraid to be ambitious. I don't expect them to be subservient, but to conduct themselves as ladies," she said.

A member of New England Pentecostal Church of God where she is also a choir member, Lela refers to church as "her life" now. She enjoys all aspects of church and gives a lot of herself to it. A great believer in prayer, Lela says she prays many, many times every day. "Prayer changes things," she says with enthusiasm. "Church is my hobby and my entertainment," she offers, saying she's there five days a week, missing only two nights to go to school.

Lela says she is just beginning to live.●

HUNT FOR SILVER—PART III

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. McDONALD. Mr. Speaker, today I am inserting the final part of the article "Hunt for Silver." Parts I and II appeared March 17, page 4607 and on March 19, page 4826 respectively. This final part details the machinations that took place against Mr. Hunt and shows why he was not the cause of the abrupt drop in the price of silver last year. I commend this matter to the attention of my colleagues.

It was Mocatta chairman Henry Jarecki—along with other shorts operating through the exchanges—who stabbed the Hunts in the back and ruined the silver market in the United States. It was they who engineered the rule changes which made it virtually impossible for longs to buy and ultimately led to a massive, if temporary, price collapse. A market consisting only of sellers—as decreed by the exchanges—would of course have to collapse. On March 27, 1980, it did. It was the commodity exchanges and the Commodity Futures Trading Commission that were responsible for the silver debacle.

But of course the rapid and extreme rule changes were not the only factors involved in creating the silver crash. There is, in fact, a great deal more that is suspicious here. Interest rates were rocketed and loans from the banks for "speculative" purposes were severely curtailed. Of course high interest rates tend to draw investment money out of the precious metals and into attractive short-term Treasury bills.

Many analysts, observing that the prime rate peaked at precisely the point at which the price of silver plummeted to its lowest

level, theorize that the Federal Reserve (under C.F.R. member Paul Volcker) may have been working in concert with the big banks and insiders on the exchanges to pull the rug from under the Hunts. Viewing the Hunt silver play and its possible future hard-money implications as a dangerous threat to their paper-money empire, the international manipulators may have conspired to bring down the Hunt's huge silver position and, if possible, destroy them.

In the commodities futures market, a great deal of the buying is done with borrowed money. When interest rates are high, it is more difficult and less attractive to borrow money to purchase new positions or to furnish additional margin. If the big banks—which set the prime lending rate—wanted to help the shorts and clobber the Hunts, they could do what they did—push the prime rate to twenty percent and discourage people from borrowing money to compete in the commodities futures market. As a result, investors would sell out their positions, and the price of silver would drop.

Did it happen that way? Note that, in the months subsequent to the silver crash, interest rates which had been forced to an all-time high plummeted faster and further than at any time in history. A drop in the prime rate from twenty percent to twelve percent in three months represents a forty percent drop. Normally, the prime won't vary more than a point or two in a year. Of course, these are uncertain times and this could all be coincidence.

Realizing the difficulties in getting large sums of money in the United States under the Paul Volcker policy at the Fed, Bunker Hunt decided to try European lending institutions. After all, European financial institutions have long been more eager to make loans with precious metals as collateral than banks in the United States. Hunt now found to his dismay that the U.S. Federal Reserve had sent out a form letter to all the major banks in the world requesting that they not make any loans to Americans for "speculation" in gold or silver. Representatives of the Federal Reserve were even flown overseas from Washington, warning the foreign banks not to lend substantial sums of money to Americans—and specifying Bunker Hunt.

Mr. Hunt was acquainted with a number of the people at key foreign banks, and he asked them, "What do you people care what the Federal Reserve says? You're not Americans; the Federal Reserve doesn't run you." They explained that they didn't dare cross the Federal Reserve because they had branch offices or other interests in the United States and the Fed could make things very tough on them. Bunker hunt comments: "That came as quite a surprise to me, because I didn't realize they had that kind of power. But they really do."

There was never any question about the ability of the Hunts to remain solvent. But, as a consequence of record interest rates imposed by the Fed and the big banks, and the huge margin deposits suddenly required by the commodity exchanges, the Hunts found themselves caught in a liquidity squeeze that would have bankrupted many nations.

Due to the rule changes made by the exchanges and a great deal of public selling of old silver, the price of silver had already begun to drop from its January seventeenth peak of about $50 an ounce. As they became increasingly pressed for cash, their broker (Bache Halsey Stuart Shields) began making large margin calls to the Hunts to secure their positions. In an apparent effort to push the price of silver back up and to raise cash to help relieve the situation, Bunker Hunt announced from Paris on March twenty-sixth that he and two Arab partners would issue interest-bearing international bonds backed by their silver holdings.

The effect of this announcement was to fuel the rumor mills in the financial markets where it was misinterpreted as a desperate call for help to raise cash. Traders began to panic and dumped silver contracts like they caused cancer. The delighted shorts watched the price fall and covered their short positions.

On that very day, Bache informed Herbert Hunt in Dallas that the brothers faced a staggering margin call of more than $100 million. It was a call that was later to total some $300 million. Due immediately. "They had always met their calls until this week," said Bache's executive vice president Elliot Smith. But they now declined immediately to do so and Bache began to liquidate Hunt bullion, futures contracts, and stocks, including huge positions in Texaco, Gulf Resources, Louisiana Land, and First Chicago Corporation.

By this time, rumors were spreading like quicksilver. One tale claimed that Bache had issued a margin call for one billion dollars—and the Hunts couldn't make it. A full-scale panic had been triggered. According to Elliot Smith, "It was a classic blowout. It was the culmination of the news that a major silver buyer was being liquidated, of the pressures of high margin rates, of all the inflation and recession talk. Everybody worried about being able to get their money out of the market, and people were just selling irrationally."

Bache announced that the margin calls had not amounted to a billion but only $300 million, that the Hunts had already paid two-thirds of the tab, and that Bache would make up the balance the next day. These assurances helped to stem the selling panic, but silver had already fallen to $10.80 on the morning of March twenty-seventh. It was Silver Thursday.

Because they had bought most of their silver bullion at under $10 an ounce, however, the Hunts were still ahead of the game in terms of their holdings in the actual metal. But the value of their bullion had dropped by nearly four billion dollars since January as the price of silver began falling in response to the quickie rule changes imposed by the exchanges. In the futures market, they had lost over a billion dollars on silver contracts they had bought when the price of silver was in the neighborhood of $35 an ounce. And, of course, they still had the agreement with Engelhard to buy 19 million ounces at $35 an ounce, a deal made before the precipitous decline in silver.

On the Sunday following Silver Thursday, Bunker Hunt flew in from Saudi Arabia and met with Herbert and representatives of Engelhard Minerals. The rug had been pulled from under the Hunts and they moved to negotiate with Engelhard on the huge silver purchase at a marathon day-and-night session involving representatives not only from Engelhard, but also of the big banks—Citibank, Chase Manhattan, Morgan Guaranty Trust, Bank of America, Manufacturers Hanover Trust, and the First National Bank of Dallas. Also wandering in and out of this top-level meeting was none other than Federal Reserve Chairman Paul A. Volcker . . . wearing pajamas. Evidently the big bankers believed they had the Hunts where they wanted them.

The upshot was that the Hunts settled with Engelhard by giving them 8.6 million ounces of silver bullion and, in addition, valuable drilling rights for oil and gas in Canada—a bargain settlement for Engelhard that may now seem less than brilliant with the Canadian Government moving to nationalize oil.

Also, the Hunts negotiated a big loan from the banks totaling $1.1 billion. In order to get this huge loan, however, the Hunt brothers had to put up virtually all their income-producing assets as collateral—including silver, oil, cattle, race horses, art, and securities. According to Herbert, these collateralized assets have a market value of eight to nine times the amount of the loan—which means that even after the biggest swindle in history the Hunts are worth around nine billion dollars.

Many have wondered why the Insider megabanks would—with the approval of Federal Reserve Chairman Paul Volcker—come to the aid of their mortal enemies the Hunts. Evidently the big bankers were afraid that the temporary Hunt liquidity crisis might precipitate a major domino effect culminating in a mammoth collapse of the entire banking system. Banks, brokers, and creditors were in danger of insolvency if Bunker and his brother were cash-squeezed and unable immediately to pay their obligations. They did not want to be dragged under. Having victimized the Hunts, the Establishment then guaranteed their liquidity—not because of guilt or charity, but out of fear that their own empires might go down while the Hunts were righting their ship.

In April, two weeks after the big loan to the Hunts was signed, Fed Chairman Paul Volcker announced to the press that one of the conditions of the loan was that the Hunt brothers would have to liquidate their entire silver stock and promise not to buy precious metals in the future. This was not encouraging news for the silver market in the United States. Alan Trustman pointedly observes: "An odd statement for Mr. Volcker to make. Knowledgeable as he is, and he unquestionably is knowledgeable, he had to know the impact his statement was likely to have—and did have—on the shell shocked precious metals markets, before he decided on the following day to qualify what he had said. What was he trying to accomplish? Save the dollar as we know it?"

Despite Volcker's pronouncement, the requirement that the Hunts dispose of their silver holdings was never a condition of the loan.

Meanwhile, not everyone had lost in the roller-coaster ride that had been afforded to silver. Some had sold short before the big plunge. One of the "lucky" sinners was Occidental Petroleum chairman Armand Hammer, whose father had been a major founder of the Communist Party in the United States. Hammer revealed that his company had gone short in both silver and gold in January when prices were high, just before the big drop. Occidental wound up with a profit of $119 million.

Had Armand Hammer acted on inside information? Is a five-pound mosquito fat? Even Hammer would not have dared risk Occidental's corporate funds in the futures market unless he had been assured that he was getting in on a sure thing. Had the price of silver gone to $60 instead of plummeting, Hammer would have gone to the slammer in an act of poetic justice.

Mr. Hammer's "good fortune" was not simply brilliant speculation. The Big Boys

were dividing up the pie and apparently cut Armand Hammer in for a piece of the action on what is known in horse-racing circles as a "boatride." It was a fixed race. Others doubtless did as well as Hammer, but did not call a press conference to gloat.

Another big winner was Norton Waltuch, vice president of Conti-Commodity Services Inc. in New York. Waltuch emerged from this hustle with a personal profit believed to be more than ten million dollars. Although he strutted confidently around the Comex silver pit, exuding assurance in the soaring price of silver, Norton Waltuch later let his clients go down the drain when he sold short. In the frank opinion of one of his former associates: "Norton betrayed us."

Congressional investigations of the silver swindle were soon launched. Hearings held by Senator William Proxmire's Senate Banking Committee have turned up substantial evidence of conflict of interest on the part of members of the exchanges and possibly certain members of the C.F.T.C. also. Based on data provided to the Committee by the Commodity Futures Trading Commission itself, Proxmire revealed that at least nine of the twenty-three members of the Board of Governors of the Comex were holding enormous short positions which would have required them to deliver more than 38 million ounces of silver bullion, worth about $1.9 billion in January when silver was still near its peak. This amounts to one of the greatest plunders by conflict of interest in financial history.

Bunker Hunt guesstimates that, on paper, some fifteen to twenty billion dollars may have changed hands between the time silver was at or near its peak of $50 and the time it dropped to $10.80. This includes all of the traders involved, the whole market, not just the Hunts.

Bunker acknowledges that he was aware all along that the Comex and the CBOT had the power to make rule changes any time they wanted—but any such rule changes, he explains, were supposed to be neutral in their effect on the market players. The extreme and rapid rule changes by the exchanges were anything but market neutral! On that basis, the Hunts are contemplating a legal suit against the Comex for its role in the silver debacle. The Comex may someday be renamed the Hunt Commodities Exchange.

The whole episode demonstrates the classic tendency of government regulatory agencies to take sides with special interests within the industry under regulation. Government intervention is *never* "market neutral," and can only help some at the forced expense of others. The commodity exchanges made their disruptive rule changes—in conflict with previous contract obligations—with the knowing approval of the Commodity Futures Trading Commission. The culprits in this financial episode were not the Hunt entrepreneurs, but those engaged in collusion between the government's C.F.T.C. and special interests in the exchanges.

Through all of this the major media have nonetheless attempted to make the Hunts look like sterotypical capitalist villains consumed by their own greed. Bunker Hunt, who has no use for the media moguls of the "Liberal" Establishment, understands the game very well. As he put it: "The same guys that were able to break the market were also able to get the media to attack its victims—which happened to be us." From the point of view of the *Insiders* of international banking and their kept press, the Hunts represented a colossal threat to a power structure based on paper money. They still do.

But now all the world has seen the character of Bunker Hunt. He surely saw the trap that the bandits running the Comex were preparing for him. He could have dumped and run, as others did—but he had urged a great many of his friends to follow him in investing in silver. He could not bail out without betraying those friends. So Nelson Bunker Hunt retained his integrity under circumstances said to have cost him four billion dollars. That hurts even when you have other billions on which to get by.

Mr. Hunt's satisfaction in all of this comes in the fact that while he may have lost a battle, there is no question that he will win the war. Bunker Hunt reportedly has 63 million ounces of silver left, even after being robbed of some 30 million ounces. The basic factors of supply and demand in the world silver outlook have not changed. The same reasons which led the Hunts to invest millions of dollars in silver apply more than ever today. Ever more silver is being consumed than is being mined; government deficits and monetary inflation still ravage the currency; and, hard-money experts realize that as inflation grows the American people will abandon paper and return to a money system based on precious metals.

At current silver price levels, Nelson Bunker Hunt is already well ahead of the game. And he still fully expects that one day the silver-to-gold price ratio will be one to five. This would mean that an ounce of silver would have a price equal to one-fifth the price of one ounce of gold. If gold were $800 an ounce, for example, silver should have a price of $160 an ounce. If the price of gold were $1,500 an ounce, silver might be around $300 an ounce.

Even at the approximate historical ratio of one to twenty, silver has a lot of catching up to do before it can begin to fulfill its great potential. But silver, the "poor man's gold," has a bright future. And so has Nelson Bunker Hunt.●

CUTTING FRAUD AND ABUSE OF THE FOOD STAMP PROGRAM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. GINGRICH. Mr. Speaker, it is hard to believe just how much fraud and abuse exists in the food stamp program until you hear about it from caseworkers themselves. One of the caseworkers from my district, Sue Pearson, has put together several suggestions to return the food stamp program to its original purpose: to help provide nourishing food for the truly needy. I would like to share her letter with my colleagues.

The letter follows:

DEAR MR. GINGRICH: I am writing to you regarding proposed cuts in the Food Stamp Program. The initial intent of this program was very good and I certainly do not feel it should be eliminated. I am a casework Supervisor and have been with the Department of Family and Children's Services for 16 years and feel I, as well as my caseworkers, can suggest ways to cut the program and not hurt the needy.

I offer these suggestions:

1. Cut retroactive benefits totally. When a client comes into our office on the last day of the month, if found eligible, he or she is entitled to the entire month's coupon allotment. Most of the time these people get in excess of $400 to $500 in coupons, and most of these people have already been helped by the Salvation Army or churches. It would save a great deal of money to eliminate this regulation and no one would be hurt.

2. Food Stamps could be like unemployment: after drawing for a certain length of time, they can't draw for awhile. We have people on stamps who have been on since the program began, not elderly folks, but self-employed or working folks. Also, those who claim no income all these years: we can't prove they have no income and they will bring in statements from relatives who say they have been helping all these years. We are obligated then to certify them.

3. We should do away with the regulation that clients do not have cooking facilities (they can live in a car, a tent or camper at KOA Campground) and get food stamps. All they have to verify is residence and identity. This is done by a note, often from anyone who can write and say their car, tent or etc. is in their yard and within three days (if they have no income), we give them a full month's allotment. More than once these folks are gone in a day or two and hit another county.

4. Stolen coupons should not continue to be replaced. We have to replace the amount they tell the police they had stolen. If they bring in a police report every month, we give them replacement every month. The police have told us we are getting "ripped off" that these folks are not really getting coupons stolen but they don't have staff to investigate and they have to write up the police report as it's given to them. We are then obligated to take the police report as an honest statement from the client and give whatever amount they got the month before. Family and Nutritional Services said they could have saved them from the month before.

5. Do away with separate household allowance. If the client decides after eating with his or her mother-in-law and father-in-law for years that he and his family aren't going to eat together anymore, they can apply as a separate household and get stamps. This happens a lot when the entire family income is over the scale for stamps, in a day or two they decide to eat separately and reapply for stamps.

6. Crack down on those who are self-employed. These people can make $40,000 for the first six months of the year and come in when they have a bad month and are eligible for the maximum amount of Food Stamps.

The elderly are not getting the benefit of the Food Stamp program. Because their houses are paid for, they usually have no shelter cost deducted. Most of them get an average of $10 to $30 a month in coupons; whereas the self-employed man can get hundreds in food stamps.

The regulations tend to make the caseworker out to be the one not telling the truth and the client's word is taken for every-thing. The regulations are also complex and change daily. There should be simple "cut and dry" rules that let the caseworker determine eligibility.

I have only touched on a very few of the areas of concern that all caseworkers are having. You would do well to talk to the caseworkers to see what problems the regu-

lations cause. They are "on the front line" and can help.

I have enclosed some statistics that show some elderly persons' budgets on food stamps and some other cases.

Please be assured of our interest and concern as well as out support in getting some much needed change.

Very truly yours,

SUE PEARSON.

ACTUAL CASES

1. Lady 71 years old, Social Security Income of $272.80 per month.

Expenses:	
Medicare	$9.60
Hospital insurance	13.00
Monthly drugs	44.88
Phone	12.62
Electricity—did not verify	36.96
Gas—did not verify, we couldn't count	115.00
Sewer	5.00
Insurance	13.16

Drives 1967 Ford—house is paid for. She drives to doctor 30 miles round-trip. Gets $25.00 per month in food stamps. Owes hospital bill and doctor bill for cancer surgery, amount that medicare does not cover.

2. Age 89—Income $239.70 Social Security, Supplemental Security Income $18.30.

Expenses:	
Gas	$105.22
Electricity	25.02
Phone	12.69
Home insurance and taxes	15.75

Must pay taxi to go to doctor or to grocery store. Gets $11.00 per month in food stamps.

3. Couple ages 70 and 63. Combined income of $596.00.

Expenses:	
Medicare	$19.20
Gas bill (he has cancer and must keep house warm)	170.59
Taxes and insurance (on house which is paid for)	18.36
Phone	12.57
Electricity	26.71
Water	4.42

Have to pay what medicare doesn't pay on doctor and hospital bill. Have to pay gas for 1975 truck to get to and from doctor.

This couple is ineligible for Food Stamps or Medicaid.

4. Man and wife aged 31 and 33 respectively with five children aged 13, 10, 8, 6, and 11 months.

Expenses:	
House note	$385.00
Electricity	35.16
Water	30.00
Garbage pickup	12.00
Gas	80.00

He makes good money as drywall, sheetrocker, up to $400.00 per week. Not much work at current time. States no income—verifies it by note from friend who swears to this.

Gets $367.00 per month in Food Stamps.

5. Man and wife aged 34 and 33 respectively with seven children. Some children hers by a previous marriage, but no child support. His income is $996.30 per month.

Expenses:	
House note	$405
Phone	20
Electricity	48
Gas	50

They get $293.00 per month in Food Stamps.

6. 71-year-old lady earns $309.50 per month in Social Security.

Expenses:	
House rent (from children)	$33.00
Phone	12.50
Electricity	15.71
Gas	45.00

Pays for doctor and drugs. Did not verify for these. She has to pay someone to take her places because she has no car.

She get $10.00 per month in Food Stamps.

One final note: the elderly have houses paid for and don't get a deduction. If the others go out and over obligate themselves for a house payment, they are rewarded with food stamps.●

MANA-ZUCCA

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. LEHMAN. Mr. Speaker, it has been said by those who were growing up when Mana-Zucca was performing and thrilling audiences all over the world with her own compositions and singing that, along with being glamorous, beautiful, and talented, she projected a great excitement—in her musical works and performances, and in being Mana-Zucca, herself.

The aura of Mana-Zucca, composer-pianist, shall remain long after her recent death. She has left with us great legacies: Her compositions, which total over 1,000, and the exciting memories of her glamorous and full life.

The Miami Herald has written an article on Mana which I would like to share further by having it included in the CONGRESSIONAL RECORD. The article follows:

MUSIC MATRIARCH MANA-ZUCCA DIES

(By James Roos, Herald music editor)

Composer-pianist Mana-Zucca, who for more than half a century was a major local musical figure, died Sunday at her home on Miami Beach. her age is estimated at 97, because, according to her son, Miami lawyer Marvin Cassel, she long ago destroyed all official documents relating to her true age.

Mana-Zucca was undeniably Miami's musical matriarch. She was the composer of "I Love Life," the song that helped make her famous, and more than 1,000 other compositions, from concertos and sonatas to songs and chamber music.

From the 1920s through the mid-1950s, her mansion, Mazica Hall, on what today is the Jordan Marsh complex at Omni, was a meeting spot for some of the world's greatest artists.

Misha Elman, Josef Hoffmann, Jose Iturbi, Fritz Kreisler, Alma Gluck, Efrem Zimbalist and many more, played at her concerts each Tuesday, when audiences of 300 filled her 80-foot living room, and where over the seasons more than 500 concerts, for and by young people, were held.

More recently, in her less palatial yet spacious Miami Beach home, she was surrounded by the trophies of a lifetime: Meisen brica-brac, a collection of more than 200 miniature pianos, two grand pianos, elegant tapestries, rugs and Tiffany lamps.

One of six children, Mana, as she was known to friends, gave her first public "concert," unbeknownst to her parents, at 2½, singing on the stoop of her New York home. She played her first notes on a toy piano at three, and by the age of 8, she was playing Beethoven's First Piano Concerto with Walter Damrosch and the New York Philharmonic. At 13 she was studying piano and playing in Berlin under the alias Augusta Zukerman, a name she said she disliked as much as her real one, Gizella Zucca-Mana. "I hated to see those names on programs," she once noted, "but when I reversed Zucca-Mana to Mana-Zucca I thought it was fine." So she kept it that way.

Composing came naturally, she insisted, and, in fact, she wrote her Concerto for Piano and Orchestra at the age of 17.

Her best composition, she was fond of saying, is her only son, Marwin, who gave her three grandchildren. But the public has proclaimed "I Love Life" its favorite song.

Her serious music was marked by superior craftsmanship, melodic lines often flecked with tart harmonies and the brilliance of her instrumental writing appealed to virtuosos including Jascha Heifetz, Misha Elman and Shura Cherkassky, who earlier this season appeared in a Miami recital and performed some Mana-Zucca pieces. Among her many pupils was Miamian Ruth Greenfield, founder-director of Miami-Dade Community College's Lunchtime Lively Arts Series, which paid tribute to Mana-Zucca with a special concert two seasons ago.●

AMERICAN RADIO RELAY LEAGUE SUPPORTS H.R. 2203, THE FCC VOLUNTEERS BILL

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. DANNEMEYER. Mr. Speaker, the American Radio Relay League is the national, nonprofit organization of amateur radio operators. The ARRL represents more than 160,000 individuals licensed by the Federal Communications Commission.

I am in receipt of a letter from Richard L. Baldwin, secretary of the organization, in which he informs me that at its recent board of directors meeting a resolution was passed in which the ARRL members were urged to support my bill, H.R. 2203. This legislation would permit the use of volunteers by the Federal Communications Commission to monitor amateur radio and citizens band station transmissions.

The bill addresses a growing problem of lack of effective enforcement of FCC regulations. This is particularly of immediate interest in light of possible reductions in the budget for the FCC's Field Operations Bureau. The amateur radio community has an excellent history of self-policing the ranks of their hobby group. This legislation, by removing legal barriers now in statute, will allow for greater coordination between the FCC and the volunteer groups.

As the major national organization of amateur radio operators, I suggest very strongly that the ARRL is in a position to speak with authority on the merits of this legislation. Accordingly I am pleased to have their support and hope my colleagues will reflect on the resolution of support of the ARRL. Mr. Speaker, I ask unanimous consent to insert the full text of the letter at this point in the RECORD:

THE AMERICAN
RADIO RELAY LEAGUE, INC.,
Newington, Conn., March 17, 1981.

Hon. WILLIAM E. DANNEMEYER,
Longworth House Office Building,
Washington, D.C.

DEAR MR. DANNEMEYER: It is with the greatest of pleasure I convery to you, from the record, a Resolution adopted by the Board of Directors of the American Radio Relay League, Inc., during its annual meeting March 11-12, 1981:

"The Board of Directors of the American Radio Relay League extends thanks to U.S. Representative William E. Dannemeyer for his support of the Amateur Radio Service. The Board urges all ARRL members to express their written support for House Bill HR-2203 to permit the use of volunteers by the Federal Communications Commission so as to facilitate the administration of FCC services to radio amateurs."

We would be honored to have this resolution recorded as an extension of remarks in the Congressional Record or to have it placed in the files of the Subcommittee on Telecommunications, Consumer Protection and Finance in support of HR-2203. We would like to testify for the bill when it reaches the hearing stage.

Sincerely yours,

RICHARD L. BALDWIN,
Secretary.●

THE NATION AND THE PACIFIC NORTHWEST BOTH NEED A NEW LOCK AT THE BONNEVILLE DAM

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. WYDEN. Mr. Speaker, today I, along with my colleagues Mr. FOLEY of Washington and Mr. AUCOIN of Oregon, am introducing legislation to authorize construction of a new navigation lock at Bonneville Dam on the Columbia River. The lock is estimated to cost $150 million and will remove a bottleneck in the Columbia-Snake waterway system that is frustrating increased barge traffic.

This project is necessary if the Columbia-Snake River system is to mature and realize its potential as one of the world's great waterway systems. When fully developed, the Columbia-Snake River system will be a tremendous national asset, aiding in the movement of cargo from the resource-rich Northwest and adding to our national security by providing a northern transportation route not depending on passage through the Panama Canal.

As such, this is not a regional issue, but an issue of national importance.

The Columbia-Snake River system now moves 3.2 billion tons of waterborne commerce annually, valued at $25 billion in revenue. Most of the tonnage is in bulk commodities. The Columbia-Snake River system feeds, among others, the Port of Portland, the west coast's leading port in export tonnage. With an improved, modern lock at Bonneville, the system can do even more duty.

These are the economic reasons for a new lock at the Bonneville Dam:

It will eliminate a costly and time-consuming bottleneck now occurring at the present lock at Bonneville Dam. This lock is at the end of a seven lock river system. The Bonneville Lock is the oldest and smallest of the seven locks on the Columbia-Snake River waterway system forcing barge traffic to break up into smaller tows to lock through the Bonneville Dam. This delay causes congestion and costs shippers $2 million annually.

The lock was built in 1938 and has not had any rehabilitation work since 1963, even though it handles 25 percent of all U.S. wheat exports. Wheat exports favorably impact our balance of payments. Wheat exports are in increasing demand in Asian Pacific Rim countries, who now account for 55 percent of all U.S. grain exports.

The completion of the new lock will save shippers $2.50 per ton, favorably influencing the cost of commodities and other products consumed in this country and exported abroad.

The new lock will aid the movement of America's coal exports from the West.

The new lock will aid expanding containerized cargo movements through the Columbia-Snake River system which totaled 187,000 tons in 1980. These containerized shipments will double by 1990.

The new lock will enhance the development of a multimodal transportation network and increase opportunities for Midwest and other overland shipments that use rail-barge and motor carrier-barge shipments on the Columbia-Snake River system. These overland-waterway multimodal shipments will give shippers alternative western route systems easing the flow of traffic on the Mississippi River system and traffic which now must travel through the Panama Canal. It also should have a favorable impact on competitive freight rates in the region.

Construction of the new lock will have a positive environmental impact on the Columbia River by reducing turbulence, high oxygen levels and other negative marine pollution caused by congestion of barges and tows waiting to lock through the dam.

Construction of a new lock will help in protecting the natural scenic beauty of the Columbia River Gorge by balancing the use of the various transportation alternatives.

The new lock will aid in the shipment of waterborne transit which uses half the energy necessary to do the same job by rail and is nine times more energy efficient than motor carriers doing the same job. This energy savings becomes more significant when one considers that 49 percent of the commodity traffic uses the Columbia River system.

Finally, this project has a positive cost-benefit ratio, one of the key criteria being used by this administration to assess public expenditures. This project will return a minimum of $5 to every Federal dollar invested. This Federal investment will leverage an estimated $500 million private investment creating new employment opportunity along the Columbia-Snake River waterway system.●

THE BUDGET A MISTAKE TO RUSH TO JUDGMENT

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. RANGEL. Mr. Speaker, this morning's New York Times carried a column by Anthony Lewis, entitled "Economics or Politics?" Lewis makes the case that the Reagan budget, although heralded as one which insulates the truly needy indeed does cause additional financial problems for those at the lowest end of the economic ladder. The story about the husband and wife, both of whom are disabled, who have seven children is vividly illustrative of a truly needy family falling through the safety net.

As the Congress continues its work on the budget, I believe it is critically important that we scrutinize all the budget reductions in order to make certain that the evenhanded approach that the administration claims they adopted is in fact present. I, for one, am vigorously opposed to placing the budget proposal on a fast track here in the Congress. It is clear in reviewing testimony of individuals coming before the Ways and Means Committee that there is a great deal of disagreement among economists as to the effects of the budget reductions and tax modifications the President is proposing.

Additionally, the President wants to change the structure of many of these programs, by returning them to the States. As the reason why the Federal Government got involved in these programs initially was due to the lack of largess on the part of the States, I am not convinced that a return to them is a good idea.

Currently the authorizing committees are taking testimony from individuals on these proposals. It is my belief that the witnesses coming before these committees are providing important information which will serve as a basis for us reaching a conclusion on the wisdom of these basic policy changes. To act on this package prior to the receipt and deliberate review of this material would be the height of irresponsibility.

I hope that the Members take time to review the Lewis column in order to have a fuller understanding of the import of our actions. The article follows:

ECONOMICS OR POLITICS?

(By Anthony Lewis)

BOSTON, March 18.—When challenged on the human impact of his proposed budget cuts, President Reagan defends them as economically essential. He and his aides argue that only by cutting across the board can they get the budget under control and open the way for economic growth. Every interest has to share the burden, they say. The only exception is the "truly needy."

Those are the arguments. The facts, as they have begun to emerge in Congressional hearings, are different. It is clear now that the Reagan cuts would hurt people who by any definition are needy—and would spare juicy targets among the better-off. And the decisions on what to cut were not so much economic as political.

Consider this amazing fact: The United States Government now spends about $1 billion a year on health payments to elderly persons who have annual incomes of more than $30,000. Is the Reagan Administration proposing any cuts in or ceiling on those payments to the non-poor? No. The figures on Medicare recipients and their incomes appeared in a fascinating story by David E. Rosenbaum in The New York Times. About 1 million Americans over 65 have incomes above $30,000, he wrote. On average they get $1,000 a year in Medicare payments. Of course many rely on that money. But in a world of financial limits they are not "truly needy."

The same story told about a husband and wife, both disabled, who have seven children and survive on public assistance. Richard Schweiker, the Secretary of Health and Human Services, was asked on a television program what would happen to them under the Reagan program. They "wouldn't have to worry about being cut," he replies, because they were "a classic case of . . . the truly needy."

But Administration budget experts said the family would love at least $6 a week for each child in school, under Reagan proposals to cut food stamps for children getting free school lunches. Assuming four children in school, the family would lose $24 a week in food stamps: a painfully significant amount for people who scrimp to get along on beans and macaroni.

That family, and others like it, would lose not only stamps. The Reagan budget proposes cuts in fuel assistance for the poor, grants to the states for welfare, Medicaid and other programs. Administration spokesmen fence with the figures, but there can no longer be any doubt that some truly desperate Americans will be worse off.

Public assistance programs are not sacrosanct. But there is a striking contrast between those budget cuts and ones that President Reagan chose not to make—a contrast in both equity and amount.

For example, there is widespread, nonpartisan concern about the growing cost of adjusting Social Security and Federal pension payments annually to reflect increases in the Consumer Price Index. This week Republican senators proposed that the payments be pegged instead to prevailing wage rates. That change would save $3.8 billion a year—more than twice the $1.8 billion the Administration wants to cut from food stamps.

When the senators took the idea to the President, he rejected it out of hand. He had made a campaign promise, he explained, not to change the cost-of-living increases. The reason, in short, was political.

When Reagan campaigned, he did not talk about cutting food stamps or making most of the other substantive reductions he has now proposed. He spoke of saving what had to be saved by ending "waste." In office he decided he had to make real domestic cuts to allow for a huge rise in defense spending. And he naturally avoided targets among those likely to be part of his constituency.

His budget proposed a 20 percent tax on fuel for private and corporate airplanes, which would have cut down on an enormous subsidy. But when the owners and pilots screamed, the proposal was withdrawn. They were Reagan voters.

None of this is surpirsing. Ronald Reagan and David Stockman can say, fairly enough, that they have no political hope of changing the budget if they take on the pilots and the Medicare recipients and the pensioners. But is it sad if a fiscally reformist Administration loses a chance to reform in outrageous subsidies and in programs that are really out of control.

It would be nice, anyway, if Stockman & Co. were less pious about the budget they hammered together in a few weeks. They sound sometimes as though they thought it had been handed down to Mount Sinai. It is a human effort, and a highly political one.

The realities of the Reagan program, as they become clear, also caution against rushed Congressional action. Under the guise of economic theory, the Administration is trying to push through a good deal of ideology: not just in cutting this budget or that but in eliminating whole programs repeatedly authorized by Congress, such as legal services for the poor.

Senator Daniel Patrick Moynihan warned the other day that the budget process was being perverted. "We're changing 30 years of social legislation," he said, "in three days of budget markups."●

CONFUSING PARTY CROSSWINDS IN CONGRESS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. DINGELL. Mr. Speaker, I address my colleagues today as a member of the Democratic leadership, as part of this broader colleagial body, and as a citizen of this great Nation. For weeks, I have been reading newspaper articles headlining "Confusing Party Crosswinds in Congress" and "Democrats Totally Off Balance" or "Still Blowin' in the Wind." I have listened to my colleagues harangue at one another across the center aisle—Republicans at Democrats for being "the last of the big spenders," Democrats at Republicans for trying to balance the budget "on the backs of the poor, the aged, minorities, and the environment." Enough is enough. I think it is time to set the record straight.

Tuesday afternoon March 10, I received a copy of President Reagan's final proposed budget, the infamous "blue book." That revised $695 billion budget for fiscal year 1982 entails reductions of $55.9 billion, involving approximately 200 programs. A lion's share of those programs come under the jurisdiction of the Committee on Energy and Commerce which I chair. Our Subcommittees on Health and the Environment, and Commerce, Transportation, and Tourism are particularly hard hit.

I am not opposed to balancing the budget or even to the $55.9 billion in cuts. We will take our fair dollar share of that $55.9 billion in cuts. However, I believe that we as Democrats have to keep in mind our constituencies and our agenda for the 1980's. A review of those items and of our own programs should produce even greater productivity and efficiencies than the Reagan budget proposals. A review of our energy programs has already produced important and useful results, and others are confidently anticipated. In that regard, this committee's agenda in the 97th Congress alone calls for concentration in five major areas of concern:

(1) MEASURES TO STRENGTHEN THE U.S. ECONOMY, RESTORE COMPETITION, REDUCE INFLATIONARY PRESSURES, ENHANCE EMPLOYMENT, AND IMPROVE THE U.S. POSITION IN FOREIGN TRADE

Revitalization of America's productive capacity and improvement of the nation's ability to compete successfuly in world markets are vital to reduce the staggering inflationary pressures in this country and improve the nation's economic performance. A renaissance of self-confidence, resourcefulness and risk-taking among Americans must be sparked for the reindustrialization of America to succeed. This Committee has undertaken to coordinate programs within its broad jurisdiction to work toward these goals.

At the heart of the Committee's effort is an in-depth study of how capital is formed in the United States today, the first such study in modern times. This will be integrated with studies of the capital formation problems of specific industries such as utilities, many of which are threatened with possible large scale bankruptcies, and small businesses, distressed by hemorrhaging economic ills. Concurrently, the Committee will be working to remove barriers to free competition in health, energy, communications, and domestic and foreign commerce.

In this regard, for example, the Committee, among other things, is working on measures to assure U.S. dominance in the rapidly growing communications technology field, to deal with the international uranium cartel and to remove barriers to internation-

al commerce in energy resources such as coal, the most abundant and potentially profitable U.S. energy resource.

(2) MEASURES TO MINIMIZE OR REDUCE FEDERAL REGULATION

This Committee has jurisdiction over Federal regulations affecting energy, securities, exchanges, finance, communications, transportation, health, the environment and public safety. The effects of this regulation reach virtually every American and every business in the United States, from the giant auto companies and crucial money markets, to community hospitals and the corner drug store.

There can be no question that this regulatory structure, laboriously constructed by Congress over the past century, has made an enormous contribution to the quality of life in America. As a direct result, for example:

The mother buying food for her family or medicine for her child can do so with a degree of confidence in the quality, safety and efficacy of these products that is unmatched by consumers anywhere in the world;

Millions of ordinary people throughout America are able to invest in the securities which capitalize the nation's industry with confidence that they will be protected against fraud and exploitation; and

Businesses, small and large, throughout the nation are protected from unfair competition, whether it be from financial marauders or deceptive market practices.

Over the past decade, on the other hand, there have been growing complaints that some Federal regulation has had an adverse impact on the economy and individual initiative. There is convincing evidence that some regulation is outdated, some is too burdensome, some may be unnecessary and much is ineffective.

The Administration is calling for a sweeping reorganization of Federal regulatory policy. Across the country, business leaders are applauding the Administration's plans to simplify the maze of Federal regulations that, they say, discourages investment, aggravates inflation and suffocates productivity. The Committee shares the beliefs that reform is necessary but its enthusiasm is tempered by a concern that the Administration program may be regressive. The proposals it has reviewed appear selective, and special interests may be expected to use the crusade call of reform to advance policies for their own individual benefit and thus do serious injury to millions of American consumers and businessmen, particularly the owners of small businesses, throughout the country.

It is significant to note that when the Administration announced the decontrol of gasoline (an authority ceded to the Executive by Congress) its spokesman assured the public that the cost would only rise by $0.03 to $0.05 per gallon. Now American drivers find themselves paying over $1.50 per gallon with average increases ranging from $0.10 to $0.15. (At the time of decontrol, this Committee had predicted increases of at least $0.10 per gallon.)

Now the Administration has indicated that it proposes abruptly to end all controls on oil and natural gas. Experience with home heating oil prices in the Northeast proves that this can have a devastating impact on tens of millions of American families, particularly in the colder regions.

It is now clear that whatever may be the case with respect to the economy and inflation, energy issues are not responsive to simplistic economic theories. All Members urgently need to have access to comprehensive and reliable analyses of the impact of proposed energy initiatives by the Executive in order to protect the interest of their constituents.

The Committee believes that it is vital to Members that it have the resources to evaluate the multiplicity of regulatory reform proposals put forth by the Executive and others and to advise Members of the potential effects of each proposal upon their constituents and the nation as a whole.

(3) MEASURES TO CONTROL OR REDUCE FEDERAL SPENDING, IMPROVE GOVERNMENT EFFICIENCY, AND ELIMINATE WASTE, ABUSE OR FRAUD IN MAJOR PROGRAMS

This Committee does not have responsibility for a large number of "big ticket" Federal spending programs, but the programs it does control, taken together, have direct effects upon the lives and welfare of virtually every American.

Over the past six years, there has been a growing effort to control Federal spending, root out waste and fraud, eliminate gravy and make the government do what it should do more efficiently.

Now, the current Administration is proposing draconian cuts in all Federal spending. This Committee supports the overall spending reduction goal and believes that virtually every Federal program under its jurisdiction can produce significant savings for the taxpayer.

The Committee has two concerns, however, which it believes all Members will share.

First, the Committee is concerned that the costs associated with the reduction must be shared equally by all Americans, rich and poor, farmer and urban dweller, consumer and businessman. It is the constitutional duty of each Member to protect the interests of all his constituents; that duty may not be ceded to the Executive.

Second, the Committee is deeply concerned that some of the spending cuts proposed by the Executive may effectively alter or abrogate existing law without formal legislative action by the Congress, and thus violate the spirit and, perhaps, the letter of the Constitution. For example:

The proposed cut in the Federal Trade Commission's antitrust budget will have the effect of significantly modifying authorities limiting monopolistic business practices and will virtually repeal important provisions of a wide range of statutes including the Robinson-Patman Act, the Clayton Act, the Sherman Act, the National Energy Conservation Policy Act (NECPA), and the Energy Security Act Amendments to NECPA;

The drastic reductions in funding for important rail services will have the effect of dramatically revising national transportation priorities and will have a serious impact on efforts to revive the economy of the nation and, indeed, have potentially severe implications for national security;

Cuts that eliminate funds for unemployment insurance radically alter the existing social compact of the nation with its working men and women.

We are a nation of laws, and under the Constitution the Executive Branch has a responsibility faithfully to execute the laws. If the Administration proposes to make such significant changes in *substantive* law and *national policy*, it should make these recommendations to Congress in the form of legislative proposals. It must not seek to achieve such changes through the back door in the guise of "budget cutting." Any promise to send up legislative proposals later is not justification for acting as if the laws were already altered.

It is in the interests of every Member to assure that the Committee has the resources to protect the vital interests of the legislative branch in shaping Federal policy.

(4) MEASURES TO OVERHAUL U.S. HEALTH AND ENVIRONMENTAL LAWS

During the first session of the 97th Congress, the Committee will be called upon to advise the House on the actions to be taken in regard to 19 laws dealing with health matters and six major environmental laws which are due for reauthorization.

The Administration proposes to reduce sharply Federal responsibility for financing health care and for determining the appropriate programs to provide health care programs for the poor, and, as a consequence, to shift a greater responsibility to the States.

This will provide the framework for the first sweeping reexamination of national health care policy in over a decade and the results of this reexamination will have a direct, personal and major impact on tens of millions of Americans in every region.

Over the past century, the Federal government has assumed an increasing responsibility for providing health care for those who otherwise would have inadequate, or no access to care. The Congress accelerated this policy over the past three decades, culminating in the enactment of Medicaid in 1965. Recently a growing concern has been expressed over the cost and efficiency of the Federal policy.

The same history and concern exist with regard to the traditional programs that Congress designed to deal with specific health problems ranging from childhood immunization to cancer, cardiovascular and pulmonary diseases, and hypertension.

During the 97th Congress, the Committee will also be called upon to advise the House on actions to be taken on major legislation affecting the environment, including the Clean Air Act, the Toxic Substances Control Act, the Noise Pollution Control Act, the Safe Drinking Water Act, the Comprehensive Environmental Response, Compensation and Liability Act ("Superfund"), and the Hazardous Materials Transportation Act.

Balancing costs and benefits of all these programs is a complicated process requiring highly developed skills. The results will not only have an important effect on the quality of life in this nation over the next decade or so, but will also have a significant impact on the economy.

It is vital to all Members that the legislative branch of government play a meaningful role in shaping these decisions and this can happen only if this Committee has the resources to deal effectively with the issues and to advise Members of the long-range consequences of adoption of the Administration proposals and of alternatives to those proposals.

(5) MEASURES TO MINIMIZE U.S. VULNERABILITY TO ENERGY AND MATERIALS SUPPLY INTERRUPTIONS AND TO STRENGTHEN NATIONAL SECURITY THROUGH INDEPENDENCE IN ENERGY AND MATERIALS SUPPLY

Even though the United States appetite for foreign oil has decreased by almost two million barrels per day over the past 2 years, consumers are still paying foreign producers a whopping $100 billion annually—more than double what the Nation paid only two years ago.

This is a crippling drain on our economy and probably the biggest single factor behind our chronic inflation. Equally serious, the nation's security is jeopardized by the fact that we depend on foreign producers for nearly half the oil we consume. Any significant interruption in supply could bring our economy to a grinding halt and cripple our national defense capability. In light of the political problems facing a number of major oil producing nations, the possibility of interruption of supply must be a major factor in all our national planning until we can find ways to reduce our dependence . . . and ways to reduce dependence must be a major goal of national policy.

There are a number of paths to the goal of independence and all fall within the expanded jurisdiction of this Committee.

One important path is to increase domestic production of energy sources. The United States has been called, with some truth, "the Saudi Arabia of coal." The predecessor Committee pioneered in measures to increase domestic coal use and to develop coal-based synthetic fuels to replace oil, but a great deal remains to be done.

Even though the Nation's coal reserves are vast and there is great potential for export, in addition to meeting our domestic needs, there are serious transportation problems. Rail has traditionally been the predominant method for moving coal, but the fact is that our rail systems are deteriorating rapidly. There are also weak links in our port systems, which maintain insufficient coal handling facilities for loading coal into ships. Energy independence, our competitiveness in world markets, and our transportation systems are interrelated, and are all related to basic national security requirements.

Another important path is to develop other energy alternatives, such as energy from waste, biomass production, alcohol fuels, energy from wood and from peat, as well as geothermal energy and other renewables such as solar energy, including wind energy, and other synthesized energy forms, such as methanol from coal.

All these programs will take time and the Committee must balance the cost of accelerated development against the benefits to be derived, a complicated and demanding project, which requires dramatically expanded resources and accounts for some $302,000 of the increase in salaries in this year's Committee budget.

Another important path to energy independence is conservation, which most experts agree will give this nation the biggest and fastest reduction in energy consumption. Recently there have been complaints that conservation threatens uncomfortable changes in the American way of life and would impose unwanted hardship upon the American consumers. Some argue that conservation decisions should be left to the "marketplace."

The Committee believes that dramatic energy savings can be won with virtually no inconvenience to, or sacrifice by, the consumer. It further believes that Americans have found the conservation imposed by the actions of the marketplace through skyrocketing gasoline and home heating oil prices very uncomfortable indeed.

Many of the energy conservation programs with which the Committee is concerned involve saving not only energy, but also money. Low Income Weatherization Assistance, the Solar Energy and Energy Conservation Bank, the efficiency standards programs for buildings, appliances and automobiles, and the Residential Energy Conservation Service (provided under the National Energy Conservation Policy Act) are all aimed at efficient investment of Federal dollars to obtain more efficient use of energy. The Nation can "produce its way to greatness" using less energy, but using it more wisely, and discomfort need not be a factor.

The Committee believes that all Members will want to have the information that will enable them to make crucial decisions in energy matters that are of critical importance to all Americans and to their nation's security.●

VIETNAM VETERANS ON THE BRINK

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 23, 1981

● Mr. MURTHA. Mr. Speaker, I was pleased last week to join as a cosponsor of Congressman DON EDWARDS' bill to extend the Veterans' Administration's Operation Outreach program. I believe this program is essential to our Vietnam veterans.

These centers help provide readjustmant counseling and related mental health services to any veteran who served on active duty during the Vietnam era. Increasingly, we see that the mental stress of that tour of duty is one of the biggest problems facing these young veterans. Having served for 1 year in Vietnam myself, I certainly understand the problems these veterans face and the need for this kind of program.

I am pleased to note Congressman EDWARDS now has some 78 cosponsors of the bill. Whatever I could say about it, however, is said better in the following article written by Mr. Peter Leo on March 16 in the Pittsburgh Post-Gazette.

The article follows:

VIET VETS ON BRINK OF BEING ALONE AGAIN

We don't like to think about Vietnam vets. They remind us of a war we'd like to forget.

Steve Rooney tried to forget. He succeeded for 10 years until the moment last November when he walked into a storefront operation Downtown on Penn Avenue called the Vet Center.

He doesn't know exactly why he did it. He does know it's among the toughest things he's done in his 34 years. Maybe even tougher than risking his life in Vietnam.

At his first counseling session with other Vietnam vets, he tried to speak. But each time he opened his mouth, he burst into tears. It was like an internal explosion.

In weekly fragments over the next four months his year in Vietnam spilled out—the horror, the fear, the pain.

Rooney had last talked about Vietnam when he came home in 1970. Ten minutes with his parents. That was it. Then he went about the business of living. Compulsively and successfully.

Since then, he has never known a moment of unemployment. He works with his father selling radio air time. A committed family man, he lives comfortably in the suburbs with his wife and two daughters. Life has been good for Steve Rooney.

So why the Vet Center?

They were unique among American fighting men. The youngest to go to war, they dropped their pencils and picked up their rifles. Their average age was 19. In World War II it was 26.

World War II vets went over and back on troop ships with their units. They knew each other well and wound down together on the way home.

Vietnam vets, replacement troops, went to war alone, came home alone. It was 72 hours from battle-torn rice paddy to family living room. No time to heal. No one to heal with. The flights home did not shake with raucous celebration. There was only the silence of starting to forget.

At home, they were treated not as warriors but as killers. They didn't have reunions; they avoided each other. The VA psychiatrists weren't able to ease the pain of men who had stuck bayonets in the throats of other human beings, watched buddies turned to blood and gore in an instant, lived with the constant fear of death. How could they know what it was like?

Dave McPeak knows what it was like. He was there, an altar boy at St. Canice one year, a combat Marine the next. Now he is a therapist at the Vet Center. "They find out they're not alone, they're not weak. They decompress each other. They heal themselves."

To survive in war, the vets plugged up their emotions, blocked out the experience. They were deprived of the healing that comes with reliving their experience with others who understand.

But the pressure—delayed stress syndrome was the name given the only recently understood phenomenon—had to be relieved sometime, usually years later, and in some way, usually nightmares and flashbacks.

"Talking about it, it doesn't hurt as much as it did," says Steven Rooney. "People go crazy thinking they're alone."

Now Vietnam vets are on the verge of finding themselves alone again. The Reagan budget cutters believe VA hospitals can do the job of the 92 vet centers around the country. The money runs out April 10. After that, who knows?

"The VA is terrific at benefits, at medical and psychiatric care," says Dave McPeak. "But I don't believe they can do what we can do." Some 1,000 vets have come through its doors at 954 Penn Ave. since the center opened last April. Many are Steve Rooneys who will make it without a Vet Center. But there are others just emerging from their loneliness, just beginning to draw strength from the troop ship they have formed, making some sense of their lives for the first time. For some, its a matter of life and death.

"I could give the names of a hundred guys who came in suicidal," says McPeak. "Most are working, cutting their grass, paying their taxes, listening to their wives, taking their kids to the zoo."

That's what Pittsburgh is getting for about $100,000. It's what the country's getting for $9 million. That's what it costs to manufacture one tank.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a

system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 24, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 25

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for alternative fuel programs and the Economic Regulatory Administration, Department of Energy.
1114 Dirksen Building
Armed Services
Sea Power and Force Projection Subcommittee
To hold closed hearings on proposed authorizations for fiscal year 1982 for the Naval research and development program of the Department of Defense.
212 Russell Building
Select on Intelligence
*Budget Subcommittee
To resume closed hearings on proposed authorizations for fiscal year 1982 for intelligence activities of the United States.
S-407, Capitol

9:30 a.m.
Appropriations
State, Justice, Commerce, and the Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the office of the Secretary, general administration, Economic Development Administration, and the Regional Action Planning Commissions, Department of Commerce.
S-146, Capitol
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed legislation authorizing funds for fiscal year 1982 for the National Aeronautics and Space Administration.
235 Russell Building
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To continue oversight hearings to review supplemental assistance and restructuring policies for Consolidated Rail Corporation (Conrail), and on proposed authorizations for fiscal year 1982 for the U.S. Railway Association.
5110 Dirksen Building
Foreign Relations
To continue hearings on proposed authorizations for fiscal year 1982, focusing on the International Development Association (VI), and the African Development Bank.
324 Russell Building
Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings on proposed legislation authorizing funds for the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act.
2228 Dirksen Building
Labor and Human Resources
Labor Subcommittee
To continue hearings on S. 348, to increase job opportunity by allowing employers to pay young people the minimum wage at a reduced rate.
4232 Dirksen Building

10:00 a.m.
Appropriations
Energy and Water Development Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1982 for energy and water development programs.
1318 Dirksen Building
Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1982 for the Federal Highway Administration, Department of Transportation.
1223 Dirksen Building
Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 681, to provide a comprehensive system of liability and compensation for oilspill damage and removal costs (being held at the Senate desk).
4200 Dirksen Building
Finance
To continue hearings on the administration's spending reduction proposals for economic recovery.
2221 Dirksen Building

11:00 a.m.
Foreign Relations
Business meeting, to consider proposed authorizations for the International Development Association (VI), and the African Development Bank.
324 Russell Building

2:00 p.m.
Appropriations
Energy and Water Development Subcommittee

HOUSE OF REPRESENTATIVES—*Tuesday, March 24, 1981*

The House met at 12 o'clock noon.

The Reverend Dr. Calvin V. French, pastor, Massachusetts Avenue Congregation of the Reorganized Church of Jesus Christ of Latter Day Saints, Washington, D.C., offered the following prayer:

Our Father, who has watched over this Nation from generation to generation, and has brought us to this time and this place, help us to sense the honor of our calling and be worthy of that trust.

Make our lives more eloquent than our speech—remind us in our deliberations that the character of this body is determined by the character of all who serve here.

Keep us at tasks too hard for us, that we must turn to Thee for strength and counsel.

May we not fail our own—or the coming generations in our dedication to brotherhood and justice.

Give us clear heads, clean hands, and pure hearts, that we may be faithful to our mission—in service to our fellow men, our Nation, and to Thee.

We ask this in the name of Jesus Christ our Lord, who went about doing good. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. BOLLING. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

THE REVEREND DR. CALVIN V. FRENCH

(Mr. HARKIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARKIN. Mr. Speaker, I would like to take just a few moments this morning to thank the Reverend Dr. Calvin French for his opening prayer, and for his rich words of wisdom to guide us as we begin today's session.

Dr. French, as many of us know, is the pastor of the Massachusetts Avenue Congregation of the Reorganized Church of Jesus Christ of Latter Day Saints here in Washington.

I am proud to note, also, that he has strong ties to the State of Iowa—and to Iowa's Fifth Congressional District—in particular.

He studied, and earned his A.A. degree at Graceland College in Lamoni, where his daughter, Kelsey, is currently a sophomore. He received his B.A. from the University of Iowa, a masters from Temple University in Philadelphia, Pa., and his doctorate from Drake University, in Des Moines. His son, Colin, is now a law student there. His advanced theological studies have been done at Harvard University in Massachussetts.

For 11 years, Dr. French was the pastor at the Central Congregation of the Reorganized Church of Jesus Christ of Latter Day Saints in Des Moines, which is where I came to know him through his extensive community work. His wife, Lavone, is an attorney who worked in the Polk County attorney's office in Des Moines, worked often with my wife, Ruth, while she was the Story County attorney in Ames.

Dr. French is a clinical member of the American Association of Marriage and Family Therapists—the premier American association of family counselors, and has also served as pastor at the Boston and Philadelphia Central Congregations.

He is a good friend, a wise man and a distinguished religious leader, who has dedicated his life to work on behalf of a better quality of life for all humans.

I thank him for taking the time from his busy schedule to join us today.

VIETNAM AFTERSHOCKS

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, on the front page of today's Washington Post appears a report of a study that has been made with respect to the effects still lingering upon veterans of the Vietnam war. The report concludes that those who suffered combat duty, and particularly those who suffered repeated exposure to enemy fire, seem for one reason or another more prone than other Americans to have psychological problems lingering in their lives. Many of these men feel rejection, and that may be understandable in view of the way in which American society received them so blithely and with so little regard for their feelings, their sacrifices or their heroism.

For that reason, it seems to me particularly inappropriate that we should discontinue the one innovative thing that has been created expressly to serve the needs of Vietnam veterans and their requirement to be rehabilitated into our society.

Storefront rehabilitative facilities have been provided in some 91 locations throughout the United States. They were set up 2 years ago on a pilot basis. They are manned by Vietnam veterans. The counseling they give is expressly for Vietnam veterans. It seems to me the results they have obtained speak well for them, and that the little amount of money this program costs—just $32 million in fiscal 1982—ought to be retained in our budget. This innovative approach is the only thing that we have done expressly to try to redress the glaring imbalance of the welcome received by veterans of other wars as against the shameful lack of welcome—indeed, the indifference—the Nation extended to veterans of the Vietnam war. It should be retained. These young Americans served their country with as much devotion and as much personal sacrifice as any who ever fought under the American flag. The least we can do now, in even this belated expression of our appreciation, is to continue our support for this program.

NUCLEAR GAMBLE MUST STOP

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, the specter of nuclear proliferation looms ominously before us: The radical and unstable regime in Iraq has begun an alarming escalation of atomic weapons development. Pakistan, India, and Libya are stepping up their own nuclear armaments programs. A dangerous potential exists in the explosive Middle East for nuclear arms takeover by PLO terrorists.

Some of our European allies—France, Italy, and Portugal—supply essential hardware and technology to Iraq and Pakistan without stringent controls on their use. Through energy blackmail, Iraq barters high-priced oil for uranium stockpiles, sensitive technology, and sophisticated nuclear equipment. Intelligence reports indi-

cate that both Iraq and Pakistan will marshal their nuclear capability not for commercial purposes but for creation of a powerful nuclear arsenal.

In the interest of international security, European nations must cooperate with the United States to restrict the supply of nuclear equipment to volatile regimes and insist upon inspection of nuclear facilities by the International Atomic Energy Agency.

I call on the administration to take immediate and effective action to remind our European friends to stop their ill-conceived propagation of nuclear weapons. We must safeguard human existence on this Earth from the horror of nuclear holocaust.

REVISING THE FEDERAL REGULATORY PROCESS

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Mr. Speaker, this morning, our distinguished colleague from California, GEORGE DANIELSON, began hearings in his Subcommittee on Administrative Law on the Regulatory Procedure Act of 1981. This bill is the product of months of Judiciary Committee consideration in the last Congress, and is substantially the same bill which the committee approved last year. I rise today to call this important bill to the attention of my colleagues and to urge their support for its early passage.

No one in this Chamber needs to be reminded of the pressing national need for meaningful regulatory reform. All of us have heard from our constituents about the endless barrage of new rules and regulations pouring out of Washington. And as troubling as the sheer number of regulations, is the public perception that the rules are unnecessary, overly costly, and counterproductive to an expanding national economy. Something must be done to bring this situation under control, and it must be done quickly. The Regulatory Procedure Act of 1981, H.R. 746, offers us the opportunity to act rapidly and wisely on this problem. I urge my colleagues to recognize the work the Judiciary Committee has already done on this legislation and support GEORGE DANIELSON'S efforts to enact H.R. 746 as quickly as possible.

THE IMPACT OF CUTS IN STUDENT AID

(Mr. PEYSER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and to include extraneous matter.)

Mr. PEYSER. Mr. Speaker, each day we learn a little more about the impact of the slashes that the administration is making in student aid.

We now have finally gotten the information that the Pell grants or the educational opportunity grants which are for the neediest of our students will be cut across the board by at least $100 for each grant. We also learned that the guaranteed student loan, which is the program the Congress passed to aid middle-income families with students in school, will have a reduction by the interest-in-school factor of at least $225 a year, and growing each year as the loan increases.

Mr. Speaker, today I am entering into the RECORD a letter from Wells College, which is in Congressman LEE'S district; a letter from Pikes Peak Community College, which is in Congressman KOGOVSEK'S district; and a letter from the University of Missouri, which is in Congressman BAILEY'S district. Each of these letters speak clearly for itself, outlining the terrible problems that will be created if the Congress goes along with these cuts in student aid.

Mr. Speaker, the letters to which I referred are as follows:

WELLS COLLEGE,
Aurora, N.Y., March 5, 1981.

Representative PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE PEYSER: Your concern over the Administration's cuts in the higher education budget are shared by all of us. We are pleased to know that you can be counted on for support in Congress.

I am enclosing a copy of our analysis of the problems we envision at Wells. This was sent to all our students, staff and faculty, and our students were asked to share this information with their parents. Our student government is actively working on information sessions and letter writing.

I have before me case studies of students who will not be able to return to school in the fall if these cuts are allowed. No college can afford to pick up the gap of $650 to $2,300 that students will lose. The middle income group will suffer the most and they are the backbone of our student body.

Thank you for your help.

Sincerely,

MARY M. HOPKINS,
Executive Assistant to
President Peterson.

Enclosure.

MEMORANDUM

FEBRUARY 25, 1981.

To: The Wells College Community.
From: Patti McGill Peterson, President.

As you are all aware student financial aid is one of the targets of the Reagan budget cuts. There are also large cuts which were inherited from the Carter administration about which little appears in the press. For example, inadequate funding of Pell Grants (formerly Basic Grants) has reduced awards to our students by $27,000 this academic year.

As the Carter budget requests made last March was inadequate to meet the needs this year, money has been borrowed from fiscal year 1981 funds to pay fiscal year 1980 awards. The potential shortfall of $627 million is needed in a supplemental appropriation to correct this. Wells students could lose as much as $95,000 in federal funds in the Pell Grants alone in 1981-82 without immediate action.

We also estimate that 20-30 students will be forced out of the National Direct Student Loan Program unless federal capital contributions for fiscal year 1981 are increased to at least fiscal year 1980 levels. This will mean that many of our neediest students will not be able to finance their education since many banks are reluctant to extend credit to low-income students.

The legislative revisions proposed for the Guaranteed Student Loan program are even more threatening. All loans would be based on need after grants and other forms of aid are considered, the federal interest subsidy would be eliminated and the new Parent Loan interest would increase from 9% to the prevailing market rate.

At present approximately 65% of our students depend on Guaranteed Student Loans to finance part of their education and over 100 of these students have loans as their only source of aid. At many independent institutions 75% of all students depend on GSL's to meet expenses.

Representative Paul Simon, Chairman of the House Postsecondary Education Subcommittee has told the American Council on Education that the impact of budget shortfalls and loan changes will force 25% of the nation's college students to give up their studies. In the independent institutions it could be as high as 50%. In the spirit of attempting to limit inflation Wells College is not asking for more, more, more. We are, however, asking for a much more carefully considered plan which acknowledges that we cannot undo economic problems overnight that have been years in the making. What has been proposed is a wholesale slash which can subject a single student to three or more significant aid losses.

Action is needed. We trust that you will communicate your concerns to your Senators and Congressional representatives.

PIKES PEAK COMMUNITY COLLEGE,
Colorado Springs, Colo., March 10, 1981.

Hon. PETER A. PEYSER,
House of Representatives, Cannon House
Office Building, Washington, D.C.

DEAR REPRESENTATIVE PEYSER: I, too, share your concern about the budget cuts recommended by the new administration. In my judgment, students enrolled in colleges and universities are well served by the current student financial aid programs; e.g., Pell Grants, Supplementary Educational Opportunity Grants, Student Loans, and College Work Study Programs. To tamper with these programs by reducing budgets would be devastating to both lower and middle income students.

The Guaranteed Student Loan Program has permitted students to substitute loans for parental contribution. To provide students with Guaranteed Student Loans only for remaining need after other sources of aid were considered and at the same time to eliminate the in-school interest subsidies would drastically affect the middle income student. The Guaranteed Student Loan Program proposals may virtually shut the program down.

The Education Amendments of 1980 authorize a $2,100 maximum Pell Grant in fiscal year 1982. The budget calls for a $1,800 maximum Pell Grant. Such a reduction will definitely have an effect on the needy student's aid package. Also, if Congress does not pass a supplemental appropriation to meet a shortfall in fiscal 1980,

the maximum Pell Grant in 1981-82 would be about $1,000—even more of a reduction.

I believe it is very important that you and your colleagues give immediate attention to the proposed administrative cuts. The enactment of the Education Amendments of 1980 provided all of us in the postsecondary educational community with the legislation necessary to enable us to better serve the needs of our students. Not to fund this legislation would be an injustice.

Thank you for your letter regarding student assistance programs and your support in an effort to sustain these programs.

Sincerely,

DONALD W. MCINNIS,
President.

UNIVERSITY OF MISSOURI,
Columbia, Mo., March 11, 1981.

Hon. PETER A. PEYSER,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR REPRESENTATIVE PEYSER: Under date of February 25, you addressed letters to the Chancellors of the four campuses of the University of Missouri seeking information on the impact of the proposed reductions for student assistance in the federal budget.

I am deeply appreciative of your interest and concern about bringing the leadership of higher education into play on this critical issue. The cuts proposed by the Reagan budget, if they prevail, will be devastating for many students.

We have prepared some figures on the impact of the proposed cuts on students at the University of Missouri which you may find useful (enclosed).

This information is being shared with the leadership in the national associations headquartered in Washington and with the members of the Missouri Congressional Delegation, particularly Representative Tom Coleman who is a member of the House Subcommittee on Post Secondary Education. We shall continue to work with the aforementioned groups and individuals to bring the urgency of this matter to the attention of the administration.

With appreciation for the initiative you are taking in this matter,

Sincerely,

JAMES C. OLSON,
President.

UNIVERSITY OF MISSOURI—STATUS REPORT ON PROPOSED FEDERAL SPENDING CUTS IN STUDENT FINANCIAL AID PROGRAMS

(Prepared by the Office of Scholarships and Student Financial Aid Services)

BACKGROUND

The Reagan Administration has announced budgetary cuts and regulatory rescissions which will directly affect the UM system and our students. In some areas the cuts are worse than first expected, in other areas some suggestions are liveable. These summaries were compiled from various sources and were accurate as of Tuesday, March 3, 1981.

I. Regulatory rescissions

A. Regulations implementing the Educational Amendments of 1980.—The Carter Administration worked long hours to publish final regulations implementing the Educational Amendments of 1980. These regulations published in final form, appeared in the Federal Register on December 30 and 31, 1980. Upon taking office President Reagan immediately signed an executive order delaying the implementation of all regulations for 60 days. At the present time we are therefore operating all federal student aid programs reauthorized in 1980 without final regulations. We are using the final law as published and our best judgments to try and stay within the law. In a few cases the federal government has written letters explaining portions of the law. The results of these rescissions if they continue much longer will be at best confusion and at worst possible violations of the law. During April we must have some guidance from the government prior to packaging new students.

B. Pell Grant (Basic Educational Opportunity Grant) Formula Rescission.—The Reagan Administration has withdrawn the formula for computation of Pell Grants for 1981-82. Without this final formula no grant can be awarded since need has not been determined. The Administration wants to reduce the cost of the program (currently about $2.4 billion) by doing the following:

1. Expect an additional $750 in self-help (summer jobs, savings) from all students. Whether or not the students have the savings or can find a job may not be taken into consideration.

2. Eliminate deductions in the formula for state and local taxes paid by student and family.

3. Increase the taxation rate applied against a family's disposable income from the current 14 percent to 20 percent.

4. Establish a maximum income of $25,000 on eligibility for the Grant. Currently all students with need receive funds—no matter their income.

These four changes would reduce the Pell Grant for a "typical" family with $20,000 from $1,000 to about $560.

The major problem with the formula rescission is that it takes time for any new formula (no matter how bad) to work through the regulatory process. Briefly, the delay is as follows:

Regulations Rescinded—Mid-February.

New Regulations published in Federal Register—April 1st.

Mandatory 45-day Congressional comment period begins (does not include periods of Congressional recess—Easter recess usually is for two weeks)—April 1st.

End of mandatory Congressional comment period—May 30th.

National Processor begins to process and mail four million student eligibility reports (SER's) to students nationwide—June 1st.

Students receive SERs in mail and begin to send them to the University—June 15-July 1.

Final awards returned to students—July 15-August 15.

Please recall that the Pell Grant is the floor program on which all other aid programs are based. While some tentative awards could be made, a final offer must precede any distribution of funds to students.

II. Budgetary cuts

A. Pell Grant Program.—The Pell Grant Program is officially an entitlement program—that is the government must pay all eligible students during a given year. During 1980-81 the Secretary of Education "borrowed" about $1 billion to fund this year's students. In order to fully fund recipients at a maximum $1,750 level it is projected that the government must have a supplemental budgetary appropriation of $1.2 billion. If the supplemental appropriation is not made then the maximum grant at high cost institutions would fall from $1,750 to $1,150. At the University of Missouri the maximum Pell Grant would fall from $864 (average) to $543 (or a loss of about $3.3 million systemwide). This reduction does not take into consideration the changes in the formula listed in I, B. above. Those cuts would be in addition to this possible reduction.

B. Guaranteed Student Loan Program.—The largest of all the federal aid programs has been targeted for substantial reductions by both the Carter and Reagan Administration. This program provides 9% loans to students which are repaid over a 10-year period of time. This year within the UM system 11,500 students will receive $29 million in GSL loans.

The government proposes to cut the cost in this program in the following ways:

1. Impose a $40,000 income ceiling on parents of dependent students or independent students to reduce borrowing.

2. Require that the maximum student loan cannot exceed the cost of education (the appropriate budget for that student) less the family's expected contribution, the student's expected contribution and any other financial aid available.

3. Require parents who do not have the "expected contribution" and have no other sources of funds to borrow from the Parents Loan Program. The loans would be at 3% over the current Treasury Bill rate and would begin to be re-paid immediately.

4. Eliminate the in-school subsidies paid by the government by allowing lenders to either collect the interest while the student is in school or to add the interest to the principal when the student leaves school.

The effects of these four proposals are as follows:

Increase the paper work required in the aid offices since all applicants would have to submit a need analysis.

Decrease the size of the loans making them less attractive to commercial lenders. Add to this the effect of having to "bill" for interest while the student is in school and we may see substantial numbers of lenders leave the program.

Make the loans more difficult for students to get and more expensive over the year.

Discourage most parents from borrowing under the Parents Loan Program due to the high interest rate.

C. National Direct Student Loan.—The NDSL program while not yet included in the Stockman black or white books is due for a $100 million reduction due to a smaller request for federal capital in the program. If the program is not eliminated by some future budget cut we can expect at least a 15% reduction in available funds within the system for 1981-82.

III. Effects on the university and UM students

We can project that the entire range of possible program cuts will have the following effects:

A. On the UM students—

1. See decreased numbers of professional, graduate and independent (older) students able to secure adequate financing to attend.

2. See increased pressure for the available dollars in student aid by all groups on campus.

3. See pressure by "new" students or transfer students who can no longer afford to go to private schools or to residential campuses. Urban campuses and community colleges should experience dramatic growth—but with severely stretched resources.

4. See great pressures from students, parents and others to have an early commit-

ment of aid at a time when that is not possible.

B. On the UM System—

1. See shifts in types of students attending the various campuses. These shifts will be dramatic, probably short-lived and unpredictable.

2. See expectations that the University will do even more than it is currently doing in the area of student aid.

3. See a general decline in middle-class students attending the University.

Attached you will find a chart which projects the potential loss in student aid by campus. This information was provided by the Directors of Student Financial Aid and is current.

UNIVERSITY OF MISSOURI—POSSIBLE CUTS IN FEDERAL STUDENT AID PROGRAMS

[Projected as of Mar. 4, 1981; corrected Mar. 5, 1981]

Program	Campus				Total
	Columbia	Kansas City	Rolla	St. Louis	
Pell grant:					
1980–81 students aided	4,370	1,200	1,500	1,520	8,590
Amount awarded	$3,843,000	$1,121,000	$1,226,000	$1,234,000	$7,424,000
1980–81 students with incomes over $25,000	501	77	300	149	1,027
Amounts	−$273,000	−$42,350	−$90,000	−$87,000	−$492,350
1980–81 average award	$880	$934	$817	$813	$864
Potential 37% shortfall average award	$553	$587	$513	$511	$543
Amount [1]	−$1,703,443	−$461,799	−$610,400	−$533,419	−$3,309,061
Potential Pell Grant loss	−$1,976,443	−$504,149	−$700,400	−$620,419	−$3,801,411
Guaranteed student loan:					
1980–81 students aided	6,410	2,472	1,800	564	11,224
Amount awarded	$15,147,500	$8,575,000	$3,600,000	$1,103,350	$28,425,850
1980–81 students with incomes projected to be over $40,000 [2]	3,749	800	600	400	5,549
Amount	−$9,313,000	−$2,775,080	−$1,000,000	−$825,000	−$13,913,080
Total students affected by cuts [3]	4,250	877	900	549	6,576
Total amount	−$11,289,443	−$3,279,229	−$1,700,400	−$1,445,419	−$17,714,491

[1] Projected only on Pell Grant recipients with income under $25,000.
[2] Projection based on those students who have no reported incomes on file—generally lower income students will submit an application for other forms of aid. Projection could deviate by ±10%. Projected cuts do not include the amount of funds which would not be available due to "need only" requirement.
[3] Only includes Pell Grant recipients with incomes over $25,000 and GSL recipients with incomes over $40,000. All Pell Grant recipients would suffer a 37% reduction without supplemental funding.

UNIVERSITY OF MISSOURI, COMPARISON OF SYSTEM-WIDE STATISTICS—1979–80 TO 1981–82

	1979–80	1980–81	Percent change from 1979–80
A. Dependent students:			
1. Average income	$18,404	$20,920	+13.7
2. Average real estate value nonliquid assets	27,206	29,716	+9.2
3. Cash, savings, and checking	3,158	3,085	−2.3
4. Expected family (dependent) contribution for education	733	865	+18.0
5. Expected student (dependent) contribution for education	809	823	+1.7
6. Expected total family and student (dependent) contribution	1,542	1,688	+9.5
7. Average need (institutional budget minus total family and student contribution)	2,206	2,730	+23.7
8. Average basic educational opportunity grant eligibility index number	1,230	[1] 1,831	+48.9
B. Independent students:			
1. Average income	5,466	5,159	−5.6
2. Total assets (liquid and nonliquid)	2,664	2,109	−20.8
3. Total student contribution	5,462	5,116	−6.3
4. Average need (institutional budget minus total student contribution)	3,631	4,351	+19.8

UNIVERSITY OF MISSOURI, COMPARISON OF SYSTEM-WIDE STATISTICS—1979–80 TO 1981–82—Continued

	1979–80	1980–81	Percent change from 1979–80

C. Summary 1979–80 and 1980–81:
1. Dependent students: Family income increased by 13.7 percent and nonliquid assets increased 9.2 percent (probably as a result of inflation). Liquid assets (savings, etc.) decreased by 2.3 percent. Both family and student expected combined contribution increased by 9.5 percent but the average need increased by 23.7 percent. The basic educational opportunity grant index increased by 48.9 percent which meant a smaller average grant to University of Missouri students.
2. Independent students: Independent students' income decreased by 5.6 percent and their total assets decreased by 20.8 percent. Independent students' contribution for aid was 6.3 percent lower in 1980–81 than in 1979–80 while their overall need for financial aid increased by almost 20 percent.

[1] The higher the index number the smaller the grant.

Note.—The University of Missouri system includes campuses in Columbia, Kansas City, Rolla and St. Louis. Enrollment within the University is approximately 60,000.

CONCURRENT RESOLUTION URGING WHITE HOUSE NOT TO INVITE SOUTH AFRICAN OFFICIALS

(Mr. DIXON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DIXON. Mr. Speaker, today I have introduced a House concurrent resolution with the support of over 40 of my colleagues in the House urging the President not to invite the Prime Minister of South Africa, or any high level official of that Government, to the United States until that country renounces its system of apartheid.

There have been reports that the State Department and the White House are considering the possibility of inviting Prime Minister Botha for an unprecedented visit to the United States.

This is just one of many alarming signals that President Reagan may seek to totally reverse our policies toward South Africa and the region in general.

Just last week it was reported that a five-member South African military delegation had entered the country without the knowledge or approval of the United States, and were asked abruptly to leave the country.

Just today it was disclosed that President Reagan's Ambassador to the United Nations, Jeane Kirkpatrick, met with the top South African military intelligence officer. This contradicts public assurance by the State Department that no such meetings took place.

South Africa has been justly isolated in the world community for its system of apartheid, a legalized web of racism, where the 16-percent white minority oppresses the black and colored majority.

We believe that the invitation of Prime Minister Botha would send the wrong signal to our many allies on the continent of Africa. It would announce that the United States no longer cares about the oppression ongoing in South Africa, or the rights of all individuals regardless of color.

I would like to share the text of this resolution and its sponsors with our colleagues in the Congress.

H. Con. Res. 98

Whereas the Republic of South Africa's policy of institutionalized and legalized racism, known as apartheid, is one of the cruelest forms of human rights abuse in the world today, involving a combination of discriminatory rules and practices by which 16 percent of the Republic's population dominate the majority;

Whereas abhorrent and pervasive human rights abuses, including degrading treatment and punishment and the use of torture—all in gross violation of the United Nations Declaration on Human Rights—persist in the Republic of South Africa in spite of efforts by the world community to influence the Government of the Republic of South Africa toward change;

Whereas the Government of the Republic of South Africa continues to rule in Namibia in spite of the termination of its mandate to administer that territory and continues to resist the implementation of the United Nations plan for independence for Namibia;

Whereas the United States has worked constructively during the past several years in a worthwhile effort to seek respect for the rights of all South Africans to participate in the political process in South Africa without discrimination based on race;

Whereas no South African Prime Minister has ever been invited officially to visit the United States because of our disapproval of the indefensible policy of apartheid; and

Whereas such a visit would likely be read by Africans and all the world as a signal that the United States accepts the practice of apartheid and, therefore, would certainly undercut the progress we have made in our relations with nations throughout Africa: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the President and the Secretary of State should not invite the Prime Minister of South Africa or any high level official of that Government to visit the United States until it can be demonstrated that the South African Government has abandoned totally its policy of apartheid and commited itself to granting social justice and full participation in the political process to all South Africans regardless of color.

A TRIBUTE TO THE LATE ALLARD K. LOWENSTEIN ON THE ANNIVERSARY OF HIS DEATH

(Mr. WALGREN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and to include extraneous matter.)

Mr. WALGREN. Mr. Speaker, Saturday a week ago marked the first year after the death of Allard Lowenstein. On that occasion a number of his friends and family gathered at the Arlington National Cemetery, and our distinguished colleague, Mr. Michael Barnes, of Maryland, gave a moving eulogy in Al's memory. I would like to insert that eulogy in the Record for the consideration of the Members and the many friends of Al Lowenstein across the country. It is as follows:

Remarks by Michael D. Barnes, of Maryland, in Remembrance of Allard K. Lowenstein, Arlington National Cemetery, March 14, 1981

It was only a year ago that Al was taken from us, and yet, look at what's become of the country since then.

I was visiting a friend's office recently, and noticed a poster hanging on the wall. It was "vintage Vietnam War," and though the poster has noticeably aged—dog-eared and tattered, like Al and like many of us whose political awareness began during that war—its message startled me for a moment. It hardly seemed thirteen years old. The words went something like this:

The wealth of the nation is squandered on cruelty . . .
United States economy and safety threatened by excessive weaponry;
United States sending military advisors to Latin America; tensions growing in Cambodia, Bolivia, Guatemala, Korea.
Hostility and violence growing in American cities; avenues of hope are lost in violence and armaments.
A city without hope may burn itself in racial sickness;
Nuclear war may be the final pathology of ideology and armaments.

It would not have been so frightening, I think, except that the litany of horrors in 1968 may seem tame in comparision to the inventory which we could take in 1981. I shudder each morning when I hear the "thump" of the newspaper landing on my doorstep. What new retreat from decency will it disclose?

CIA instructed to spy on Americans at home.

President decides that if you can't afford a lawyer, you aren't entitled to justice.

A thousand middle-income children caught eating subsidized school lunches; Administration terminates program for millions of poor.

Secretary of State declares "combating international terrorism" to be top foreign policy priority . . . lifts sanctions against Chile for government-sponsored murder on streets of Washington.

President claims food stamps are "waste of taxpayers' money" * * * dines at Jockey Club.

Administration proposes tax-cut to relieve the downtrodden * * * those making $200,000 or more to benefit.

Under Secretary of State reported to have remembered where Africa is.

It gets worse, but I need not go on. Anyone who shared a struggle with Al Lowenstein—anyone who shared a cause with him—knows too well how different the world of today is from the world which he sought to craft * * * knows too well that we are sliding back from the minimal distance which we had pulled ahead.

We gather here today to remember Al Lowenstein. But the real question is whether he is buried in this soil. Have we indeed buried Al Lowenstein and put him behind us? Or did we bury only his body, but put him within us?

The *Kaddish*, which I know hearts are reciting today, declares:

"The departed, whom we now remember, behold they have entered into the peace of life eternal, but they still live on earth in the acts of goodness they performed and in the hearts of those who cherish their memory."

Only we, "we hearty band of fellows," can determine whether Al Lowenstein still lives on earth. Too many of his acts of goodness have been laid to waste and negated * * * too much of the progress to which he spurred his country is now being reversed. Al will thus live on only if those of us, "who cherish his memory," will cherish it so deeply that his cause—no, truly I must say, his causes—will not die.

On the tenth anniversary of Robert Kennedy's death, Al wrote a message which is as valid today as it was then:

"* * * the awful fact of his unnatural death will shadow events as long as we are a part of them. And in that shadow we will still struggle with the problem connected to so many others—the problem of how to revive enthusiasm and excite energies"—G-d, how much easier it would be if we still had Al, the quintessential recruiter and mobilizer—"of how a spirit once aborted can be born again. Old battle cries drift back, but they are harder to hear now. * * *

"The mind wanders past jaded words. There is not radiance; nothing is clear cut. We have learned that Camelot was not quite Camelot, and that America is neither

as innocent nor as easily changed as we once thought. It has become sensible to be cynical.

"But anybody who thinks about it knows that it is sensible, too, to remember that greater sophistication is not the same thing as greater wisdom . . . that an immobilizing cynicism is no cure for what has gone wrong.

"And anybody who finds himself wishing on this occasion that Robert Kennedy were still around knows what Robert Kennedy—or Al Lowenstein—"would be saying if he were here—knows that we have dallied long enough, and that it is past time to try again to do better, to make a difference * * * past time to dream again of things as they ought to be, and ask again why they are not."

As Peter Yarrow would remind us, it is truly past time to "weave the sunshine out of the falling rain * * * to weave the hope of a new tomorrow" and fill our cups again.

That poster I spoke about, it continued:

The solutions must spring from individuals on this planet.

We can identify ourselves clearly by speech and by action;

We can advertise for peace, locally and nationally.

We can pray for peace * * * vote for peace candidates * * * work for peace.

We can create a community of consciousness.

We must not be party to a mandate of fear, or the trees and the flowers, the birds and the children may burn with the metropolis.

Today is a beautiful day to act.

It will not be as easy this time, though surely it was not easy the last time. But it will be more difficult now precisely because so many have grown so cynical. So many have had their hopes raised, only to be thrown down. So many have followed brave leaders, only to see those leaders brought down.

Ted Kennedy said last year that "All by himself, Al was more effective than an organization of thousands. He was a one-man demonstration for civil rights. Even when he walked alone, he was a multitude marching for peace." But we shall have to renew the struggle now without Al, and where he by himself was thousands, we shall have to be thousands. And where he was a multitude, we shall have to mobilize multitudes, and act with the passion and strength of multitudes.

I quoted Al on Robert Kennedy. Here, so near to Bobby's grave as well, perhaps I should also quote him on Al. He wrote:

"For Al, who knew the lessons of Emerson and taught it to the rest of us: 'They did not yet see and thousands of young men as hopeful, now crowding to the barriers of their careers, do not yet see that if a single man plant himself on his convictions and then abide, the huge world will come round to him.'"

Al did plant himself and then abide. And now we, crowding to the barriers, must take the stands which Al is no longer here to take. We must take a stand against those who would arm us into conflagration. We must take a stand against those who see as "East-West" the struggle of those whose challenge is "from the bottom, up." We must take a stand—we must be the strength and the voice of those who are the weakest and most voiceless. We must be the reminders to all Americans about what America is supposed to be all about.

And so I would ask you—you hearty and loyal souls who are hearty and loyal enough to come here today: will you keep him alive, and *not* leave him buried in this soil? Will you *not* surrender the causes to which Al rallied us? Will you refuse to accept injustice and inhumanity?

Will you leave this hallowed ground today and promise that, when you are at home late at night * * * comfortable and resting * * * and the telephone rings—promise me, please, that you will rally when a young and hesitant voice says: "Al Lowenstein told me to call this number."

You will be needed.

EL SALVADOR

(Mr. LEHMAN asked and was given permission to address the House for one minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEHMAN. Mr. Speaker, last year the administration requested that our Appropriations Subcommittee on Foreign Operations approve the reprograming of $5.7 million to provide nonlethal military equipment to the Government of El Salvador. I voted for the reprograming because the information available to us at the time indicated to me that the junta in El Salvador held out the greatest hope for order and stability combined with necessary economic reforms and political freedoms. I thought the equipment would help the junta both by signifying U.S. support for moderation and reform and by helping to professionalize the military and reduce the level of violence in the country. If the junta should fall due to lack of U.S. support, I saw no alternative but civil war between the far right and the far left, and greatly increased misery and violence for the people.

Nearly 1 year has passed, and I have closely watched the situation in that unhappy country. Now, faced with another reprograming request—this time for lethal equipment—I cannot support the administration.

First, over the last year, the Government of El Salvador has not made sufficient progress in controlling the violence by the right, including elements of the Government's own forces. The death toll has continued to rise, and even in the areas most symbolic of improvement—the junta's inability to keep Colonel D'Aubuisson in custody last summer, or the unsatisfactory investigation into the deaths of the American churchwomen—the signs are disappointing.

Second, I am troubled that El Salvador is seen as the setting for an East-West confrontation. The internal issues seem to me much more compelling, and much more likely to affect the outcome, than the posturing of the major world powers. The influx of arms supplied by Communist nations is disturbing, but our response must not be extreme and should not concentrate on military supplies and training.

Third, whatever our subcommittee does this afternoon, $20 million in weapons and services will be provided to El Salvador under the special emergency authority of section 506(a) of the Foreign Assistance Act. I believe $20 million is more than enough. I am far from convinced that the extreme left in El Salvador is as strong as it has been painted to be, either in numbers or in arms. This is indicated by testimony received by our subcommittee and by the failure of the left's final offensive in January, despite the lack of any U.S. military assistance to the Government.

Finally, I believe the best solution for El Salvador—and other nations of the region have called for this approach—is negotiation. To place too much emphasis on a military solution strengthens the Salvadoran military and plays down the importance of civilian government and civilian solutions. This may permit even greater excesses on the part of the violent elements of the security forces. Only such an increase in right wing violence will cause the left's ranks to swell and make the much publicized Communist weapons a threat.

We cannot walk away from El Salvador. Instead, we must emphasize economic assistance and diplomatic initiatives to continue the reforms and encourage peaceful negotiations. I understand the State Department is today announcing its intention to double the level of economic assistance to El Salvador. While I have not seen details of the proposal, and I do not know what other countries will be cut to provide the higher level, I would be inclined to support such an approach. But I do not believe the proposed $5 million in military assistance will help bring an end to the turmoil and suffering in El Salvador, and I will not support it as proposed by the administration.

Mr. Speaker, the following three editorials from the Miami Herald present a thoughtful and realistic discussion of what our options are in El Salvador. I know my colleagues will find the commentary helpful as they assess what their own positions should be concerning the direction of U.S. policy in Central America.

The articles follow:

[From the Miami Herald, Feb. 4, 1981]

HIGH STAKES IN EL SALVADOR

Robert White's removal as U.S. ambassador to El Salvador may not constitute a declaration of Reagan Administration policy, as a State Department spokesman emphasized. Mr. White's firing does, however, signal the direction that the Administration's policy may be taking as it undergoes review.

To the extent Mr. White's removal represents a mere change of personnel, it warrants one kind of response. To the extent his firing heralds a turning away by the Reagan team from commitment to the kinds of political, economic, and social reforms in El Salvador that Mr. White championed, it warrants quite another response.

A career Foreign Service officer, Mr. White was given a hard, thankless, and dangerous job when the Carter Administration sent him to El Salvador. In working to implement United States policy of backing reforms, which angered extremists on left and right, Mr. White served his nation well.

In early December, leaks to the press from the Reagan transition team marked Mr. White as one ambassador who would be replaced as soon as Mr. Reagan took power. Mr. White complained through the press in response that such statements weakened his authority at a time when he was trying desperately to do his job in the midst of a civil war.

Administration spokesmen say Mr. White was removed because he complained through the press instead of through channels. It may not be fair, but given Mr. White's too-controversial and too-high profile, it probably is best that he be replaced now, even if for the wrong reasons. A new diplomat may be better able to work effectively.

The urgent and far more important question is. What will the Reagan Administration's policy be toward that war-wracked Central American nation? Some key concerns need be kept uppermost in mind as that policy is being drawn.

Foremost among them is that the United States easily could harm, not serve, its own national interest. It will harm itself if it permits itself to become the military defender of a right-wing, military dictatorship that is hated by El Salvador's people and opposed by the world's democracies.

That is not the situation now, but the danger clearly exists. The current Salvadoran government is portrayed as a centralist alliance between military and civilian reformers. As the terrorism grows worse, however, the ruling junta seems to grow more rightist, more militarist, more violent. If the junta is so centrist, why do its forces kill only leftists and peasants?

The Carter Administration was dedicated to agrarian reform in El Salvador so that the masses would not need to rebel. It also stressed human rights.

As the Reagan Administration steps up military aid to the Salvadoran junta, it must not lose sight of those just and human objectives. And as it formulates its position, it should be careful to coordinate its thinking with the other Latin American democracies, and with Mexico and Venezuela in particular. Support for the junta must not be blind. The future of all Central America may swing on El Salvador's hinges.

[From the Miami Hearld, Feb. 27, 1981]

VIETNAM'S SPECTER LOOMS BEHIND SALVADOR POLICIES

President Reagan's policies regarding El Salvador remain cause for serious concern, despite his recent vow that he has "no intention" of allowing the United States to bog down in another Vietnam like quagmire there.

Intentions, after all, are one thing, and policies quite another. Ever-more worrisome reports continue to issue from Washington. The Pentagon has pushed hard for over a year for dispatch of U.S. combat troops to "advise" El Salvador's army, according to former U.S. Ambassador Robert White. The Reagan Administration is considering deployment of such military "advisers" there, as well as possible naval blocades to stem the flow of weapons to leftist guerrillas.

Once the United States begins to assume a role of active military involvement, where will that stop? The direct parallels emerging with how the United States was drawn ever deeper into Vietnam need not be belabored—yet.

Even more troubling is the way the Reagan Administration is defining the struggle in El Salvador. The line being sounded ever louder posits that surrogate Soviet adventurism is to blame. "You have to begin drawing the lines" somewhere, explains James Brady, the President's press secretary. Classic domino-theory logic, applied wrongly once again to misleadingly simplify a complex civil war. The Vietnam syndrome strikes again.

The Administration seems obsessed with the notion that the Kremlin is ultimately behind the turmoil in El Salvador. Teams of diplomats recently paid sales calls on West European and Latin American capitals, carrying portfolios of "captured documents" allegedly proving that Salvador's guerrillas have obtained massive arms aid from Communist nations around the world, delivered through Cuba and Nicaragua.

The point is not that there are no foreign Communists trying to fan El Salvador's flames. Doubtless there are. It should come as no surprise either that they are supplying weapons to leftists there—just as the United States is arming the governing junta.

The point is twofold. First, the essential truth must not be forgot that El Salvador's war originates not in Moscow, but in its own ugly history. Until recently, the top 5 per cent of Salvador's population received 38 per cent of the nation's income, and fewer than 2 per cent owned more than half the farmland. The oligarchy used the army to squash peasant demands for justice.

Today's violence is essentially class rebellion springing from that history. Keeping foreign Communists and arms out would not end it. Blocking arms flows to guerrillas and checking their military offensives is not enough.

That is the second point: The Reagan Administration seems to be overemphasizing military tactics as though they were solutions. It shows dangerous signs of unqualified support for the governing junta, despite that junta's rightward swing and its suspect inability to curb right-wing "death squads."

If the Reagan Administration is to win for the United States the future favor of Latin Americans—its proper strategic goal in El Salvador—it must go beyond military aid and simplistic anti-communism. It should be pressuring the junta vigorously to speed its promised social, economic, and land-distribution reforms. And it should be pushing the junta, together with Mexico, Venezuela, and other allied nations, to negotiate a political settlement. Victory in El Salvador will be won in the people's hearts and minds, not on the battlefield. American finesse is required, not American force.

[From the Miami Herald, Mar. 5, 1981]

LET DIPLOMACY'S FORCES TRY TO HEAL EL SALVADOR

Instead of seeking an illusory military solution to El Salvador's problems, the Reagan Administration should be turning this nation's diplomatic muscle toward fostering substantive negotiations to end the war there. To fail to do so would be wrong, dangerous, and shortsighted.

Even El Salvador's increasingly right-wing civilian-military junta insists it needs the economic aid it will get more than the weapons. Salvadoran President Jose Napoleon Duarte says he wants to talk about a Socialist International offer to mediate the bloody dispute.

Bernt Carlsson of Sweden, general secretary of that international group of Social Democratic parties, says many important leftist and guerrilla groups in El Salvador already have accepted the mediation offer. Latin American Social Democratic parties and governments, including vitally important Mexico, now favor negotiations. So does Christian-Democratic Venezuela.

No mediation is likely to succeed, however, if the State Department maintains the disdain that spokesman William Dyess displayed on Tuesday. Even as Mr. Carlsson was in Washington to see senior State Department officials, Mr. Dyess said the United States would not attempt to tell El Salvador what to do.

"El Salvador is not a client of the United States," said Mr. Dyess, blithely ignoring the Reagan Administration's plan to send military advisers and increase military aid there. If the Administration can assist the Salvadoran junta militarily without making it a client, why cannot it urge negotiations?

It can, of course; it simply has chosen instead to beat its breast rather than talk. The folly of that choice can only become more evident with each step the United States takes into the Salvadoran quagmire.

All in all, the possibility may exist to make all key combatants negotiate in good faith, on pain of isolation. The United States should adjust to the changed circumstances. At least initially, mediation through the Social Democrats' international could skirt the guerrillas' insistence that they must negotiate directly with the United States on grounds that the junta is superfluous.

With massive U.S. aid, a junta military victory may well be possible—tens of thousands of deaths hence. There is the equal danger that the Administration could blunder into pushing El Salvador's war-weary masses into supporting the Marxist guerrillas, with the opposite result.

Enduring peace will not come to El Salvador so long as its society and economy remain grotesquely inequitable. In the orgy of killing, the vital reforms needed to achieve social justice become less and less achievable. Indeed, President Duarte said Tuesday that the most important part of the land reform will take another five to 10 years. By then, his nation may have drowned in blood.

BUDGET CUTS AND OUR NATIONAL INTEREST

(Mr. FUQUA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FUQUA. Mr. Speaker, the Federal research and development budget represents the American people's investment in their future. The administration's treatment of science in its revised budget belies its oft-stated goals of a new economic beginning. Major cuts at the National Science Foundation and the National Institutes of Health will only inhibit our ability to unlock the secrets of nature and provide the kind of innovation necessary

to stimulate our economy and build the Nation.

It makes no sense to delay the modernization of our research laboratories so that they can be useful and on the cutting edge of science. It makes no sense to cut those parts of the National Science Foundation that might unlock the secrets of research that gives us tools to better expand our economy. It makes no sense to deprive our citizens of the scientific education that has helped us match and surpass the Soviets after Sputnik. And, Mr. Speaker, it makes no sense to restrain the health research enterprise that has conquered so many diseases and that leads the fight on the disease people hate more than war—cancer.

We owe it to the American people to carefully review and examine all of these budget decisions to determine whether or not they are truly in our long-term national interest.

THE ADMINISTRATION HAS CHANGED THE RULES FOR DISASTER ASSISTANCE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, with only about one-half of the disaster loans for farmers having been processed, the administration has changed the rules for disaster assistance to deny about half the farmers the assistance which was intended to be delivered as a result of the 1980 drought, the worst in history.

A recent letter from my State says that unless the farmers get these emergency loans, many will lose their farms and livelihood, and there will be much suffering.

Mr. Speaker, today I am introducing a bill which says that notwithstanding any provision of the law, no change in the regulations shall apply to any disaster loan application which was pending on the date the rules were changed—March 19, 1981.

ASSURE SENIOR CITIZENS RETIREMENT BENEFITS WILL NOT BE REDUCED

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, recent press reports have indicated that some Democrats are leaning toward a budget proposal which would cut future benefits for social security recipients.

Now, we know who the Democrats are talking about when they come to this floor and claim that President Reagan's economic program favors the rich. The rich are evidently, according to some Democrats, our elderly on social security, who the President says should be protected. At least, it is the elderly they plan to attack.

It appears that House Democrats are so intent on saving social welfare programs for those who refuse to work that they are willing to cut benefits for those who worked all their lives and now depend on social security to sustain their retirement.

Maybe there is a misreading of Democratic Party intentions here. If so, our Nation's elderly deserve to be assured that they are not going to have their benefits slashed.

House leaders have assured big business that it will get its retroactive tax cut. Why not assure our senior citizens in the same manner that they can expect this year's budget to guarantee them that retirement benefits will not be reduced.

Many of us in this House will eagerly await such an announcement. More important, the Nation will be waiting, too.

POSTAL SERVICE TO ADVERTISE NINE-DIGIT ZIP CODE SYSTEM

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I was disturbed to learn in recent days that the Postal Service is planning a media advertising blitz to promote its plan to implement a nine-digit ZIP code system.

I have learned that this effort will include sending a flyer to every postal patron in the country, as well as an extensive ad campaign.

Mr. Speaker, over 80 Members of this House and a majority of the Senate have expressed their clear-cut opposition to the nine-digit ZIP code. And I am convinced that the overwhelming majority of the American people are opposed to it.

In view of this opposition—not to mention the fact that just 2 days ago the Postal Service raised the cost of a first class stamp from 15 cents to 18 cents—I think it is ridiculous and unwise for the Postal Service to spend millions of dollars to try to sell the American people on this foolish plan.

That is why I introduced legislation yesterday to, not only deny funds to the Postal Service for implementing the nine-digit ZIP code, but to deny funds for this wasteful advertising effort as well.

I urge all my colleagues to join me in this effort.

CRITICS OF THE PRESIDENT'S EL SALVADOR POLICY

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, 1 day last week 21 Democratic Members came to the well of this House to make 1-minute speeches against the President's policies toward El Salvador.

It is time someone called their bluff. I would like any or all of these critics to answer the following questions:

First, do you want to see the Marxist-Leninist guerrilla movement set up a government in El Salvador?

Second, do you disagree with the assessment of Roman Catholic Archbishop Rivera of San Salvador that the guerrillas are now rejected by a majority of people in El Salvador because they tend toward "the conquest of power for its own sake"?

Third, do you agree or disagree with the El Salvadoran Government's practice of land reform?

Fourth, since all of these critics bring up the Vietnam tragedy, let me ask them: Have any of them spoken to a victim of Vietnamese Communist reeducation camps, or the surviving boat people? In short, if they were wrong about the Communists in Vietnam, what makes them think they are right about Communists in El Salvador?

It is time these critics put up or shut up. Either they have a solution to El Salvador that will lead toward human rights or they do not. Do not be bashful, critics—you have nothing to lose in admitting you are wrong, again.

IMMIGRATION POLICY IN SHAMBLES

(Mr. BEARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEARD. Mr. Speaker, I think all of my colleagues in this House would agree with me that our immigration policy—if, indeed, we can call it a policy—is in a shambles. Accordingly, I am introducing the Immigration and National Security Act today, and I hope its broad reforms will be enacted by this House just as soon as possible.

I feel that the most important reform to come out of this bill will be through the provision that will declare it a crime for any person to hire an illegal alien. A growing wave of sweatshops in this country are cruelly exploiting those aliens while at the same time preventing millions of American citizens from gaining employment. The mechanism for enforcement will be through more secure social security cards and a new computer program within the existing social security system.

I am also asking that the border patrol be strengthened and that we reduce the present immigration ceilings to 350,000 per year. There would also be a provision for granting amnesty to many long-term aliens who have

become productive members of this society. Thank you.

THE 160TH ANNIVERSARY OF GREEK INDEPENDENCE

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, it gives me pleasure to honor the 160th anniversary of Greek independence. On March 25, 1821, a small band of Greek patriots revolted against the oppressive Ottoman Empire. Outnumbered by the Turks, the Greeks saw their initial revolt fail, but it led to freedom 8 years later.

This was not the only time Greece had been subjugated as a nation; for over 400 years Rome had buried the standard of freedom enjoyed by Greece during the Golden Age. The Greeks' hard won independence also survived the invasion of World War II and a Communist postwar threat.

The entire Western World is indebted to Greece for the contributions she has made to civilization. The concepts of freedom and democracy first laid down by the ancient Greeks are the same concepts our Government was founded on and are the same privileges both of our countries enjoy today.

EL SALVADOR

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, I heard the remarks of our distinguished colleague, the gentleman from Illinois (Mr. MICHEL), on El Salvador. I would just like to suggest to him and my other colleagues that if they want to get a more balanced view, they can look at yesterday's CONGRESSIONAL RECORD on page 4856 at some remarks that I put there under the heading "El Salvador, Symptom of a Sick Foreign Policy?"

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. MURTHA) laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., March 23, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 12:26 p.m. on Monday, March 23, 1981 and said to contain a message from the President wherein he transmits a preliminary report on the Community Impact Assistance Study.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.

PRELIMINARY REPORT ON COMMUNITY IMPACT ASSISTANCE STUDY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Armed Services:

(For message, see proceedings of the Senate of Monday, March 23, 1981, page S2478.)

LATEST POSTAGE RATE INCREASES

(Mr. GOLDWATER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOLDWATER. Mr. Speaker, if you have gone down to your local post office this morning, you have probably seen the new postage stamp—for 18 cents. As of midnight March 21, the 15-cent first-class postage stamp is as extinct as the dinosaur.

The Postal Service tells us they need higher rates because of inflation. In fact, even before the latest rate increase was approved, there was talk of a 22-cent stamp before the fall of 1982. Instead of simply increasing postage rates whenever they feel like it, I suggest they look at creative alternatives to higher rates.

I have introduced a bill which would allow advertising on postage stamps as a revenue-raising measure. The revenue raised would be used to offset the taxpayer dollars which subsidize the Postal Service every year and to reduce, or at least delay, future periodic rate increases.

The taxpayer is telling us loud and clear that he has had enough; enough of high taxes, enough of inflation, enough of eroding purchasing power. I believe the taxpayer wants, and deserves, some help. I and my 17 colleagues who have cosponsored this creative legislation, realize we must do something for the taxpayer. I urge that the Committee on Post Office and Civil Service hold hearings on this bill.

□ 1230

IN MEMORY OF CHESTER BITTERMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, Chester Bitterman was a graduate of Columbia Bible College in Columbia, S.C. It was there he decided to become a linguist. He subsequently spent three summers in linguistic training—two at the University of North Dakota and one at the University of Texas in Dallas—and 3 months learning jungle survival in Mexico, thus fulfilling the requirements for his life's work.

Accompanied by his wife, Brenda, and his daughter, Anna Ruth, now 3, Mr. Bitterman went to Colombia in August 1979 to translate the Bible into Indian languages. A second daughter, Esther Elizabeth, now 18 months old, was born in Colombia. The family was living in Lomalinda, 85 miles southeast of Bogota, preparing to begin work with the Carijona tribe when Mr. Bitterman suffered a gall bladder illness and had to fly to Bogota for surgery. On January 19, he was abducted by terrorists, held hostage for 6 weeks and then killed.

Mr. Bitterman was a translator for the Summer Institute of Linguistics. This organization is a subsidiary of Wycliffe Bible Translators, based in Huntington Beach, Calif., which is an organization that specializes in developing a written language for remote peoples of the world. The folks at Wycliffe seek primitive communal groups whose languages are unwritten and work with them to develop an alphabet, primers, and dictionaries. Their ultimate goal is to translate the Scriptures, usually the Gospel according to St. John, into the tribe's native language, a process that usually takes 10 to 15 years. The Wycliffe organization has 209 people working in Colombia and in February 1981, the organization had 4,000 workers translating the Bible into 750 languages in 36 countries.

Chester Bitterman died on March 7, 1981, with a bullet through his heart. He was not the first nor will he be the last victim of the conflict raging throughout the world between the gospel according to Karl Marx and the Gospel according to St. John. When he was kidnaped by members of the M-19 or April 19 movement, the terrorists were actually looking for Alva Wheeler, the Colombian director of the institute. The gunmen took Mr Bitterman instead. M-19 accused Mr. Bitterman of being a spy and demanded that the Summer Institute of Linguistics leave Colombia.

Wycliffe Bible Translators, or the Summer Institute of Linguistics, is only in countries with the consent of the host government. A good question can develop as to why governments of countries where these remote tribes are located permit these translators to come into their countries and do their work. The answer to this question also explains why the proponents of Karl

Marx want to roadblock the bringing of written language to these remote peoples. Governments around the world have learned that, as a result of the development of a written language, and also having the Gospel according to St. John translated as a part of the effort, these remote people not only begin to learn the rudimentary aspects of civilization but, in those instances where Christianity works its message and changes people by making them peaceful rather than warlike, it permits these remote people to be a constructive part of a nation rather than a hostile, noncooperative and noninterested outpost. When tribes take on this beginning of civilization, they are less interested in the Gospel according to Karl Marx, and this explains why revolutionary terrorists of the Communist type such as M-19 are working so diligently to remove people like Mr. Bitterman, and his colleagues, from Colombia.

The suggestion that the Summer Institute of Linguistics or the Wycliffe Bible Translators are in any way connected with the U.S. Government is a joke. Neither of these organizations has a charter from the U.S. Government, nor is it required of them to obtain one. They function in a free society, which exists in the United States of America, and they are not in any was answerable to the U.S. Government for what they do. The false charge that asserts that there is some connection between the work of these organizations and the U.S. Government is nothing more than an effort on the part of those who oppose their work to discredit them.

During Mr. Bitterman's 6-week captivity, the Bitterman family maintained that the institute could never acquiesce to the terrorists' demands for the missionaries to leave the country. Capitulation would embolden terrorists elsewhere in the world, Mrs. Bitterman said.

At home in Lancaster, Pa., the missionary's parents accepted the news of his death with the same quiet faith that they said had sustained them during the 6 weeks of captivity. Chester Bitterman, his father, said:

> We believe God allowed this to happen for reasons of His own. We do not always understand God's purpose, but we can accept it.

One of Mr. Bitterman's brothers, Chris, 18, praised the courage of the Summer Institute of Linguistics and its missionaries in Colombia.

> Chet himself said one life isn't worth all the hundreds of Indians who would have never heard the Word. This is what he said even before he was kidnapped.

It is altogether fitting that we pay respect to the memory of Chester Bitterman as one who gave up his life for his fellow men. He is one of the great heroes of our era, and he should be recognized as such.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I rise today to pay tribute to my constituent, the late Chester Bitterman III, whose untimely and tragic death at the hands of leftist guerrillas in Colombia is condemned as a despicable and cowardly act by every peace-loving citizen of the world. That Chet's death was brought about by violence is in marked contrast to his way of life and his mission of spreading peace and enlightenment to remote peoples of the world.

I gratefully acknowledge and concur with my distinguished colleague from California who recognized Chet as one of the great heroes of our era. To that I would like to add my admiration and respect for Chet's family—his wife and daughters, his parents and his brothers and sisters, for they too have acted courageously throughout this ordeal and can also be called heroes.

Chet's employment with the Summer Institute of Linguistics, a subsidiary of Wycliffe Bible Translators, was the fulfillment of a dream the Bitterman family had waited a lifetime to realize. Coming from a devoutly Christian family, Chet was prepared for and eagerly accepted his assignment to Colombia where he would join his wife's family and begin his work of setting down a written language for Colombian Indian tribes for the ultimate purpose of translating the Bible into their language.

But Chet never had a chance to begin that work. On January 19, some 18 months after he had arrived in Colombia to prepare for and await the start of his assignment, a splinter faction of the M-19 or April 19 terrorist movement kidnaped him from the institute's headquarters in Bogota and 47 days later, in the jungles of Colombia, took his life with a single bullet through his heart.

This disgusting act of inhumanity illustrates the depravity of those, who by force, seek to impose their will on others. It was these actions that Chet and his employers wanted to overcome, not through covert means, as alleged by his murderers who called him a spy, but by offering enlightenment and hope through a written language to remote peoples of the world.

Throughout these 47 agonizing days, unsure of Chet's physical condition, his safety from bodily harm or even his future here on Earth, the Bitterman family demonstrated the kind of moral and spiritual courage which, throughout history, has far better protected the liberties free people hold dear than all the arsenals of the world. They recognized that giving into terrorist blackmail or attempting negotiations for Chet's life with his kidnapers could seriously endanger the lives of other missionaries in the future in Colombia and elsewhere around the world and were, therefore, the first to ask that our Government not interfere.

The importance of Chet's work and that of those who will surely follow continues to be foremost in the thoughts of the Bitterman family. Their prayers are said now for the lives and safety of other missionaries. And despite Chet's brutal murder, the family extends only charitable thoughts and concern, not hatred, to his terrorist kidnapers.

Even upon learning of Chet's death the Bittermans have continued to demonstrate their inherent selflessness by remaining firm in their conviction that God's will be done. They have made it clear to everyone with whom they have had contact that they view Chet's death as God's will, and therefore, something good will come from it.

That good may be worked by the Bitterman family itself. Where others might seek to lay blame for the events which claimed their son's life, the Bittermans have offered their help in the fight against international terrorism by sharing their experiences with any forum desiring to listen.

And they have offered hope for the future. The Bitterman family is confident that through others, Chet's mission will be fulfilled. Their unswerving faith in the future is summed up in a verse from Revelations which they quoted after Chet's death was confirmed:

> And I heard a great voice out of the heaven saying, behold the dwelling place of God is with men and He will dwell with them and they shall be His people and God himself shall be with them and be their God.
>
> And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain. For the former things are passed away.
>
> And He that sat upon the throne said, behold, I make all things new. And He said unto me, write; for these words are true and faithful.

God has blessed this Nation to put in its midst people like the Bittermans—a son who has died brutally in a distant country, but a family who is determined to see that his death shall not have been in vain. The work of bringing hope to the world has just begun.

Mr. DANNEMEYER. I thank the gentleman.

Does the gentleman from Texas desire recognition?

Mr. COLLINS of Texas. I would like to ask the gentleman to yield, and say I commend him.

I want everyone in the country to know that our hearts have gone out to the family and our admiration has

gone out to Chet Bitterman for what he did as a missionary serving abroad.

HOUR OF MEETING ON WEDNESDAY, MARCH 25, 1981

Mr. DE LUGO. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12 o'clock noon tomorrow, Wednesday, March 25, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the Virgin Islands?

Mr. WALKER. Reserving the right to object, Mr. Speaker, am I correct that what we are doing is changing the time of opening session tomorrow from 3 o'clock to 12 o'clock?

Mr. DE LUGO. The gentlemen is correct.

Mr. WALKER. Is that not being done a little late, given the fact that we are to consider some extremely important committee funding resolutions tomorrow? There may be Members who have not come to town as a result of a pro forma session on yesterday and today who may be planning to bring flights into town to arrive for a 3 o'clock opening of the session tomorrow and, therefore, would be in a position of not being able to participate in the opening 3 hours of the session if that is the way their plans were made?

The SPEAKER pro tempore. The Chair understands that the minority leader has cleared the request.

Mr. WALKER. I, too, understand that the minority leader and the minority whip have cleared the request, but it still raises a question in my mind about bringing to the House at this late date this kind of a change when we have some of the first major legislation that we have taken up in this session to come before the House, and to all of a sudden change the opening time of the session. I would hope that we are not going to see a pattern develop here—and while I do not plan to object today, on any future instances of this type where we get notice the day before, you can expect that I will object.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the Virgin Islands?

There was no objection.

ALTERNATE COMMITTEE FUNDING RESOLUTION PROCEDURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS), is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, tomorrow we have coming before us a staff funding motion which is different than what has come before us previously. As we approve the committee funding resolutions, instead of getting to approve each of them individually, as we always have in the past, this year they are coming up in one big lump sum.

Now, the reason that the majority has carried the rule that way is because they are anxious to save some of these committees, that otherwise would be voted down individually, and by putting them in a package, carry the whole ball game forward.

□ 1245

What we need to do is to look forward to tomorrow, because all America is looking to Congress to cut expenses. There is not a hometown in America but what tells Congressmen we have too much government, we have too much spending, that inflation is killing them. Tomorrow, we have an opportunity to take a step forward. We have an opportunity to cut expenses, to provide an example of frugality for every Federal agency in this country.

The showdown vote is this: On what was spent for committee staff funding last year, will we cut it 10 percent? We are going to get all kinds of terms, talking about what they authorized last year. It does not matter. The question is, what did committees spend last year. We need to cut the total spending by 10 percent.

Let me give you some figures that are indicative of the doubletalk that we can anticipate tomorrow. The first thing that happens, any time you have a funding resolution which cuts, which they anticipate, they just ask for a little more. That way, you can take a minimum cut and do not hurt yourselves. So, when all committees came in, even after their trims, so-called trims, they asked for $47 million. When they came out of the Accounts Subcommittee of the House Administration Committee, they have cut that down to $42.8 million.

Now, $42.8 million, what does that mean? What it means is, in addition to this $42.8, they already have $24.7 for statutory, which is another way of getting the money. They are now spending over $67 million for committees.

Now, how does that $67 million compare? Look at is this way: The investigative committees in 1971 totaled $9.9 million; in other words, $9.9 million 10 years ago. We were spending $9.9 million, and now they are in asking for $40 million for investigative committees alone. That means they are asking for four times as much.

Being on the Republican side of the aisle, we realize that the big burden to reduce will come on the Democratic side of the aisle, because we have a tradition in the House—the Democrats have established a tradition—of taking a large proportion for themselves. Now, in the other body it is the tradition that it is 2 to 1. Last year, when the Democrats controlled, it was 2 to 1 Democrat. This year, when the Senate is Republican, it is 2 to 1 Republicans. The ratio of the House staffs today is 5.5 to 1—5.5 to 1. For every Republican staffer there are 5.5 Democrats here. So, what we are going to ask is that the Democrats outnumber the Republican 4 to 1. We ask that they reduce the size of this overloaded, bloated staff.

Just to look at a few basic examples, the first one that always comes to my mind is the District of Columbia Committee, because you really ask yourself, do we need a separate District of Columbia Committee? It ought to be a subcommittee of Government Operations Committee. The other body gets by with just 7 people on their staff, but it takes 41 over here to handle the District of Columbia issues. We all know that the District of Columbia now is a separate entity, a separate government. Congress does not run it anymore. We just simply have some oversight functions.

Let me compare for you some figures which I think are very interesting because it shows how far Congress has grown with these investigative committees. I want to compare 1974 and what the Democrats are recommending for 1981.

On the Banking Committee, it was $1,082,165 in 1974; now, it is $2,457,600.

On the Foreign Affairs Committee, it was $590,945; now, it is $1,888,600—nearly four times as much in 7 years.

On Government Operations, it was $991,998; now, it is $2,461,900—all of this just during 7 years.

The Energy and Commerce Committee was $903,271, and now it is $4,043,700. I serve on the Commerce Committee, and I would like to say that we do not need $4 million. A few years ago we had a staff of 58. Now, they say they need 170. They do not need all those people.

Merchant Marine had $245,692; now, they have $1,700,400. That is seven times as much for the Merchant Marine.

The Rules Committee, back in 1973 and 1974 combined, both years combined, was $5,530. Now, they want $530,000 just for the year of 1981.

Science and Technology was $400,777; now they want $1,896,800.

The Ways and Means Committee was $124,568. Now it is $2,450,800. What is that, about 20 times as much?

As you go down the line on all these committees, you ask yourself this question: How can we call for less spending by people on food stamps, people who are handicapped, people interested in education, people interested in arts and humanities, how can we ask them to make sacrifices unless we provide an example right here in this House, where we should make real financial sacrifices?

So, the showdown vote is coming tomorrow. This vote tomorrow will be

this: Are we going to take the expenses that we had last year, and are we going to cut those expenses by 10 percent, because a 10-percent cut is a real cut? Will we cut the expenditures for committee staff by 10 percent when the issue comes to the floor tomorrow?

Mr. Speaker, tomorrow, we will see whether this House is serious about cutting waste in the Federal Government. The committee investigative budgets will be considered in one omnibus resolution by the full House of Representatives.

Tomorrow, we will be told by liberal Democrats that we are cutting the budgets of the committees. However, it is important that no one be deceived by cuts which are not real. The committees of the U.S. House of Representatives spent $39,971,551 in investigative expenditures in 1980. This amount was totally separate and in addition to the $24 million the committees were given in statutory funds. There will not be any true cuts in committee spending until the committee authorizations are held below the nearly $40 million in investigative expenditures in 1980.

It is important that we look at some specific examples of bloat that were included in those 1980 investigative expenditures. These facts should make it clear to all that substantial cuts can be made from 1980 expenditures.

My committee, Energy and Commerce, had almost three times the staff in 1980 that it had in 1973—146 compared with 56. Twenty-three of these employees were paid over $40,000 per year. The House Administration Committee recommended $4,043,722 for the Energy and Commerce Committee for 1981. This is almost $400,000 more than the committee spent in 1980.

The Ways and Means Committee spent $69,790 for investigative funding in 1973. Six years later, the expenditures were 25 times higher at $1,863,051. Last year expenditures by the committees increased again. It is difficult for me to believe that cuts in expenditures cannot be made from the Ways and Means Committee which paid 11 of its investigative employees salaries of better than $40,000 per year in 1980.

The Rules Committee spent $457,434 of its investigative budget in 1980. In 1973, the Rules Committee spent only $1,744 of its investigative budget. The Rules Committee's staff is six times as large as it was 6 years ago.

The Merchant Marine and Fisheries Committee is in a similar situation. It spent seven times as much in 1980 for its investigative staff as it did just 7 years ago. Last year, the investigative expenditures of the Merchant Marine and Fisheries Committee were more than double the expenditures of the Armed Services Committee which has jurisidiction over a tremendous share of the Federal budget.

These are just a few of the unnecessary expenditures that were made by certain House committees in 1980. Let no one misunderstand on which side of the aisle this waste exists. Eighty-five percent of the investigative staff positions are filled by Democrats.

Yet, the Democratic leadership has decided this year not to allow the full House to approve or disapprove of the budgets of each committee individually. We will be forced to consider all of the budgets together. Frugal committees will be lumped together with wasteful committees. Members who are opposed to wasteful Government spending will have one logical choice—vote against passage of the resolution funding the investigative budgets of all committees.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. COLLINS of Texas. I will be glad to yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I am glad I had an opportunity to get in on the gentleman's discussion, because I think he is making a very interesting point. The gentleman recognizes, does he not, that the Armed Services Committee, which is one of the most important committees in the House, as I am sure the gentleman will agree, has one of the smallest funding requests of any major committee? I hope he will bear that in mind in connection with his legislation.

Mr. COLLINS of Texas. I am glad the gentleman from New York spoke out, because, as Mr. STRATTON has so well expressed it, Armed Services is one of the great committees. It has been one of the most efficient committees we have in Congress. There were three that stood out. They were Armed Services, Veterans' Affairs, and the Committee on Standards of Official Conduct. Of all the committees, Armed Services stood out as the most efficient. In fact, on the Republican side of the aisle, when they are coming through with their recommittal motion tomorrow, they are recognizing that Armed Services should be raised. In other words, the 10-percent cut should not be across the board.

House Administration Committee has already cut its spending by 20 percent. There are a lot of others that should be cut. I think there are many that should be cut by 25 percent, but Armed Services deserves a raise. That is one of the best managed and most efficient committees in Congress.

Mr. STRATTON. I appreciate the gentleman's comments, and I do hope that the House will bear in mind that the Armed Services Committee is charged with the oversight of the budget of the Department of Defense, yet the House committee that oversees that department, with its massive expenditures, is itself living at a very austere and abstemious level.

Mr. COLLINS of Texas. The gentleman has done well to bring this out, because, of course, defense is one of our major congressional objectives for next year. The example, the way that the efficient administration of Armed Services here in the House is an example of how well we are going to see Defense carried forward for the Nation. Dollar for dollar, they have less committee staff in Armed Services than any branch of our congressional offices.

Mr. STRATTON. That is very true, and, as I say, I do appreciate the gentleman giving me an opportunity to make the point succinctly.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I would like to thank the gentleman for the work he has put into this and the figures he has put before us today in preparation for the important vote tomorrow. The symbolism of what the Congress does, as he says, is going to disclose a lot to the American people. I hope the Congress will back him all the way so that we can see some real cuts in staffing here, proving that the intent here in Congress is a serious one relative to Government spending.

I fear that those who like to talk about economy, when faced with their own committee operations here in the Congress may falter or may not accept the fine leadership the gentleman has suggested.

I appreciate very much the work Mr. FRENZEL, the gentleman from Minnesota, and Mr. BADHAM, the gentleman from California have put into this. It has been an extremely valuable contribution to good government.

Mr. COLLINS of Texas. I think the gentleman from New York (Mr. CONABLE), has taken the lead on the Republican side as our leader in working to have tax cuts for Americans. The way we are going to have tax cuts is when we cut expenses, then we in turn are going to be able to cut taxes. Everyone wants to see taxes reduced.

I want to add that Mr. BADHAM and Mr. FRENZEL have done a great, great piece of work on behalf of all of us in Congress in carrying this matter down to the wire. So, tomorrow when on the key vote, I hope everyone votes for the recommittal motion, which will mean that we will cut expenses, cut committee staff 10 percent below what was expended in 1980.

CAN AMERICAN INDUSTRY BE BORN AGAIN?

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

● Mr. REUSS. Mr. Speaker, I enclose the text of my remarks yesterday at the 100th anniversary of the Wharton School of Finance at the University of Pennsylvania, as part of their centennial on an industrial policy for America. The text of my remarks follows:

CAN AMERICAN INDUSTRY BE BORN AGAIN?

The Wharton School could hardly find a better theme on which to celebrate a hundred years of excellence than this—what kind of policy should we adopt toward American industry?

We have just passed through a decade of economic turmoil. We have not come close to solving our chief economic problems—high inflation, high unemployment, high interest rates. The rate of economic growth has slowed, and the rate of productivity growth has stopped. International economic competition has taken over a substantial portion of the American market for a wide range of industrial goods—from steel and autos to the newer high technology industries.

Many proposals to resuscitate American industry are on the table:

1. Backing losers—bailing out troubled firms or industries by government subsidies, refundable tax credits, orderly marketing agreements, renegotiated wage contracts, new federal banks.

2. Picking winners—selecting individual industries, firms, or product lines for a broad range of government support, as in Japan's effort to foresee world trends.

3. The Reagan program—tight money; a reduced federal sector by slashing spending; and massive cuts in marginal personal income tax rates heralded to encourage "work, savings, and investment."

4. The March 2, 1981, report of the Joint Economic Committee Democrats—building upon our earlier supply side work to develop a comprehensive strategy for investment and jobs.

Let us look at each of the four proposals:

1. BACKING LOSERS

Backing losers has been a popular governmental occupation.

Not all of the government's rescue attempts have ended in failure. The $250 million of loans guaranteed to Lockheed have been repaid, and the company survives. On a smaller scale, the Small Business Administration, the Economic Development Administration (EDA), and the Farmers Home Administration have given financial assistance to hundreds of struggling firms, most of which remain in business.

But too often the bail-out approach simply sends good money after bad. EDA guaranteed over $50 million of loans to Wisconsin Steel in 1979 to finance modernization and pollution control equipment at an aging Chicago plant. Within months a lengthy strike at International Harvester, Wisconsin Steel's largest customer, drove the company into bankruptcy.

EDA fared even worse on a series of loans it guaranteed to the Seatrain Shipbuilding Corporation for building large tankers in the old Brooklyn Navy Yard. As the cost overruns mounted, so did the infusions of guaranteed credit. By the time Seatrain had sold two tankers, the market had dried up. Seatrain finally filed for bankruptcy this February, leaving EDA with $60 million of debts.

And 15 months after the Congress bailed out Chrysler, the company is still teetering on the edge of collapse. The arguments that the bailout would save hundreds of thousands of jobs and billions of dollars in transfer payments were quickly proven false. Chrysler has had to close plants and fire more than half its 120,000 workers anyway. On top of a general slump, the combination of high car prices and high interest rates continue to undermine the company's recovery.

Already, Chrysler has used $1.2 billion of the $1.5 billion of federally-guaranteed credit. Its best hope of averting bankruptcy is to attract new equity through a merger or foreign joint venture. This could have happened without the taxpayers risking $1.5 billion to give the current management another chance. I reluctantly supported the Chrysler loan guarantees because they were the only game in town. A far more useful governmental role would have been to provide retraining and supportive services to workers displaced in a Chrysler reorganization.

These ad hoc governmental tinkerings would not, in my judgment, be much improved by regularizing them into a new Reconstruction Finance Corportion to salvage the losers. Advocates of an RFC hope to free it from the kinds of political pressure that dominated the debate on Chrysler. I'm not at all sure that transferring the decision-making power to an RFC would purge the process of the politics that polluted Wisconsin Steel and Seatrain. Worse, I fear that an RFC would only institutionalize the process of government bailouts, sink even greater resources into inefficient, non-competitive industries, and thus simply postpone the structural reforms that our economy needs.

2. PICKING WINNERS

Can our federal government do a better job than the market in deciding what products, firms, and industries will prosper in the future?

I doubt it.

The advocates of picking winners usually point to the industrial policies of foreign countries. But the record is not particularly encouraging. Despite the commitment of vast sums of money and a near monopoly of the government market, the British are still struggling to break into the world computer market. The Germans and French have been equally unsuccessful. In the case of Japan, the government favored some industries, and those industries have prospered. But so have a number of industries that were not the targets of government largesse.

Agriculture is the one area in which the United States government has played a broad-based role. Building on our rich base, the government influences everything from the course of agricultural research to the actual marketing of farm products overseas. It is the one area in which we have become most Japanese.

But we are ill-prepared by either our philosophy or our past to embark on a path of detailed intervention across the industrial spectrum.

Not that the government has not had a major impact on the nature and size of American industry. Major post-war expenditures on defense and space contributed a great deal to the evolution of the domestic aircraft and computer industries. Subsidies, tax benefits, and trade protection have benefited many industries.

But this military-space experience, where government is the market, has not prepared the government to judge the vagaries of changing technology or shifting markets. When it comes to picking private sector winners, humility becomes us.

3. THE REAGAN PLAN

Mainly, it proposes to increase saving and investment through a massive personal income tax cut, largely to the affluent. The beneficiaries of the tax cut, we are told, will not divert the cuts to inflationary personal expenditures, particularly of luxury imports. Nor will they use the proceeds to bid up the price of existing real estate, commodities and collectibles. Instead, the tax cut will somehow be channeled into the productivity-enhancing inflation-fighting new plant and equipment that we clearly need.

Let us give the proposal the benefit of an enormous doubt. Let us assume that it will by itself bring about large-scale new business fixed investment.

We still have to ask two questions.

First, why will not the high interest rates resulting from the President's and the Federal Reserve's restrictive monetary policy, and from the continued budget deficit, in large part undo the pro-investment effect of the income tax cut?

Second, can hyped-up business fixed investment succeed unless it is accompanied by those very structural programs—a good infrastructure, training for real jobs, support for research and development—that the Reagan budget would weaken?

The Reagan program, then, makes contact with the problem of reindustrialization in only the most preliminary way.

4. A COMPREHENSIVE STRATEGY FOR INVESTMENT AND JOBS

This brings us to the last, best hope of earth—the strategy for industrial regeneration of the Joint Economic Committee Democrats. This strategy moves us away from an exclusive focus on any one element of the economy. Even something as vital as new plant and equipment is only part of the picture. After all, the lastest robot is only as good as the trained programmer hired to run it. What is needed is a many-sided approach:

a. New plant and equipment

Our need for new capital has been rising.

America's capital stock has been growing older. Almost half our industrial plant and equipment was built before the oil shock in 1973, and much of the rest was designed on the assumption of cheap, abundant oil.

Moreover, the labor force has grown rapidly as the baby boom came of working age and more women entered the labor market. With more workers, we need more and better machines if economic opportunity is to be open to all.

And growing international competition has forced many domestic industries to run faster if they want to continue to run at all—and that often means more or better or newer capital equipment.

Despite the evident need, we actually invested a smaller proportion of our national income in the 1970's than we did in earlier decades. It is no wonder that our productivity performance has been so poor.

In the recent 1981 annual report, Democrats and Republicans alike urge that firms be allowed to depreciate their equipment more rapidly. In my view, such a true supply-side measure is needed today, not in the sweet bye-and-bye when Congress can make up its mind on the cosmic implications of Kemp-Roth.

b. Research and development

We should be equally concerned about the current trend in our commitment to re-

search and development. Working smarter, bringing new products and processes to the world market are crucial elements in maintaining the competitive strength of the American economy.

And, again, the key word is comprehensive. We need to maintain the public commitment to funding basic research and updating the quality of our research facilities. The recently established industry technology centers in the Department of Commerce can help focus the efforts of academic researchers on the particular challenges facing American industry.

And the challenge is there. For many years we led the industrial world in the share of national income devoted to commercial research and development. That has changed. Germany and Japan now devote a higher percentage of their total resources to research and development than we do and France and Britain are not far behind.

The Administration's program does take one small step in the right direction by allowing research equipment to depreciate over three years, with a 6 percent investment tax credit.

R & D, both public and private, need far greater support.

c. Developing new markets

A comprehensive approach to investment and jobs is the key element in an effective U.S. international trade policy. New factories will help meet foreign competition; new products will bring new customers to our door.

In a competitive era, we will have to do more. We need to take our better mousetraps to the world's door and make sure that door is open to American products. We have a definite interest in the economic health of our trading partners. Slow growth in Europe or the developing world will have a severe effect on U.S. exports.

d. Infrastructure

Our industrial development depends on an adequate and properly maintained infrastructure—including roads, bridges, railroads, ports, sewer and water systems, utilities, and other physical support systems. It has been allowed to deteriorate, particularly in our older cities. One in five American bridges should be replaced, and more than half of the nation's roads require major repairs. The future costs of water and sewage treatment are astronomical.

Despite the urgency of the needs, state and local governments have reduced their investment in infrastructure over the last decade. Financially strapped cities have increasingly chosen to delay new construction or repairs on existing facilities.

Before the accumulated effects of such postponements overwhelm us, we must strengthen the ability of state and local governments to respond to their infrastructure needs. Your ideas for encouraging such investments could be of great value to us.

e. Human resources

Similarly, investment in human resources must be a central focus of a comprehensive investment strategy. Millions of potential workers now fail to find stable employment in the private sector. Some lack the most basic educational skills. Others, the victims of poverty and discrimination, are trapped in decaying inner cities. The available jobs are usually temporary, low-paying, and dead-end, and too often unlikely to offer a better standard of living than welfare.

We cannot rely on general economic improvement to remedy this underinvestment in human beings. We will need a combination of measures that upgrade workers' skills, provide relevant training, and lead to permanent jobs at reasonable wages.

This should not entail a proliferation of new government programs—or the steadfast retention of all existing ones. The poor track record of some CETA programs should prompt a search for better alternatives, that result in lasting gains in employment and earnings. A well-run public employment program could provide useful public services and worthwhile job experience for the hard-to-employ.

We lack effective methods of tapping the resources of private industry for our human investment programs. The current employment tax credit program is poorly designed, and few employers have bothered to use it. But surely, as part of an investment-oriented tax cut, we can look for ways to strengthen financial incentives for employment and training.

The current attack on the Trade Adjustment Assistance program should encourage us to consider more general ways to deal with worker dislocation, whether caused by trade or technological change. Instead of concentrating on income maintenance, such a program should explicitly encourage training or other actions that improve employability. We will need to experiment with different combinations of services, to learn just what government can do to smooth the adjustment process for workers. But the case for government involvement is a strong one. Good adjustment programs will reduce the pressures for ill-fated rescues of "losing" industries.

f. Labor-management-Government cooperation

The comprehensive approach I have outlined—combining investment in plant and equipment, research and development, public infrastructure, and human resources—should form the basis for a rational industrial policy.

In each of these areas, attention should be given to the special needs of the small business sector, typically the source of our most innovative and most rapidly growing industries.

The inner city ventures of the Control Data Corporation, for example, illustrate one promising way of making urban areas commercially attractive to small business. The company has enlisted public and private backing for its projects to establish business development centers in low-income neighborhoods. The centers provide training, computer, and mailing services, and other shared facilities that new businesses need but often cannot afford on their own.

When tried in St. Paul, Minnesota, such a center attracted dozens of new businesses which proceeded to grow rapidly. By addressing the specific impediments to small business growth, such public/private activities will accomplish much more than broad tax breaks intended to lure firms to economically distressed areas.

Government should be facilitating cooperative efforts by business and labor to improve productivity and foster industrial development. In scores of plants, labor-management committees have worked out solutions to specific industrial problems outside the scope of collective bargaining. Some of the more ambitious initiatives produced new training programs to alleviate skill bottlenecks; others led to the design of more efficient production processes. In local communities such as Jamestown, New York, joint committees have encouraged these activities at the plant level and greatly strengthened labor-management relations. With modest government resources, we can assist a variety of labor-management initiatives and increase awareness of their achievements.

We of the Joint Economic Committee intend to pursue a Comprehensive Strategy for Investment and Jobs. This Symposium will advance our thinking, and contribute useful ideas to the endeavor. I look forward to learning from you.●

NATIONAL EFFORT TO COMBAT DRUNK DRIVING—PART I

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BARNES), is recognized for 5 minutes.

● Mr. BARNES. Mr. Speaker, on March 12 I was joined by 24 distinguished colleagues in introducing H.R. 2488, a bill calling for firm action in confronting our No. 1 highway safety problem—drunk driving.

Drunk driving is a national epidemic which kills nearly 70 persons every day in the United States. Nearly 26,000 Americans are killed and more than 1 million crippled or seriously injured in drunk driving incidents every year. The economic cost created by the drinking driver surpasses $5 million annually.

On March 9, Rhode Island Senator CLAIBORNE PELL and I held a news conference to expose the drunk driving epidemic which poses one of the greatest threats to our children. Senator PELL, who has championed action against drunk driving for several years, introduced S. 671, legislation identical to H.R. 2488, with cosponsors Senators GLENN, GOLDWATER, and HUDDLESTON.

Also participating in our news conference were several cosponsors of H.R. 2488 and victims of drunk drivers, including the national officers of MADD—Mothers Against Drunk Drivers—founder and President Candi Lightner of California and Vice President Cindi Lamb of Maryland. Representatives of State Governors' task forces on drunk driving and from the medical profession appeared to urge passage of legislation to bring to a halt these senseless tragedies on the Nation's highways.

The Pell-Barnes legislation would combat drunk driving by encouraging the States to set mandatory minimum standards to deter drunk driving and to punish and rehabilitate violators.

Mr. Speaker, I submit for the RECORD a copy of H.R. 2488, the statements at the news conference of Senator PELL and myself, and subsequent news articles from Newsday, Long Island, N.Y., and the Montgomery Journal, Chevy Chase, Md.:

H.R. 2488

A bill to amend section 402 of title 23, United States Code, relating to establishment by each State of comprehensive alcohol-traffic safety programs as a part of its highway safety program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 402(b)(1) of title 23, United States Code, is amended by adding at the end thereof the following new subparagraph:

"(H) provide for comprehensive alcohol-traffic safety programs to reduce the incidence of driving while under the influence of alcohol, including (i) mandatory enforcement programs which require, at a minimum, that any person found to be driving a motor vehicle on a public highway when the percentage of alcohol by weight in the blood of such person is 0.10 per centum or higher shall be deemed to be driving while under the influence of alcohol for purposes of such programs and that any person convicted of driving while under the influence of alcohol (I) perform not less than ten days of community service and, in the case of a person convicted of driving while under the influence of alcohol more than once in any five-year period, such person be imprisoned for not less than ten days for each such conviction after the first, (II) participate in a traffic safety or alcohol treatment program, and (III) have his license or privilege to operate a motor vehicle suspended or revoked for not less than one year, except that, in the case of a first offender who needs such license or privilege for work-related or other essential purposes, the license or privilege of such offender may be restricted for not less than one year in lieu of such suspension or revocation, (ii) alcohol treatment programs, (iii) traffic safety programs, (iv) a driver record system which identifies repeat offenders and is readily accessible to the courts in such State, and (v) monitoring programs to assure compliance with court ordered imprisonment and community service.".

SEC. 2. The amendment made by the first section of this Act shall become effective the day after the last day of the two-year period beginning on the date of enactment of this Act.

STATEMENT BY SENATOR CLAIBORNE PELL

We are here this afternoon to launch a campaign against America's number one highway safety problem—the drunk driver—who represents a threat to every one of us. It is easy to dismiss this as a problem that has little relevance in our daily lives, until you take a look at the odds that a drunken driver will directly affect your life or the life of a member of your family.

Studies by the Department of Transportation have shown that, in some cities, as many as one out of every ten drivers on the road on a typical Friday or Saturday night is legally drunk. In fact, of the next 100 persons born in the United States, one of them can expect to die in a traffic accident caused by a drunk driver—unless we act to prevent it.

These statistics are difficult to comprehend both in sheer volume and in the actual misery they represent. The experiences of those whose lives have been touched by the drunken driver is even more shocking.

With us this afternoon to tell of her experience is one of the many victims of drunk driver accidents, as well as several people who have lost loved ones to these largely unpunished criminals.

Like most people, I gave little thought to this problem. Then, in the space of just 18 months, two of my valued aides were killed in separate accidents due to the actions of drunken drivers.

On November 16, 1974, Elizabeth Powell of my staff was slaughtered by a man whose car went out of control, crossed a median strip and struck the automobile in which she was riding. The man had been drinking. Elizabeth was killed instantly. After several delays in the case, the man who struck Elizabeth pleaded guilty to the charge of Manslaughter by Automobile, and he received a one year suspended jail sentence.

On September 27, 1975, Stephen Wexler, the Chief Counsel to the Senate Education Subcommittee and my close friend and associate for ten years, was struck down by a drunk driver who was drag racing with another car. Steve left a young widow and an infant son. The driver of the car that hit Steve was charged with drunk driving, and both he and the driver of the other vehicle were charged with Manslaughter by Automobile. Again, after innumerable delays, both drivers were convicted of Manslaughter and received suspended sentences.

Both accidents were well publicized, and—just as when any accident occurs involving drinking and the loss of young lives—there was a sense of outrage and, on the part of some, a call for swifter, stronger penalties. But all too often, except for the immediate families and friends of those killed, the image of the tragic accident fades quickly, along with the recognition that our laws must be changed.

I believe the federal government is not powerless to attack the drunk driver problem. The legislation which Congressman Barnes and I will introduce will establish a strong national deterrent which will ensure that drunken drivers in all states receive both punishment and rehabilitation. Our bill will replace the currently uncertain and infrequent system of punishing drunk drivers. Using a combination of weapons—jail sentences, community service, rehabilitation, improved record keeping and revocation of driving licenses—it will set a uniform minimum standard for all of the states.

Our bill, of course, is just a part of the larger efforts which must be made at all levels of government. Local legislation, improved public education campaigns, and better targeted efforts to rehabilitate the alcoholic driver are essential. But these alone will not be nearly enough unless the Congress sends a strong and clear signal to every courthouse in America—let's get serious about the drunk driver problem."

STATEMENT OF CONGRESSMAN MICHAEL D. BARNES, LEGISLATION CONFRONTS THE NATIONAL DRUNK DRIVING EPIDEMIC, MARCH 9, 1981

Thank you Senator Pell for your very precise account of this terrible and needless tragedy caused by drunk drivers. All of us concerned about resolving this national crisis appreciate your tremendous leadership.

West Virginia Governor Jay Rockefeller will not be able to be with us this afternoon due to prior commitment. However, in his own state he recently set up a statewide task force to combat on the state level the problem we are addressing here today.

I introduced legislation identical to Senator Pell's late in the 96th Congress when I first learned in detail from victims, like the national leaders of "Mothers Against Drunk Drivers" who are with us today, just how serious a threat drunk drivers pose to the health and safety of citizens on the nation's highways. As Senator Pell pointed out, statistics clearly indicate that none of us are immune from this threat to life and health.

Nearly 70 Americans died in alcohol-related auto crashes yesterday. Nearly 70 more citizens will be killed in drunk driving incidents today. Nearly 70 more unsuspecting persons will be killed in the United States due to the thoughtless drinking driver tomorrow. More than one quarter of a million Americans have been killed in drunk driving incidents over the past decade, averaging about 26,000 lives and the million crippling and other serious injuries every year. There is no greater threat to the lives of our children than that posed by the drinking driver. The economic hardships created by drunk drivers every year in the United States, according to the most conservative estimates, surpasses an astounding $5 billion. Clearly, every American is threatened by drunk drivers every day. The human suffering hidden so well behind these statistics can never be measured. This national epidemic will continue unabated unless there is responsible and reasonable action to confront the drinking driver problem—the nation's number one highway safety problem.

As a parent, a citizen, and a member of Congress, I refuse to stand by and allow this holocaust on our highways to continue. In the District I represent in Congress, Montgomery County, Maryland, we have more than 45,000 problem drinkers. The threat of the drinking driver is one of the most pressing problems in my community. I have literally heard from thousands of my constituents who support federal action to shut off this very real threat. This problem is a critical issue in my state of Maryland. A recent study by the Maryland State Police, submitted to Governor Hughes' special task force on drunk driving, indicates that in 1978 deaths to drivers of motor vehicles accounted for 52 percent of all fatalities. Some 50 percent of all drivers killed were found to have been intoxicated at the time of death. But, most striking is that of those drivers killed, a drinking driver was found to have been at fault in 90 percent of the cases. Obviously, the drunk driving problem is not confined to my community or state. Drunk drivers destroy lives and limbs in every community across the nation. I am convinced that citizens nationwide want action to stop this neglected national disgrace.

We are here today, Republicans and Democrats alike, to offer an answer to concerned citizens who ask how long this carnage on our highways must continue. Our legislation confronts the national drunk driving problem by offering a strong, uniform deterrent to help assure that drunk drivers are treated stringently in every state. We are encouraging states to set up comprehensive alcohol-traffic safety programs, in close cooperation with the local communities, to deter drunk driving and to punish and rehabilitate those who continue to drink and drive. Our legislation includes mandatory minimum standards, such as a ten-days' loss of freedom for anyone convicted of drunk driving, and participation in alcohol treatment or traffic safety programs. Our legislation also calls for the automatic suspension of the driving privilege, and a statewide record-keeping system to track repeat offenders. Our legislation provides one of the most important answers to my state's drunk driving problem, that is the legal definition of driving while intoxicated. One provision calls on Maryland and

Mississippi, the only two states allowing a blood-alcohol concentration level more lenient than .10 percent, to come into line with the rest of the nation by defining intoxication at a BAC level no higher than .10 percent.

Let it be understood that this legislation does not create a new federal program, or involve appropriations of new federal funds. But, our legislation would encourage each state to take firm action, or risk losing its share of federal highway safety funds. Our intent is to encourage uniform standards, but leave the states with enough flexibility to adjust to diverse local circumstances.

From my own experience as a graduate student studying in Switzerland, tough laws, stringent enforcement, and effective public information campaigns work. We understood that you just did not drink and drive. Our legislation seeks to create that same attitude in the United States.

I am fully aware that this effort at the federal level alone will not turn the tide against the national drunk driving epidemic. I heartily endorse and encourage the ceaseless efforts of citizens groups like "Mothers Against Drunk Drivers" to confront this issue in every community in the nation. I support the initiatives of states like Maryland, New York, California, and most recently in West Virginia, where statewide task forces have organized to focus on the state's specific drunk driving problems and to design workable solutions to those deficiencies. Our legislation is not a panacea for a problem that our society has allowed to continue and worsen. I am convinced, however, that with passage of this legislation, action by state legislatures to adopt it, and cooperation of the nation's lawmakers, law enforcers, judges, prosecutors, citizens groups and the public generally, we will be able to create significant changes to save lives and reduce crippling injuries.

Today, we are calling on the Congress to take a serious and hard look at this national problem. We are calling on the Congress to hold public hearings to further explore this most complex, life threatening problem. Thank you.

[From Newsday, Mar. 10, 1981]

BILL TOUGHENS U.S. STANCE ON DRUNK DRIVERS

(By Myron S. Waldman)

WASHINGTON—The state senator from New York whose daughter had been killed was there. The woman from Lincoln, Calif., whose two daughters and two nieces had been killed was there. The school teacher from Waldorf, Md., who is paralyzed from the chest down was there.

They and others whose lives have been radically affected by drunk drivers were in the big room in the Capitol to hear Sen. Claiborne Pell (D-R.I.) and Rep. Mike Barnes (D-Md.) announce the introduction of a bill calling for mandatory jail terms, fines and the creation of alcohol-treatment programs for drunk drivers. The measure is to be introduced in both houses, probably this week.

"Nearly 70 Americans died in alcohol-related auto crashes yesterday," Barnes told a news conference. "Nearly 70 more citizens will be killed in drunk-driving incidents today. More than one quarter of a million Americans have been killed in drunk-driving incidents over the past decade, averaging more than 26,000 lives and one million cripplings and other serious injuries every year." His statistics came from the National Highway Traffic Safety Administration and National Safety Council.

For Pell, there were personal reasons behind his sponsorship in the Senate. "On Nov. 16, 1974, Elizabeth Powell of my staff was slaughtered by a man whose car went out of control," he said. "The man had been drinking . . . [He] pleaded guilty to the charge of manslaughter by automobile and he received a one-year suspended jail sentence.

"On Sept. 27, 1975, Steve Wexler, a friend and the chief counsel to the Senate Education subcommittee, was struck down by a drunk driver who was drag racing with another car . . . Both drivers were convicted of manslaughter and received suspended sentences."

Sentences such as these are not enough to deter drunk driving, according to Barnes, Pell and a half-dozen Republican and Democratic cosponsors. The bill calls for a mandatory 10 days of community service plus fines for first offenders and, for repeat offenders, at least 10 days' imprisonment plus fines. Both first offenders and repeaters would have their drivers' licenses suspended for at least one year.

The bill also calls for a uniform intoxication standard of .1 percent alcohol in the blood, improved records to track offenders and a variety of education and enforcement procedures.

States would not be required to enact laws to implement the standards. However, the Department of Transportation could withhold a state's share of the $200 million of federal highway safety funds if it did not comply.

Barnes and Pell had introduced the legislation last year. A Senate subcommittee held hearings, but the bill never even got a hearing in the House. This year, spokesmen for the House Public Works and Transportation Committee said it would be studied carefully.

State Sen. William T. Smith (R-Big Flats), who has been active in combatting drunk driving since his daughter, Judith Kelemer, 27, was killed, said that at least some of the bill's proposals are in effect in New York, but that state law is easier on first offenders. A big problem in New York, Smith said, is enforcement of the statutes now on the books.

Also making statements supporting the legislation were members of Mothers Against Drunk Drivers (MADD), including Pat Owen of Lincoln, Calif., who was near tears as she told of the deaths of her two teenage daughters, two nieces and the paralysis of a third niece as the result of a hit-and-run accident involving an alleged drunk driver.

And Dr. Henry Betts, medical director of the Rehabilitation Institute of Chicago, recalled the "national hysteria" when 300 people died every year from polio. When 26,000 die annually from drunken driving, he said, "it is an epidemic."

[From the Montgomery Journal, Mar. 11, 1981]

VICTIMS OF DRUNKS TELL OF ORDEALS

(By Mike M. Ahlers)

Marion Puryear is one in a million.

That is roughly the number of persons injured every year in accidents involving drinking drivers. Another 26,000 people die every year as a result of drunk driver incidents.

But it wasn't statistics that prompted the Waldorf resident, crippled in a 1978 car wreck, to appear before a news conference held Monday by Montgomery County Rep. Michael Barnes (D-Md.) on proposed reform of drunk driver laws. It was a desire to tell the story behind the statistics.

"No one can really understand this kind of tragic impact on an individual and a family unless they experience it," she said as she sat in her wheelchair before half a dozen TV cameras.

"For three months I was in traction with a metal band screwed into my skull and weights hanging from the back of my head—totally immobile. My privacy was gone. Someone else had to take care of my entire body and its functions," she said.

"This still continues to this day. For five more months (after getting out of traction) I began the agony of trying to make a paralyzed body move. This has been the hardest, most depressing experience I have ever had to endure."

"My teenaged children were in a state of shock," she said. "My husband suddenly had to become all things to us. It was overpowering, far beyond human endurance."

Puryear's experience was but one of a dozen highlighted at the press conference. There was Cindi Lamb, a 24-year-old Mt. Airy, Md., woman whose five-month-old baby became a quadruplegic after she was hit by a drunk driver with 35 prior traffic violations, including three arrests for drunk driving.

And there was Candy Lightner, a California resident whose 13-year-old daughter Cari was struck down and killed by a repeat offender drunk driver while she was walking to church one Saturday afternoon. Lightner is founder and president of Mother's Against Drunk Drivers (MADD), the organization largely responsible for the push to stiffen drunk driving laws nationally and locally.

Locally, state legislators have introduced more than 100 bills in Annapolis aimed at drunk drivers. Nationally, a bill co-sponsored by Sen. Claiborne Pell (D-R.I.) and Barnes would require that states set minimum fines and penalties for drunk drivers as a condition of receiving federal highway safety funds.

The law was first introduced last October—too late in the session to hold public hearings, according to congressional aides. Monday, accompanied by support from a number of professional and social organizations, it was re-introduced.

Under the proposed law, first offenders would face a mandatory minimum sentence of 10 days of community service in addition to fines and participation in an alcohol treatment or highway safety program. First offenders would also stand to lose their licenses for up to one year.

Repeat offenders would be given a mandatory sentence of at least 10 days in addition to treatment or safety schooling. They would also lose their licenses for at least one year.

The proposed law would require states to keep records enabling them to easily identify repeat offenders. And states would be required to adopt a .10 blood-alcohol concentration as their legal standard for drunkenness.

Among the states that would be effected by the latter requirement is Maryland, which currently has a .15 blood-alcohol level for intoxication and a .10 level for driving while impaired.

Ironically, the number of deaths per 100 million miles traveled on Maryland highways is among the lowest in the nation, ac-

cording to William Bricker, administrator of the state's Department of Motor Vehicles.

"Our studies indicated that while the state laws of other jurisdictions give the impression of toughness, the application of those laws fall dismally short and are frequently subverted by plea bargaining and other evasive tactics that ultimately fail to identify and deal with the drinking driver," he said.●

SPECIAL USE VALUATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, today I am introducing legislation which is intended to make clear to the Internal Revenue Service that when the Congress states something in the laws it enacts, it means it.

I think that the IRS has to be made to understand that the Congress expects it to make an earnest attempt to determine and follow congressional intent on a particular measure, as expressed in the legislative history of the law and the law itself, rather than try to find a means of ignoring the will of the Congress.

My bill is the result of the interpretation which the IRS gave to the so-called special use valuation provision of section 2032A of the Internal Revenue Code, enacted with passage of the Tax Reform Act of 976, Public Law 96-455. Briefly, the relevant portion of section 2032A provides for a farm or business to be valued for estate tax purposes at its productive value, rather than its fair market value, if the farm or business is inherited by a relative of the deceased and maintained as an active family operation by the heir.

Section 2032A says, in part, that family farms and businesses may qualify for the special use valuation if, in 5 out of the 8 years preceding the decedent's death, "there was material participation by the decedent or a member of the decedent's family in the operation of the farm or other business." Certainly there is little ambiguity in this language.

In the "General Explanation of the Tax Reform Act of 1976," prepared by the staff of the Joint Committee on Taxation, the following passage is found:

Qualifying real property.—Real property may qualify for special use valuation if it is located in the United States and if it is devoted to either (1) use as a farm for farming purposes or (2) use in a trade or business other than farming. In the case of either of these qualifying uses, the Congress intended that there be a trade or business use. The mere passive rental of property will not qualify. However, where a related party leases the property and conducts farming or other business activities on the property, the real property may qualify for special use valuation. For example, if A, the decedent, owned real property which he leased for use as a farm to the ABC partnership in which he and his sons B and C each has a one-third interest in profits and capital, the real property could qualify for special use valuation. However, if the property is used in a trade or business in which neither the decedent nor a member of his family materially participates, the property would not qualify.

The Internal Revenue Service, in regulations it issued subsequent to enactment of section 2032A, stated that, for purposes of determining which types of property qualified for the special use valuation, "the mere passive rental of property will not qualify. The decedent must own an equity interest in the operation." Period. The IRS failed to notice, or chose to ignore, not only the language of the law mentioned earlier, but also the Joint Committee's explanation, cited above, where it is stated, quite explicitly, that:

Where a related party leases the property and conducts farming or other business activities on the property, the real property may qualify for special use valuation.

It is common for retired farmers in my district, or their widows, to cash rent their farms to their children, who then actively continue to operate the family farm. It is also very common for retired farmers in northwest Iowa, as elsewhere, I would presume, to enter into crop share agreements with their children in which the retired farmer receives a portion of the crop raised on the farm as payment for the rental of the land.

The practical effect of the IRS's interpretation of section 2032A is to say that those who had cash rented their farms to their heirs will not qualify for the special estate tax reduction, while those who had crop share arrangements with their heirs do get the break. Certainly the Congress never intended for this distinction to be made.

My bill would simply clarify what the IRS should have known from even a cursory, but objective review of the legislative history of the special use valuation provision. Estates that otherwise qualify for the special use valuation would receive an estate tax reduction, regardless of whether the deceased had rented the farm to an heir on a cash or crop share basis.

Mr. Speaker, the Internal Revenue Service's whimsical interpretation of section 2032A is exactly the sort of bureaucratic boldness that gives credence to the argument that the Congress should have the authority to veto every regulation that comes out of the executive branch. I think it is time that the Congress put the IRS on notice that it is not going to be allowed the discretion to subject every tax law approved by the Congress to its own highly subjective interpretation.

I am confident that my colleagues will join me on this particular matter in reaffirming not only congressional support for family farms and businesses, but also the desire on the part of Congress to have its laws subjected to a literal interpretation.

H.R. 2783

A bill to clarify the application of section 2032A of the Internal Revenue Code of 1954 with respect to qualification of certain property for valuation based on use, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TREATMENT OF MATERIAL PARTICIPATION BY FAMILY MEMBER ON AVAILABILITY OF VALUATION BASED ON USE OF CERTAIN FARM, ETC., REAL PROPERTY.

(a) IN GENERAL.—Nothing in section 2032A of the Internal Revenue Code of 1954 (relating to valuation of certain farm, etc., real property) shall be construed—

(1) to prevent otherwise qualified real property from being treated as qualified real property by reason of the rental of such property by the decedent to a member of decedent's family; or

(2) to require an additional tax to be imposed under subsection (c) of such section by reason of the rental of such property by a qualified heir to a member of the qualified heir's family.

(b) MEANING OF TERMS.—Terms used in this section shall have the same meaning as when used in section 2032A of the Internal Revenue Code of 1954.

(c) EFFECTIVE DATE.—The provisions of this section shall apply to the estates of decedents dying after December 31, 1976.

SEC. 2. REQUIREMENT OF MATERIAL PARTICIPATION BY DECEDENT.

(a) GENERAL RULE.—Subsection (e) of section 2032A of such Code is amended by adding at the end thereof the following new paragraph:

"(12) MATERIAL PARTICIPATION BY DECEDENT REQUIRED.—Real property which meets the conditions of subsection (b)(1)(C)(ii) on the basis of material participation by a member of the decedent's family shall be treated as qualified real property only if during any 8-year period ending on or before the date of the decedent's death there have been periods aggregating 5 years or more during which there was material participation by the decedent or the decedent's spouse in the operation of such farm or other business."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to the estates of decedents dying after the date of the enactment of this Act.●

1980 ELECTION NOT A MANDATE FOR DESTRUCTION

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, we continually hear the refrain from the President and his supporters that the 1980 election was a mandate to adopt the President's budget recommendations. Of course, it was no such thing.

Mr. Reagan won the election with only 51.6 percent of the vote. Undoubtedly, there was a large element of protest against inflation, unemployment, and what the public perceived

as weakness and vacillation in foreign affairs. If the election meant anything it was that Carter lost, not that Reagan won.

In a recent article by Richard Cohen, the Washington Post columnist, reprinted in the Akron Beacon Journal of March 17, Mr. Cohen notes this fact and states that while he did not vote for Jimmy Carter, what he voted for was a change—not a revolution. Mr. Cohen asks those who voted for Mr. Reagan if they really intended to vote to reduce food stamps, end legal services for the poor, make an uproar about El Salvador, vote for bloc grants to the States so that they could do as they please with Federal money, cripple national public radio, and so forth.

He points out, for example, that the proposal to end Federal funding of legal services for the poor is not a budget decision, it is a policy decision. He notes that it is wrong to tell poor people that because of their poverty that they have less rights and that these were not the sort of issues that were presented to us in the election.

Mr. Speaker, people are calling and writing my office with increasing frequency stating, in substance, that they would not have voted for Mr. Reagan if they had known that he was going to support some of the changes that he is now promoting. I must say that, if one looked at Mr. Reagan's pronouncements, before and during the campaign, it was fairly clear what his philosophy was and what kind of priorities he espoused. As one who differed with his priorities and believed in the social goals of the National Democratic Party, I did my best to point out to the voters last fall the implications of a Reagan Presidency. Perhaps that is one reason why Mr. Reagan did not carry my congressional district. However, it is now quite clear that not everyone was listening, either to Mr. Reagan or the Democrats.

Mr. Speaker, there are some in our party who have been so shocked by the last election and the public support for Mr. Reagan's general budget cutting goals that they are prepared to go along with his specific revisions. I do not think that this will turn out to be as politically expedient as it may appear at present. More important, I think such an approach would be an abdication of responsibility to the American people.

The elections were clearly a mandate to curb runaway Government spending and to get inflation under control. They were not a mandate to wipe out 30 years of major social and environmental legislation in 3 days, as Senator MOYNIHAN has so aptly put it.

Our colleague, DON PEASE has shown by his statesmanlike alternative budget proposal that it is possible to preserve basic programs, build up our military defenses, revitalize American industry and go the President one better by actually producing a balanced budget in fiscal year 1982. While I would not presume to say that his approach is the only feasible one, he has shown that it can be done.

As the House Budget Committees and Appropriation Committees begin their deliberations, I trust that our colleagues are not going to abdicate to the OMB and are going to undertake the difficult task of sifting through the tremendous mass of programs and activities supported by Federal funds and continue adequate support for those which serve basic human needs and important national goals.

Mr. Speaker, the full text of the Richard Cohen article follows these remarks:

WAS NOVEMBER ELECTION FOR CHANGE OR OVERHAUL?

(By Richard Cohen)

WASHINGTON.—Excuse me and pardon me, but I have something to ask you. Did you vote for what's happening?

Did you vote to reduce food stamps, make it rougher on poor people and even get rid of the 108-year-old national aquarium?

Did you, when you voted for Ronald Reagan, have in mind making a big todo about El Salvador and did you think that we had to dump a whole ton of money into the Defense Department so that we will spend $55 million on military bands but nothing for legal services for the poor?

Did you vote for block grants to the states so that they could do with federal money (not state money) pretty much what they want? Was it your intention when you went into the voting booth to eliminate the tiny national water project which costs $1.5 million a year and which helps local governments with their water and sewer problems? How about National Public Radio? Did you think you were voting against it?

I know I didn't vote for any of this. I didn't vote for Jimmy Carter, either, but what I voted for was a change—not a revolution. I voted for a bit more backbone in our foreign policy and maybe a little toughness in the budgeting process.

I wanted someone to get hold of the economy and do something about inflation. If that meant making some hard decisions, that was fine with me. But I did not vote against poor people and I did not vote to repeal the lessons we learned in blood in Vietnam.

I think I was typical. After all, for all the talk about a Reagan landslide, he only won with 51.6 percent of the vote—hardly the groundswell it is now made out to have been. If there was a statement in those results it was that Carter lost, not that Reagan won—certainly not that he won big and certainly not that he won with a mandate to fundamentally change the relationship of the government to the people.

What was expected was some minor changes, some tinkering, less liberalism, maybe, but not a crash course in conservatism. You knew with Reagan that there would be less government but not, I think, less heart.

But the decision to end federal funding of legal services for the poor is not a budget decision. It is a policy decision. Sure, legal services cost money. So does trial by jury. Legal services cost, in fact, $300 million a year, and while that's not peanuts, it is not what is known in Washington as Big Bucks.

Money, though, is not the issue. You don't scrimp on basic rights. You don't tell one segment of society that the government cannot afford to protect its rights. You don't tell poor people that, because of poverty, they have less rights. These were not the sort of issues that were before us in the election. For that, the press must take some blame. In two highly touted debates—one with John Anderson, the other with Jimmy Carter—Ronald Reagan was not asked a single question about either legal services or food stamps or, in specifics, how he was going to reduce the welfare burden.

Always, the assumption seemed to be that Reagan accepted the premise of the New Deal and the era of social legislation that followed and that his differences with Carter were only of shading, emphasis—a dollar here, a dollar there. Even when the press got specific, Reagan responded with bromides and anecdotes.

If you are one of the people who saw through that, who knew all along what Ronald Reagan intended, then the morning papers must bring good news indeed. But for a whole lot of us, we pick it up, scan the headlines, scratch our heads and ask, "Did we vote for this?"

The answer is no. But the question no longer matters.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YOUNG of Alaska (at the request of Mr. MICHEL) for the balance of the week on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DE LUGO) to revise and extend their remarks and include extraneous material:)

Mr. REUSS, for 5 minutes, today.

Mr. BARNES, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. WEISS, for 60 minutes, on March 26.

Mr. BEDELL (at the request of Mr. DANIELSON) for 5 minutes today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. FIELDS), and to include extraneous material:)

Mr. FORSYTHE.

Mr. PHILIP M. CRANE.

Mr. GILMAN.

Mr. CORCORAN.

Mr. FINDLEY.

Mr. DORNAN.

Mr. ARCHER.

Mr. GREEN.

Mr. EMERY in two instances.
Mr. GUNDERSON in two instances.
Mr. BETHUNE.
Mr. DERWINSKI.
Mr. FRENZEL.
Mr. WORTLEY in two instances.

(The following Members (at the request of Mr. DE LUGO) and to include extraneous matter:)

Ms. MIKULSKI.
Mr. WOLPE in two instances.
Mr. RICHMOND.
Mr. ZABLOCKI.
Mr. FAZIO in two instances.
Mr. FRANK.
Mr. ROE.
Mr. MAZZOLI in two instances.
Mr. REUSS.
Mr. KILDEE.
Mr. MATTOX.
Mr. GUARINI.
Mr. WAXMAN.
Mr. STARK.
Mr. MOAKLEY.
Mr. WEISS.
Mr. HOWARD.
Mr. HUBBARD.
Mr. AUCOIN.

ADJOURNMENT

Mr. DANIELSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 55 minutes p.m.), under its previous order, the House adjourned until Wednesday, March 25, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

876. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 110(b) of the Agricultural Act of 1949 to eliminate the requirement that the Secretary of Agriculture waive interest on loans made on 1980 and 1981 crops of wheat and feed grains placed in the farmer-held grain reserve program; to the Committee on Agriculture.

877. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting the annual report for calendar year 1980 on special pay to military officers holding critical positions, pursuant to 37 U.S.C. 306; to the Committee on Armed Services.

878. A letter from the Acting Director, Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for civil defense programs for fiscal years 1982 and 1983, and for other purposes; to the Committee on Armed Services.

879. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Housing Act of 1949 to make discretionary the power of the Secretary of Agriculture to provide interest credit subsidy to low and moderate income borrowers, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

880. A letter from the Chairperson, National Advisory Council on Indian Education, transmitting the seventh annual report of the Council, pursuant to section 442(b)(6) of Public Law 92-318; to the Committee on Education and Labor.

881. A letter from the Acting Administrator, Energy Information Administration, Department of Energy, transmitting reports covering the month of December 1980, on changes in market shares for refined petroleum products and retail gasoline, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Energy and Commerce.

882. A letter from the Acting Chairman, Interstate Commerce Commission, transmitting a report on the effectiveness of the Rail Passenger Service Act of 1970, pursuant to section 308(c) of the act, as amended; to the Committee on Energy and Commerce.

883. A letter from the Chairman and Chief Executive Officer, Consolidated Rail Corporation, transmitting a report analyzing the effects upon the Corporation and its employees of alternative changes in labor agreements and related operational changes, pursuant to section 703(c) of Public Law 96-448; to the Committee on Energy and Commerce.

884. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting a comprehensive plan for the improvement of all intercity rail passenger service provided in the Amtrak basic system, pursuant to section 305(f) of the Rail Passenger Service Act, as amended; to the Committee on Energy and Commerce.

885. A communication from the President of the United States, transmitting a report on progress toward conclusion of a negotiated solution of the Cyprus problem, pursuant to section 620C(c) of the Foreign Assistance Act of 1961, as amended (H. Doc. No. 97-36) to the Committee on Foreign Affairs and ordered to be printed.

886. A letter from the Acting Director, Peace Corps, transmitting a draft of proposed legislation to authorize appropriations for the Peace Corps, and for other purposes; to the Committee on Foreign Affairs.

887. A letter from the President, Inter-American Foundation, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1969, to authorize the sum of $12 million for fiscal year 1982, and such sums as may be necessary for fiscal year 1983; to the Committee on Foreign Affairs.

888. A letter from the Acting Inspector General, Department of Health and Human Services, transmitting the quarterly report on the activities of his office, covering the period ended December 31, 1980, pursuant to section 204(b) of Public Law 94-505; to the Committee on Government Operations.

889. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize an Under Secretary of Commerce for Economic Affairs; to the Committee on Post Office and Civil Service.

890. A letter from the Secretary, Panama Canal Commission, transmitting a draft of proposed legislation to authorize appropriations for the Panama Canal Commission for fiscal years 1982 and 1983; to the Committee on Merchant Marine and Fisheries.

891. A letter from the Acting Administrator, Small Business Administration, transmitting the annual report of the agency for fiscal year 1980, pursuant to section 10 of the Small Business Act, as amended; to the Committee on Small Business.

892. A letter from the Acting Administrator, U.S. Small Business Administration, transmitting a draft of proposed legislation to amend the Small Business Act; to the Committee on Small Business.

893. A letter from the Acting Administrator of Veterans Affairs, transmitting a draft of proposed legislation to limit payment of special pay authorized eligible Veterans' Administration physicians and dentists under section 4118, title 38, United States Code, and for other purposes; to the Committee on Veterans' Affairs.

894. A letter from the Acting Administrator of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to revise and clarify eligibility requirements for reimbursements of expenses of travel for Veterans Administration health care, and for other purposes; to the Committee on Veterans' Affairs.

895. A letter from the Acting Comptroller General of the United States, transmitting the fifth report on the Government's program for classifying national security information under Executive Order 12065 (PLRD-81-3, Mar. 23, 1981), jointly, to the Committees on Government Operations, Armed Services, and the Permanent Select Committee on Intelligence.

896. A letter from the Acting Comptroller General of the United States, transmitting a report on the examination of financial statements of the National Consumer Cooperative Bank for fiscal year 1980, pursuant to section 115 of Public Law 95-351 (AFMD-81-45, Mar. 13, 1981) (H. Doc. No. 97-37); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs, and ordered to be printed.

897. A letter from the Comptroller General of the United States, transmitting a report on natural gas planning for high-priority and critical uses over the mid and long term (EMD-81-27, Mar. 23, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

898. A letter from the Comptroller General of the United States, transmitting a report on the energy conservation program for schools and hospitals (EMD-81-47, Mar. 23, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

899. A letter from the Comptroller General of the United States, transmitting a report on strengthening the Federal budget process (PAD-81-36, Mar. 3, 1981); jointly, to the Committees on Government Operations and Rules.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2594. A bill to amend the dairy provisions of the Agricultural Act of 1949, and for other purposes; with amendment (Rept. No. 97-12). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 618. A bill to convey certain interests in public lands to the city of Angels, Calif. (Rept. No. 97-13). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1528. A bill to provide an exception to the requirements of the act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945), with regard to certain lands in Riverside County, Calif. (Rept. No. 97-14). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 116. Resolution providing for additional procedures during the consideration of House Resolution 115, providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House (Rept. No. 97-16). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 117. Resolution providing for the consideration of H.R. 1986, to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually (Rept. No. 97-17). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1543. A bill to confirm a conveyance of certain real property by the Central Pacific Railway Co., and Southern Pacific Co., to A. C. Taber and his wife, Mary Taber (Rept. No. 97-15). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 2781. A bill to amend the Small Business Act to provide that any change in regulations affecting the disaster loan provisions of such act shall not apply to applications for disaster loan assistance received before the effective date of the change; to the Committee on Small Business.

By Mr. BEARD (for himself and Mr. COELHO):

H.R. 2782. A bill to amend the Immigration and Nationality Act to more fully limit and control immigration to the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. BEDELL:

H.R. 2783. A bill to clarify the application of section 2032A of the Internal Revenue Code of 1954 with respect to qualification of certain property for valuation based on use, and for other purposes; to the Committee on Ways and Means.

By Mr. CONTE:

H.R. 2784. A bill to authorize the disposal of a certain quantity of silver from the National Defense Stockpile; to the Committee on Armed Services.

By Mr. CORRADA:

H.R. 2785. A bill to provide financial assistance for the transportation of petroleum and petrochemical products and agricultural commodities between ports located in the continental United States and Puerto Rico; to the Committee on Merchant Marine and Fisheries.

By Mr. PHILIP M. CRANE:

H.R. 2786. A bill to suspend for 3 years the duty on P-Chlor Meta Cresol (CAS 59-50-7); to the Committee on Ways and Means.

H.R. 2787. A bill to amend the Internal Revenue Code of 1954 to allow certain married individuals who file separate returns to be taxed as unmarried individuals; to the Committee on Ways and Means.

By Mr. DERWINSKI:

H.R. 2788. A bill to amend title 39 of the United States Code to require that any extension of the ZIP code be part of a voluntary service option with a reduced rate; to the Committee on Post Office and Civil Service.

By Mr. EDWARDS of California (for himself, Mr. ANDERSON, Mr. BADHAM, Mr. BEILENSON, Mr. BROWN of California, Mr. BURGENER, Mr. JOHN L. BURTON, Mr. PHILLIP BURTON, Mr. CHAPPIE, Mr. CLAUSEN, Mr. COELHO, Mr. DANIELSON, Mr. DANNEMEYER, Mr. DELLUMS, Mr. DIXON, Mr. DORNAN of California, Mr. DREIER, Mr. DYMALLY, Mr. FAZIO, Ms. FIEDLER, Mr. GOLDWATER, Mr. GRISHAM, Mr. HAWKINS, Mr. HUNTER, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEWIS, Mr. LOWERY of California, Mr. LUNGREN, Mr. MCCLOSKEY, Mr. MATSUI, Mr. MILLER of California, Mr. MINETA, Mr. MOORHEAD, Mr. PANETTA, Mr. PASHAYAN, Mr. PATTERSON, Mr. ROUSSELOT, Mr. ROYBAL, Mr. SANTINI, Mr. SHUMWAY, Mr. STARK, Mr. THOMAS, and Mr. WAXMAN):

H.R. 2789. A bill to designate the "Bizz Johnson Trail" in the Susan River Canyon, Lassen County, State of California; to the Committee on Interior and Insular Affairs.

By Mr. EMERY:

H.R. 2790. A bill to amend title 38, United States Code, to provide expanded opportunities for individuals to earn educational assistance benefits based on honorable active service in the Armed Forces, and for other purposes; jointly, to the Committees on Armed Services and Veterans' Affairs.

By Mr. EVANS of Georgia:

H.R. 2791. A bill to provide for the exercise of congressional power, pursuant to article I, section 8, "to raise and support armies . . . to provide and maintain a navy . . . to make rules for the Government and regulation of the land and naval forces," and all the Armed Forces subject to the jurisdiction of the United States by providing that the courts of the United States shall not have jurisdiction with respect to questions involving the constitutionality of statutes providing different treatment on the basis of sex in the composition of the Armed Forces or in criteria for induction, for training or service in the Armed Forces; to the Committee on the Judiciary.

By Mr. FORSYTHE (for himself and Mr. BREAUX):

H.R. 2792. A bill to amend title II, title IV establishing a Fishermen's Contingency Fund, and title V of the Outer Continental Shelf Lands Act Amendments of 1978; to the Committee on Merchant Marine and Fisheries.

By Mr. GILMAN (for himself and Mr. SOLARZ):

H.R. 2793. A bill to help eliminate world hunger and malnutrition and promote global security; jointly, to the Committees on Foreign Affairs, Banking, Finance and Urban Affairs, and Ways and Means.

By Mr. GLICKMAN (for himself, Mr. FRENZEL, Mr. MOLLOHAN, Mr. STANTON of Ohio, Mr. BUTLER, Mr. GINN, Mr. O'BRIEN, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. MAVROULES, Mr. WHITEHURST, Mr. PANETTA, Mr. LUJAN, Mr. KINDNESS, Mr. HEFTEL, Mr. DORGAN of North Dakota, Mr. YOUNG of Missouri, Mr. JOHNSTON, Mr. WILSON, Mr. WHITTAKER, Mr. BONKER, Mr. JACOBS, Mr. LOWRY of Washington, Mr. DORNAN of California, Mr. WEAVER, Mr. LUNGREN, Mr. TAUKE, Mr. EDGAR, Mr. ERDAHL, Mr. ROEMER, Mr. RITTER, Mr. LAGOMARSINO, Mr. YATRON, Mr. WIRTH, Mr. BETHUNE, Mr. BEDELL, Mr. WEBER of Minnesota, Mr. SEIBERLING, and Mr. MARTIN of North Carolina):

H.R. 2794. A bill to amend title 44, United States Code, to reduce the gratuitous distribution of the Congressional Record; to the Committee on House Administration.

By Mr. GREEN (for himself, Mr. STANTON of Ohio, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. WHITEHURST, and Mr. FORSYTHE):

H.R. 2795. A bill to amend title II of the Social Security Act to improve the long-range financing of the old-age, survivors, and disability insurance program by gradually increasing the minimum retirement age (for unreduced benefits) from 65 to 68; to the Committee on Ways and Means.

By Mr. HANCE (for himself, Mr. ANTHONY, Mr. ENGLISH, and Mr. SYNAR):

H.R. 2796. A bill to amend the Internal Revenue Code of 1954 to exempt from the crude oil windfall profit tax oil from stripper well properties; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma (for himself and Mr. FRENZEL):

H.R. 2797. A bill to amend the Internal Revenue Code of 1954 to permit the use of restricted stock options and to eliminate the exercise of restricted stock options as an item of tax preference; to the Committee on Ways and Means.

By Mr. NEAL:

H.R. 2798. A bill to amend the Internal Revenue Code of 1954 to eliminate percentage depletion in the case of domestic crude oil; to the Committee on Ways and Means.

By Ms. OAKAR:

H.R. 2799. A bill to establish a Council on Judicial Tenure in the judicial branch of the Government, to establish a procedure in addition to impeachment for the retirement of disabled Justices and judges of the United States, and the removal of Justices and judges whose conduct is or has been inconsistent with the good behavior required by article III, section 1, of the Constitution, and for other purposes; to the Committee on the Judiciary.

H.R. 2800. A bill to amend the Atomic Energy Act of 1954 to provide that no licenses for the construction or operation of nuclear reactors at nuclear powerplants shall be issued or renewed until completion of a study of the safety of such plants by the Office of Technology Assessment, and to amend the Energy Reorganization Act of 1974 to provide that the Secretary of Energy shall not construct nuclear waste disposal facilities within or near to densely populated areas; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

H.R. 2801. A bill to authorize the Secretary of the Treasury to make annual contributions to local governments to defray a portion of the long-term debt incurred by such local governments to finance projects

to preserve and restore certain facilities; to the Committee on Banking, Finance and Urban Affairs.

H.R. 2802. A bill to promote the domestic recruiting of teachers for teaching positions in overseas dependents' schools of the Department of Defense, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. SCHEUER:

H.R. 2803. A bill to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal year 1982, and for other purposes; to the Committee on Science and Technology.

H.R. 2804. A bill to authorize appropriations for environmental research, development, and demonstrations for fiscal year 1982, and for other purposes; to the Committee on Science and Technology.

By Mr. SOLOMON:

H.R. 2805. A bill to prohibit funds to be used to advertise or implement a nine-digit ZIP code system; to the Committee on Post Office and Civil Service.

By Mr. STRATTON:

H.R. 2806. A bill to extend the current period of the suspension of the Vinson-Trammell Act profit-limitation provisions from October 1, 1981, to July 1, 1982; to the Committee on Armed Services.

By Mr. WAXMAN:

H.R. 2807. A bill to amend the Public Health Service Act to extend the programs of assistance for family planning and programs relating to genetic diseases, to extend the program of assistance for pregnant adolescents, and for other purposes; to the Committee on Energy and Commerce.

By Mr. WEAVER:

H.R. 2808. A bill to amend the Internal Revenue Code of 1954 to eliminate the requirement that unemployment benefits be reduced by the amount of certain retirement benefits; to the Committee on Ways and Means.

By Mr. DIXON (for himself, Mr. WOLPE, Mr. SOLARZ, Mr. GRAY, Mr. AUCOIN, Mr. BEDELL, Mr. BINGHAM, Mr. BRODHEAD, Mrs. CHISHOLM, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. CROCKETT, Mr. DELLUMS, Mr. DOWNEY, Mr. DYMALLY, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. FAZIO, Mr. FORD of Tennessee, Mr. HAWKINS, Mr. LEHMAN, Mr. LELAND, Mr. MCHUGH, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. OBERSTAR, Mr. PEASE, Mr. RANGEL, Mr. RATCHFORD, Mr. RICHMOND, Mr. SABO, Mr. SAVAGE, Mr. SCHUMER, Mr. SIMON, Mr. STOKES, Mr. STUDDS, Mr. VENTO, Mr. WALGREN, Mr. WASHINGTON, Mr. WAXMAN, and Mr. WEISS):

H. Con. Res. 98. Concurrent resolution expressing the sense of the Congress that the United States should not invite officials of the Republic of South Africa to visit until apartheid is ended; to the Committee on Foreign Affairs.

By Mr. MURPHY:

H. Con Res 99. Concurrent resolution expressing the sense of Congress that the Secretary of Health and Human Services, acting under the Child Abuse Prevention and Treatment Act, and other Federal officials should cooperate with State and local officials in their efforts to solve the recent murders of black children in Atlanta, Ga., and to provide for the safety and well-being of children in Atlanta who are threatened by this crisis; jointly to the Committees on Education and Labor and the Judiciary.

MEMORIALS

Under clause 4 of rule XXII,

29. The SPEAKER presented a memorial of the Legislature of the State of North Dakota, relative to a balanced Federal budget; to the Committee on Government Operations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. FORD of Tennessee introduced a bill (H.R. 2809) for the relief of Bronislava Dorfman, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 38: Mr. SIMON.

H.R. 67: Mr. LEBOUTILLIER and Mr. ROUSSELOT.

H.R. 68: Mr. LEBOUTILLIER.

H.R. 73: Mr. BENEDICT.

H.R. 82: Mr. ROUSSELOT.

H.R. 92: Mr. ROUSSELOT.

H.R. 269: Mr. GOLDWATER, Mr. HUBBARD, Mr. RUDD, and Mr. SHUMWAY.

H.R. 501: Mr. AUCOIN, Mr. BONER of Tennessee, Mr. CLAY, Mr. CROCKETT, Mr. DE LA GARZA, Mr. DIXON, Mr. EDGAR, Mr. FASCELL, Mr. FLORIO, Mr. FOLEY, Mr. FRANK, Mr. GLICKMAN, Mr. HALL of Ohio, Mr. HAMILTON, Mr. HATCHER, Mr. KILDEE, Mr. KOGOVSEK, Mr. LAFALCE, Mr. LEHMAN, Mr. LOWRY of Washington, Mr. LUNDINE, Mr. MCDONALD, Mr. MAVROULES, Mr. MOFFETT, Mr. MURPHY, Mr. NATCHER, Mr. NOWAK, Mr. OBERSTAR, Mr. OTTINGER, Mr. PEYSER, Mr. PRITCHARD, Mr. REUSS, Mr. RITTER, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. SEIBERLING, Mr. SHANNON, Mr. SHELBY, Mr. STENHOLM, Mr. STOKES, Mr. WEISS, Mr. WOLPE, Mr. YATES, Mr. YATRON, Mr. BARNES, Mrs. BOUQUARD, Mr. DONNELLY, Mr. GUARINI, Mr. HAWKINS, Mr. JONES of North Carolina, Mr. KEMP, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. NEAL, Mr. PORTER, Mr. RODINO, Mr. ROE, Mr. PRICE, Mr. GORE, Mr. WON PAT, Mr. ATKINSON, Mr. HANCE, Mr. IRELAND, Mr. HOLLENBECK, Mr. ASHBROOK, Mr. BEREUTER, Mr. BROWN of Ohio, Mr. BROYHILL, Mr. BUTLER, Mr. CAMPBELL, Mr. CARNEY, Mr. CLAUSEN, Mr. COATS, Mr. CONTE, Mr. CORCORAN, Mr. COUGHLIN, Mr. COURTER, Mr. PHILIP M. CRANE, Mr. DANNEMEYER, Mr. DOUGHERTY, Mr. DOWNEY, Mr. DUNCAN, Mr. DUNN, Mr. EMERY, Mrs. FENWICK, Mr. FORSYTHE, Mr. FRENZEL, Mr. GINGRICH, Mr. GINN, Mr. GOLDWATER, Mr. GRADISON, Mr. GREEN, Mr. GREGG, Mr. HARTNETT, Mrs. HECKLER, Mr. HILER, Mr. HYDE, Mr. JEFFORDS, Mr. JEFFRIES, Mr. JOHNSTON, Mr. KINDNESS, Mr. KRAMER, Mr. LAGOMARSINO, Mr. LEE, Mr. LENT, Mr. LOEFFLER, Mr. LOTT, Mr. LOWERY of California, Mr. LUNGREN, Mr. MCCLORY, Mr. MCEWEN, Mr. MCGRATH, Mr. MADIGAN, Mr. MARKS, Mr. MARLENEE, Mr. MARRIOTT, Mr. PARRIS, Mr. PASHAYAN, Mr. PAUL, Mr. PETRI, Mr. QUILLEN, Mr. RAILSBACK, Mr. REGULA, Mr. RINALDO, Mr. ROBERTS of South Dakota, Mr. ROUSSELOT, Mr. RUDD, Mr. SAWYER, Mr. SENSENBRENNER, Mr. SHUMWAY, Mr. TAUKE, Mr. VANDER JAGT, Mr. WALKER, Mr. WAMPLER, Mr. WEBER of Minnesota, Mr. WHITEHURST, Mr. WHITTAKER, Mr. WILLIAMS of Ohio, Mr. WINN, Mr. WOLF, Mr. MINETA, Mrs. COLLINS of Illinois, Mr. TRAXLER, Mrs. CHISHOLM, Mr. BLILEY, Mr. DANIEL B. CRANE, Mr. EMERSON, Mr. GUYER, Mr. LEBOUTILLIER, Mr. MITCHELL of New York, Mr. MORRISON, Mrs. SNOWE, Mr. SOLOMON, Mr. WEBER of Ohio, and Mr. SPENCE.

H.R. 560: Mr. RINALDO and Mr. BINGHAM.

H.R. 615: Mr. DREIER.

H.R. 704: Mr. COLLINS of Texas, Mr. SHARP, Mr. CONABLE, Mr. KOGOVSEK, Mr. ROBERTS of South Dakota, Mr. JACOBS, Mr. BAFALIS, Mr. ERLENBORN, Mr. GOLDWATER, Mr. HILER, Mr. JEFFORDS, Mr. MCCLORY, Mr. WOLPE, Mr. KRAMER, and Mr. LUNGREN.

H.R. 705: Mr. COLLINS of Texas, Mr. CONABLE, Mr. KOGOVSEK, Mr. ROBERTS of South Dakota, Mr. JACOBS, Mr. BAFALIS, Mr. ERLENBORN, Mr. GOLDWATER, Mr. HILER, Mr. JEFFORDS, Mr. MCCLORY, Mr. WOLPE, Mr. KRAMER, Mr. LUNGREN, Mr. FRENZEL, Mr. KINDNESS, and Mr. GORE.

H.R. 706: Mr. CROCKETT, Mr. DE LUGO, Mr. ROSENTHAL, Ms. MIKULSKI, Mr. OBERSTAR, Mr. GINGRICH, Mr. GARCIA, Mr. MOTTL, Mr. ROUSSELOT, Mr. HYDE, Mr. JEFFRIES, Mr. MCCLORY, Mr. CARMAN, and Mr. KEMP.

H.R. 708: Mr. JOHNSTON.

H.R. 713: Mr. WYLIE, Mr. GOODLING, Mr. HORTON, Mr. EVANS of Iowa, Mr. HYDE, Mr. LENT, Mr. GINGRICH, Mr. REGULA, Mr. MORRISON, and Mr. EMERSON.

H.R. 1250: Mr. CONABLE, Mr. DUNCAN, Mr. ARCHER, Mr. VANDER JAGT, Mr. PHILIP M. CRANE, Mr. FRENZEL, Mr. MARTIN of North Carolina, Mr. BAFALIS, Mr. SCHULZE, Mr. GRADISON, Mr. ROUSSELOT, Mr. HOLLAND, Mr. HANCE, Mr. KRAMER, Mr. DOUGHERTY, Mr. KOGOVSEK, Mr. COLLINS of Texas, Mrs. HECKLER, Mr. PORTER, Mr. ROE, Mr. HILER, Mr. NEAL, Mr. GLICKMAN, Mr. MCDONALD, Mr. EVANS of Delaware, Mr. GINGRICH, Mr. BARNARD, Mr. BURGENER, Mr. MORRISON, Mr. DICKINSON, Mr. LAGOMARSINO, Mr. FARY, Mr. DAUB, Mr. BEREUTER, Mr. EMERY, Mr. CHENEY, Mr. HOWARD, Mr. HARTNETT, Mr. LEWIS, and Mr. SHAW.

H.R. 1518: Mr. FORD of Michigan, Mr. CROCKETT, Mr. DAVIS, Mr. NOWAK, Mr. WHITEHURST, Mr. RITTER, Mr. YOUNG of Missouri, Ms. OAKAR, Mr. PURSELL, Mr. GUYER, and Mr. BROWN of Ohio.

H.R. 1519: Mr. BRODHEAD, Mr. FORD of Michigan, Mr. CROCKETT, Mr. DAVIS, Mr. NOWAK, Mr. YOUNG of Missouri, Ms. OAKAR, Mr. PURSELL, and Mr. GUYER.

H.R. 1531: Mr. PATTERSON.

H.R. 1541: Mr. DOUGHERTY.

H.R. 1640: Mr. DYMALLY, Mr. JACOBS, and Mr. HERTEL.

H.R. 1644: Mr. STENHOLM.

H.R. 1649: Mr. SIMON.

H.R. 1650: Mr. PATTERSON.

H.R. 1663: Mrs. COLLINS of Illinois, Mr. STOKES, Mr. YATES, Mr. MOFFETT, Mr. PEPPER, Mr. FORSYTHE, Mr. FAZIO, Mrs. CHISHOLM, Mr. WON PAT, Mr. GRAY, Mr. SCHUMER, Mr. ZEFERETTI, Mr. DWYER, Ms. MIKULSKI, Mr. CROCKETT, Mr. GILMAN, Mr. RODINO, Mr. APPLEGATE, Mr. DIXON, Mr. PRITCHARD, Mr. CLINGER, Mr. BARNES, Mr. EDGAR, Mr. PHILLIP BURTON, Mr. NEAL, Mr. FISH, Mr. CONYERS, and Mrs. SCHNEIDER.

H.R. 1850: Mr. ADDABBO, Mr. BOLAND, Mr. DOUGHERTY, Mr. STOKES, Mr. HORTON, Mr. YATRON, Ms. FERRARO, Mr. HOWARD, Mr. FINDLEY, Mr. FRANK, Mr. JEFFORDS, Mr. STUDDS, Mr. WHITEHURST, Mr. FLORIO, Mr. NOWAK, Mr. MITCHELL of Maryland, Mr. MURPHY, Mr. HEFNER, Mr. DONNELLY, and Mr. MOAKLEY.

H.R. 1912: Mr. STUMP.

H.R. 2052: Mr. VENTO, Mr. FORD of Tennessee, Mr. FRANK, Mr. PORTER, Mr. OTTINGER, and Mr. BARNES.

H.R. 2082: Mr. GORE.

H.R. 2142: Mr. CLAUSEN.

H.R. 2219: Mr. FOGLIETTA.

H.R. 2234: Mr. FRENZEL, Mr. LAGOMARSINO, Mr. MOLLOHAN, Mr. STANTON of Ohio, Mr. BUTLER, Mr. GINN, Mr. O'BRIEN, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. MAVROULES, Mr. WHITEHURST, Mr. PANETTA, Mr. LUJAN, Mr. KINDNESS, Mr. HEFTEL, Mr. DORGAN of North Dakota, Mr. YOUNG of Missouri, Mr. JOHNSTON, Mr. WILSON, Mr. WHITTAKER, Mr. BONKER, Mr. FORSYTHE, Mr. JACOBS, Mr. LOWRY of Washington, Mr. DORNAN of California, Mr. WEAVER, Mr. LUNGREN, Mr. TAUKE, Mr. EDGAR, Mr. ERDAHL, Mr. ROEMER, Mr. YATRON, Mr. WIRTH, Mr. BETHUNE, Mr. BEDELL, Mr. WEBER of Minnesota, and Mr. SEIBERLING.

H.R. 2235: Mr. FRENZEL, Mr. LAGOMARSINO, Mr. MOLLOHAN, Mr. STANTON of Ohio, Mr. BUTLER, Mr. GINN, Mr. O'BRIEN, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. MAVROULES, Mr. WHITEHURST, Mr. PANETTA, Mr. LUJAN, Mr. KINDNESS, Mr. HEFTEL, Mr. DORGAN of North Dakota, Mr. YOUNG of Missouri, Mr. JOHNSTON, Mr. WILSON, Mr. WHITTAKER, Mr. BONKER, Mr. JACOBS, Mr. LOWRY of Washington, Mr. DORNAN of California, Mr. WEAVER, Mr. LUNGREN, Mr. TAUKE, Mr. EDGAR, Mr. ERDAHL, Mr. ROEMER, Mr. YATRON, Mr. WIRTH, Mr. BETHUNE, Mr. BEDELL, Mr. WEBER of Minnesota, and Mr. SEIBERLING.

H.R. 2262: Mr. BARNARD, Mr. FLORIO, Mr. MINETA, Mr. RICHMOND, and Mr. SUNIA.

H.R. 2326: Mr. LAGOMARSINO, Mr. STARK, Mr. YOUNG of Missouri, Mr. ST GERMAIN, Mr. DE LA GARZA, Mr. BONKER, Mr. FRENZEL, Mr. BINGHAM, Mr. GIBBONS, Mr. JOHNSTON, Mr. SHAMANSKY, Mr. SAVAGE, Mr. WHITEHURST, Mr. GLICKMAN, Mr. VENTO, Mr. FORSYTHE, Mr. EVANS of Georgia, Mr. DWYER, Mr. MAZZOLI, Mr. FRANK, Mr. SAWYER, Mr. ZABLOCKI, Mr. BADHAM, Mr. PATTERSON, Mr. NEAL, Mr. COLLINS of Texas, and Mr. BAFALIS.

H.R. 2348: Mr. ROTH, Mr. NEAL, Mr. AKAKA, Mr. HUGHES, Mr. STOKES, Mr. JEFFORDS, and Mr. SCHEUER.

H.R. 2445: Mr. MCEWEN.

H.R. 2451: Mr. MARRIOTT, Mr. SANTINI, Mr. HUNTER and Mrs. SCHNEIDER.

H.R. 2488: Mr. PORTER, Mr. WAXMAN, and Mr. FAZIO.

H.J. Res. 18: Mr. LEBOUTILLIER.

H.J. Res. 84: Mr. WOLF and Mr. GOODLING.

H.J. Res. 128: Mr. ARCHER, Mr. BAILEY of Missouri, Mr. BEREUTER, Mr. BONER of Tennessee, Mr. CORCORAN, Mr. CRAIG, Mrs. FENWICK, Mr. HANCE, Mr. HUTTO, Mr. JEFFRIES, Mr. MCDONALD, Mr. NATCHER, Mr. ROBINSON, Mr. ROE, Mr. VOLKMER, Mr. WINN, Mr. YOUNG of Alaska, and Mr. LOTT.

H.J. Res. 159: Mr. FITHIAN.

H. Con. Res. 50: Mr. PRITCHARD, Mr. RANGEL, Mrs. SCHNEIDER, Mr. MCCURDY, Mr. ATKINSON, Mr. COUGHLIN, Mr. DWYER, Mr. MINETA, Mr. ROE, Mr. STOKES, Mr. WEAVER, Mr. RUDD, Mr. LOWERY of California, Mr. ARCHER, Mr. MARKS, Mr. WIRTH, Mr. KRAMER, Mr. WILLIAM J. COYNE, Ms. FERRARO, Mr. SHAW, Mr. WALGREN, Mr. COURTER, Mr. EDGAR, Mr. DORNAN of California, Mr. KOGOVSEK, and Mr. WHITEHURST.

H. Con. Res. 55: Mr. SIMON.

H. Con. Res. 90: Mr. LEBOUTILLIER.

H. Res. 14: Mr. LEBOUTILLIER.

H. Res. 93: Mr. FRENZEL, Mr. LAGOMARSINO, Mr. STANTON of Ohio, Mr. BUTLER, Mr. O'BRIEN, Mr. PRITCHARD, Mr. MCCLOSKEY, Mr. MAVROULES, Mr. WHITEHURST, Mr. PANETTA, Mr. LUJAN, Mr. KINDNESS, Mr. HEFTEL, Mr. DORGAN of North Dakota, Mr. YOUNG of Missouri, Mr. JOHNSTON, Mr. WILSON, Mr. WHITTAKER, Mr. BONKER, Mr. JACOBS, Mr. LOWRY of Washington, Mr. WEAVER, Mr. TAUKE, Mr. EDGAR, Mr. PEASE, Mr. ERDAHL, Mr. ROEMER, Mr. YATRON, Mr. WIRTH, Mr. BETHUNE, Mr. SEIBERLING, Mr. MOLLOHAN, and Mr. DORNAN of California.

H. Res. 98: Mr. CHENEY and Mr. MILLER of Ohio.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

HOUSE RESOLUTION 115

By Mr. WRIGHT:

Strike section 2 and insert in lieu thereof the following:

SEC. 2. The committees and amounts referred to in the first section are: Select Committee on Aging, $1,183,680; Committee on Agriculture, $1,184,840; Committee on Armed Services, $952,223; Committee on Banking, Finance and Urban Affairs, $2,414,919; Committee on the District of Columbia, $275,187; Committee on Education and Labor, $2,565,448; Committee on Energy and Commerce, $3,750,000; Committee on Foreign Affairs, $1,800,119; Committee on Government Operations, $2,229,402; Committee on House Administration, $1,219,000; Committee on House Administration—House Information Systems, $7,509,560; Permanent Select Committee on Intelligence, $938,700; Committee on Interior and Insular Affairs, $1,219,615; Committee on the Judiciary, $1,350,410; Committee on Merchant Marine and Fisheries, $1,581,241; Select Committee on Narcotics Abuse and Control, $540,000; Committee on Post Office and Civil Service, $902,500; Committee on Public Works and Transportation, $1,806,373; Committee on Rules, $530,738; Committee on Science and Technology, $1,820,928; Committee on Small Business, $776,000; Committee on Standards of Official Conduct, $450,000; Committee on Veterans' Affairs, $352,490; and Committee on Ways and Means, $2,252,000.

Section 6, subparagraph 1, after the word "expenses" insert the following: "(not in excess of $7,509,560)".

SENATE—*Tuesday, March 24, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Almighty God, sovereign Lord of history, from whom, through whom, and to whom are all things, if a sparrow does not fall without Your knowledge, certainly the issues facing this body this week concern Thee.

Thy word assures us that Thou dost "work in everything for good to those who love Thee and are called according to Thy purpose." May that confidence guide the Senators as they seek equitable and just solutions to complicated problems which influence the destiny of every American. Give wisdom to discern, courage to decide, and let Thy will be done in the Senate as in heaven.

Bless the faithful men and women who manage the machinery of the Senate, without whom this institution could not function. We thank Thee for their efficient and productive labors.

Fill this place with Thy love and peace, we pray in the name of the Messiah. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the acting majority leader is recognized.

THE JOURNAL

Mr. WARNER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. WARNER. Mr. President, I ask unanimous consent that, following the time allocated to the two leaders under the standing order as well as the series of special orders which have been entered into for this morning, there be a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. WARNER. Mr. President, I reserve the remainder of the time for the majority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The Chair recognizes the acting minority leader.

Mr. ZORINSKY. Mr. President, I reserve the remainder of the time for the minority leader.

(Later Mr. ROBERT C. BYRD made the following remarks which are printed at this point in the RECORD by unanimous consent.)

A NEW TRANSATLANTIC BARGAIN

Mr. ROBERT C. BYRD. Mr. President, the growing Soviet challenge to the West highlights the importance of reassessing the goals of the Western Alliance. Is there a mutually shared perception of the challenges confronting us and the policies needed to meet them? Are the present mechanisms for consultation, cooperation, and decisionmaking adequate? Just where is the alliance headed?

The Reagan administration has proposed increasing the portion of our national budget directed to defense from 24 percent to fully 32 percent, amounting to an annual real growth rate in defense outlays of 7.6 percent through fiscal year 1984. At the same time, the administration has put strong pressure on our allies to follow suit, and to commit more of their forces outside the NATO area. The Soviet Union is now engaged in a major diplomatic offensive to forestall the development of such a consensus in the alliance. These pressures have exacerbated strains within the alliance, particularly in regard to U.S. arms control policy.

The question of burden sharing within the alliance has been an issue for many years, and is of concern to many of us here in the Senate. The administration's policies insure that this issue will receive increased attention.

Some of the best minds on both sides of the Atlantic have produced a thought-provoking paper on the state of the alliance. Released this past week, the report was a joint project of four highly respected private institutions in the United States, the United Kingdom, Germany, and France. The consensus statement offers a number of recommendations to address the problems now confronting the alliance. Among other things, it suggests the development of new consultative and decisionmaking machinery which should be of particular interest as we turn our attention to the needs of the alliance in the 1980's.

I believe the report, "Western Security: What Has Changed? What Should Be Done?" will be of interest to all my colleagues. I ask unanimous consent that it be printed in the RECORD in its entirety.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

WESTERN SECURITY: WHAT HAS CHANGED? WHAT SHOULD BE DONE?

(By Karl Kaiser, Winston Lord, Thierry de Montbrial, and David Watt)

Note: Policy directions and recommendations are in *italics*.

I. WHY THIS REPORT?

I.1 As Western nations enter the difficult 1980s, the challenges they face are formidable and often unprecedented.

I.2 First, in sharp contrast to only ten years ago, when the prospects for the 1970s were of détente and successful arms control negotiations with the East, the period now beginning is marked by increased tensions between East and West and enhanced Soviet military threats both in Europe and in Third World regions.

I.3 Second, the West will also be facing an increasingly unstable and volatile Third World upon which it will depend more and more for its economic survival. This is particularly true of the Persian Gulf region, which provides around 15 per cent of US oil consumption, 60 per cent of European consumption (and over 70 per cent of Japanese). In effect, the new importance of the Third World for Western security is such that an extensive and prolonged interruption of oil supplies today would provoke a world economic crisis of a greater magnitude than the Great Depression of the 1930s. In this context, Western security can no longer be limited to events and threats occurring in the NATO region alone. Nor is it possible to isolate European security from crises arising in other regions vital for the West.

I.4 Third, the period ahead will also be one of prolonged economic crisis worldwide. It will be characterized in the West by very low growth rates combined with high inflation and high unemployment rates. These economic difficulties can be expected to sharpen North-South tensions, increase competition among Western nations themselves, and produce potentially dangerous social tensions within Western democracies.

I.5 The resulting domestic political difficulties already constrain in some European countries the ability of governments to devote more resources to defence and aid efforts needed to respond effectively to external challenges. Such a situation, characterized by serious discrepancies between those countries which manage to increase their defence efforts despite economic hardship, and those which do not do so to the same extent, can be expected to trigger new strains in the Alliance over the traditional question of "burden sharing".

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

79-059 O - 1984 - 53 - (Vol. 127 Pt.4)

I.6 The cumulative impact of all these issues constitutes in itself a difficult challenge for the 1980s. What renders this challenge even more formidable is the fact that although interests common to all Western nations are at stake, the West is itself seriously divided on many of these issues. Indeed, a key characteristic of the current international situation is precisely that the West is undergoing a phase of strain and dissension at the very time when it also has to deal with a crisis with the East, crises in the Third World, and a prolonged economic and energy crisis on a global scale. European-American divisions and quarrels during most of 1980 following the Soviet invasion of Afghanistan illustrate this situation. Not only did the Afghan affair divide the West as to an appropriate response to the Soviet move; it also acted as a catalyst for earlier transatlantic tensions and disagreements. As a result, the latter took on a new dimension.

I.7 Disagreements on defence and its corollary, arms control, increased. Despite the decision laboriously reached by NATO in December 1979, the modernisation of long range theatre nuclear forces (LRTNF) in Europe remains in doubt; given the political resistance evinced in certain European countries, its practical implementation cannot be assumed. Controversy over defence also spilled over into economic issues, as most European nations failed last year to achieve the commitment made in 1977 to maintain a real increase of 3 percent in defence expenditure.

I.8 Similarly, disagreements over the Middle East and policy toward Iran also sharpened as instability in the region grew after Afghanistan and the Iran-Iraq war, and as Europeans became even more threatened by their dependence on oil supplies from that region. While less divisive for the time being, the situation created by internal events in Poland and the possibility of Soviet military intervention in that country, could cause further strains in the Alliance.

I.9 To be sure, tensions or even disagreements are scarcely new in the Western Alliance. After all, NATO as a grouping of independent democratic nations has always been—perhaps necessarily—a "troubled partnership". Severe crises have erupted in the past, as in the case of Suez in 1956 and the 1973 October War, not to mention the persistent quarrels of the 1960s on the Multilateral Nuclear Force and on France's withdrawal from NATO's integrated military command.

I.10 Nonetheless, the current transatlantic crisis cannot be considered as just one of a series of short-term episodes. It is more far-reaching:

First, current differences between Europeans and Americans involve all the Europeans, particularly the Germans, and not only the French, as was the case in the 1960s.

Second, divergences bear not just on isolated problems, but on a whole spectrum of issues, ranging from defence to economics and basic foreign policy.

Third, the present crisis is new in the amount of public disagreement that has been aired on all the issues mentioned. The publicity of these various quarrels, widely expressed in the press on both sides of the Atlantic, has in turn contributed to increasing mutual suspicions, misperceptions and misunderstandings. As a result, accusations such as "self-neutralisation" or "self-finlandization" on one side, and policies of "incoherence" and "zig-zag" on the other, have widened the gap between Americans and Europeans. They have made the crisis even worse.

I.11 Because of the magnitude of these disagreements and divisions, actual and potential, and because they coincide with immediate major challenges and threats to all Western nations, the authors have decided jointly to write this Report. We hope that this collective undertaking will contribute to a better mutual understanding on both sides of the Atlantic. This is all the more important at a time when new leaders have recently been elected (in the United Kingdom, Germany, and the United States) or will shortly be elected (in France).

I.12 This Report does not attempt to provide a comprehensive analysis of each issue to be faced during the 1980s. The central focus is on East-West relations in Europe and the Third World, as they affect European-American relations. Although economic problems are of major importance in shaping international politics, this Report is primarily concerned with political and security issues.

I.13 Our objective is to analyse how the various challenges facing the West in the next few years can best be met.

I.14 Accordingly, the Report is divided into four parts:

A diagnosis of the current transatlantic crisis;

Western relations toward the Soviet Union;

Security concerns in the Third World and their impact on East-West and European-American relations;

Ways to improve the coordination of policy among the key Western nations, particularly in situations outside NATO's geographical boundaries.

II. DIAGNOSIS

Short-term factors

II.1 The current European-American tension finds its roots in historical and structural trends as well as in short-term, coincidental factors. To be sure, the latter have played an important role recently in exacerbating transatlantic quarrels and bringing them into the open. Poor management and policy errors by the American leadership in the past few years have clearly reduced European confidence in U.S. statesmanship. At the same time, Europeans were reluctant to act vigorously in the recent crises, thereby inducing impatience in the United States. Moreover, these factors have led at times to further tensions between the two sides of the Atlantic at the highest levels of government, thereby adding a "personal" element to an already strained relationship.

II.2 These short-term factors, however, fail to explain the magnitude and true nature of current transatlantic problems. It would be dangerously erroneous in particular to believe that once the international situation quiets down, the difficulties between Europe and America will simply disappear. They find their roots in deeper, historical and structural trends.

Historical and structural trends

II.3 Some of these elements have to do with wider societal developments in America and Europe, including the change of generations and the appearance of the new political elites. On the American side, there has been a gradual evolution of the United States away from a European-centered foreign policy, to a more global approach in which other regions (especially Asia and the Middle East) compete with Europe in U.S. preoccupations. To a certain extent this is paralleled by the gradual reduction in influence of a certain East coast, European-oriented elite which was highly knowledgeable and sensitive about European history and politics. Clearly, new American elites drawn from other regions (the South, the West) are, like the media, less concerned and informed about Europe. More important, perhaps, has been the emergence in the recent past of an increasingly nationalistic mood in the United States, born in part as a reaction to the decline of America's stature in the world since Vietnam. This new nationalism is reflected in a growing irritation and impatience with the Third World as a whole (particularly following the Iran hostage crisis) as well as with Soviet behaviour. A similar irritation has been noticeable toward the European allies, which are often perceived in the United States as "not doing enough" to fulfill their share of the collective Western burden.

II.4 A parallel evolution has been taking place in Europe. US prestige has declined in the eyes of younger European elites, particularly as a result of the Vietnam war, and as European nations became stronger economically. Europeans have tried to assert their own voice in world affairs, at times in ways that conflict with US policy, as in the case of the Venice initiative on the Middle East. At the same time, Europeans devoted increasing attention to Community matters (enlargement of the EEC, cooperation with African and Arab nations) and became more Euro-centered (in developing more political and economic relations with Eastern neighbours).

The transatlantic balance of power

II.5 This evolution is linked to the structural transformation of both the internal balance of power (between the US and Europe) and the external balance of power (between the US and the Soviet Union). The common denominator is the relative decline of US power over the past decade and a half (in political and economic terms in the first instance, in military terms in the second).

II.6 Internally, the transformation of the balance of power between Europe and America has been most spectacular in the economic field. Here the American supremacy of the immediate post-war period has been replaced by a situation in which the European Community as a whole has become as rich as the US and often more competitive on the world market. As a result, the ability of the United States to influence European policy in accordance with its own interests has sharply declined. Conversely, the Europeans have shown a greater willingness and ability to defend their own interests against those of the United States, where these have diverged. Examples are the German-American quarrel over the "locomotive theory" and the European-American controversy over nuclear energy and non-proliferation. In the monetary field, the creation of the European Monetary System was aimed to a large extent at shielding Europe from the consequences of the decline of the dollar-based international monetary system. Similarly, in November 1978, the Europeans obtained a direct influence on US economic policy, as the United States was forced to defend the dollar following strong pressures from European central banks.

II.7 However, the growth of European economic power, relative to America's, has not been accompanied by a similar transformation of the security relationship between the Allies. Militarily, Europe as a whole remains dependent on the nuclear guarantee provided by the United States since the end of World War II. This dependence is modified in the case of Britain and France both of which have independent nuclear forces. Nonetheless, it is the US guarantee which safeguards the integrity of France's and Britain's neighbours. In that sense, the US nuclear guarantee remains essential to the preservation of European security as a whole. Indeed, as Soviet military strength increased both in nuclear and conventional

terms since the late 1960s, European dependence has in fact increased. This has sharpened the contradiction in a transatlantic relationship in which the protégé has become as rich as the protector and more reluctant to follow its lead, and yet does not assume the political and military responsibilities which come with its newly acquired economic might. So far, despite the existence of two nuclear powers in Western Europe, and of a strong German conventional army, the Europeans have not been willing or able since 1954 to move toward a more independent European defence posture. This failure has inhibited Europe's ability to play a more significant role in world affairs. In addition, there has been reluctance in some European nations to make an adequate defence contribution to NATO. Having been addicted to a regime of "security on the cheap" by being protected from the outside, certain European countries tend to resist serious efforts aimed at increasing their defence role and expenditures; indeed, when they have agreed to do so, it has more often been to placate the United States than to contribute to their own defence.

II.8 Politically, the development of the transatlantic relationship has been equally unbalanced. European political cooperation in the field of foreign policy has improved during the past decade, but Europe has yet to become a consistent actor in its own right on the world scene. Europe has often tended to criticize US diplomatic moves without presenting a credible alternative, given its own military weakness and its internal divisions. The end result has been to damage political relations between the allies further, without reinforcing the stature of the West as a whole in world affairs.

II.9 In short, the relative decline of US leadership has not been compensated by a substitute European leadership and consequently Western power has been diluted. Small wonder that such an unbalanced transatlantic relationship, in which no clear leadership emerges, produces strains and frustrations on both sides.

The Soviet-American balance of power

II.10 These tensions are magnified by the consequences of the other historical trends—namely, the change in the US-Soviet balance of power. The key dimension is the growth of Soviet military strength. Its impact has been particularly painful in terms of transatlantic relations: increased Soviet pressures and leverage in Europe, as well as doubts about the credibility of the US security guarantee, have led to even more tension and strains among the allies.

II.11 In the security areas, the fragile "balance of imbalances" (whereby the Warsaw Pact's conventional superiority was to be compensated by Western superiority at the nuclear level) upon which NATO's flexible response posture has been based since the 1960s has been altered—some would say broken—by the magnitude of Soviet military expansion at every level over the past decade.

II.12 At the conventional level, the 1970s saw an aggravation of the military situation. As the military balance shifted further in favour of Soviet forces this was no longer offset by NATO's qualitative superiority. Indeed, in certain areas Soviet weapons are now superior (armoured vehicles, artillery), and in others (such as anti-tank weapons, tactical aviation) the gap is being closed.

II.13 At the theatre nuclear level, NATO's long-standing advantage in battlefield weapons has been eroded by obsolescence and the introduction of new Soviet systems. At the level of long-range theatre systems, the Soviet advantage has been increased since the mid-1970s by the introduction of the long-range Backfire bombers and Mirved MRBMs (the SS20).

II.14 At the strategic level, the Soviets have achieved "parity" in central systems since the early 1970s. Having deployed at least three new types of heavy ICBMs (the SS17, 18 and 19), they will, in theory, be in a position by the late 1980s to destroy most American ICBM silos in a first strike. This imbalance should, however, be corrected toward the end of the decade by the deployment on the US side of new mobile MX ICBMs, as well as Trident II SLBMs, and possibly a new strategic bomber.

II.15 The combined impact of these factors has been to call into question the validity of NATO's strategy of flexible response. As the increased Soviet conventional superiority is no longer compensated by US nuclear superiority at higher rungs of the escalation ladder, the Europeans may have in fact become even more dependent on US first use of nuclear weapons. This "solution" could become less credible, given strategic nuclear parity and the absence, for some years, of an effective LRTNF force on NATO's side. Nor is it very desirable for the Europeans to be excessively dependent on first use, since they would have to bear the consequences of "limited" nuclear exchanges on their continent.

II.16 This shifting military balance, and the resulting doubts about the credibility of the US security guarantee, have also played an important role in worsening the climate of transatlantic relations as a whole. American leaders, while recognizing this problem, have called for greater European efforts on defence and a greater solidarity with the United States in checking Soviet expansion. To a certain extent, such American criticisms—to the effect that Europe does not carry its share of the defence burden—are unfair, as they ignore the fact that the European share in total NATO expenditure has risen from 22.7 per cent in 1969 to 41.6 per cent in 1979. Conversely, while Europeans have been accustomed to paying a political or economic price for their protection, they have found that their protection has declined but that the price to be paid has increased. All these trends, if further developed, could increase the temptation in some European quarters, though in a minority, to envisage other types of security arrangements on the Continent.

Détente, arms control and the Third World

II.17 Europeans have tended lately to give more emphasis to the other aspects of security, namely negotiations and arms control, in particular with respect to LRTNF and confidence-building measures. Their hope has been that the dialogue with the Soviet Union would be kept going and that such discussions would eventually check the growing imbalance of their defence posture. This renewed European interest in arms control talks, which is noticeable even in France, coming at the very time when the US has become increasingly disenchanted with such negotiations, has caused further transatlantic strains, as with the failure to ratify the SALT II Treaty.

II.18 Similar tensions occurred in the political area, in the aftermath of the Soviet invasion of Afghanistan, with Americans and Europeans openly disagreeing as to the nature and future of détente. In contrast to Americans, for whom détente with the Soviet Union in recent years has been primarily a military and global geostrategic matter, détente has had a much more tangible and direct meaning for Europeans. For certain European nations, in particular Germany, détente translates into political relations, but also into economic and human day-to-day relations. In short, the United States has more of an option than the Europeans of discarding previous concepts of détente, playing down arms control and seeking alternative ways toward a stable relationship with the USSR, including an increase in the American defence budget. For most Europeans, however, the end of détente in Europe would result in a political, economic, human, and security price. Rightly or wrongly, most European governments and public opinions as a whole have thus far been reluctant to pay it.

II.19 The crisis triggered by the Soviet invasion of Afghanistan also served to highlight another set of transatlantic dissensions involving the whole question of how to respond to challenges to Western security arising in the Third World. Far from generating a new sense of cohesion within the Western Alliance in the face of a blatant military action by the Soviet Union in a country formerly non-aligned and situated close to a region vital to the West as a whole, Moscow's intervention in Kabul sharpened divisions and tensions within the West and forced them into the open. Not only did Afghanistan catch the West unprepared, but for several months after the invasion itself Western reactions to the crisis appeared to be chaotic and often contradictory. Initially, America and Europe, as well as Europeans themselves, were publicly divided on most counts: on the significance of the Soviet move itself; on its impact on East-West détente, particularly in Europe; on the type of response that was called for (economic sanctions, symbolic boycott of the Moscow Olympic Games, military presence in the Persian Gulf area).

II.20 To a certain extent, the Afghan crisis has served as a painful learning process for the Alliance. By the beginning of 1981, a certain degree of cohesion has been restored within the West. There is now a growing realisation of the seriousness of the security threat in the Persian Gulf region. The Soviet invasion of Afghanistan underlined the magnitude of Soviet military presence and capabilities in the immediate periphery of that area and the deficiencies of the Western military posture in a region vital for Western economic survival. The Soviet threat to Western interests compounds the local instabilities evidenced by the Islamic Revolution in Iran and by the Iran-Iraq war, both of which have a potential for increasing East-West confrontation in the region.

II.21 Nonetheless, strong differences remain between the United States and Europe, as well as among the Europeans themselves, on the political and military implications of security challenges arising in the Third World. At stake is the extent to which Europeans are to involve themselves militarily in the management of such threats. Politically, a key issue, yet to be answered, relates to the impact of Third World crises on European détente. Here, the problem of "divisibility of détente" is likely to create further tensions between the two sides of the Atlantic, as well as, perhaps, between major European nations.

Policy implications

II.22 The main conclusion to be drawn from the above analysis is that the crisis in American-European relations is the product of complex historical and structural trends, involving societal, political, economic and military dimensions. It will not go away by resorting to short cuts and other political or military "quick fixes".

II.23 Perhaps the most important policy implication therefore is that the days of the old "Atlantic" system, based on U.S. predominance and its corollary, European reluctance to take wider responsibilities, are over. Given today's international realities, neither the United States nor Europe can be expected to face the challenges of the 1980s on its own. This means that a new Alliance relationship has to be built and that it will have to be based on a more equal

participation on both sides. In short, NATO must for the first time become a real alliance, not just one characterized by U.S. dominance and European passivity. Clearly, a great deal of skill and effort will be needed in order to establish a new framework of co-responsibility such as is proposed in this Report. For such a relationship implies that diversity—and at time disagreements—will occur. However, it is important to recognize at the outset that diversity can be reconciled with a modern alliance among democratic nations in the nuclear age. Indeed, diversity may also benefit the collectivity, as individual members provide their experience and special competence for the common good of the whole alliance.

II.24 In preparing for this new relationship, it is also important to be fully aware of the obstacles on both sides of the Atlantic. The quarrels of the past few years have left severe scars on both sides. This explains a tendency evident in Europe, as well as in America, to present the problem of the transatlantic relationship in conflictual and generally over-simplistic terms. It is particularly striking to note that the prevailing debate over the future of American-European relations (as well as East-West relations) revolves around two opposite nostalgias:

II.25 On the European side, it is the nostalgia for the far-reaching détente hoped for in the early 1970s, which would allow the Europeans to continue to enjoy the benefits of their peace whatever happens in the rest of the world, and whatever the Soviet Union does elsewhere. Hence, the temptation in some quarters in Europe to want to continue détente at any cost; to underestimate the Soviet military threat on the Continent; to play down events occurring in Third World regions; and to consider American reactions to Afghanistan as a short-lived sign of displeasure or as an overreaction to be shortly followed by a new era of US-Soviet détente.

II.26 A similar phenomenon is at work in the United States. Here, a growing aspiration is to return to the era of US supremacy and absolute leadership in world affairs. This is translated in the resurgent tendency to consider every event in the world in purely East-West terms, and the use of force as the panacea for most such issues. In this context, the behaviour of Europeans is viewed with increasing irritation as evidence that Europe is already sliding toward "appeasement", "finlandisation", or "self-neutralisation" with the Soviet Union. Given such perceptions, there is in some American circles the temptation to pressure Europe into action and, failing that, to leave it to its own fate.

II.27 There is a clear danger that such tendencies at work on both sides of the Atlantic, if left unchecked, could lead to a collision course. It is therefore urgently necessary to define common objectives and to coordinate the various Western policies with respect both to the Soviet Union and the Third World. At the same time, it is equally important to establish as soon as possible the new consultation and co-ordination mechanisms necessary to achieve these goals and implement these policies.

III. WESTERN SECURITY AND THE FUTURE OF EAST-WEST RELATIONS

The challenge

III.1. An unprecedented accumulation of challenges threatens Western security. The traditional East-West conflict has assumed new proportions at the global and European level. For the West, future Soviet policy will remain a central concern for the coming years. No doubt, the Soviet Union is characterised by striking weaknesses. As a historical experiment, Communism has failed, given its continued repression of the individual and its dismally bad economic performance. The allegiance of the different non-Russian nationalities within the Soviet Union remains doubtful and so does its hold on its socialist allies. Nevertheless, the Soviet Union has performed strikingly well in the military field, where it has been amassing power to a degree that a shift of the world military balance in its favour has been occurring. Its military capabilities pose a threat to its neighbours and can increasingly be projected on a global scale.

III.2. Given the basic unattractiveness of the Communist model the problem does not consist of the traditional threat of world revolution. Nor is the danger of an imminent attack on Western Europe the most pressing problem. Rather there are risks of turmoil in Eastern Europe as a result, for example, of Soviet intervention in Poland. There are also increased dangers arising from Soviet involvement in Third World areas, some of them vital to the economic survival of the West. The interaction of local instabilities and exploitation by the Soviet Union could threaten the economic lifelines of the West. A spillover into Europe of actions like the invasion of Afghanistan can never be excluded.

III.3. It is by no means clear how the Soviet Union is going to use its capabilities and what its intentions are likely to be. Moreover, since the succession to the present leadership may produce change, one can at this stage at best only speculate about future Soviet policy. However, past Soviet behaviour has shown that the USSR is willing to use its military power not only within the Warsaw Pact, but as was the case with Afghanistan, also outside, suggesting a greater willingness to take risks than in the past.

III.4 In view of these uncertainties it remains the task of prudent Western policy to be aware of the Soviet Union's internal weaknesses and, indeed, to use them for selective co-operation if this can induce moderate Soviet behaviour and mutually advantageous arrangements. At the same time it cannot be ruled out that a pessimistic view of the future may come true. *Consequently the West must be prepared for the eventuality that the considerable Soviet military capabilities may, in fact, be used inside or outside Europe. Through its own policy the West must, above all, seek to deter and counter such use in the traditional East-West arena and beyond.*

III.5 It is the combination and accumulation of different threats that make the present crisis so profound. In some cases, such as Europe, the West is dealing with well-known issues, though each presents new and dynamic aspects. But in other cases, such as Soviet intervention in the Third World, the interaction of local instability and the East-West conflict as well as the Western oil supply means that the West is dealing with essentially new problems for which it has no established institutions or habits of co-operation, let alone well-thought-out policies. *In essence the West is, therefore, called upon to redefine and expand the basic rules and institutions of its security system.*

111.6 In addressing these questions our countries have to take into account that the new problems often uncover differences in perspective and interest within the West which have to be taken seriously. *Consequently, the management of internal diversity, allowing for some differential approaches must be a necessary corollary to the concerted response to the external threats which our strong common interests dictate.*

Past policies

III.7 For more than a decade the West has tried to respond to the Soviet challenge by a combination of defence policy within the Alliance and a policy of selective co-operation with the Soviet Union generally referred to as "détente policy". The underlying assumption of the West's policy vis-a-vis the East always was that a military balance would be the prerequisite for an active détente policy. In reviewing the achievements of this period it must be said that although arms control policy became one of the key elements of détente policy, it produced only limited results. While it led to some agreements in the field of strategic weapons, the policy failed to induce the USSR to limit the overall momentum of its strategic build-up or to show restraint in areas of the Third-World. In Europe the Vienna negotiations on mutual troop reductions reached no binding results. It was, however, during this period of Western détente policy and efforts at arms control that the Soviet Union went through an extraordinary expansion of its military armaments at the strategic nuclear, theatre nuclear and conventional levels.

III.8 Yet it would be wrong to forget the dividends that détente has brought about, notably in Europe. It resulted in the Four-Power Agreement on Berlin and thereby stabilised what used to be a constant crisis spot. The movement of persons between East and West considerably increased, particularly between the two German states, where prior to the Polish crisis about 8 million West Germans annually visited the East and more than a million East Germans visited the West. The Eastern trade of West European countries grew drastically during this period; so did American trade, though to a lesser degree and with a larger share of grain exports, while European trade focussed on machinery and equipment in exchange for growing imports of raw materials and energy.

III.9 During the phase of détente, relations between the United States and the Soviet Union improved for a limited period, notably in connection with various bilateral agreements on nuclear weapons and the expansion of trade. The emigration of Russian Jews increased considerably. The Final Act of Helsinki concluded an important round of multilateral negotiations involving all European countries, the United States and Canada. For the first time, this document defined basic rules of East-West relations which, even when not fully observed, at least provide a yardstick for measuring the behaviour of states. Public opinion and governments in the West, as well as dissidents and forces aiming at change within the East, in fact successfully used the Helsinki Act to bring pressure to bear on the Soviet Union.

III.10 Between the United States and Europe considerable differences in perceptions exist with regard to the impact and future prospects of détente. In the case of arms control the opinion prevails in the United States that it was not only relatively unsuccessful but that it contributed in a major way to the neglect of important requirements of defence and partially explained the decrease of defence expenditure, as well as the relative decline of American military power during the 1970s. In Europe, however, arms control, despite its limited results, is generally regarded both as a means to assure political support for defence and as a political means to communicate with the Communist countries. Détente policy in general is seen in Europe as having had positive results; while it literally affected millions of Europeans—Germans in particular—détente did not affect the average American and has therefore been generally perceived as a failure.

III.11 When East-West relations deteriorated in recent years, particularly under the impact of Soviet actions in Third World regions, these different experiences often produced mutual misgivings. It has led to American allegations that Europeans selfishly protect their gains of détente while leaving the burdens of confrontation with

the Soviet Union to the United States. It has led to European concerns over American cavalier treatment of detente. Europeans hesitated to risk achievements which they considered not only to their own advantage, but to that of the West as a whole.

III.12 Throughout the 1970s the security policy of the Alliance as a group focussed on Europe. Wherever East-West issues arose outside the NATO area, it was the United States that primarily dealt with them. The Arab-Israeli war of 1973 made Europe and the West as a whole aware of its dependence on Middle-East oil. Although already at that time the possibility of an East-West conflict growing out of an American-Soviet confrontation in that area was clearly visible, the lesson was either forgotten or relegated by the Alliance to the level of the superpower relationship. The invasion of Afghanistan by the Sovite Union has fundamentally changed this perspective. Whatever the motives for the Soviet move, its consequences are obvious: it brings the Soviet Union nearer to an area of fundamental importance to the West and of inherent instability. The invasion has therefore produced a new arena of the East-West conflict outside the traditional NATO area and imposed it on the existing regional conflicts.

Problems of the military balance

III.13 The effectiveness of nuclear deterrence remains crucial for the preservation of peace. At the level of *strategic nuclear weapons* it is well-known that the Soviet Union has been able to achieve parity. In fact, during the 1980s it will acquire the theoretical possibility of destroying the land-based American ICBMs in a first strike, although opinions differ both within the United States and Europe as to the probability and relevance of such an eventuality. *Various plans are under consideration—such as the construction of a new MX missile and of the Trident II, as well as efforts to decrease the vulnerability of land-based ICBMs—which aim at the preservation of the credibility of the US deterrence system. The evolving American strategic doctrine is intended to serve the same purpose. It is essential that the United States make the necessary efforts to assure a strategic nuclear balance.*

III.14 *At the same time, the continuation of the* SALT process *is desirable. Before entering a new round of SALT negotiations, the new Administration should carefully review its defence policy and long-term arms control objectives. Given political realities, the SALT II Treaty will need some modification; the protocol which is due to expire at the end of this year should be re-examined to see if the issues it deals with can be resolved in a longer-term arrangement. A strategic dialogue between the superpowers enhances East-West stability. This dialogue should not block US programs needed to maintain a strategic balance. At the same time it could help prevent an unchecked growth of nuclear capabilities which could undermine the credibility of nuclear deterrence. It could inject greater predictability and verifiability in the arms programs of both sides. It could produce agreements that might lessen the cost of the arms race and allow the West to devote more resources to other urgent defence needs. Moreover, in view of the widening difference of perception between Washington and Moscow as to what the basic purposes of strategic arms control should be, it is important that there be a dialogue between the two superpowers on conceptual principles and strategic doctrines. Such a dialogue should be conducted on the US side in such a way as to respect the interests of its Western allies.*

III.15 There has been a continuous growth in the Soviet Union's capacity for the full range of theatre and tactical nuclear weapons, in particular *long range theatre nuclear forces*, notably the SS-20, for which there is no equivalent on the West European side, and the Backfire bomber. These have been perceived as an increasing threat to Western security. With the realisation of parity at the strategic level, an excessive imbalance in Europe could undermine the credibility of the American deterrent. Moreover, a continued growth of the Eastern arsenal might—through its mere threatening proportions—undermine the psychological basis of stability in Europe.

III.16 In failing to respond to the signals of concern which the West has addressed to the East since 1977 on LRTNF weapons, the USSR has disregarded basic prerequisites of stability in the nuclear age. The negotiation proposals which the Soviet Union advanced shortly before the NATO decision of December 1979 on LRTNF only revealed an intention to split the Western Alliance rather than to reduce its superiority or to reach an agreement aiming at equal security for both sides.

III.17 The NATO decision of 1979 providing for a parallel approach to produce 108 Pershing-II and 464 ground-launched cruise missiles and to begin to deploy them four years later unless successful negotiations with the Soviet Union permit a reduction of these figures, represents a sensible and politically practicable approach to dealing with the problem created by the Soviet Union.

III.18 There may, however, be differences of perspective between the United States and Western Europe which could pose serious problems in implementing the LRTNF program. To many Europeans the program is primarily a vehicle to get the Soviet Union to the negotiating table rather than one that will have to be implemented to some extent in any case. They often view the process of negotiations as a substitute for an adequate nuclear deterrence. By contrast, in the United States there is some tendency to focus on the procurement part of the NATO decision and to pay less attention to the arms control offer, thus underestimating the precariousness of the domestic compromise behind this decision is a number of West European countries.

III.19 *It is therefore essential that the members of the Atlantic Alliance pursue the implementation of both elements—weapons deployment and arms control negotiations—of the NATO LRTNF decision. The Alliance should support the concept that Germany should not become the sole country to station these weapons so as to maintain the multilateral character of defence and to preserve incentives for other European countries not to slip into a withdrawal from a responsible contribution to European defence. For these reasons, it is important that the United States, backed by its NATO allies, makes an honest and determined effort to pursue arms control negotiations, and that Belgium, Britain, Germany, Italy and the Netherlands effectively contribute to and prepare for the deployment of the systems to the extent necessary. Protracted and basically unsuccessful arms control discussions must not delay beginning the deployment of these weapons beyond the end of 1983. Indeed, only the clear resolve of the West to proceed is likely to stimulate serious negotiations.*

III.20 The issue of LRTNF cannot be seen in isolation from the situation at the level of strategic weapons. An attempt to maintain the effectiveness of nuclear deterrence in the European theatre through a mixture of arms control and deployment of weapons only makes sense if at the strategic level an approximate parity can be preserved. *It is therefore essential that the United States takes all steps necessary to maintain the credibility of its deterrence, through defence programs and doctrines as well as efforts to reach arms control agreements.*

III.21 A renewed malaise about the use of nuclear weapons in Europe is likely to characterize the domestic politics of various European countries and could result in opposition to the deployment of nuclear weapons and to the option of a first use of nuclear weapons. This is a recurrent issue, for each generation has to contemplate for itself the horrible prospect of nuclear war and come to grips with the relevance of nuclear deterrence for the preservation of peace. *However, the opposition to the nuclear option must be confronted with the fact that a decrease in reliance on nuclear weapons could only be achieved through an enlargement of conventional options lest deterrence be undermined. Such a shift would be possible only if significantly larger resources were allocated to the conventional sector, even though that course would be rendered more difficult by the cost of modern weaponry and the downturn of our economies.*

III.22 As to the level of *conventional forces* in Western Europe, present trends in the military balance continue to favor the Warsaw Pact. This must be a cause of serious concern and should lead to a resolute response on the part of NATO. Small and even slow changes over a period of years are having a cumulative effect. There were 26 Soviet divisions in Eastern Europe in 1967 while now there are 30, and they have become larger in size. NATO has traditionally sought to offset numerical Warsaw Pact advantages in manpower by a qualitative superiority in its conventional weapons. But in recent years the Warsaw Pact has been modernizing and expanding its conventional arms more rapidly and effectively than has NATO. In some areas (for example, surface-to-air missiles, certain armored vehicles and artillery) Soviet weapons are now superior, while in other fields, such as tactical aircraft, the gap in quality is being closed. The advent of new weapons systems, particularly precision-guided munitions and new anti-tank and air defence missiles, may cut into the Warsaw Pact's advantage in tank and aircraft numbers, but in general the pattern is one of a military balance moving steadily against the West.

III.23 The temporary diversion of Soviet military forces toward internal policing in the wake of the Polish crisis, accompanied by the possible unreliability of the Soviet Union's allies in joining in any aggressive design against the West, may, for the time being, reduce the risk of a surprise attack on Western Europe. However, this situation is unlikely to modify the long-term military balance.

III.24 *It is therefore important that all members of the Alliance fulfill the pledges made by NATO members in 1977 to increase real spending on defence by 3 per cent per annum.* Not to maintain the commitment would have deleterious consequences for NATO military capabilities. It would also send the wrong signal to the Soviet Union. The effect of such a failure upon the United States must also be given serious consideration. If at a time that a new American Administration increases US defence spending substantially, the Europeans are seen as sliding backwards, there could be growing resentment. Such a debate about troops and "burden sharing", coming on top of other differences between Europe and America, could have grave consequences for public support for the basic American commitment to European security.

III.25 *At the same time, we should not be mesmerized by any magic figure. What really matters is the effective contribution to defence.* Furthermore, many Americans, in accusing Europeans of an insufficient contribution in defence, are not aware of the fact that it is the United States which, as a result of a decade-long decrease of defence expenditure (in real terms) until 1978, is in burning need of catching up again, whereas most Europeans have, during the same period,

consistently increased their defence expenditure.

II.26 Given American-European differences on what constitutes an overall and adequate contribution to security policy, on the necessary shares and on the NATO commitment to increase defence spending, *we recommend the following efforts:*

First, that there be a review within NATO countries and with Japan of what constitutes a contribution to Western security (such as defence, aid, special measures), and how each has performed in the past;

Second, that all NATO countries continue the Long Term Defence Programme to produce greater military readiness, improve reinforcement capacities, increase reserve forces and mobilization techniques and make greater savings through improved military cooperation and rationalization of weapons research, development and production;

Third, that the United States urgently undertake a review of its military manpower policies so as to be able to raise the calibre and number of its military personnel. The shortage of experienced personnel with critical skills and the decline in reserves should be addressed through better compensation. But if the all-volunteer armed forces cannot provide adequate numbers of qualified military manpower, there should be a return to some form of compulsory nondiscriminatory military service.

The role of arms control

III.27 *In the nuclear age, burdened by growing conventional military capacities and increasing political conflicts, arms control must continue to have an important place in Western policy. Despite understandable disappointment about its modest success in the past, the West should continue to pursue a policy that seeks to prevent the outbreak of war, dampen an ever more costly arms race, and enhance predictability and stability. A failure to pursue such a policy would also seriously undermine the legitimacy and political support of Western defence policy, especially in Europe, where the idea of arms control has taken strong roots. However, the West must be more realistic about the potential of arms control. It is meaningful only if placed in the context of a sensible security policy. In the future, arms control initiatives have a chance of unified Western support only if they clearly contribute to security. NATO must attempt to integrate security and arms control in its approaches to the Soviet Union, as was attempted in the December 1979 decision on LRTNF.*

III.28 *Besides negotiations on limitations of strategic weapons and LRTNF (dealt with above), arms control in the conventional field focussing on Europe should be pursued. MBFR should abandon its emphasis on factors such as numbers of soldiers and focus on real military capabilities, notably of launching surprise attacks, as was done in the Western proposals for the Vienna negotiations of December 1979. The French proposal of confidence-building measures in the first phase of a Conference on Disarmament in Europe would extend the geographic reach of such measures to include the Western part of the Soviet Union and could therefore improve stability in Europe.*

East-West relations and trade

III.29 Many of the hopes and assumptions underlying détente have been shattered. East-West relations, after having deteriorated during the last years, are in a crisis. Détente has been undermined further since December 1979 by the invasion and continued military occupation of Afghanistan and by the threatening Soviet posture to invade Poland to reverse internal developments there. The measures of the German Democratic Republic to decrease intra-German human contacts, combined with threats to withdraw from agreements securing free access to West Berlin and intra-German co-operation, also threaten important Western interests.

III.30 The question of how to conduct East-West trade, credit policy, technology transfer and participation in economic boycotts has been particularly divisive between the United States and Europe. This is explained in part because of differences in situation: the share of foreign trade as a percentage of GNP is several times higher in Western Europe than in the United States, and this is true in particular for the share of Eastern trade. Europe primarily exports industrial plant and machinery, and the United States, grain. In terms of exports, each is therefore vulnerable in different ways to abrupt changes due to political decisions.

III.31 The role of trade, in particular imports, in the evolution of East-West relations is also viewed differently in a philosophical sense on the two sides of the Atlantic. One school, which is prevalent in the United States and also has some support in Europe, would argue that trade favours the Soviet Union; its discontinuation should be used as an instrument of retaliation or deterrence to influence Soviet behaviour. An increase of trade creates a one-sided dependence which could be exploited by the Soviet Union to put pressure on Western countries. Dependence on energy makes a country much more vulnerable than dependence on machinery. A further growth of East-West trade should be avoided. This school is increasingly concerned with the West's growing dependence on Soviet energy and views negatively an increase of gas supply from the Soviet Union to a number of West European countries. An opposing school, whose views are prevalent in Europe, would argue that trade relations are beneficial to *both* sides; they create an interdependent relationship in which Soviet interest in Western machinery corresponds to West European interest in importing energy. This school would argue that the Soviets are unlikely to exploit their delivery of raw materials to put political pressure on West Europeans since this would undermine its crucial imports of Western technology. If the USSR were to cut the supply, it could only happen under extreme circumstances for which the West must have emergency procedures. Moreover, this school argues that if trade links are cut off, an essential motive for moderation in Soviet behaviour vis-á-vis the West will be taken away and those forces inside the Soviet Union who advocate autarky will be strengthened.

III.32 There has been considerable disagreement over economic sanctions, their relevance and effectiveness after they were proposed and implemented in the wake of the Soviet Union's invasion of Afghanistan. In fact, the controversies as well as the sanctions, such as the grain embargo of the United States, continue and create divisions among both Europeans and Americans, although it has been the United States government which pressed most vigorously for a tighter policy. Today there is a general willingness on both sides of the Atlantic and in Japan to tighten the export controls on technology that can be used for military purposes and not to undercut US sanctions. Moreover, there seems to be a basic agreement among NATO countries to apply economic sanctions in case of a Soviet invasion of Poland.

III.33 *In the current circumstances, CO COM restrictions on technology with a direct military bearing should be maintained and even tightened. There is a striking absence of inter-allied dialogue on these issues at the highest political level. It is not enough to address these problems in COCOM. They should be placed in the broader context of a long-term policy vis-a-vis the Soviet Union. We therefore recommend that the Western governments make a special effort to review the relevance of trade, credit policy, technology transfer and joint ventures in East-West relations in order to shape a long-term strategy and create a better understanding in the political, business, and agricultural communities, as well as in the public, for these issues and for the legitimacy of whatever measures may be necessary in the future. These questions should be reviewed at the seven-nation summits.*

Poland

III.34 The West is now faced with a crisis in Poland. The improvement of East-West relations in the 1970s contributed to the liberalisation and evolution in Poland which is now at stake. A Soviet operation to stop by brute force what is obviously a desire for change of the Polish population could not fail to create the most dangerous and unpredictable situation in Eastern Europe, as well as strong reactions from Western Europe and the United States. Such a move would be viewed as a threat to European security by Americans and Europeans who have deep historical links and feelings of solidarity with the Polish people. They would regard such Soviet behavior as gross violation of the Final Act of Helsinki and of international law.

III.35 *In order to prevent a further decline of the economic situation in Poland which might eventually precipitate chaos and Soviet intervention, the West should give aid to Poland, while clearly signaling to the Soviet Union that it would have to carry the sole burden of supporting Poland if ever it were to invade.*

III.36 In order to help deter the Soviet Union from invading Poland, the West must—as it has begun to do—make clear in advance that such a step would have grave consequences for the Soviet position in the world and relations with the West. The mistake of not communicating possible Western reactions to an invasion of Afghanistan prior to the event must not be repeated. In the event of a Soviet intervention in Poland, the West should withdraw from the Madrid follow-up conference of the CSCE and sever scientific contacts useful for the Soviet Union. In addition, the West would have to cut down drastically economic interaction with the Soviet Union. This should mean a continuation of the export ban on grain for the United States and an equivalent reduction of European and Japanese exports to the Soviet Union. It is important that a policy of sanctions, if applied, distributes the cost in a fair and effective way. Other steps should be considered jointly by the United States, Western Europe, and other major countries such as Japan. If an invasion takes place, we recommend that a NATO summit convene immediately to consider measures appropriate to the new international security situation.

U.S.-Soviet relations

III.37 Few factors are as important for the preservation of world peace as the American-Soviet relationship. Both in resisting Soviet expansion through appropriate means and through co-operation and dialogue that seek a limitation to conflicts, the United States will be a decisive factor in determining the course of global developments. *In our judgement, a substantial improvement in the United States' capacity to act worldwide is necessary. This does not mean that the United States need aim at the restoration of its overwhelming superiority of the post-war period, nor that American allies abdicate their own responsibilities. It would be unfortunate if the present and proper desire to restore American strength should rule out a serious dialogue between the two superpowers. Indeed, the restoration of strength should be seen as a foundation for making such a dialogue more equal and constructive.*

Reconciling security policy in the Middle East and Europe

III.38 Western security is increasingly threatened by conflicts in the Middle East. As will be explained below, local conflicts or internal instability threaten the oil supply of the West and may lead to consequences of catastrophic proportions, while

at the same time offering new options for the Soviet Union to expand its influence by indirect means or direct intervention. Local conflicts can therefore escalate to an East-West conflict in that area and might possibly spill over into Europe. Two consequences follow:

III.39 First, neither NATO, which focuses on defense of the Atlantic area, nor the American-Japanese security treaty, which deals with the defence of Japanese territory, is adequate to deal with the new challenges to Western security. Additional approaches are needed, which we propose below.

III.40 *Second, the West must carefully consider what connection can and should exist between East-West relations in the Middle East and in Europe. At the political level, no distinction should be made between the Middle East and Europe when it comes to assessing offensive Soviet behavior and its impact on Western policy. Since an expansion of Soviet influence in the Middle East does effect Western security, the Soviet Union must be held accountable in general political terms, and Western steps in the political and economic fields, including the general range of East-West relations, must be considered.*

III.41 *When it comes to any connection between the Middle East and Western Europe at the military level, the West has an obvious interest in maintaining an option of limiting any possible military conflict between East and West to the Middle East, and of preventing its automatic spill-over to Europe. That means that the necessary preconditions be created to keep the option of such a separation of military conflict. It lies in the logic of a policy of geographical limitation of military conflict in the Near East that Europeans and Amercans maintain a military capacity either within the Middle East or available in regions outside the European theatre in order to act without automatically using forces stationed in Europe. Such forces should be designed to deter a conflict and contain it if necessary, as well as to help achieve political objectives in the region.*

Domestic support

III.42 The present challenge to Western security policy is fundamental and requires a reconsideration of basic rules and institutions of Western security policy. Moreover, scarce resources have to be reallocated and new responsibilities shouldered in a situation where the political willingness may be low and the economic possibilities limited. *It is therefore necessary that a full-fledged debate in which our publics are squarely faced with the new realities be started by political leaders. For these reasons, these questions must not remain an arcane subject of governments. but should be introduced as a matter of public discourse in parliaments and the media.*

IV. THE SECURITY SITUATION IN THE THIRD WORLD

The definition of Western interests

IV.1 We have already noted that many of the most urgent and difficult issues that arise between Europe and the United States lie outside the main European theatre. The instability of the developing world during the last decade has coincided with two other important trends in world affairs—first, the increased dependence of the developed world upon the developing for its sources of raw materials and energy; and second, the growing pretension of the Soviet Union to global power, which causes the Russians to take a direct interest in situations which they would previously have considered beyond their sphere. We have already discussed in broad terms the difficulties that this conjuncture causes as the result of a general tendency of the United States and the European countries to give different weights to the various regional factors and to the Soviet threat.

IV.2 Divergences also occur because of differences in the relative importance of particular areas to the interests of the United States and its partners. Central America and the Caribbean, for instance, are regarded by the United States for obvious geographical reasons as crucial, whereas to most Europeans they are somewhat peripheral. Southern Africa, on the contrary, because of historical factors and long economic connections, is of more interest to Britain, Germany, and France than to the United States. Even where there is a high degree of common interest, those differences that exist may be of considerable significance. An interruption in the flow of oil from the Middle East, for instance, would cripple European and Japanese industry in a very few months, whereas the United States, with its more diverse sources of supply, could survive for rather longer. The perception of this fact makes Europeans more nervous than Americans about the short-term consequences of military operations launched in the area by the West; though we note below that the US economy is, in reality, deeply dependent upon Gulf oil.

IV.3 There are, of course, many parts of the world over which there is no divergence at all, and others where divergence, if it occurs, need cause no great concern. Where there is no strong Western interest and no Soviet interest either, there is no need to argue. We can also agree to take a relatively relaxed view about a number of so-called "Marxist" regimes in the Third World whose relationship with the Soviet Union is tenuous and cynical. Speaking merely in ideological terms, the Soviet drive in the Third World has been unsuccessful, even where underpinned by arms sales and political relations. Moreover, from an economic point of view the Soviet cupboard is bare and unattractive, and there are many countries whose political label as such does not hurt Western interests.

IV.4 More acute problems arise in two areas. The first is where the Soviet Union intervenes in a Third World country and threatens its neighbours either through its own military pressure or through surrogates, such as the Cubans or Vietnamese. We have seen in recent years a disturbing series of such interventions in Africa, the Middle East and parts of Asia. There are different perceptions in the West about the strategic significance of these actions, but specific Western interests, such as vital mineral resources, can be put at risk by them.

IV.5 *Where Western interests are at stake, Europe and the Unietd States should agree on the need for a Western capacity to intervene and should take steps to improve their machinery for doing so. Where no immediate interests are threatened, it may well be that the United States and certain European countries will wish to resist the Soviet threats on geopolitical grounds, whereas other European countries will see no such necessity. Some such divergences seem to us inevitable and not necessarily disastrous.* The case of the Vietnam war showed that even on a subject of very high political sensitivity, governments and public opinions on both sides of the Atlantic were prepared to accept, in practice, that unanimity within the Western world is as impossible as unanimity within the United States.

IV.6 The second category of problems arises where Europe and the United States share vital interests in an area, and may be in dispute not only about how they can best be defended but also about how the cost of defending them is to be divided. At present the main region in this category is that of the Middle East and the Gulf. The United States, Europe, and Japan share a vital interest in keeping Middle East oil flowing. Europe's and Japan's dependence on oil from the Gulf hardly needs further emphasis. But it would be entirely false to regard the secure supply of this oil as exclusively a European or Japanese matter. The loss of this source would also have calamitous consequences for the United States, both in its effects on the American economy and because the blow which it would inflict to the entire Western economic position would strike at the heart of America's security. It is not simply "European oil" that the United States is being asked to defend in the Middle East.

IV.7 The threats to ths supply come from four main directions:

The menace of Soviet military power: This Russian threat to the Gulf region is not unique in the past hundred years, nor, given the difficulty of the terrain, is it easy from the Russian point of view, to put into effect In recent years, however, a greatly increased Soviet arilift capability and increased presence in and around the region enhances Soviet capacity to move military forces into the area. The invasion of Afghanistan has shown that this is a capacity which the Soviet Union is prepared to use in certain circumstances. Moreover, the Iranian Revolution and the Iraq-Iran war have created conditions in which the Soviet Union might be tempted to intervene (and would certainly find it easier than in the days of the Shah to do so).

National and ethnic rivalries: The tensions which produced the Iraq-Iran war are by no means the only ones in the area that could at some time lead to open hostilities in the region and consequent disruption of oil production.

Revolution or internal disruption: There are at least half a dozen countries in the area whose regimes must be regarded as precarious in a ten-year perspective. Any of these upheavals could lead to interruption of oil supplies.

A new Arab-Israeli war: In case of a new conflict it should be assumed that the West would continue to supply Israel with materiel and the Arab states would retaliate with at least a partial oil embargo against the West. It is also true that even without a resumption of hostilities, the failure to solve the Palestinian problem is a permanent contribution to the instability of the whole area.

The role of military force

IV.8 The exact role which military force should play in deterring these threats, or in coping with them if they materialise, is debatable. While the arguments are in part dependent on the detailed scenarios envisaged, a Western military presence would in itself, for certain countries in the region, have a positive political effect and a reassuring impact. Many in the West believe that there should exist a large Western capacity to confront the Soviet army in the area. This would not necessarily entail a large Western presence permanently stationed in the Gulf region—rather an ability to deploy a very considerable force rapidly in case of a large Soviet invasion. The main argument in favour of provision on this large scale is that no small capability would be able to hold the position without early recourse to nuclear weapons. This latter is undesirable in itself and possibly lacking in credibility. On the other side, it can be maintained, first, that even a substantial expeditionary force would be at a serious geographical disadvantage and that the nuclear threshold might have to be crossed in any case; and second, that it might aggravate the situation of the West in the area by necessitating large bases and a general "visibility" which some of the countries involved do not desire at present.

IV.9 *Whatever is thought of these arguments, it is clear that, given the immense uncertainties in the region, there is a need for some Western forces. The Soviet leaders have shown themselves extremely reluctant in the past to get into a direct military confrontation with the other superpower. Their knowledge that an American force with Euro-*

pean and Japanese support, however inadequate for prolonged hostilities, was poised and ready to throw itself in the path of the Soviet advance would therefore have an important deterrent effect. A Western force might also prove invaluable in the face of other threats than that of Soviet military intervention. In the case of national rivalries leading to war in the Gulf area a Western naval task force able to keep open the Straits of Hormuz might well be required. In the case of domestic turmoil threatening Western interests we should need a capacity to intervene on the side of any friendly power which called for help. There are also many possible eventualities calling for a quick deployment into the area for defence of oil fields.

IV.10 *If it is conceded to be in the interest of all Western countries that some Western capability for deployment should exist, it follows that those who benefit should bear some of the cost of its maintenance.* The question is, what constitutes a significant and appropriate contribution? The problem here is to some extent one of public opinion, which in America tends to see Europe's willingness to take part actively in the protection of "European" oil in the Middle-East as a major touchstone of the present relationship. *From this point of view the more visible and directly related to the Middle East problem the European contributions, the better. Even marginal assistance from Europeans would be symbolically important in maintaining alliance cohesion, in demonstrating to the Soviets and the countries of the region that the West is united, and in persuading American public opinion of the utility of a major US effort in the area. From a European point of view it is also necessary to ensure, by direct involvement, that the arrangements should be based on shared responsibility and truly collective decision-making.* A new reality needs to be given to these principles where the vital interests of the whole Western world are at stake. In the following section, we put forward proposals to achieve this goal.

IV.11 *These considerations point to active European military participation on the ground and at sea in the Middle-East.* There are political and practical difficulties about this approach. The non-American powers have very limited resources available for long-range operations, and it is arguable that for them to try, at this stage, to create a capacity which would make any appreciable difference to the military situation would cost money that would be better spent on improving the quality of their forces in the NATO sector. Moreover, in the case of Germany and Japan there are considerable misgivings inside and outside these countries about whether they should assume a global military role for the first time since the end of World War II.

IV.12 *For these reasons it seems best to adopt a mixed policy whereby the main burden of putting together a rapid deployment force falls on the United States, but the Europeans make some contribution in terms of men and materiel where this is appropriate (as in the case of Britain and France) and/or provide en route facilities for the American rapid deployment force, contribute to the enhancement of the existing Western bases in the area, permit some American resources to be released for the Middle East.* A European presence in the area would be politically and symbolically important. It would underline to European publics their stake in the area; it would greatly help to gain American Congressional and public support for a major US effort in the area; and it would therefore improve American-European relations.

Nonmilitary policies

IV.13 Military methods are not, however, the only ones on which the West must rely in order to maintain stability in the Middle-East. Other persuasions, such as economic and technical assistance, political support, and mutually acceptable financial arrangements with the oil-producing states, play an equally important part; it is indeed here that the European states have their main historical expertise. *The overall strategy (which has to be shared) ought to include the strengthening of all economic relations, especially trade, with the Arab countries; an increase in economic aid to be distributed to the strategic countries of the area—particularly to Turkey, Pakistan, and Egypt; the judicious use of arms sales. The entire West has a major interest in an intensive, cooperative approach to the recycling of Arab oil revenues.* The expense involved in such programmes could be very considerable (the economic support of Turkey, one of the most crucial countries in the area from the Western point of view, cost the German Government DM 1.1 billion in 1979 and 1980). Hence the European countries will find it hard to maintain the effort politically if they receive no credit for it from the American government or American public opinion.

IV.14. *It is urgently necessary that the new US Administration and its European partners reach an understanding as to what is meant by "burden sharing" and what is to be "counted" in any calculation of contributions. Once the ground rules are broadly agreed, it is also essential that the Administration take some responsibility for persuading the Congress and the American public that in their view a "fair" contribution is being made.* "Burden sharing" should not mean American soldiers and European money. Nor should it mean American and European men and money and American reproaches.

The Arab-Israeli conflict

IV.15 The other, more controversial, contribution which the European countries can make to stability in the Middle East is in relation to the Arab-Israeli dispute. The conflict has already resulted in four bloody wars since 1948, all having repercussions far beyond the immediate area of hostilities. Quite apart from the possible consequences of another outbreak, the prolonged crisis is a permanent embarrassment to the West. The issue can always be used as a stick to beat us with, and every Arab government favourable to the West is thrown on the defensive by their own feelings as much as by the knowledge that there are 650,000 Palestinians dispersed throughout the Gulf area. Failure to solve the Palestinian problem therefore presents a constant major obstacle to stabilisation of the region. At the same time it must be recognised that a solution of the problem would not of itself restore stability to the Middle East or ensure a flow of oil.

IV.16 In recent times the question of the best approach toward an Arab-Israeli peace settlement has become a matter of controversy between Europe and America. Significant differences do exist, yet in the final analysis they are based more on tactics and negotiating strategy than on fundamentals. On both sides of the Atlantic there is an understanding of the need to:

Continue urgently to work toward a political settlement;

Recognise the legitimate rights of the Palestinians to some form of self-determination (whether on the basis of the Camp David Agreements or the Venice declaration);

Safeguard the existence of the state of Israel with secure boundaries;

And keep Soviet influence in the area limited.

IV.17 Yet many Europeans argue that American administrations are politically unwilling to put adequate pressure upon the Israeli government to make necessary, but in their view justifiable, concessions. Motivated by a desire to improve their relations with the Arab states, to make their own contribution to the peace process, and out of a certain sense of urgency, the Europeans have undertaken a number of independent initiatives, most notably in the Venice declaration of the European Economic Community in June 1980. The Americans tend to see separate European initiatives as meddling in an already highly complex and sensitive negotiating process. They view such European initiatives as unhelpful and they point out that it is the United States, not the Europeans, which has the economic, political and military assets to support the negotiating process.

IV.18 Clearly there is now a pressing need to revitalize the peace process. While the peace agreement between Egypt and Israel was a considerable achievement, the Camp David Agreements have neither been the major breakthrough that was once euphorically acclaimed, nor the total failure that some have professed.

IV.19 *Additional approaches and new ideas are needed. The United States should be more attentive to European contributions. The Europeans, in turn, should seek to enhance, rather than make more cumbersome, the already difficult quest for peace.*

Other factors

IV.20 It should be noted that there are some very distinct assets for the West in the Middle East. The biggest of these is the feeling of fear and hostility which the activities of the Soviet Union arouse in most parts of the region. This is not simply the result of the apprehension of Soviet military power, but is firmly rooted in an Islamic distaste for "godless" communism. To the Arab world the Soviet invasion of Afghanistan was a religious as well as an international outrage. *We believe that the West should give encouragement and military assistance to the liberation movement in Afghanistan which is still fighting Soviet occupation. At the same time, the West should support diplomatic approaches which would result in Soviet withdrawal and a guaranteed non-aligned status for the country. The maintenance of Pakistan's security should be an important part of Western security.*

IV.21 Long-standing political and economic ties of the United States and Europe with most Middle Eastern countries, and European Community economic and trading links of all kinds also present a counterweight to Soviet influence. *It is clearly in our interests to foster these assets as much as possible, not only because they contribute to the political stability of the area but because military operations, if they ever became necessary, could only be satisfactorily conducted with the cooperation of the countries involved.*

IV.22 It cannot be in the interests of the West as a whole to be so dependent on a single area for its economic security. This dependence can only be reduced, however, on two conditions. *The first is that the United States, Europe and Japan make greater efforts to build up their stockpiles and to agree on how to share alternative sources of oil supply, particularly in time of crisis. The existing mechanism is too weak and should be complemented by a general crisis management mechanism. The second is that all the Western economies should make determined and indeed dramatic efforts to diversify out of oil and into other kinds of energy. This must include nuclear energy.* These are not processes that can be left entirely to the natural forces of supply and demand. The removal of regulations inhibiting the exploitation of oil and gas resources, particularly in the United States, should improve supply. But a good deal of purposeful intervention in the market by governments is also essential. *This cannot be achieved without a willingness on the part of political leaders*

in America, Europe and Japan to press farsighted and often unpopular policies.

V. CONSULTATIONS AND CO-ORDINATION

The need for new approaches

V.1 *The West, faced with the new and more demanding world described above, needs to improve its consultations and policy co-ordination. Present institutions are inadequate and at times lack relevance for the 1980s. We need to create new mechanisms for truly collective decision-making, and make them efficient. At the global and strategic level, heads of state and government must give more concentrated attention to fundamental long-term considerations. At the regional level, we need to devise new methods for the management of crises as well as for making assessments of evolving political and security situations. Finally, we need to develop better methods of co-ordination with NATO, between NATO and the groups of principal nations as proposed below, and with the European Community.*

V.2 As we have suggested, political and security considerations are becoming increasingly interconnected at the global level. Many of the most sensitive issues for Western Europe and the United States will emerge in the Third World, especially when local or regional disputes become entwined with global East-West competition. Yet there are no well-developed processes for continuous European-American discussions on political security problems outside the limited geographic area prescribed by the North Atlantic Treaty Organization. If there had been more effective consultations on Afghanistan in the months before the Soviet invasion, the Western response would have been marked by less friction and more coherence.

V.3 Recent developments have also served to uncover and accentuate differing perspectives and interests within the West on policy toward Eastern Europe and the Soviet Union. Some divergence is natural, given the changes in the world and the Atlantic Alliance since the creation of NATO at a time of a widely perceived direct Soviet military threat to Western Europe. It is a mistake to ignore those differences or paper them over. A first step toward a more healthy Alliance is to recognize them. A more differentiated approach in dealing with the array of political, economic and military issues may well be in order. But we need also to define better the overriding common interests of the West and how best to promote them. We can then proceed to bridge differences or manage them. We can reconcile policies, including differentiated ones, to produce a more concerted wetern posture.

V.4 This requires a more intensive system of consultation and policy co-ordination than we have today. Of course, improved consultations will not eliminate real differences. Effective mechanisms will not guarantee good policies. No single innovation or reform of existing institutions will provide a "quick fix." And a bureaucratic preoccupation with procedures can drain attention from our substantive challenges. But without better cooperation, our challenges will be magnified and our responses will be poorer. *We need to cultivate a new process, perhaps through a period of trial and error, that is flexible and works at several levels.*

V.5 *In creating new mechanisms it is essential that we be sensitive to the interests of all Western nations, particularly some of the smaller members of the Alliance which will not always be included.* Their concerns must, of course, be taken into account, but it should be recognized that in fundamental ways their concerns are not separate from those of the major members of the Alliance. And we expect that the need to limit the nations participating in some consultations, on the basis of those which have greater responsibilities or roles to play, will be understood by all.

The role of NATO

V.6 *With regards to NATO, there must be closer co-ordination of Western policies toward the East, especially* before *separate national decisions are taken. The experience with the imposition of political, economic and technological sanctions on the Soviet Union following the invasion of Afghanistan underlines this need. There should be improved management within the Alliance so as better to co-ordinate and interrelate the spectrum of political, military and economic policies. NATO is more than a military grouping. It is a political alliance of like-minded states. Economic security is of increasing importance to its members, but economic policies should not be allowed to undermine overarching political concerns. The allied governments, at a higher political level, must develop a more comprehensive approach toward the protection of their interests, one not narrowly based upon considerations of the military threat.*

V.7 *We do not propose that NATO undertake major institutional innovations, concerning political and security developments in the Third World.* To enlarge formally its geographical responsibility would require fundamental amendment of the Treaty and ratification in fifteen parliaments. Such change would be highly contentious. It would also detract from the prime purpose of NATO, to defend the territories of its member states.

V.8 At the same time, the organization must be more concerned with the growing threats to Western security from developments in the Third World. *Accordingly, NATO should expand the process of joint assessments and consultations on those Third World developments which directly affect the security interests of its member states.*

The seven-nation summits

V.9 The seven-nation summits of leaders of the advanced industrialized countries, which began in Rambouillet in 1975, are another useful forum. They have certain advantages: they engage the political will that only heads of state and government can supply; they include Japan, Italy, Canada, as well as the President of the Commission of the EEC; and they are being regularized. On the other hand, they occur too infrequently to provide continuous co-ordination, and their high level limits them to general discussion. *The summits should continue to deal with vital economic and energy problems but the national leaders should also take the opportunity to discuss systematically broad geopolitical concerns and security matters.* At the Venice summit in spring 1980, for example, the leaders only discussed the urgent issues of Afghanistan and contacts with the Soviet Union outside the formal agenda.

V.10 *We propose that the seven-nation summits should from now on be devoted at least as much to political and security concerns as to economic ones. Political and security issues have become, in any case, increasingly inseparable from economic ones, and the summits could serve to link better the approaches in the two spheres. The political/security discussions should be about fundamentals. They should center on conceptual issues and overall strategy rather than the more tactical and technical questions which are the staple of NATO and other forums. A few illustrations suffice: the nature of the Soviet threat, as well as the longer-term strengths and vulnerabilities of the Soviet system; the issue of "linkage" between East-West arms control and Soviet global activities; the question of East-West economic relations; the role of China; the nature of changes in various regions of the Third World and the appropriate policy responses. The leaders could thereby provide a general sense of direction for subsequent discussions and implementation. These meetings should take place at least once a year. Special summits should be convened when the international situation requires it.*

V.11 *For these summits to be productive and to deal expeditiously but in some depth with important problems, it is essential that they be systematically prepared. This will require a clearer designation of the responsible government officials and perhaps some type of a permanent, though small, secretariat.*

The principal nations approach

V.12 *NATO and the seven-nation summits, even with these elaborations, are insufficient forums for consulting on political/security issues outside the Central Front. The primary mechanisms should be a group of the small number of principal nations which are concerned and prepared to take a direct role in dealing with a particular problem. The organizing principle would be to include only those countries which are able and willing to accept concrete obligations within the troubled area. Participation would be linked to the capacity and responsibility for action.* The question remains open whether some types of crisis, involving indirect threats but occurring within the European boundaries, might require similar procedures. We recognize that at least one such mechanism already exists, the Berlin working group of four nations, and that it has at times broadened its discussions beyond its original scope. However, in what follows the proposed approach focuses on Third World contingencies.

V.13 *The principal nations will vary according to the issue at hand. Nevertheless, we expect that the core group will usually include the United States, Britain, France, Germany, and Japan. Flexibility should be the watchword. A crisis in the Mediterranean, for example, should involve Italy and possibly other Southern European countries. One in the Pacific might well include Canada and Australia. Sometimes a principal nation group should be formed to deal wtih a specific crisis, and it would normally be disbanded once the crisis is over. In other instances, a principal nation group should be established to keep watch on a potentially troublesome area, undertake contingency planning, and deal wtih a crisis if it erupts. A "watch-group" might continue in being for some years but, like a crisis-related group, it would be wound up once the reasons for its existence no longer prevailed.*

V.14 We believe that Japan has now reached the economic and political stature whereby it must be fully recognized as an important world power. This brings to Japan new responsibilities as well as opportunities. Clearly it has a major interest in developments in the Persian Gulf region, even though it cannot be expected to undertake a military role in the area at this time. *Japan should be encouraged to participate* in the Western security system in such a way *as not to create difficulties for its Asian neighbours.*

V.15 *Specifically, we urge that a principal nations group be established immediately to deal with developments in the Gulf and South West Asia. This group should be of a continuing "watch" nature. According to the organizing principle suggested above, we recommend that the participating nations be the United States, Britain, France, Germany and Japan.*

V.16 *The new groups we propose should be kept separate from NATO. In any event some of the likely participants are not members. Nevertheless, the full North Atlantic Council, as well as the EEC, should be kept closely informed of the activities of any principal nations group.*

V.17 The important advances the EEC countries have made in coordinating their foreign policies must be recognized and

encouraged in the interests of the West as a whole. The activities of any principal nations group should not be seen as competitive to political co-ordination within the European Community. *At the same time we believe that this intra-European process should be complemented by early consultations and co-ordination with the United States, and sometimes Japan.*

V.18 *Principal nations groups should have two primary functions—crisis management and joint assessments. During a crisis, the group would co-ordinate policies and plan next steps; military officials might often be involved. Short of a crisis the role of the group should be the joint assessment of evolving political/security conditions in critical Third World areas. This would involve regularly scheduled consultations and contingency planning. The process could take place at three levels. One would be senior foreign policy officials with broad responsibilities. Second, and particularly helpful, would be those directly responsible for a specific region, such as the Middle East, Africa, or Asia—at present there are no regular effective mechanisms for continuing consultations among such officials. Third, the current, practice of meetings among officials responsible for Atlantic affairs should be continued. Where the international situation requires it, the heads of state and governments might meet on short notice.*

V.19 *A principal nation group dealing with an area should convene at the regional level at least twice a year with the more senior officials meeting at least once a year. Frank, in-depth discussions and exchange of appraisals are especially helpful before a crisis erupts so that longer-term issues can be identified and addressed.* In this manner, the habit of consultation and co-ordination will be inculcated. Governments thereby will be better informed of each other's views before national policies are completely formulated. When a crisis occurs, governments will be more likely to concert their actions. During a crisis the group, already established, can be quickly convened.

V.20 An additional advantage of such a process would be for the development of a better understanding of geopolitical appraisals and policy perceptions on both sides of the Atlantic. As the West Europeans make a larger contribution to the defence of Western interests outside NATO, the Americans can be expected to give substantially greater attention to European policies and interests, leading to genuinely shared arrangements and joint decision-making.

V.21 Public awareness of the consultations process would help create the domestic support for the sacrifices and collective actions which may be needed. *Obviously confidentiality must be maintained; it is not possible to conduct foreign policy without adequate secrecy. Along with effectiveness and a willingness to undertake responsibility, secrecy is one of the arguments for small groups. An important distinction should be drawn, however, between the substance and the process of consultations. It is important that our national publics and parliaments understand that the responsible nations are dealing jointly with political/security questions outside Europe and the NATO area.* This will help instill in our societies a sense of shared interests and common responsibilities which is insufficient today. At heart, we are talking about a process of public education which is necessary to the foreign policy requirements of the present and future.

ORDER FOR THE RECOGNITION OF SENATOR EXON

Mr. EXON. Mr. President, I ask unanimous consent that notwithstanding the present schedule I be allotted 10 minutes as if in morning business for the purpose of a rather short speech with regard to the introduction of a bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. EXON. I thank the Chair.

(The remarks of Mr. EXON relating to the introduction of legislation are printed under "Statements on Introduced Bills and Joint Resolutions.")

RECOGNITION OF SENATOR PACKWOOD

The PRESIDING OFFICER. Under the previous order, the Senator from Oregon is recognized for a period of time not to exceed 15 minutes.

ORDER FOR CONTROL OF TIME OF SPECIAL ORDERS BY SENATOR PACKWOOD

Mr. PACKWOOD. Mr. President, is there a series of special orders entered?

The PRESIDING OFFICER. There is a series.

Mr. PACKWOOD. Could I have the names of those to whom they are allocated?

The PRESIDING OFFICER. Following the Senator from Oregon under the previous order, the Senator from Minnesota (Mr. BOSCHWITZ) is recognized for a period of not to exceed 15 minutes; under the same order the Senator from Tennessee (Mr. BAKER) is recognized for a period not to exceed 15 minutes; likewise under the order the Senator from Alaska (Mr. STEVENS) is recognized for a period not to exceed 15 minutes; following that the Senator from Idaho (Mr. MCCLURE) is recognized for a period not to exceed 15 minutes; likewise the Senator from Texas (Mr. TOWER) is recognized for a period not to exceed 15 minutes; and following that the Senator from West Virginia (Mr. ROBERT C. BYRD) is recognized for a period not to exceed 15 minutes.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that all of the special orders listed for this morning, with the exception of that of the Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Texas (Mr. TOWER) be under my control.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

SALE OF F-15 AIRCRAFT ACCOUTERMENTS TO SAUDI ARABIA

Mr. PACKWOOD. Mr. President, we are about to consider the possibility of the sale of accouterments to the F-15 aircraft to Saudi Arabia, and I think before we enter into this agreement with Saudi Arabia it is wise to look back over what we have already agreed to do, what we hoped we would receive in exchange for what we have agreed to do, and what has happened.

In 1978, after extended debate on the floor of the Senate, we agreed to sell Saudi Arabia F-15 planes. They would be equipped with the AIM-7 Sparrow missile, and the AIM-9P3 Sidewinder missile. That was in 1978.

At that time, Secretary of Defense Brown said, and I am quoting:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of F-15.

At that time our willingness to enter into the sale of the F-15's and those missiles to Saudi Arabia was posed as a test of our good will and friendship with Saudi Arabia. They indicated to us if we were not willing to sell those planes they would certainly have to take that into account in their relations with the United States.

We hoped that Saudi Arabia would provide a moderate balance in the Middle East. We hoped that if we sold them the planes we might have some leverage to encourage them to further the peace process and the stability of the Middle East.

I would like to quote from some of the statements of Senators during that time. The senior Senator from South Carolina, Senator THURMOND, in supporting the sale:

> On balance, I believe these sales will give to the United States greater leverage in its efforts to bring about peace and stability in the Middle East and better protect Israel.

Senator HARRY F. BYRD, JR., the senior Senator from Virginia:

> The Saudis consider the fulfillment of such promise a basic test of whether their friendship with the United States and their policy is worthwhile.

Senator Henry Bellmon from Oklahoma:

> In my judgment, this action, which does not jeopardize the security of Israel, will help create a more favorable climate for negotiations and assist in the achievement of a lasting peace settlement.

Senator George McGovern:

> We need their continued good will and cooperation in restraining oil prices, stabilizing international monetary issues, and in moderating radical tendencies throughout the Middle East.

Mr. President, at that time, I opposed the sale of the planes to Saudi Arabia and I made the following statement:

> Saudi Arabia does not need the F-15's. In and of themselves, they do not need them for their self-defense. Whatever problems they may have in terms of internal security, whatever problems they may have with dissidents, whatever problems they may have with revolution are not going to be solved with F-15's. They may need Piper cubs and halftracks and machine guns and walkie-talkies, and the ability to search house to house, but they are not going to do that with an F-15.

When I called this to the attention of the Senate, it was long before the seizure of the grand mosque in Mecca when, indeed, advanced fighter aircraft were utterly of no use to Saudi Arabia.

I continued my statement in 1978 by wondering when this country was ever going to learn that you do not further the interest of this country by subjecting ourselves to blackmail.

In 1978, Saudi Arabia had already increased the price of oil six times from roughly $2 to $12 a barrel. That was an example of their friendship.

They indicated in 1978 that they

would not look kindly on us if we refused to sell them the F–15's. I said at that time, "Will this country never learn that appeasement does not work?" I said I thought we would have learned that in 1938 at Munich when somebody said "All I want is the Sudetenland." We, unfortunately, learned that he wanted much more.

In 1978, the Saudi Arabians said, "All we want are the F–15's." All they were asking us to do was to barter away our integrity for energy. We did not think they needed the F–15's. Any rational assessment of their defense needs in 1978 did not include F–15's. But we were afraid that they would cut off our oil supplies if we would not sell them the planes and so we prepared to barter integrity for energy.

I concluded with this statement:

The demands are not going to stop with these plans or with this country. If we approve the sale of these planes tonight, it is not just a sad day for Israel: it is a sorry day for America because we will have forgotten the lesson of Munich and instead we will now have to learn the lesson of Riyadh.

What has Saudi Arabia done for us, for peace in the Middle East and elsewhere since the sale in 1978? They have condemned the Israeli-Egyptian peace treaty. They have broken relations with Egypt. They have led the Arab political and economic boycott of Egypt. They oppose the use of the Suez Canal by Israeli ships. They call for a holy war against Israel. They finance the PLO and other terrorist organizations and they have increased the price of oil from $12 a barrel to roughly $30 a barrel in the intervening 2 years.

Now they are going to cut their oil production because they are afraid there is a glut of oil in the market and unless they cut their production there might be a tendency for prices to drop. This is what Saudi Arabia has done.

This is what Saudi Arabia has done for us in response to our act of generosity in agreeing to sell them the planes. I hesitate to think what they might have done had we not sold them the planes.

Now they refuse to even negotiate with Israel for peace.

In the Washington Post this morning is the following story:

SAUDI GOVERNMENT REJECTS SUGGESTION OF PEACE TALKS

RIYADH, SAUDI ARABIA, March 23.—Saudi Arabia today rejected any direct or indirect peace negotiations with Israel before it completely withdraws from lands occupied in 1967.

In a statement broadcast by state-run Riyadh Radio, Saudi Information Minister Mohammed Adbo Yamani said the kingdom "has no desire to negotiate either directly or indirectly with Israel before the Zionist enemy's total withdrawal from occupied Arab lands."

Yamani was responding to a weekend statement by Israeli Labor Party leader Shimon Peres, who against the background of the Israeli election campaign suggested that Riyadh should join Middle East peace efforts.

It reminds me about the old canard about negotiating with the Communists: They will negotiate. What is theirs is theirs; what is yours is negotiable.

Now, with that background of having done almost everything to destabilize peace in the Middle East since 1978, the Saudi Arabians come back and ask for what they said they did not want to ask for in 1978 and we are prepared to sell them what we said we would not sell them in 1978. We are going to sell them what are known as the conformal fuel tanks, fuel tanks that are added to the plane to substantially increase its range. The F–15 today has a range of about 600 to 800 miles. With the fuel tanks added, about 1,500 additional gallons of fuel, it increases the range from 30 to 80 percent, depending upon the flying conditions and the payload that you are carrying.

Mr. TOWER. Will the Senator yield for a question?

Mr. PACKWOOD. Yes. Not on my time.

Mr. TOWER. Mr. President, will the Senator tell me whether or not the Saudis are currently charging the OPEC price for oil or an amount greater than the OPEC price?

The PRESIDING OFFICER. Will the Senator suspend so that the Chair can propound a question to the Senator from Texas?

Is it the Chair's understanding that the Senator from Texas acquiesces, in questioning the Senator from Oregon, that the question will be propounded on the time of the Senator from Texas?

Mr. TOWER. The question will be propounded on my time.

The PRESIDING OFFICER. I thank the Senator from Texas.

Mr. TOWER. Mr. President, I wonder if the Senator from Oregon would tell us whether or not the Saudis currently charge more than the OPEC price, charge the OPEC price, or less than the OPEC price for oil; whether or not Saudi production was not increased to make up for the deficit in oil suffered as a result of the Iraq-Iran war; and, indeed, if Saudi oil production is not greater than what their economic requirements are?

Mr. PACKWOOD. Mr. President, the Saudis are currently charging $30, sometimes $32 a barrel, which will vary a bit from week to week. They have announced that they are going to decrease their production, because their production at the moment is above what they regard as their economic necessity.

Mr. President, we are going to sell them, or at least they are asking and we intend to sell them, these fuel tanks to dramatically extend their range. We are going to sell them the new Sidewinder missile, known as the AIM–9L. This missile has a great advantage over the other missiles that we agreed to sell them in 1978.

Although they are heat-seeking missiles, the new one that we plan to sell them in so sensitive to heat that it can tell the difference in heat caused by the leading edge of the wing of an airplane. Consequently, you can shoot straight at an airplane and the missile is so sensitive it can hit the plane going head on.

The old Sidewinder missiles were not that sensitive to heat and you had to maneuver yourself behind the plane in order to be able to shoot at the exhaust from its jet. I do not need to tell anyone who is listening to these comments the difference in the fighting capability between a missile that can be fired from the front or the back and one that requires your maneuvering behind an enemy airplane before you use it.

We now also plan to sell Saudi Arabia some type of airborne early-warning aircraft. We have two types, what is known as the E–2C Hawkeye and the E–3A AWAC. The AWAC is perhaps the more advanced of the planes in that it can be refueled in the air. It allows radar surveillance of areas 200 miles or more.

In essence, it would allow Saudi Arabia from the air to monitor all of Israel if they want to. If they want those, we will sell them. It has not been agreed yet which kind we will sell them because they have not decided which kind they will mostly need.

And we are going to sell them tanker aircraft. Again, it has not been decided what kind. It will allow the F–15's, in addition to the fuel tanks that will be added to them, to be refueled in the air and further extend their range.

Interestingly, bomb racks, racks that are added to the plane to allow the carrying of either 18 or 22 bombs for air-to-ground bombing, we are not going to sell them at this time. Interestingly, the administration has said it is not considering selling the bomb racks, but I will recall to memory what we said in 1978 about what we were not going to sell the Saudi Arabians. I will predict that if we sell the F–15's and the new Sidewinder missiles, the fuel tanks and everything else that they want, we will one day also sell them the bomb racks.

I will further predict this: It will not be the last request that Saudi Arabia asks of us, and we will give in, we will give in, and we will give in again. If there is another war in the Middle East, the equipment that we sell to Saudi Arabia will be used against the Israelis by Syria or Iraq who will obtain it from the Saudis. If that is our idea of peace in the Middle East and furthering peace in the Middle East. I fail to grasp it. Now that Egypt and Israel have signed what we hope is a lasting peace accord, the biggest single stumbling block to peace in the Middle East is Saudi Arabia.

If Saudi Arabia would be willing to negotiate with Israel in the hopes that peace might be obtained, it would not be long before Jordan would also negotiate.

If Saudi Arabia would quit financing the PLO, quit financing the purchase of weapons of war by other intransigent nations, there would be peace in the Middle East.

Mr. President, my standard as to whether or not we should sell planes to Saudi Arabia is not whether they think they need them for their defense. It is, Have they given any indication of wanting to help the peace process in the Middle East? That would be the thing that would be most helpful to our foreign policy as we try to draw a line against the Soviets. I have seen no indication at all that Saudi Arabia has any desire to further that peace negotiation and initiatives.

Mr. PRESSLER. Will the Senator yield?

Mr. PACKWOOD. I yield 5 minutes to the Senator from South Dakota.

Mr. PRESSLER. Mr. President, I would like to applaud my colleague from Oregon, and I thank him for yielding. I, too, am opposed to the sale of the F–15 and related equipment.

Mr. President, the dissemination of arms in the Middle East should proceed only after the most careful analysis has been given to the possible consequences of such a decision to United States, Israeli, and other interests.

I am frankly concerned about the sale of extremely sophisticated fighter plane equipment to nations in the Middle East.

The proposed sale to Saudi Arabia includes AIM–9L air-to-air missiles and sensor tactical packs (FAST) which would greatly increase the range and the firepower of the 60 F–15 fighter planes purchased in 1978 by Saudi Arabia. This new equipment thus doubles the combat range of these planes to about 1,000 miles and strengthens their offensive capability to almost the equivalent of U.S. F–15's and F–16's.

Mr. TOWER. Will the Senator yield for a question?

Mr. PRESSLER. I will yield on the time of the Senator from Texas.

Mr. TOWER. Let me ask the Senator from South Dakota if the AIM–9L, which we propose to sell to Saudi Arabia, is a more sophisticated weapon than the AIM–7 Sparrow with which the Israeli F–15's are armed.

Mr. PRESSLER. My response to my good friend from Texas would be that in terms of a discussion of sophisticated weapons he is probably better informed on the immediate question than I am, but it has been my feeling that Saudi Arabia could very easily become another Iran, in my view. Whatever the level of sophistication, I am very hesitant to sell more military equipment to them at this time. I have consistently opposed sending into the Middle East weapons of this type.

Mr. President, Senators PACKWOOD and BOSCHWITZ also have spoken strongly on this matter. I think one of them will be addressing more specifically the details of the particular airplanes. I would like to proceed, again on my own time, Mr. President, with my statement.

I congratulate these Senators from Oregon and Minnesota for taking leadership roles on this issue of arms sales to the Middle East. Like the 23 Senators who have served South Dakota since statehood was achieved in 1889, they have tried to offer U.S. foreign policies alternatives which might maximize peace objectives in other areas of the world by minimizing the introduction of new offensive weapons into crisis situations.

As a veteran of the military conflict in Vietnam, I have felt that the world is always made safer or better by the strengthening of our alliances with those countries who have proven to be our allies. To be sure, freedom always needs strengthening and the protection of human dignity and decency may at times require major weapons investments, but military arms may not be the best way to obtain solutions in all cases. Political, diplomatic, and economic development efforts are needed to attain a lasting Middle East peace solution.

This latter effort will require support from not only the United States but all of those developed nations which depend on stability in the Middle East. The United States cannot go it alone in bolstering its many friends in the Middle East. Certainly it is legitimate to expect our NATO allies, Japan, and other prosperous countries to contribute more to Middle East peace and development efforts. Perhaps their recognition of our great common interest in a nonmilitary solution to the problems in that region would help much more than increased armaments to achieve our common goal.

Mr. President, let me summarize my feelings at this time by saying very firmly that I oppose this sale and I oppose the sale of the related parts.

Let me also say that I think that if we were to go into such a sale, we should have certain commitments from Saudi Arabia as to when the planes would come off the ground and, indeed, if our country were challenged in that area of the world, would they be willing to assist us. Do we have those sorts of commitments? I do not see those kinds of commitments.

Also, let me say that it has long been my feeling that our one staunch ally in that area of the world is Israel, one that we can count on.

The people of my State have not appreciated the repeated rounds of oil increases.

The PRESIDING OFFICER. The time yielded by the Senator from Oregon to the Senator from South Dakota has expired.

Mr. PACKWOOD. I yield 1 additional minute.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for an additional period of 1 minute.

Mr. PRESSLER. I thank the Chair.

The people of my State of South Dakota have been increasingly outraged by the continually increasing prices of oil. We have been put into a blackmail position.

Mr. TOWER. Will the Senator from South Dakota yield for a question?

Mr. PRESSLER. I do not have time to yield at this time. I have less than 30 seconds left.

Mr. President, that concludes my statement on the Middle East.

I believe I have used up my time. I yield back any remaining time to my friend from Oregon.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. I believe the Senator from North Dakota wanted 3 minutes. I yield.

Mr. BURDICK. Mr. President, I wish to add my voice to those who have expressed opposition to this sale.

In looking at U.S. interests, in studying U.S. requirements, one cannot escape the conclusion that this sale, as it stands, does not serve American purposes or advance American interests. Moreover, it threatens the security of Israel and fuels an arms race which can escalate to the point where it could end in an explosion. And no explosion, no war, will serve American interests in peace and stability.

Enhancing the capabilities of the F–15's the United States sold to Saudi Arabia 3 years ago contradicts the uses to which Congress and the American people were assured they would be put. We were assured they were to be defensive weapons; now they are being modified to serve in an offensive capacity.

Furthermore, the sale calls into question the commitments of the U.S. Government. In 1978, the U.S. Government justified its sale of F–15's to Israel by saying that offensive equipment would not be shipped to Saudi Arabia. It made the same assurances to the Congress. Now, 3 years later, the executive branch is asking that offensive equipment be sold. Whatever assurances made this time will have less meaning than the ones made the last time. The word of the United States becomes uncertain.

I add, too, that the Saudis are under no real threat of invasion from their neighbors. With Iran and Iraq preoccupied with their war, the threat which once emanated from those two countries is virtually nonexistent. Soviet forces in Afghanistan are more than 1,000 miles from Saudi Arabia's borders. Even if the Soviets should move toward the Gulf, it is U.S. forces in the Indian Ocean which would bear the burden of stopping such aggression.

It is conceivable that the present Saudi regime may have to face internal strife, but that kind of internal strife would not be eradicated by the Saudi's purchase of additional sophisticated arms.

As I mentioned previously, the Saudi arms buildup does present a threat to Israel. While Saudi Arabia would not move alone against Israel, Saudi arms could well be transferred to others.

Finally, there are those who argue that we must approve this sale in order to show our good will toward the oil-rich Saudi nation. However, after the original sale of the F–15's, Saudi Arabia threatened to cut back on the world supply of oil if the United States continued filling its strategic petroleum reserve.

Now, because of an oil glut on the world market, Saudi Arabia is threatening to cut its production. There is no available evidence that this sale or any other sale will have the effect of insuring American oil supplies.

For all the reasons I have outlined in my statement, Mr. President, I oppose this sale, and I hope my colleagues in this Chamber will join my opposition.

Mr. PACKWOOD. Mr. President, I yield 1 minute to the Senator from Missouri.

Mr. EAGLETON. I thank my colleague.

SAUDI ARABIAN ARMS SALES

Mr. EAGLETON. Mr. President, I rise today to join my Senate colleagues in denouncing the pending sale of equipment to Saudi Arabia intended to enhance the offensive capability of the F-15's that the United States will provide Saudi Arabia as part of the 1978 Middle East arms sale package.

When I voted to support the proposed

sale, I characterized my decision as being "more agonizing than any other I can recall since coming to the Senate." Acknowledging that the Saudis exercise domain over one-fourth of the free world's known oil reserves, I stated:

Better that we provide a means for the Saudis to defend that vital resource themselves than face the possibility of someday being forced to commit our own military forces.

I wish to emphasize the word "defense" today as I did then.

Mr. President, I can appreciate that the Soviet invasion of Afghanistan heightens tensions in an already turbulent region of the world. However, it was clearly understood by the President, the Congress, and the American people that the sale of the F–15's to the Saudis was for purely defensive purposes. To modify now the Saudi F-15's so as to give them an offensive capability would be a direct violation of that understanding.

It is just the type of equipment the Saudis are seeking that sparked heated debate during Senate consideration of the proposed sale. As one who reluctantly supported the sale of the planes—and only after receiving assurances from the administration that no attempt would be made to increase the range of ground attack capability—I am dismayed that any such request has not been rejected outright.

I shall not belabor the point, Mr. President, but I should like to enter into the RECORD two letters I authored—one written to President Carter and one written to President Reagan—that I feel adequately express my feelings on this matter.

Mr. President, I have written to two Presidents of the United States on this subject matter: On June 19, 1980, six then Members of the Senate—Senators Magnuson, EAGLETON, MATHIAS, LEAHY, INOUYE, and Culver—all six of whom voted for the F–15 sale, but voted for it with the firm assurance that those F–15's would not be enhanced to have an offensive capability—wrote to then President Carter protesting that sale at that time.

A second letter was sent February 6, 1981. Three Members of the Senate—EAGLETON, INOUYE, and LEAHY—wrote to President Reagan to the same effect.

I ask unanimous consent that the two letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., June 19, 1980.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are gravely concerned about reports that the Administration is considering a request by Saudi Arabia to purchase modification equipment for the F–15 aircraft the U.S. agreed to provide as part of the 1978 Middle East Arms Sale package. We urge you to deny this request.

It is this type of equipment—namely additional fuel tanks and bomb racks—that sparked heated debate during consideration of the proposed sale. The major contributing factor to Senate approval of the sale was a clear understanding that, as Secretary Brown stated in his 9 May 1978 letter to Chairman Sparkman, "Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F–15." Any modification of the planes to enhance offensive capabilities would be a direct violation of that earlier understanding.

We appreciate that heightening tension in the Middle East and Persian Gulf is cause for Saudi concern, and we can understand that these new tensions necessitate a Saudi review of its defense needs. Nonetheless, we point out that the spirit of the Arms Sale agreement precludes the transfer of any offensively-enhanced F–15s to Saudi Arabia.

We hope that you will clarify to the Saudi Government the nature of the agreement reached during Senate consideration of this matter, and reject without delay their request for aircraft modifications.

Very respectfully,

CHARLES MCC. MATHIAS, JR.,
U.S. Senator,
WARREN G. MAGNUSON,
U.S. Senator,
PATRICK J. LEAHY,
U.S. Senator,
THOMAS F. EAGLETON,
U.S. Senator,
DANIEL K. INOUYE,
U.S. Senator,
JOHN C. CULVER,
U.S. Senator.

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., February 6, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: During the course of his February 3rd news conference, Secretary Weinberger indicated that he views with sympathy the controversial Saudi Arabian request to purchase modification equipment for the 60 F–15 Eagle aircraft the U.S. has agreed to provide them. As three members of the Senate who voted to support the 1978 Middle East Arms Sale package only after receiving assurances that Saudi Arabia would not receive such equipment, we are compelled to express our concern.

It is a matter of record that the major contributing factor to the Senate's close vote of approval of the sale was a clear understanding that, as former Secretary of Defense Harold Brown stated in his 9 May 1978 letter to then Chairman John Sparkman, "Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F–15."

As we informed President Carter by a letter at the time this request first surfaced, we consider any modification of the planes to enhance offensive capabilities to be a direct violation of that earlier understanding.

We appreciate that heightening tension in the Middle East and Persian Gulf is cause for Saudi concern, and we can understand that these new tensions necessitate a Saudi review of its defense needs. Nonetheless, we point out that the spirit of the Arms Sale agreement precludes the transfer of any offensively enhanced F–15s to Saudi Arabia.

We hope that you will clarify to the Saudi Government the nature of the agreement reached during Senate consideration of this matter, and reject without delay their request for aircraft modification.

Very respectfully,

THOMAS F. EAGLETON,
U.S. Senator.
DANIEL K. INOUYE,
U.S. Senator.
PATRICK J. LEAHY,
U.S. Senator.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum without——

Mr. TOWER. If the Senator will withhold that request, Mr. President, I yield myself 2 minutes of the time allotted to me under the order and reserve the remainder of that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. The speakers have failed to note that the Saudis have increased their production, and incurred serious criticism at home for having done so, to make up for the deficit as a result of the Iran-Iraq war. In fact, they have been a moderating influence on holding prices below what they would be otherwise and do currently sell their oil below OPEC prices.

Another thing that has been ignored by the speakers is that the situation has vastly changed since 1978. They pretend that there is no change, that the threat has not increased. I simply say, Mr. President, that the principal threat in the area is the Soviet Union. In 1978, they were not in Afghanistan. In 1978, we had a strong ally in Iran. In 1978, Israel was still threatened by the possibility of its large neighbor, Egypt, once again waging war against it. The situation has changed dramatically.

In fact, Mr. President, we had better improve the capability of the indigenous forces in that area to defend their interests, or else, what has been suggested by the Senators who have been speaking is that we must do it with American Forces instead.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, I appreciate the Senator's yielding.

Mr. President, there are those who seek to make this issue a matter of partisan confrontation. If such a struggle is allowed to dominate our consideration, there will be no winner; not Israel, not Saudi Arabia, not the administration, not the Congress, and certainly not the United States. This is an occasion not for open conflict based on partisanship, but for rational and sensitive efforts to reconcile our differences. Any U.S. decision in this area will have far-reaching implications for ourselves and for our allies, and certainly for the security and stability of this vital region of the world. It is imperative that we weigh our choices carefully, that we not act in haste, but that we do act with prudence and foresight.

With that in mind, I join my colleagues in an expression of concern based on a number of problems we see in the proposed sale of fuel tanks and Sidewinder missiles to Saudi Arabia. Many of these concerns are familiar, but they bear repeating.

In 1978 Congress was told that the sale of F–15's was necessary for the defense of Saudi Arabia, and that the Saudi request for these airplanes was a litmus test of the U.S. relationship with that country. Approval of the sale would encourage moderate and supportive policies from Rivadh, while disapproval risked pushing them toward accommodation with the Soviets. There were assurances that the

Saudis would be more supportive of the Middle East peace process; they would soften their public attitude toward Egypt and President Sadat's courageous policies; they would back off from their support of the PLO; and they would exercise a moderating influence within OPEC on oil price increases.

It is now 2 years later——

Mr. TOWER. Will the Senator yield for a question?

Mr. KASTEN. Mr. President, I prefer to yield when I have finished my statement. I shall be pleased to yield at that time on any questions anyone may have.

It is now 2 years later and, unfortunately, we have seen little from the Saudi Government which would back up those assurances. In addition, they condemned our rescue mission to Iran and permitted the shipment of Soviet supplies through their territory to Iraq. They also have been less than helpful in our efforts to establish U.S. facilities in the gulf region, while allowing Soviet overflights of their country.

Mr. President, despite this record, we are hearing the same arguments in favor of providing Saudi Arabia with systems that substantially enhance the F–15's capabilities. Again, we are being told that this is a litmus test of our relationship with the Saudis. I believe it is incumbent upon this administration to make it unmistakably clear that such litmus tests are two-way matters, and, frankly, I wonder whether or not the Saudi Government has forgotten that.

We are historically obligated and morally committed to the State of Israel. Her value as a strategic asset and stable ally is unquestioned and irreplaceable. Any action by the United States that undermines her security is intolerable. Moreover, any action that might be seen by others as a lessening of our commitment to Israel is unacceptable. In this regard, it must be clearly understood that, for the first time, when this sale goes through, Saudi Arabia will become part of Israel's strategic consideration. This would undoubtedly require additional strategic plans which will place another defense burden on her.

Mr. President, in closing I wish to express the necessity that this sale be part of plans now being developed for a U.S. strategic approach to this region.

I recognize, and we all do, the concerns of the Senator from Texas that this region and our interests there have in fact changed.

It is this strategic approach which is meant to thwart Soviet thrusts in the area, which is of paramount concern to us all. This is a time of optimism in Israel and in the United States for a renewed and revitalized commitment to shared goals and policies. It is a time to move forward together in political, military, and economic cooperation.

It would be tragic if this opportunity were lost.

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum and ask unanimous consent that it not be chargeable to allocated time.

The PRESIDING OFFICER. Is there any objection to the request of the Senator from Oregon that a quorum call be made and that the time be charged to neither side? Hearing no objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon controls the time.

Mr. DURENBERGER. Mr. President, will the Senator from Oregon yield me 5 minutes?

Mr. PACKWOOD. I yield 5 minutes to the Senator.

Mr. DURENBERGER. I thank the Senator.

SALE OF F–15 UPGRADES TO SAUDI ARABIA

Mr. President, there are few regions more vital to United States and free world interests than the Middle East and the Persian Gulf. It is in this area that three continents—Africa, Asia, and Europe—intersect in a vital strategic crossroads. It is this area that provides a land bridge linking much of the world's population.

It is from this area that many of the mineral resources on which we depend originate. And it is therefore in this area in which we have a longstanding interest in stability and peaceful commerce. Our interests and those of the nations of the Middle East and Persian Gulf are and will continue to be fundamentally interconnected.

During the past few years, we have witnessed an extraordinary series of events which demonstrate both the importance and the volatility of this region. In terms of the overall international balance of power, we have seen the brutal invasion of Afghanistan and the threat which this poses to nations which must now contemplate Soviet troops within a few hundred miles of their borders. Moreover, this has occurred within the context of the grotesque collapse of U.S. policy in Iran.

In terms of the regional balance of power, we have witnessed both the continuing hostility between Israel and several of the Arab States, and the dramatic and threatening war between Iraq and Iran.

Finally, within many of the states which comprise this region, we have seen instance after instance of crises induced by the strains of modernization, fed by long-standing cultural and religious clashes, and sustained by Soviet scavenging.

In short, Mr. President, we have in this region a unique combination of the strains caused by East-West competition and North-South relations. It is these strains which continually threaten our overriding interest in regional stability, and which ultimately threaten the material interests of the Western democracies. It is these strains which threaten as well the security of Israel, a nation which has repeatedly demonstrated both its friendship with and its fundamental importance to the United States.

Yet, the situation which I have described is by no means new. It was as true in 1970 as it is now, and as true in 1960 as it was in 1970. We face a crisis, it is true, and we must confront the realities of Iran and Afghanistan. But we are challenged by the same basic problems which have pertained throughout this region for the entire postwar era. It is good that we have been forced to recognize these problems and their potential for disruption of U.S. interests, but we must not be led astray by the kind of rhetoric and quick reaction which characterized the past 4 years in general and the haphazard erection of the so-called Carter doctrine in particular.

In other words, Mr. President, unlike the situation elsewhere, we are not confronted by a novel or dramatically altered situation which requires immediate and hasty action. What we need is a clear elaboration of overall U.S. policy toward the Middle East and the Persian Gulf, a policy which addresses both the ongoing challenges of the past and the new realities of the present. We need, and I am confident that we will soon see, a clear, coherent and comprehensive policy that precludes future tests of our resolve and that promises long-term stability in terms of international, regional, and local events.

Thus, in terms of the pending request for offensive weaponry for Saudi Arabian F–15 aircraft, I am not convinced of the wisdom of granting such a request. As we all know, this is by no means a new issue. Three years ago, we in Congress were specifically assured that the sale of F–15's to Saudi Arabia would not entail a sale, either then or subsequently, of the equipment which would upgrade these aircraft for long-range air-to-ground missions. Just last summer, an overwhelming number of Senators wrote to President Carter stating our continued belief that Saudi F–15's should be sold only under the original terms and not with equipment for upgrading.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. DURENBERGER. I yield for a question on the Senator's time.

Mr. TOWER. Does the Senator believe that if the enhancement package is sold to Saudi Arabia that the Saudi F–15's will be more capable than the Israeli F–15's?

Mr. DURENBERGER. The Senator does not have an opinion on that subject.

Mr. TOWER. I can assure the Senator they will not be.

Mr. DURENBERGER. I thank the Senator for that.

Mr. President, as I said, I am not convinced that the issue has changed since 1978, or since last summer. There was no compelling case for augmenting the F–15's then, and there is none now. This is a longstanding demand, and a longstanding issue, and it is one on which the United States has spoken clearly and I believe carefully. It is not a new demand. nor is it a new issue, nor have circumstances changed sufficiently, in my opinion, to justify a change in our policy.

One thing, however, has changed dramatically, and that is that we now have some real leadership in the White House. We are demonstrating once again that

we as a nation understand the importance of a coherent foreign policy, that we recognize the reality of power, and that we will not shirk from our obligations. It is this change which should hearten the nations of the Persian Gulf and the Middle East above all else, for it is in this change, and not in new equipment, that their security, as our own, will ultimately lie. In other words, if the case for extra weaponry was weak 3 years ago, it is even weaker now that the United States has resumed its historic role in the Middle East.

Consequently, Mr. President, I cannot support the sale of extra weaponry in the form which is now contemplated. While it might be possible to offset the effects of such a sale with other measures, I must wait until such other measures have been discussed.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. DURENBERGER. If I have time to yield, I yield on the Senator's time.

Mr. TOWER. The Senator is apparently suggesting that instead of building indigenous forces there, we maintain a higher level of American presence there. So what he is saying is it is better to risk more American lives than to build the capability of the indigenous forces to defend our interests in that area. Is that correct?

Mr. DURENBERGER. The Senator is not suggesting that at all. The Senator is suggesting that there is a potential for a new American foreign policy with regard to the Middle East which is not necessarily to be measured on the standards of the old foreign policy.

The current proposals strike me as neither in the interests of the United States nor likely to promote stability within the region which we all recognize is so crucial. If the proposal was weak during a period of American weakness, it is weaker still during a period of American strength.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, I yield 1 minute to the Senator from New Jersey.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. BRADLEY. Mr. President, President Reagan has proposed to cure all that ails U.S. relations with Saudi Arabia by injecting state-of-the-art offensive capabilities into the fleet of 62 F–15s which the Saudis bought from us 3 years ago. The President's cure illustrates how in his first efforts to restore the glow of health to U.S. foreign policy he is falling prey to the practice of treating complicated policy ailments with simple military medicines. The practice bodes ill for the President's patients, and one of his first victims may be the delicate peace between Arabs and Israelis.

President Reagan's military potion of fuel tanks and smart missiles is no cure for Middle East maladies. It is a formula that can infect the region with more violent bouts of instability and war.

The new administration has been trying to bury challenges to U.S. political ingenuity and diplomacy under an avalanche of military hardware and bravado. This pattern shows up in the administration's response to the struggle in El Salvador, in its plans to recoup its right to stir up new tensions in Angola, and in its response ot the insecurity of our Saudi Arabian ally, the subject of our colloquy today. President Reagan and his foreign policy team are demonstrating a self-imposed blindness to the difficulties of conducting an effective foreign policy in a complicated world.

Military means occupy an important place in the arsenal of U.S. foreign policy, but used in the wrong way or at the wrong time, they can misfire. Military instruments are effective only if they are used to serve a strategic objective. They cannot substitute for political means when the latter are required. The key question about military means is not whether they can properly be used by the United States but how to use them properly. In El Salvador, the Middle East and potentially in Angola, the administration is establishing a poor record on the proper use of military means. Its actions permit bad military initiatives to drive out good political ones.

President Reagan is driving out prospects for restoring fundamental Saudi confidence in the United States as an ally by pacifying the Saudis with military gifts that convey only superficial devotion. Sending arms is not a substitute for providing assurance to our allies. Indeed, the Saudis have a right to be suspicious of this substitution. It tells the Saudis that it is foolhardy to rely on the United States as a guarantor of its security. First, our actions offer a poor example of how we guard the security interests of a major ally such as Israel. If we dismiss so cavalierly Israel's survival and our promises to its people, now can the Saudis expect us to treat them better? Second, caving in to Saudi demands for F–15 equipment is a repeat performance of our infirmity concerning Saudi demands that we abandon our vital interest in a strategic petroleum reserve. By once again surrendering our strategic interests to the threats of our weaker client, we undermine our credibility as that client's guarantor.

By caving in to Saudi demands on F–15 equipment we bring them the disconcerting news thtat they have a bodyguard without a backbone. That brings me to the third point. The Saudis know that in the final analysis only U.S. strength can protect them against the aggression of the Soviet Union or any other likely hostile external power. Yet we propose to sell them fuel tanks and missiles for their planes on the pretense that it will form their line of defense against the Soviets and other external threats. If the Saudis buy this logic, they will recognize—with some alarm I imagine—that they are being offered enhanced F–15's that would be of little value in repelling a full Soviet attack in lieu of effective U.S. protection.

Instead of sending the Saudis the wrong message about American interests and commitments, we should send them the right ones. We should respond to their requests for F–15 equipment by telling them:

First, no, we cannot sell it because to do so would endanger a longtime U.S. ally, and the United States will always protect the interest of all its allies.

Second, the Saudis must act on what they already know—that they share with Israel a common interest in ending Arab-Israel conflict and repulsing Soviet influence in the region. The United States will work with all its allies in the region to strengthen these objectives, and expects their active cooperation in this endeavor. Accordingly, we will stress high visibility for the United States in the region, including an enhanced naval presence and base facilities. We welcome the support of our allies in sustaining the U.S. presence politically—and if necessary financially.

Ironically by telling the Saudis what it is that we want, rather than telling them what they tell us they want to hear, we will be telling them what they really want to hear—that the United States is a staunch ally, secure in its power and courageous in its commitments to its friends.

Having outlined what I view as the flaws of the emerging administration foreign policy framework, and its dangerous consequences for relations with our allies in the Middle East, I will detail the reasons why the administration's argument that the equipment sales are no threat to Israel and required for Saudi defense are not persuasive.

The Reagan administration's sale to Saudi Arabia of AIM–9L air-to-air missiles and fuel and sensor tactical (FAST) packs will dramatically increase the firepower and range of the 62 F–15's purchased by Saudi Arabia in 1978. An offensive capability for these aircraft—already the most advanced fighter-bomber in the world—is counterproductive to U.S. interest in peace and stability for Saudi Arabia and Israel.

The improved F–15's that Saudi Arabia will have will impair security in the Persian Gulf region. Equipped with AIM–9L's and FAST packs they will undermine Israel's air superiority and enable Saudi Arabia to hit any Israeli target with greater force from bases located much deeper within Saudi Arabia.

There is no threat facing Saudi Arabia which justifies this sale. Sixty two enhanced F–15's would not protect Saudi Arabia against a full Soviet attack. Only the United States could do this. To leave the defense of the Arabian Peninsula to Saudi Arabia alone, would be to concede this area to the Soviets.

The administration's' contention that the sale of equipment is necessary to preserve regional stability, defend Saudi Arabia and restore U.S. credibility with our Saudi ally does not hold water. On the contrary, the sale will undermine these objectives. For this reason I oppose the sales.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, I wish to join with the distinguished Senators who are speaking this morning, the distinguished Senator from Oregon, the distinguished Senator from New Jersey,

and others, expressing concern about the U.S. arms sales to Saudi Arabia.

Being one of the Senators who voted against the sale of the F–15 jet fighters in 1978, I felt at that time in 1978 that that was not a wise move that we made at that time. Of course, everyone remembers at that time the provisions of the sale were that these F–15's were not given a large offensive capability. The Saudis said that they only sought the planes for being able to use them for part of their defense, that they would not put additional armament or additional capability on those planes so that they would have a larger effective capability, and it was a great concern at that time on the part of the Israelis and on the part of many of us who had a concern that we were introducing a highly sophisticated weapon into that area and that because of that there were going to be continual conflicts.

In fact, I think we talked about at the time of the sale that at first we will start off and we will have what is to be a defensive plane and then there will be a move to upgrade that plane, and many of us had a concern that the plane could be upgraded itself without the consent of the United States by other arms manufacturers who would be able to put on the wing tanks and put on the additional capabilities.

Now we find that the United States is going to upgrade the plane and going to give it a much greater offensive capability.

I stand where I think most of the Members of this Senate stand, and that is we want to be able to provide the Saudis with the capability of defending themselves and defending the strategic oil that they have in that region, but to go further than that and to introduce now with this package of armaments that we are talking about now a highly offensive plane concerns me.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. CHILES. I yield.

Mr. TOWER. Is it the Senator's belief that the enhancement package that we propose to sell to the Saudis will give their F–15's a greater capability than the F–15's in the Israeli Air Force?

Mr. CHILES. My understanding is that it gives them a capability. I do not know that it is greater, but it certainly gives them an offensive capability in the plane. It changes greatly the configuration of that plane.

Mr. TOWER. Does the Senator believe that the Sidewinder missile that the Saudis have asked for their F–15's is a better system than the Sparrow missile that the Israeli F–15's are armed with?

Mr. CHILES. No, I do not think it is a better system than the Israelis are armed with. But again I do not think that we are also trying to get into an escalation of where we are going to say that we are continuing and now we are going to give the Israelis a greater weapon than we have given them now.

I think what we talked about in the original sale in 1978 was a defensive airplane. I think with this package now my concern is that we are truly making it an offensive plane and adding to the capability.

Mr. TOWER. Does the Senator believe there has been no change in the threat situation there since 1978?

Mr. CHILES. I beg the Senator's pardon.

Mr. TOWER. Does the Senator believe that there has been no change in the threat situation in the Middle East since 1978?

Mr. CHILES. I think there have been changes in the threat situation, and I think the United States has made a lot of moves in connection with those threat situations. I think there has also been a deterioration or there has also been a greater threat or will be by the introduction of offensive weapons to the security of Israel which also adds to our problems if that comes about.

Mr. MOYNIHAN. Mr. President, will the distinguished Senator from Florida yield for two questions?

Mr. CHILES. I yield.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PACKWOOD. Mr. President, I yield the Senator 2 additional minutes.

Mr. MOYNIHAN. Mr. President, I ask the Senator this question: Has the State of Israel declared its intention to destroy the State of Saudi Arabia, to the best of the Senator's knowledge—yes or no?

Mr. CHILES. They have not.

Mr. MOYNIHAN. Has Saudi Arabia declared its intention to destroy the State of Israel? I say to the Senator that it has.

In that context it seems to me the Senator's remarks are altogether appropriate, and I wish to congratulate him for them.

Mr. CHILES. Mr. President, I again reiterate my concern that we are adding to the tensions in this area, that we will be introducing sophisticated armaments that we are talking about in this package, and it seems to me now is not the time to be doing that.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. I yield 10 minutes to the Senator from New York.

Mr. MOYNIHAN. I thank my friend from Oregon.

Mr. President, I congratulate the Senator from Florida for his remarks. I wish to continue the theme of my question.

Mr. President, there is not a Member in this Chamber of whom I am aware who does not share the concern that has been central to American policy in the Middle East for many years now with the military and the political security of the State of Israel, the remaining democratic society in that part of the world. And it comes as an unwelcome surprise that the first decision in foreign policy in that area by the new administration—and I wish the Senator from Oregon would hear me on this because he is in charge of the Republican Senatorial Campaign Committee and will in time be asked, I think, to explain this—is to arm a state that in the aftermath of the Camp David accords has escalated to unprecedented levels its commitment to the destruction of the State of Israel.

Mr. President, I do not know that the American people have followed as carefully as they might the degree to which Saudi Arabia has associated itself with the most extreme, and, to date, unprecedented assaults on the very legitimacy, the very existence, of the State of Israel.

The Islamic Conference in late January of this year, hosted by the Saudis, held at Taif in Saudi Arabia, called for a Jihad, a holy war, against the State of Israel. It issued a declaration, to which Saudi Arabia subscribed, that referred to Israel as a "usurpation." And it took the most extreme position yet taken in a long progression of such positions, declaring that the whole of the city of Jerusalem—not the old city, not a quarter of the old city, but the entire city—was annexed territory and must be given up by the State of Israel, leaving it a country without a capital. Israel's very purpose is symbolized by a united Jerusalem, and yet the Islamic Conference demanded that Israel surrender it outright.

The Taif conference, Mr. President, was followed by the nonalined conference in New Delhi February 9 to February 12, where the most extraordinary assertions yet to be made at an international conference on this subject of the Middle East were completely supported by Saudi Arabia.

The conference declared that the Negev and Galilee are annexed territories not belonging to the State of Israel, even though these territories have been part of Israel from the moment it was founded. First Jerusalem is not the capital, then the Negev is not part of the state, then the Galilee is not part of the state, and very shortly there will be no such state.

The Saudis have associated themselves completely with this enterprise. They have associated themselves with the ultimate rejection of the Camp David accords.

Moreover, they continue to arm the Palestinian Liberation Organization, which is nothing save the instrument of the Soviet policy in the Middle East and yet this administration wants to provide to Saudi Arabia the capacity to attack the State of Israel.

Mr. President, my colleagues and I understand the importance of Saudi security to the United States, and we will support the administration as it seeks to stabilize this shaky region. We will support the administration as it tries to develop a so-called consensus of strategic concerns among friendly states in the Middle East. And we understand that Israel's security can also be strengthened when the United States strengthens such friendly states, and enlarges its own role in the region. But surely we have to ask what the administration has in mind when it proposes to provide this amendment to Saudi Arabia at a time when Saudi statements and policies seem to be drifting ever further from our own. Is this the way to build a consensus? Does this show Saudi Arabia that we are serious about our interests? Or, for that matter, about theirs?

If the Saudis would associate themselves with the quest for a consensus in the Middle East, if they associated themselves with Egypt's desire for peace, if they would associate themselves with Israel's legitimate right to exist, then we would move as we are doing with some confidence.

But they do not. In the name of all that is true and holy does the administration truly think it wise to make this show of support for a state at the very instant when it declares itself intent upon the destruction of our ally, the State of Israel?

Mr. President, this matter is not concluded. It is lamentable that this administration should have sought to give these weapons in return, as best we can tell, for nothing, not one thing, not even a protest by the Department of State at the incredible pronouncements at Taif, followed by the yet more incredible ones at New Delhi. The Secretary must make clear where the United States stands. This clarity will be the most important, the indispensable element of a successful policy.

If we have decided to abandon the Israelis in the name of oil or geopolitics or what, let us say so. But since we do not mean to abandon them, let us do nothing that suggests we will.

Let us not tell a power that has declared its intent to destroy the democratic State of Israel that we do not object. Above all, let us not give them the idea that we may give them the power to do so with American weapons.

I hope the administration, while it still has time, will recognize that there is not the support in this Chamber to persist in this course.

Mr. TOWER. Mr. President, will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to yield.

Mr. PACKWOOD. Could the Senator yield on the Senator's time? I have about six more Senators who desire to speak.

Mr. TOWER. I will ask my questions on my own time.

Does the Senator from New York believe that selling this enhancement package will give the Saudis a military superiority over the State of Israel?

Mr. MOYNIHAN. No.

Mr. TOWER. Does the Senator from New York believe indeed that this enhancement package is not defensive when considering the fact that the threat may be launched from Iran?

Mr. MOYNIHAN. If there is one state that the Government of Saudi Arabia has declared its implacable enmity against, its intention to destroy, that State is Israel. Saudi Arabia has never said a word about Iran or Iraq or Kuwait. Let us remember what they say and do.

Saudi Arabia supports the Palestine Liberation Organization, a terrorist group, which carries out the foreign policy of the Soviet Union, and it has said one thing: It wishes to destroy the State of Israel, and we are giving it American arms which would help it try to do so.

Mr. TOWER. Does the Senator think the Saudis would commit suicide by launching an inferior system against the superior system of the Israelis?

Mr. MOYNIHAN. I do not know what I think about the Saudis or about how they intend to defend their own interests. What is one to say about a people who, in the aftermath of Camp David, an exposed monarchy on top of all that wealth, that fragile society, would declare a holy war against Israel and leave Egypt abandoned by the Islamic world? Saudi Arabia needs to see what its true interests are.

Mr. TOWER. Let me ask the Senator from New York just one more question: Does he believe the security of Israel would be enhanced if we do not sell either the F–15 to the Saudis or the enhancement package, and they turn instead to the French and they bought the French Mirage 4000; would that constitute a lesser security threat to Israel?

Mr. MOYNIHAN. I am familiar enough with that argument that we must do it or else the French will get the contract.

But something more important is at stake here. We have to show both Saudi Arabia and Israel that we know how to stand by an ally, the State of Israel. Nor is this my idea of how to stand by the State of Egypt. It is the Egyptians who took the risk for peace.

Mr. TOWER. Is not the central issue the security of Israel, so should we not consider all aspects of it?

Mr. MOYNIHAN. There is nothing more important, sir, to the security of Israel than the idea of its legitimacy as a state, of its right to exist.

The State of Saudi Arabia has repeatedly associated itself with claims that Israel has no right to its capital, has no right to Galilee, has no right to the Negev, and so forth. In this way, the State of Saudi Arabia makes it very difficult for us to defend them, and to promote our common interests as we would wish to do.

I have said my piece and I thank the Senator from Texas for his courtesy in asking me questions.

I thank the Chair.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Michigan.

Mr. LEVIN. Mr. President, the proposed sale of offensive equipment for the F–15's for Saudi Arabia is wrong. It is bad public policy and it contains within it the seeds of tragedy.

While I believe we have an obligation to foster better relations between our country and Saudi Arabia, that relationship should be based on reality; based on the real needs of their nation and our Nation. And in that context, it becomes very apparent that the transfer of offensive equipment is neither in our interest nor theirs.

Some have pointed to the Soviet threat, as represented by their invasion of Afghanistan, and the instability of the region as evidence that the Saudis now need the offensive punch that this equipment provides. But, Mr. President, as one who has returned just 3 months ago from a tour of the region, I say that the threat the Saudis face—and they do face a threat—will not be deterred or countered by this equipment.

Just as we should examine our defense budget in light of the source and nature of the threat we face, so too ought we look at the threat facing the Saudis in order to determine what military needs we should be concerned with. I would suggest that a realistic assessment indicates that there are three distinct potential threats: Internal instability typified by Moslem fundamentalists of the kind that seized the mosque in Mecca; external commando-like raids against their oil fields.

Finally, the least likely one is an invasion from Iraq or Iran and even less likely by the Soviets.

In none of these three cases will the offensive equipment contemplated in the President's request be used as either a deterrent or a weapon.

Obviously, the enhancement package is not useful in countering internal instability. Nor would it be needed to deal with commando raids on the oil fields. And in terms of dealing with a potential invasion—from any source—the enhancement package has limited utility. Certainly, it will not deter the madmen in Iran. Iraq has already displayed a high disregard for sophisticated military calculations in determining its own combat strategy as their willingness to invade Iran demonstrates. And in terms of the Soviets, and any potential direct threat they pose, I have no reservations in concluding that the enhancement package adds only marginally to Saudi strength—and that marginal addition does not come even close to creating either a deterrent or a meaningful counterforce to the relatively overwhelming Soviet might.

No, Mr. President, realistically the only threat this sale responds to is not a threat against the Saudis but rather a threat by the Saudis. This sale is motivated by the fear that if we do not agree to it, then the Saudis will be more willing to use their oil weapon against us. But that calculation of Saudi willingness only adds up if one ignores a most meaningful factor in the equation of national intent. Our fear of independent Saudi action is based on what we know they might be able to do to us—it totally ignores what they know we might be able to do to them.

When I was in the Middle East, I spent sometime with President Sadat. He is a brilliant man and one of the points he made was that American policy was too often made in response to the power other nations hold and not in a recognition of the power we hold. He suggested, specifically, that the Saudis need us as much as we need them if they are to preserve their monarchy, their oil, and their way of life. He indicated that our policies had too often spoiled the Saudis, catered to them, instead of treating them as a sovereign nation which has entered into a reciprocal relationship with us.

Failure to approve this sale might have a slight impact on our relationship with Saudi Arabia, granted. But it will not be devastating.

It will, however, be devastating if we approve that sale in several specific ways. First, it will reduce American credibility. When the original sale was negotiated, we made a solemn promise that those

jets would not be equipped with offensive capabilities. As a candidate Mr. Reagan himself identified the credibility of American commitments as a key element in our foreign policy. In his speech to the B'nai B'rith he said that in terms of playing a role in reaching a peaceful resolution of the region's problems, the "most important" thing we could do was to "rebuild our lost reputation for trustworthiness." He illustrated that point by referring specifically to the jet sale issue. He said:

In 1976, Candidate Jimmy Carter said: "I am concerned with the way in which our country, as well as the Soviet Union, Britain and France have poured arms into certain Arab countries—five or six times more than Israel receives."

But it was Mr. Carter who agreed to sell 60 F–15 fighters to Saudi Arabia. To get the Congress to go along, he assured these aircraft would not have certain offensive capabilities. Now, the Secretary of Defense tells us he cannot say whether this commitment to Congress will be honored.

I agreed with his analysis then. And I agree with it now. We should keep the commitment the President made to the Congress and that the candidate made to the people during the election.

That concern for fidelity of commitment was what motivated over 60 Senators to sign a letter to President Carter, last July, urging him not to approve any sale of offensive equipment for the F–15's. Since our Government is ongoing, I would submit that the same arguments made then apply now—and I ask unanimous consent that the full text of the letter and a list of its signers be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 27, 1980.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: According to recent news reports, Saudi Arabia has asked to purchase from the United States additional military equipment related to the 1978 sale of 60 F–15's. It is our understanding that included in this request are such items as multiple-ejection racks, conformal fuel tanks, KC–135 aerial refueling tankers, AIM 9–L air-to-air missiles, and AWACS. We would like to remind you of assurances given by your Administration concerning such military equipment and to register our firm opposition to the Saudi request.

When the proposed F–15 sale was debated more than two years ago, major concerns were voiced in Congress as to the aircraft's potential offensive capability. In response to these concerns, officials of your Administration provided the Congress with a series of assurances and understandings that emphasized the defensive role and restricted the potential offensive threat posed by the F–15's. In particular, a letter from Secretary Brown on May 9, 1978, to Senator John Sparkman, then Chairman of the Senate Foreign Relations Committee, stipulated the following:

"The F–15 we plan to sell to Saudi Arabia will have the same configurations as the interceptor model approved for the United States Air Force."

"The plane requested by Saudi Arabia will not be equipped with the special features that could give it additional range. Specifically, the planes will not have conformal fuel tanks ("fast packs"), i.e., auxiliary fuel tanks that conform to the body of the plane, and Saudi Arabian KC–130 tankers do not have equipment for air refueling of the F–15."

"Saudi Arabia has not requested that the plane be outfitted with multiple ejection racks (MER 200) which would allow the plane to carry a substantial bomb load. The United States will not furnish such MER's."

"Saudi Araba has not requested, nor do we intend to sell any other systems or armaments that could increase the range or enhance the ground attack capability of the F–15."

In addition, in testimony before the House Foreign Affairs Committee on May 9, 1980, Secretary of Defense Brown was asked whether the United States was planning to provide the Saudis with an aerial refueling capacity for the F–15's. In response, Secretary Brown said: "The F–15 does have a receptacle, but the Saudis don't have an aerial refueling capability with a probe, so they will not be able to refuel the F–15."

Moreover, a separate letter was sent on February 16, 1978, from Assistant Secretary Bennett to Congressman Lee Hamilton in which the following statements were made concerning the AIM 9–L and AWACS:

"The Saudi Air Force is not scheduled to get the AIM 9–L all-aspect sidewinder missile which will be carried on the United States Air Force F–15's."

"An F–15 sale will not lead to the sale of E2C or E3A (AWACS). The F–15 has an excellent radar. Were the Saudis to purchase an aircraft with less effective radar than the F–15, they would be more than likely to seek an airborne radar system."

We feel that the sale of additional military equipment which would increase the range or otherwise enhance the offensive capability of the F–15's sold to Saudi Arabia would not be consistent with the above assurances and understandings given to the United States Congress. Therefore, we urge you to reject any such requests by Saudi Arabia for the sale of the additional weapons and equipment as reported in the press.

Sincerely,

Signed by Senators: Armstrong, Baker, Baucus, Bayh, Bellmon, Biden, Boren, Boschwitz, Bradley, Bumpers, Chafee, Chiles, Church, Cohen, Cranston, Culver, Danforth, DeConcini, Durenberger, Durkin.

Eagleton, Ford, Hart, Hatch, Heflin, Heinz, Huddleston, Humphrey, Inouye, Jackson, Javits, Jepsen, Kassebaum, Kennedy, Laxalt, Leahy, Levin, Lugar, McGovern, Magnuson.

Moynihan, Mathias, Matsunaga, Metzenbaum, Mitchell, Morgan, Nelson, Packwood, Pell, Pressler, Proxmire, Pryor, Riegle, Roth, Sarbanes, Sasser, Schweiker, Simpson, Stevens, Stewart, Stone, Tsongas, Warner, Weicker, Williams, Zorinsky.

Mr. LEVIN. But, Mr. President, while a part of my opposition to this sale is based on my concern for our commitment, a larger part is based on the fact that the rationale for that commitment still remains. The offensive equipment, as I have suggested, does the Saudis little good. And, as I am about to suggest, it will do the region a great deal of harm.

The effect of the sale on the region is twofold. First, it directly increases the threat to Israel with all that portends. The Saudis may have become our allies and our friends, but they still remain an implacable adversary of Israel. There has been no moderation—even as negotiations for this sale were ongoing—in the Saudi support of and calls for a jihad or holy war against Israel. Their backing for the PLO has not diminished. Their behavior in the United Nations has not moderated. Giving such a country the offensive capability to strike directly against Israel is an act of pure folly.

And, to a certain extent, I believe that folly is implicitly recognized in the administration's arms sale plan. Not only do we give the Saudis the capacity to strike against Israel but we also then promise to provide the Israelis the means to defend, at least theoretically, against that strike.

Mr. President, this absurdity simply guarantees that the kind of destructive arms race we all want to avoid will take yet another turn around the track and bring all of us a few steps closer to the finish line we all seek to avoid.

Let me then summarize my arguments. First, providing the Saudis with this offensive equipment will not make them any more secure. Second, we do not need to provide them with the equipment in order to feel secure ourselves in terms of any oil threat—that security comes from a mutual need and interdependence which is quite separate from the offensive hardware we propose to sell. Third, the sale is inconsistent with the promises made to the Congress and to the world when the original F–15's were sold to the Saudis. And, finally, this sale simply serves to increase the arms race and bring us closer to the kind of miscalculation we can neither afford or encourage.

This sale, then, Mr. President, is wrong. It is built on false assumptions of need, rooted in misunderstandings of power, flawed by its break with past promises, and tainted by its support for an expensive and destabilizing arms race.

Mr. PACKWOOD. Mr. President, I yield 7 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota has been yielded 7 minutes.

Mr. BOSCHWITZ. Mr. President, I also rise to speak in opposition to the enhancement package that is being suggested for the Saudis.

The enhancement package has been spoken of as a litmus test when it was presented to us in the Foreign Relations Committee. As my part of this colloquy this morning, I would like to list some of the other litmus tests or some of the other equipment that we have sold to Saudi Arabia in just 2 years. I am not sure I can get through the entire list for the 2 years. But the litmus test is often applied and the litmus test has often been satisfied; that we are indeed friends of the Saudis, that we should, indeed, continue to be friends of the Saudis, and that the Saudis have an important and significant role in the free world.

Mr. President, let me read some of the items that we sold the Saudis in 1978. Of course, there was the sale of 60 F–15 Eagles. At the time of the original purchase of the F–15's, there was a letter from Secretary Brown, which I am sure others in this colloquy have mentioned, specifically excluding the type of equip-

ment that we are speaking about today as the enhancement package. In 1978 there were also 14 F–5E jet fighter planes. There were 4 KC–130 tanker aircraft; 240 AIM–7F Sparrow air-to-air missiles; 240 AIM–9J air-to-air missiles; four hundred 43 Redeye antiaircraft missiles; 400 23–B Hawk ground-to-air missiles; 28 advanced missiles and other aircraft—some of them, Mr. President, coming from Britain. The sales include a large number of armored vehicles and tanks, some of which came from France and Italy, as well as the United States.

That is the essential list of weapons that were purchased by Saudi Arabia in 1978. Indeed, it is a very impressive list.

So is the overall list of military goods and services purchased by the Saudis. It totals $18.2 billion from the United States since the end of 1973. In addition, the Saudis purchased another approximately $8 billion worth of military items from other nations in the world.

The list of U.S. purchases includes 110 F–15 jet fighter bombers. Since 1979, a list of armaments sold by the United States to Saudi Arabia for these planes includes: 3,000 laser-guided air-to-ground bombs; 1,000 Maverick air-to-ground missile "smart bombs"; and 2,000 more Sidewinder air-to-air missiles. The Senator from Texas is not present in the Chamber. He knows the names and numbers better than I.

The sales list also includes antiaircraft weapons, from France, Sweden, and the United States; 136 antiaircraft cannons; 400 more Hawk antiaircraft missiles; 400 more MM–43A Red Eye antiaircraft missiles; 117 Harpoon multipurpose naval missiles; and 150 M–60A1 tanks.

So, Mr. President, the list of military equipment sold by our country on a perhaps litmus-test basis, as this sale is now being heralded, is indeed long.

We have been friends with Saudi Arabia. We should continue to be friends of this important nation. But to sell an enhancement package of equipment, some of which is not yet deployed even on our own aircraft does not lend itself to the stability, to the continuance of peace in the Middle East. It only heightens the arms race and brings an element, indeed, of instability to the Middle East. So I will oppose the sales. Thank you, Mr. President.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington has been yielded 3 minutes.

Mr. GORTON. Mr. President, in all that has been said about helping Israel to maintain a balance in its defenses, I have seen little or nothing about the problem created for that country when it is placed by our actions in the position of having to increase its economic commitment to national security functions. Israel is constantly fighting a losing battle against the ravages of inflation. Its current inflation rate is 133 percent. Almost everything in the national economy, wages, prices, and so forth, is indexed to this disastrous rate.

The administration proposes to offer $600 million in increased credits for fiscal year 1983 and fiscal year 1984 at a 12- to 13-percent rate of interest. The service on this additional debt will run to $1,436,000,000 in 10 years. As some Israelis have said, this is like offering a junkie another shot of heroin.

While we add to the armaments of Saudi Arabia, questionable from the standpoint of its defense needs and from our strategic needs as I believe that to be, we run the very real danger of adding the finishing touches to the destruction of the Israeli economy. What country can continue to stand the strain of such a firestorm of inflation and what kind of a favor are we offering to Israel to make this contribution to that inflation.

Does it not make more sense for the administration and the Congress to reconsider these sales to Saudi Arabia, until better assurances are received that they will actually result in a stronger and more open support for our peace efforts, a reduction of interregional tensions and that they will not adversely affect the military security and economic strength of other friendly nations within the region which are essential to the area's overall security?

We know that Israel's consumer price index ran at the rate of 133 percent last year. We know that its inflation rate has been running at from 7 to 9 percent per month. How can we add to that burden until we know that the Saudis' need for additional military materiel has a genuine basis in defense needs.

In the final analysis, the security of Saudi Arabia depends on the United States and the security of the region as a whole will be aided most by a reduction of tensions and upon peaceful relations between states in that region.

I am not yet persuaded that the security of Saudi Arabia's oil installations will be increased by the addition of F–15 fighters with sophisticated equipment to the mountain of armament that we, France, Italy, Britain, and Sweden have already delivered to Saudi Arabia in the last 3 years. In addition, Saudi Arabia is hiring Pakistani mercenaries to add to its security. Now we propose to add accessories to the F–15 which changed it from a defensive to an offensive weapon.

What quid pro quo do we receive? Another increase in the price of oil? Or will we get a sincere diminution in calls for a holy war against what Crown Prince Fahd, in his speech before the Islamic Summit Conference at Taif, on January 26, called a "racist entity" and demanded an "Arab Jerusalem" as its "eternal capital."

Mr. TOWER. Will the Senator yield for a question?

Mr. GORTON. Yes.

Mr. TOWER. Mr. President, are not the Saudi oil prices actually below the OPEC price and have they not increased their oil production substantially beyond what is economically practical and feasible for them in an effort to make up for the oil deficits as a result of the Iraq-Iran war?

Mr. GORTON. Mr. President, I do not believe that for one moment. The price of oil is set by Saudi Arabia. The amount of oil which it produces at any given time is based entirely——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PACKWOOD. Mr. President, I ask unanimous consent for an additional 15 minutes to be allocated to me under the special orders.

The PRESIDING OFFICER. Is there objection?

Mr. TOWER. Mr. President, will the Senator amend that request to give me an additional 15 minutes under my control?

Mr. PACKWOOD. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, do I have the floor?

Mr. PACKWOOD. Yes.

Mr. GORTON. Mr. President, my answer to the question is that it is my view that the price of oil set by Saudi Arabia and the production levels set by Saudi Arabia are set purely by that country in its own interest. That is because it is the largest such producer and has constantly been in the forefront of seeing to it that prices are increased.

Mr. TOWER. Will the Senator yield for a question?

Mr. GORTON. I yield.

Mr. TOWER. If that level is in their own interest, why is it there is so much internal criticism in Saudi Arabia for their having raised that production far beyond their economic requirements, and why is it that they cannot recycle the petrodollars that they are earning as a result of that increased production? Is the Senator not aware that the Saudi price is $4 below the OPEC price?

Mr. GORTON. The Saudi price may well be below the OPEC price and the price set by other smaller producers, but those prices, in turn, are based upon what the Saudis themselves want to do. Whenever the Saudis believe it to be in their own interest to cut production, they cut production. When they believe it to be in their own interest to increase production, they increase production.

To continue with my statement:

Will we, by making this sale of F–15's to Saudi Arabia, receive support for the peace making efforts on which we have spent so much effort, time, and money?

I am aware of the tensions and the turmoil in what Prince Fahd calls "the Islamic Nation." But is it too much to expect that they can reduce the shrillness of their rhetoric; reduce the vast contribution they continue to make to the Palestine Liberation Organization, or privately exert effective efforts to turn the PLO from the path of international terrorism to one of peaceful negotiation?

The path of statesmanship is open to the leaders of Saudi Arabia. All they have to do is to grasp the nettle and exert courage in the face of opposition that, all too often in the recent and distant past, has refused to face reality and to act wisely. They must realize that leaders may not run ahead of the mob and still proclaim themselves leaders. Is it too much to ask that they use their influence to moderate the position of the PLO, with respect to that organization's stand on the status of Israel

as an independent entity and with respect to the provisions of U.N. Resolution 242?

Until that kind of leadership is shown, why should we encourage present trends by making concessions without return?

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Arizona.

Mr. DECONCINI. Mr. President, it is my firm belief that the administration's decision to sell to Saudi Arabia equipment to upgrade what is already the most sophisticated fighter-bomber in the world, the F–15, may ultimately prove detrimental not only to the security of Israel, but to the general stability of the Middle East.

This is most certainly not a partisan issue. I urged the Carter administration to reject the Saudis' request for sale of this equipment in July of last year—indeed in 1978 I vigorously opposed the sale to Saudi Arabia of the F–15's, themselves. The upgrading of the Saudis' 60 F–15's is an all too tempting way to try to encourage the Saudis to promote American strategic interests in the Persian Gulf and American economic interests in the international oil market. The psychology of the sale seems to be that we are not selling them a new weapons system, only upgrading a system that they already have. Unfortunately, given that the Saudis are shrewd capitalists and that they have their own perceptions of the strategic makeup of the Persian Gulf, it is likely that the upgrading of the F–15 will—at best—have a short term effect on the Saudis' attitude toward the United States.

Moreover, in the long run the sale significantly enhances Saudi military capability and is the impetus for another round of the arms race in the Middle East. The equipping of the most sophisticated fighter-bomber in the world with extra fuel tanks, advanced radar, and AIM 9L air-to-air missiles makes the F–15 a lethal threat 1,000 miles from its takeoff point—that is, anywhere in the Middle East. The scenarios for use of these planes by the Saudis are not reassuring.

Assuming that the current Saudi Government remains in power and assuming that it continues to try to maintain a mutually advantageous relationship with the United States—and of course we know from the example of Iran how tenuous these assumptions are—the Saudis could use the upgraded F–15's to respond to an external attack. But given the size of Saudi Arabia and the strength of its potential aggressors, the F–15's—upgraded or not—will not enable Saudi Arabia to defend itself successfully.

Given the inadequacy of the F–15's in serving as a credible deterrent for the Saudis, we must look at the offensive purposes to which the F–15's could be employed. One possibility is that the Saudis might want to use the upgraded F–15's to settle old scores in the Persian Gulf. Certainly such a scenario does not fit in the U.S. search for stability in the Middle East. Another possibility is that they could be used against Israel. I challenge the administration or anyone in this body who supports this sale to say that he or she guarantees that in the case of a change in power in Saudi Arabia or in the case of another Arab-Israeli war or even in the case that another Arab-Israeli war was perceived to be imminent, that the Saudis could resist the temptation to use their American supplied and upgraded F–15's against Israel or to transfer its planes to another Arab nation for this purpose.

Mr. TOWER. Will the Senator yield for a question? What other old scores might they be likely to settle?

Mr. PACKWOOD. Does the Senator yield on the time of the Senator from Texas?

Mr. DECONCINI. I am glad to yield to the Senator on his time.

Mr. TOWER. What old scores would they like to settle?

Mr. DECONCINI. I think there are many old scores in the history of the Saudis and the Persian Gulf. I think the Senator from Texas is aware of the volatileness in that area, of the disruption which has been fomented in that area by Iraq, by Iran, and the Saudis have had to choose sides time and time again. I think that is quite clear, at least to this Senator.

Mr. TOWER. Is the Senator suggesting that they might be used offensively against Iraq?

Mr. DECONCINI. That Senator is suggesting that I do not know where they might be used. The Senator is suggesting that to provide a lethal weapon that has a penetration of 1,000 miles when there has been a commitment by the last administration that this would not be done, is not in the best interests of the United States, or Saudi Arabia.

Mr. TOWER. Has anything changed in the Middle East since 1978? Have there been no changes there, in the political situation, perhaps?

Mr. DECONCINI. Have there been any changes? Of course there have been some changes. I think the Senator from Texas is very aware of that, and I think the Senator from Texas is trying to indicate that because of some changes in Iran and Iraq this would justify a change in this country's firm commitment not to supply.

To conclude my remarks:

That the United States is stimulating the arms race in the Middle East by making this sale is tacitly recognized by the administration. To offset the upgrading of the Saudi F–15's it is my understanding that the Reagan administration plans to offer Israel 15 additional F–15's at preferential financial terms as well as other concessions as a quid pro quo for the Saudi sale. Despite the preferential pricing, this quid combined with the cost of an additional early warning system and whatever other equipment that the Israelis may perceive to be necessary to counterbalance the enhanced Saudi threat will place another burden on the already highly strained Israeli economy. And, of course, there are no guarantees that the Saudis will not come back to us asking for other types of arms.

Mr. President, I believe that this situation is a case in which we should leave well enough alone. Although it is fraught with dangers, there is peace in the Middle East. I encourage my fellow Senators to recall the written guarantee which the Carter administration gave this body when it approved the sale of the F–15's to Saudi Arabia. At that time the Carter administration pledged that no additional equipment which could "increase the range and enhance the ground attack capability of the F–15's" would be supplied to Saudi Arabia. The Saudis accepted this limitation as a condition of the sale, and I do not believe that the Senate would have approved the sale without this assurance. I urge my colleagues to return this administration to the provisions of this pledge by opposing this sale.

I ask unanimous consent at this time, Mr. President, to have printed at this point in the RECORD a letter I wrote to President Reagan on this issue.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, D.C., March 18, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Your decision to sell AIM–9L air-to-air missiles and Fuel and Sensor Tactical (FAST) packs for installation on the 62 F–15s purchased by Saudi Arabia in 1978 may ultimately prove detrimental not only to Israeli security interests but to the general stability of the Middle East.

The F–15 is already the most sophisticated fighter-bomber in the world. The addition of these items will substantially increase the offensive capability of these aircraft. No reasonable analysis of the potential threats facing Saudi Arabia yields the conclusion that such an offensive F–15 capability is justified. Indeed, it would seem that the Saudi's true purpose is to have the capability of threatening Israel.

It is my sincere hope, Mr. President, that you will reconsider this decision in light of its potentially destablizing effects. I am confident that the United States can demonstrate its special relationship and friendship with Saudi Arabia in a host of other ways that do not impinge so directly on the interests of America's most enduring ally.

Sincerely,

DENNIS DECONCINI,
U.S. Senator.

The PRESIDING OFFICER. The time of the Senator from Arizona has expired.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Maryland.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Maryland.

Mr. MATHIAS. Mr. President, in 1978 when the plane package deal for Egypt, Israel, and Saudi Arabia was approved, Secretary of Defense Brown testified,

Saudi Arabia has not requested, nor do we intend to sell, any other systems or armaments that could increase the range or enhance the round attack capability of the F–15.

The plane package deal was accepted because of those assurances. I repeat the word "package" because it has been said that this administration does not consider that it is a package. But as we considered it, as we approved it, it was a package.

In the last year of the Carter administration, I sensed a move to renege on

that commitment. Now the Reagan administration confirms a decision, citing changed circumstances in the region to justify selling some, though not all, of what the Saudis have requested. There is no doubt that circumstances in the region have changed. Iran is no longer under the Shah. It is in chaos. It is also at war with Iraq. The Soviet Union occupies Afghanistan and is probing vigorously elsewhere in the region.

But the package in 1978 included specific commitments.

I reminded President Carter of this last year and made the same point to the Reagan administration officials. If any changes are to be made in the commitments, they must be made with the agreement of all the parties concerned, the whole package—the Congress, the executive branch, the Israelis, the Egyptians, and the Saudis.

For all parties to agree, then Israel's defense against an enhanced Saudi threat must be strengthened. As far as I can judge, only the most preliminary sort of an administration effort in that direction has thus far revealed itself.

I yield back the remainder of my time.

Mr. PACKWOOD. I yield 3 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

ENHANCING THE SAUDI F–15'S: DOES IT GET ANYONE ANYWHERE?

Mr. DOLE. Mr. President, the Senator from Kansas has serious concerns about the plan to sell enhanced offensive equipment to Saudi Arabia. In the past, I opposed the sale of these F–15's to our major foreign oil supplier. But, we must keep in mind that Saudi Arabia is the world's major oil supplier and the United States has a need to enhance our geopolitical interests and security in the Middle East. What we must ask is whether enhancing the firepower and range of the 62 F–15's purchased by the Saudis in 1978—over strong congressional opposition—will significantly contribute to either American or Saudi security.

Congress originally agreed to the sale on the condition that such offensive upgrade equipment not be included in the transfer. That point has just been made by the Senator from Maryland. We do realize there are threats to Saudi Arabia and its crucial oil fields that, if carried out, the United States would view with extreme alarm, and U.S. intervention then would be a likely possibility. Under such conditions, how does the enhanced capability of the F–15's add to Saudi internal security? On the other hand it is very evident that the new firepower and range of the F–15's makes a noticeable and significant difference toward our longtime ally, Israel.

Since World War II, Saudi forces have fought against the State of Israel three times. Each time, these forces were part of a coordinated, pan-Arab attack. In the future, facing a circle of well-supplied, oil-financed enemies, an Israel strained to the utmost to provide for its national defense would be forced to consider the likelihood of pinpoint strikes by heavily armed, long-range Saudi F–15's. Without an Israeli preemptive strike to eliminate this threat, Israel's now crucial air superiority would be in jeopardy. At the same time, Saudi awareness of a preemptive attack on its soil would encourage its inclination to join in joint Arab aggression.

WHERE DOES IT GET US?

It seems to the Senator from Kansas that unless the United State is willing to abandon its long and faithful ally, Israel, selling this equipment creates new problems for the United States without any new, obvious benefits. It does little to make a real increase in Saudi security, while contributing to Israeli insecurity and vulnerability, and endangers the instability of the region.

If the F–15 sale is intended to "buy" some kind of good will or influence in Riyadh, then the United States must provide a countercapability to Israel so that at least the F–15's do not pose an increased hazard to our allies. Perhaps some kind of sense can be made from supplying both sides in an escalating arms race if we could point to real gains or concessions that will result from the transaction. There are many conflicting and competing goals in the conduct of American foreign policy, where our chief concern must be the reality of Soviet imperialism. Nevertheless, what are the prospects of any gains to America or the West by making this addition to the Saudi arsenal?

THE STRATEGIC PETROLEUM RESERVE

For a long time, this Senator has advocated that our national security and our energy policy needs would be best served by the filling of the strategic petroleum reserve as soon as possible. Such a reserve would diminish the threat of an OPEC oil embargo. Saudi Arabia has taken the lead in threatening the United States with reduced production of daily oil supplies if Washington attempts to fill the reserve. Without a specific quid pro quo on this sensitive, political, and economic issue, is there yet any indication that Saudi policy will be any less threatening to U.S. interests if we follow through on our plan on SPRO?

THE CAMP DAVID PEACE

The greatest threat to Mideast stability is the failure of any of Israel's enemies to join Egypt in the peace talks and the settlement of the West Bank issues. The United States is heavily committed to this peace progress. Saudi Arabia has failed to indulge in anything that could be construed as constructive to the goal of peace. It continues to be the major banker for the terrorist PLO groups. Only last month, Saudi leaders again were calling for a jihad, or holy war, against Israel. Is there any prospect that the sale of this weaponry to the Riyadh regime will lead to Saudi participation in the peace negotiations? Will the Saudis reconsider their financial support of the PLO?

In our attempts to face the Soviet challenge in the Mideast and the threat to Persian Gulf oil supplies, the United States has engaged in a naval buildup and the creation of a Rapid Deployment Force. The option of basing forward units, forward supplies, and even American forces in the western Indian Ocean littoral has been suggested as one possibility. The Saudis have consistently opposed American base arrangements in the Arabian Peninsula. If the F–15 enhancement sale goes through, is there any prospect that this attitude will change?

I say that a number of us who certainly want to support this administration are going to have to have some indication, somebody to give us some assurance on behalf of the Saudis that there will be certain—maybe "concessions" is not the right word, but certain considerations by Saudi Arabia.

SAUDI GOODWILL MEANS WHAT?

Mr. President, this sale clearly raises some key policy questions that the administration should address. In light of the problems the sale seems to raise, and the failure of Saudi Arabia to support key U.S. policies, we need to take another look at whether or not there is a real need for offensive weapons like these. There may be substantial policy and geostrategic interests that will be served by the proposed sale. If so, these need to be articulated in the context of thc questions the Senator from Kansas and others here today have brought forward.

It just seems to me that we all have a great deal of difficulty endorsing a transaction that might contribute to Israeli insecurity and damage Mideast peace and stability, if the only purpose is to acquire Saudi goodwill—when no suggestion is made that there is a good chance Saudi policies will soon change. There are plenty or areas open to the Saudis to demonstrate in deeds what their good will toward the United States is claimed to mean, if they are serious about cooperation with American policies.

Whether it is the Camp David peace accord or SPRO or whatever, it seems to this Senator that the Saudis have at least not publicly indicated any great desire to be helpful.

As I suggested in my statement, having opposed the F–15 sale in the first instance, I am not in any great rush to support enhancement unless some questions are answered that I think have been raised properly by many who have spoken here this morning, to the satisfaction of the majority of the Members of this body.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, the administration's decision to sell offensive weapons and equipment to Saudi Arabia is a most unfortunate one—for Israel, for peace and stability in the Middle East, and ultimately for us. I opposed the Carter administration's 1978 decision to sell F–15 aircraft to Saudi Arabia, and I think, as others have mentioned, we all recall the finding commitments that were made at that time that the aircraft would not be equipped with these advanced offensive systems through later sales. The current proposed sale violates those commitments, which were, admittedly made by another administration.

I think it is fair to say, however, that many Senators supported the aircraft sale in 1978 on the assumption that this other advanced equipment would not be

attached. I expect, therefore, that many more Senators will join the opposition to this current proposal which so clearly increases the level of threat existing against Israel.

I believe other Senators have made clear why this equipment is particularly dangerous for Israel—both because of its characteristics of extending the aircraft's range and its advanced missile technology; and because of the absence of any clear threat to Saudi Arabia other than the one they perceive from Israel. In the past 32 years Saudi forces have engaged in armed conflict four times—three of them against Israel. It is folly to believe the weapons we are selling would not be used for the same purpose again, should the opportunity arise.

Rather than these immediate tactical questions, however, I would like to comment briefly on some of the broader policy issues this proposed sale raises.

First, and foremost, is our relationship with Israel, our steadfast ally in a troubled part of the world for 33 years. President Reagan himself during the campaign recognized the strategic value of Israel as a firm friend and ally and potential stabilizing force in a region characterized by constant changes of government and swerves in policy.

Our continued economic, political, and military support is essential if Israel is to play this role. And the fundamental foundation of our policy has been and must continue to be full and strong support for Israel so it will feel free and confident to negotiate a peaceful settlement directly with its Arab neighbors—a settlement negotiated from strength rather than weakness, a settlement leading to peace not continued turmoil.

It is ironic if this is our policy and our objective that we are doing the very thing designed to make Israel less secure, less confident and therefore less willing to negotiate. We are arming an adversary of Israel with the most modern of weapons, and thereby are forcing Israel to stay in step by obtaining more equipment from us, at great cost to an already strained economy. In doing so we are making Israel more dependent on us—economically and militarily—which has a profoundly disturbing similarity to the Carter policy of trying to buy peace by giving aid and weapons to all sides. This is a dangerous policy in my view, not only because it increases dependence and further strains an already hard-pressed economy, but because it inevitably increases the likelihood of violence and the scale and scope of that violence when it comes.

Not the least of the problems of this policy is the economic burden it places on the Israelis by forcing another round in the Mideast arms race. In the past we have congratulated ourselves on our generosity in "allowing" Israel to buy weapons from us on lenient credit terms. From the Israeli point of view, however, allowing someone to go even deeper in debt is hardly a favor, particularly when it was our action that necessitated the borrowing in the beginning. Clearly if this proposed sale is allowed to go through, then additional weapons systems must be made available to Israel on a grant basis so as not to disadvantage them even further than we have already done.

Second, this sale has serious implications for our relations with Saudi Arabia. It has been said by some that this sale must go through because the Saudis regard it as a test of our relationship. In fact, that is true, but not in the way they mean it. The real test is one of whether our bilateral relations are going to be truly based on reciprocity rather than a series of threats and bluffs.

Much has been made of Saudi Arabia's moderate position, based largely, in my view, on the Government's conservative nature and its professed distaste for communism. In short, our approach has been, anybody who does not like the Russians must be OK. In fact, Saudi policies in many respects have been inimical to our interests and to the interests of peace. It has consistently been one of the major financial backers of the PLO and other terrorist groups. It has broken diplomatic relations with Egypt and withheld economic support because of the Camp David agreements—one of the few diplomatic successes of the Carter administration. It refuses to join the peace negotiations. It has regularly rejected American proposals for a base on the Arabian Peninsula. And finally it bears a major share of responsibility for OPEC pricing policies that have created devastating economic pressures in both the Western developed nations and the lesser developed world.

These facts are particularly disturbing in light of the current tendency to regard this sale as something we owe the Saudis for past favors. In fact, if they have done anything for us at all, it has been to shoot us in the leg rather than the neck. It may be a little less painful but the wound can be serious nonetheless.

I would suggest, as an alternative, that it is past time for our bilateral relations with Saudi Arabia to reflect true reciprocity, and this sale ought to have been approved only after receiving appropriate quid pro quos to insure a more benign or constructive attitude on the part of the Saudis.

Finally, this proposed sale has broad implications for our longer term strategy to bring peace to the Middle East. The most significant effect of this sale is likely to be the beginning of a new round in a Mideast arms race. The F–15's, a serious threat in themselves, nonetheless had limited utility against Israel when based away from the northern border and when lacking the equipment we are now about to provide. Now these weapons systems become a threat that will have to be countered, particularly in light of the recurring questions about the long-term stability of the Saudi monarchy. This is a region noted for its political volatility, and regardless of how responsible and restrained one may consider the Saudi Government, Israel and the United States must always be prepared for the very real possibility that next week it will be gone and a different one will be in its place with different attitudes and policies, but the same military equipment.

Preparing for these contingencies is expensive and distracting. It will cost an already weakened Israeli economy millions of dollars to strengthen its defenses, and a U.S. offer of more loans is not much help. And it will distract both governments from the real issue, which is how to make peace rather than war.

This is also a problem for the Reagan administration—how to restore momentum to the peace process. Recognizing that any significant developments will probably not occur until after the upcoming Israeli elections, the new administration here has an opportunity to do some thorough advance thinking and planning outside a crisis atmosphere. The proposed sale does not suggest it has done so, for it is hard to see how the negotiating process can usefully be served by supplying advanced weapons to the Saudis and thereby decreasing their incentive to participate in the peace process. It is fundamental human nature to expect people to seek compromise when the benefits of doing so outweigh the benefits of noncooperation. So long as we effectively reward the Saudis for their intransigence, we should expect no cooperation from them.

Nor should we expect them to be very helpful in stabilizing the region and deterring Communist advances. They are already providing major financial support to the most destabilizing of forces—the PLO—and are unwilling to accord us a physical presence in the region. This attitude is a vivid reminder that we have only one firm ally in the Mideast—Israel—and that our policies would be best devoted to strengthening it rather than challenging it.

I had hoped, Mr. President, that the change in administrations would bring to an end 4 years of weakness and inconsistency in foreign policy which have cost us heavily. Thus far, President Reagan has shown every sign of being a strong and effective leader with a clear vision and a willingness to act in pursuit of it. Not everyone here shares that vision in its totality. I have my own areas of disagreement. But it particularly pains me to see a decision such as this one which does not meet any of the President's own objectives. It does not stabilize the region. It does not strengthen Israel. And it is unlikely to have any long-term favorable impact on Saudi oil policy. In short, it brings us—and the Middle East—little but trouble. Although its ill effects on Israel could be ameliorated through greater provision of grant military assistance, its longer-term impact on our relations with Israel and Saudi Arabia and the harm it does to the peace process will be much more difficult to repair. The President would do well to reconsider this unfortunate decision.

Let me repeat two very brief points, Mr. President. It seems to me that what we are doing, whether we like it or not—and many of us do not—is arming an adversary of Israel with the most modern of weapons and that, in turn, is going to force the Israelis to stay in step by obtaining more equipment and that equipment will come from us, and it is going to come from us, if we sell it on

our normal terms, at great cost to an already strained Israeli economy.

The other things we are doing, as a result of this sale and driving Israel toward us for more arms, is making Israel still more dependent on us—economically and and militarily. That, particularly where selling arms first to the Saudis and then arms to the Israelis, has a distinctly familiar—disturbingly so—sound to it. It sounds like the old Carter administration policy of trying to buy peace by selling arms to both sides. I do not think, Mr. President, that that is really the solution.

I am also concerned that this sale has very broad, longer range implications for our policy to bring peace in the Middle East. Apart from the serious threat of the F–15's themselves, I think we have to recognize that there are recurring questions about the stability of the Saudi monarchy.

This is a region noted for its political volatility and, regardless of how responsible and restrained one may consider the Saudi Government, Israel and the United States must always be prepared for the very real possibility that, next week, the Saudi Government will be gone and a different one will be in its place, with different attitudes and policies, but the same military equipment.

In sum, Mr. President, we are talking about some contingencies the preparation for which is expensive and distracting. I hope that we might focus, Mr. President, not so much on how to make war but on how to make peace.

The PRESIDING OFFICER. The 3 minutes yielded to the Senator from Pennsylvania have expired.

The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from New York.

Mr. D'AMATO. Thank you, Mr. President.

The PRESIDING OFFICER. The Senator may proceed.

Mr. D'AMATO. Mr. President, I take this opportunity to ask my colleagues to consider whether or not an arms sale to Saudi Arabia really serves our national interest.

The relationship between the United States and Saudi Arabia during the past several years has not been a pleasant one.

The American people have felt the Saudi Arabian effect on energy costs, inflation, and our entire economy. Now, after the "squeeze" that they have placed on our economy, we are being asked to part with some of the most advanced weaponry that our Nation has. Let us seriously ask ourselves, "Are the Saudis such good friends that we want to arm them with our most sophisticated weapons for, as they say, protection? Will these weapons be used solely for protection?

The arms that are being discussed for possible sale can best be described as "top of the line" items: Airborne warning and control systems, which are more than mere early warning systems with their capacity to direct and control interceptor action; fast pack fuel tanks to enable the range of the F–15 to be doubled so that more weapons can be carried longer distances; and the Sidewinder AIM 9L air-to-air missile, which is capable of head-on attack and, when combined with the AWACS, is an awesome interceptor. These arms present a real challenge to whoever holds air superiority in the region in which they are deployed. In this case, it's Israel

Let us ask ourselves again if we really want to sell these arms to the Saudis, keeping in mind that they have not been helpful in working toward a mid-East peace. Saudi Arabia is opposed to the Egypt-Israel peace and has supported the terrorist PLO with hundreds of millions of dollars. They not only have threatened our allies in Oman, but they have called for an outright "holy war" against Israel. Are these the people we want to share our most sophisticated weaponry with?

The situation in the Middle East is pivotal, to say the least. Let us consider whether this arms sale to the Saudis might tip the Middle East balance and ingnite a waiting timber box.

The internal situation in Saudi Arabia does not lend itself to stability when we consider their constant internal squabbles over royal family succession, the seizure of the Grand Mosque in Mecca, and the human rights violations of the Shiites.

Mr. President, allow me to indicate that Israel is a strong ally of the United States; an ally capable of defending herself; an ally who has provided us valuable intelligence information through the capture of Soviet Mig's, tanks, and missiles. In a possible Soviet-United States confrontation, Israel can be counted on to stand on our side. She is a strong ally who should not be compromised by the proposed sale of these weapons to Saudi Arabia, which would effectively strip Israel of her air superiority in the region. This is no way to treat a strong ally.

We must also consider the security of our military technology. The airborne warning and control systems are certain to attract Soviet attempts to compromise the Saudis either through espionage, crew defection, or radical takeover. We must consider the possibility that our technology might fall into unfriendly hands.

If this proposed sale of weapons reaches the floor of this body, I urge all of us to consider its impact on the delicate balance that exists in the Middle East and its impact on a good and loyal ally of this Nation, Israel. The proposed sale is not in our best interests and will only fuel the tension that already exists in the Middle East. These facts I respectfully ask my colleagues to consider.

In short, this sale does nothing to advance the cause for political or military stability in the Middle East.

The PRESIDING OFFICER. The 3 minutes for the Senator from New York have expired.

The Senator from Oregon.

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, while there is yet much to be heard and considered on the proposals to supply fuel tanks and missiles to the Saudi Arabians on the F–15's, I think it is useful at this time to express my personal reservations on having the United States supply such equipment.

The 1978 sale of the F–15's by the United States to Saudi Arabia was approved by the Senate on the strict condition that such equipment was not to be made available in order to provide guarantees that the F–15's would be used only for defensive purposes. Accordingly, in my view, there is a heavy burden of persuasion on those who would now seek to supply such equipment.

I am concerned that appropriate assurances be provided by Saudi Arabia to the United States that the F–15's with such additional equipment would be used under appropriate circumstances to promote the interests of the United States in the Mideast, even if our interests conflict with those of one or more other Arab nations.

Such equipment, with potential for military offensive purposes, poses an obvious threat to Israel in the face of the Saudis' continued support of the PLO, their opposition to the peace initiatives embodied in the Camp David accord and hostile statements by Saudi Arabia against Israel, such as King Khalid's call for a holy war at the Islamic summit meeting last January.

It may be that commitments by Saudi Arabia, backed by corroborating deeds, could satisfy these concerns; but these are threshold questions which should be resolved before giving serious consideration to providing the fuel tanks and missiles.

Mr. TOWER. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, it appears that I have been the devil's advocate here today. I have taken a position that is certainly politically unpopular, and I know that I take political risks in doing so. But I believe that I must advocate those positions which are designed to preserve and protect the national interests of the United States of America. Indeed, our foreign policy must be based on clear perceptions of national interest.

In my view, it is in our national interest to preserve the political and territorial integrity of Israel. Beyond that, we have a strong moral obligation to Israel, and I am not one who would see the United States treat its friends lightly.

I believe that the Israelis are a valued ally, that they are a country that has great military, political, and strategic importance in the eastern Mediterranean area and the Middle East. Certainly, the strength of Israel is something the Soviets have to calculate in pursuit of any of their objectives in the Middle East.

I would not support anything that I seriously believed would jeopardize the security of Israel. In fact, this sale would not. It has been suggested that the administration is being precipitate, that they are being hasty, in making this decision. Quite to the contrary, this is something that I am certain the admin-

istration has agonized over for a long time. In fact, the hastiness has been in the knee-jerk response of the opposition to the sale, because it appears that a number of my colleagues are still thinking of the threat in 1978 terms rather than in 1981 terms. Let us look at what has happened since then.

To begin with, the threat to Israel from her most powerful neighbor, Egypt, has been removed by the Camp David accords.

Second, Iran, as a result of revolution, has turned from ally to adversary. We no longer have a powerful Iran with a sophisticated armed force to defend our interests in that area.

The Soviets have occupied Afghanistan. The activity in the states around the Persian Gulf that are Soviet surrogates has increased. Look at South Yemen. Look at Ethiopia. Look at Colonel Qadhafi and his projection of power into Chad and the threat to the Sudan. Look at the links that are being established by Soviet surrogates.

The Saudis clearly perceive the Soviets, not Israel, as the principal threat to their own security. They are not likely to waste their military resources in a hopeless war against Israel, and that is what it would be.

One thing that the speakers here today have not brought out is the fact that the AIM–9L Sidewinder is not as capable a weapon as the AIM–7 Sparrow, with which the Israeli F–15's are armed.

One Saudi military man said to me, "We would be fools to attack the Israelis. They would chew up our F–15's, and they would come back and bomb every one of our airfields within range." The Saudis recognize the military capability of Israel.

Let us say a word about Saudi policy. I have no sympathy with and I do not advocate the Saudi posture toward Israel. In my view, it is totally improper and incorrect, and I could not disagree more strongly.

I sat in Riyadh a few weeks ago and had an insulting and abusive tonguelashing for 2 hours from a member of the Saudi Government on Israel and the Palestinian problem. I must say that it tried my patience considerably. I disagreed profoundly with their positions.

However, we cannot always be afforded the luxury of only associating ourselves with those countries with whose policies we agree. We cannot always impose our policies on other countries which happen to share mutual interests with the United States.

In terms of the jihad that has been mentioned here today, I can assure you that that is more rhetoric than substance. I do not believe any of those states—even those with a greater animus toward Israel than Saudi Arabia has—are prepared to take Israel on at this point.

I believe that we always should make sure that the Israelis are armed with the best equipment possible. As a matter of fact, I have been willing to give the Israelis more than some previous administrations have, because I believe it is in our interests that they possess this military capability. But we must recognize the changed dimension of the threat. We must not always think of it just in Arab-Israeli conflict terms. We have to think of it now in other terms.

What has been suggested here today is that we not enhance the capability of the gulf states, not enhance the capability of the indigenous forces to defend themselves against the Soviet threat.

It appears that we are more prepared to raise the American force level and the American presence over there and risk American lives, rather than take some action that, on the face of it, might appear to pose some threat to the security of Israel.

Mr. President, thinking in terms of Israeli security, if we oppose the enhancement package sale to Saudi Arabia, we contribute nothing to the security of Israel. In fact, are we going to be influenced by emotional arguments, some politically motivated, or are we going to be influenced by a real and perceptive look at the long-range security interests of Israel?

In fact, the Saudis now are the dominant figure in the Gulf Cooperation Council. There are six gulf states that have organized, not to fight Israel, but to establish a mutual security effort against the Soviet threat and whatever threat is posed by the conflict between Iraq and Iran.

Our AWACS aircraft are over there now to work with the Saudis, to work with our fleet units, to work with British and French fleet units, trying to defend our vital interests over there. That is why they are there.

So there is a clear recognition of what the threat is.

When we talk about offensive capability in terms of the enhancement package for the Saudi F–15's what we are really talking about is a defensive capability against the more immediate threat posed by the Soviet presence in the Middle East and posed by Iran.

When we posture the enhancement package against that immediate threat, it is not an offensive capability. It is a defensive capability.

If we do not provide this enhancement package, what the Saudis will do in the interest of defending themselves against what they perceive to be the greatest threat, and that is the Soviet Union, is buy the French Mirage 2000 or 4000 aircraft. The Mirage 2000 or 4000 will have an armament package that is more offensive capable than what we propose to sell to go along with the F–15's.

Does that make any sense in the security of Israel?

Furthermore, that is a force that could be rationalized with the force of Iraq that also possesses Mirage aircraft.

I yield myself 4 additional minutes.

And there would be an enormous pressure placed on Saudi Arabia in the event of a conflict between other Arabian states and Israel to incorporate a Saudi Mirage force into the Iraqi force. It would pose, over the long term, a greater threat to Israel.

In my view, we minimize the threat to Israel when the gulf states arm and defend themselves by providing them with our equipment which requires our spare parts, our technical assistance, and our supply train.

Do not tell me we do not influence the use of those systems. Obviously, when the supply train was cut off to Iran they could not fully employ the most sophisticated aircraft we sold them, the F–14, against Iraq. That is an example of what happens when foreign countries possess American equipment and Americans do not support what they are doing.

So let us think in terms of the real security of Israel.

As disagreeable as the Saudis have been on matters pertaining to Israel, they have been a moderating influence among Arab States that are far more hostile, far more virulent in their opposition to Israel.

Moreover, to say that the Saudis have done nothing for the United States is simply not true.

I recognize they have gone along with OPEC price increases, but they have tended to moderate those increases and currently they sell their oil at below the OPEC price.

Let me note further that they are producing now roughly twice as much oil as they need for their income and many Saudis are very critical of the Kingdom's high oil production policies. They feel that Saudi Arabia's only natural resource is being wasted and that there are insufficient viable investment opportunities for the income that is in excess of the Saudis' domestic needs.

So I think we have to look at the positive side of what Saudi Arabia has done.

Let me note also that they give a very high percentage of their GNP to foreign assistance, much higher than we do, and that assistance is going to such countries as Morocco, the Sudan, North Yemen, Somalia, and Jordan, all countries that are either friendly to the United States or countries that we want to be our friends. The Saudis are prepared to continue such help and have indicated that they might give assistance also to Turkey and to Tunisia, friends and allies of the United States.

I might note the Saudis have consistently supported the dollar. Currently a large proportion of their more than $100 billion of foreign official assets is in dollar instruments, and I might note further that Saudi Arabia led the Islamic world in condemnation of the Soviet invasion of Afghanistan.

Certainly we disagree with their policies toward Israel. Certainly we disagree with their failure to accept the Camp David accords.

Remember, they are now part of an organization of the Gulf Cooperation Council which contains one important state, Oman, that has supported the Camp David accords.

If we fail to supply the indigenous forces in that area with military equipment they need to protect themselves against a threat both to our interest and theirs, then we have made a very foolish decision indeed.

Mr. President, I reserve the remainder of my time.

Mr. PACKWOOD. Mr. President, will the Senator yield for a question?

Mr. TOWER. I yield.

Mr. PACKWOOD. Mr. President, when the Senator was recently in Saudi Arabia in meeting with Government officials did he pose to them the question of why they refuse at all to negotiate with Israel on a peace treaty?

Mr. TOWER. I believe the Saudis feel that the internal political consequences for themselves within Saudi Arabia and in the broader fraternity of the Arab world would be inimical to their long-term interest. I feel that Saudi Arabia is going to be the key to the ultimate settlement of the Middle East problems, but I think that we have to permit them some latitude and consider the internal political forces that are at work in that part of the world.

I think it is pretty obvious that all of the Arab States over there fear the Palestinians. They have a great problem with the Palestinian presence in so many of these countries, and they earnestly desire to get the Palestinian issue solved, to get that issue off of their backs so they can focus more on what the real threat is in that area.

But I think we must understand the internal political forces at work on some of these governments.

If we pushed the Saudis or any other government for that matter into a position that provided a political hazard for the survival of that Government, we might see that Government or other governments in a similar situation replaced by governments far more hostile to the United States.

Mr. PACKWOOD. Do I understand that answer to mean that the Saudis feel that their Government is so shaky that even to enter into negotiations would cause their downfall?

Mr. TOWER. I think the Saudis are thinking in terms not just in their own internal situation but in terms of what might happen in other countries of the Arab world. Remember, they are in a pretty nasty neighborhood right now. They have South Yemen on their flank; they have Iraq on their flank. So they are in a position where a too apparent softening of an attitude could result in an exploitable situation for the Soviets, who do not like the Saudi Government, to bring that Government down.

Mr. PACKWOOD. Mr. President, the Senator from Texas has made reference several times to the moderation of the Saudi Government in the sale of oil and the production of oil.

There is an interesting column in the Christian Science Monitor on March 5 by Mr. C. L. Cranford reporting on a speech that Oil Minister Yamani made in Saudi Arabia, and in a question and answer period he was asked the question as follows:

> The Saudi citizen sees the oil policy of the Kingdom of Saudi Arabia as one under which we produce more than the needs of our economy and sell at a price less than that of others, including those of the Gulf countries. In response to these efforts, we find that we are under attack in the media and by the heads of state of Western countries.

Yamani, in response to the question, said as follows:

> If we were to force the Western countries to invest large sums of money in alternative energy resources, it would take seven to 10 years to bring about some results of these investments, which would reduce oil demand to a level that would affect Saudi Arabia, which at that time would not find enough markets to sell its oil to meet its economic demands.

Sheikh Yamani then goes on to indicate he can understand why Algeria or other countries want to sell oil at the highest price possible immediately. Algeria will not be able to export any oil after 1990. Saudi Arabia has ample oil. It is not in their interest to force the United States and other Western countries by prices so high into a position of turning to alternative forms of energy so that we will no longer need Saudi Arabia's oil.

Sheikh Yamani continues:

> The interest of the Kingdom of Saudi Arabia is that we extend the life of oil to the largest extent possible to allow us to build our economy in the most diversified manner including industry and agriculture.

He predicted that Saudi production, presently at 10.3 million barrels a day, might drop to as low as 5 million barrels by 1982.

Mr. President, all Sheikh Yamani is saying is that Saudi Arabia's policy is going to be carried out in Saudi Arabia's interest, not our interest, not Western Europe's interest, not Japan's interest; their interest. And that is as I would expect it would be, just as our policy should be carried out in our interest.

I come back to concluding with the premise that I started with. The best thing that could happen to the Middle East in terms of a unified protection against the Soviet threat is peace in the Middle East; a unified Egyptian, Saudi Arabia, Jordanian, and Israeli presence in the Middle East; united in peace, agreeing on their boundaries, agreeing on their territories, and united against the Soviet threat. Saudi Arabia is the key to that peace. Egypt has agreed to it. Jordan would agree if Saudi Arabia would agree.

And yet I am told by the Senator from Texas that one of the most powerful countries in the Arab world, one of the richest, one that has been the most able, with a limited, reasonably homogeneous population, cannot do what Egypt was able to do, a country that is poverty stricken, a country that over the years has been through a variety of revolutions, while the Saudis have not.

I am saying that until Saudi Arabia realizes that its interests, the Middle East's interests, Israel's interests, and our interests all coalesce in terms of being united for peace in the Middle East against the Soviet threat that the Senator from Texas makes reference to—until they are willing to do that, and especially if their regime is as unstable as the Senator from Texas indicates—then I think we would be very unwise to place in their hands the most sophisticated weaponry that this Nation possesses.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. Mr. President, the Senator from Oregon has suggested that Sheikh Yamani has indicated that it is in the Saudi national interest to increase the production of oil and keep the price down. I would expect that he would make that argument at home. I would not expect that he would try to sell the Saudis on the notion that it should be done for altruistic reasons.

I also assume that my friend from Oregon expresses his concern over Israel because he believes the preservation of Israel is in our national interest. I would not think the Senator from Oregon would contend it is not in our national interest, but something we should do anyway. Obviously that is the rationale for supporting Israel and not just selling them equipment but giving it to them as well.

We do it. Why? For altruistic reasons? Partially, but largely because it is in our national interest to do so.

We would all like to see this Middle East problem resolved, but I suggest we had better not try to dictate the terms of the resolution of this problem because we might find that in trying to do so we have exacerbated the problem.

I have no use for the PLO. It is a terrorist organization; it is an implement of Soviet policy, and I think we should continue to be critical of Saudi policy in supporting the PLO.

But I can say that the Arab States have seized on the PLO simply because they see it as the only viable representation of the Palestinians. I hope we can find more responsible leadership among the Palestinians in order to achieve some sort of rational settlement in the Middle East.

Once that problem goes away, the Soviet threat will still be there. They will try to find other things to exploit, so we must understand that once that is accomplished the Soviet threat does not go away, and it is essential that the indigenous forces in that area have the capability to do something in their own defense.

They want to do it. I think that, perhaps, the scope of the internal problem for Saudi Arabia and other states is underestimated. Saudi Arabia does not now have simply a homogeneous population. There are 5.5 million Saudis and 2.5 million foreigners in Saudi Arabia right now. There are 100,000 Palestinians there now and an even higher number of other Arab State nationals. They do pose a problem, and we have got to be understanding of that problem, while disagreeing with the posture Saudi Arabia has taken.

In the final analysis we cannot talk of the threat in 1978 terms. We have to think of it in 1981 terms, and the dimensions there have changed dramatically. In my view it would be tragic if we did not give indigenous forces in the area the ability to help defend themselves and to defend our vital national interests.

Mr. President, I am prepared to yield back the time if the Senator from Oregon is prepared to do so.

Mr. PACKWOOD. Mr. President, I have Senators MITCHELL and HART who have requested 1 minute each.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time allotted to me be allotted to Mr. BAUCUS so that he may further yield it, I understand, to the distinguished Senator from

Maine (Mr. MITCHELL), who will want 3 or 4 minutes. So I yield it to Mr. BAUCUS to control, if that is agreeable.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon.

Mr. PACKWOOD. How much time do I have left?

The PRESIDING OFFICER. The Senator has 54 seconds.

Mr. TOWER. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes and 15 seconds.

The Senator from Oregon.

Mr. PACKWOOD. I yield the remainder of the time I have left to the Senator from Maine.

Mr. MITCHELL. I yield to the Senator from Montana.

Mr. BAUCUS. Mr. President, I yield 3 of the 15 minutes that the minority leader yielded to me to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine is recognized for 3 minutes.

Mr. MITCHELL. Mr. President, I am concerned about the recent reports that the administration will recommend the sale to Saudi Arabia of equipment to expand the range and offensive capabilities of the 62 F–15 airplanes she is buying from the United States.

The sale of this equipment would add another element of destabilization to an already uncertain political climate in the Middle East.

When the Saudis first requested these airplanes in 1978, a narrow Senate vote approved the sale, only after the strongest assurances from the executive branch that the intent of the sale was to upgrade the Saudi defensive capability only. At that time, Congress—and our friends in the Middle East—were assured that there was no intention on the part of the Saudis to request further capabilities for these planes, and no willingness on the part of the American Government to provide any such equipment.

In 1980, when the Saudis again requested the offensive equipment that had earlier been denied, over two-thirds of the U.S. Senate joined in a letter to President Carter, urging that the request be denied. A decision was delayed until after the election. Now we learn that the administration plans to approve that request and send it to Congress for approval.

A careful assessment of the military and diplomatic situation in the Middle East at present reveals no compelling evidence that this sale of offensive equipment is warranted by Saudi defense needs.

The fuel packs which the Saudis seek and the administration wishes to provide, will have the effect of more than doubling the range of the F–15 from 450 miles to over 1,000 miles. Thus, from a defensive mode, the F–15's will be transformed into a striking force capable of hitting any part of Israel from deep within Saudi territory. Yet the Soviet presence, which is cited as a reason for the sale, is located well over 1,000 miles distant, in Afghanistan.

The other major component of the equipment package to be approved for sale is the advanced version of the Sidewinder missile, the AIM–9L. This is the most advanced air-to-air missile in the U.S. armory. It is only now being deployed on our own F–15's.

Any objective review of Saudi Arabia's defense needs today must conclude that its ability to deter—let alone defeat—a Soviet attack is nil. The only force capable of withstanding a full-scale Soviet attack is our own.

The threat from South Yemen has been amply countered by the substantial Saudi tank purchases and by the original configuration of the F–15's.

The threat from Iraq has substantially vanished with the involvement of that country in its continuing war with Iran.

I recognize and share the administration's desire to assure international stability and order. But I question whether the arming of Saudi Arabia with an inherently offensive capability will be perceived by any of her neighbors—particularly Israel—as a contribution to stability in the Middle East. Rather, it seems to me, it might well be viewed as an inherently destabilizing factor in a region already ridden with tension.

Decades of wars in this area should have demonstrated to us by now that the only secure and lasting road to stability in the Middle East is through the political process of negotiations leading to agreements for restraint. The buildup of arms in Iran should have been a lesson to us that the regimes we arm have no more inherent ability to stay in power than those we fail to arm.

The fact is that the lethal and escalating arms race in the Middle East is an element of instability in itself. If it can be restrained, at least the potential of unpredictable disaster is somewhat lowered.

Under the circumstances, I hope the administration will reconsider and not ask that this equipment be approved for sale. It will add nothing to Saudi Arabia's legitimate defensive needs, and it has the potential for detracting from her long-range security as well.

Mr. President, I thank the Senator from Montana for yielding me the time.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield 30 seconds to the Senator from Colorado.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. Mr. President, in 1978, when the Senate debated the sale of airplanes to Saudi Arabia, at that time, as Senators will recall, a commitment was made that further enhancement of the capabilities of those aircraft in a manner that might make them a threat to the Government of Israel was absolutely opposed even by those who were proponents of the sale of the aircraft. Now, some 2 or 3 years later, we have the very fact that was feared most by those of us who opposed that sale at the time and by the Government of Israel.

Mr. President, I oppose the administration's proposal to enhance the power and range of the F–15 fighter planes sold to Saudi Arabia in 1978 because I do not feel the proposed arms sales advances the interests of the United States in the Middle East.

When I opposed the original sale of the F–15's to the Saudis in 1978, I stated as my guiding principle that any foreign policy action we take in the Middle East must advance, rather than retard, the chances for peace between Israel and the Arab States. That same principle underlies my opposition to the administration's proposal to sell the Saudis conformal fuel tanks, AIM–9L air-to-air missiles, and aerial refueling and airborne surveillance systems. At the time of the original sale our Government pledged that the F–15's would never be so equipped. Because the proposed arms sale represents a major shift in U.S. policy and commitment the burden of proof on how this sale will advance the prospects of peace must be on those who advocate it. They have not convinced me these sales will serve the interests of the United States.

I have always supported U.S. commitment to the security of Israel and will continue to do so because I believe a strong Israel is in the national security interests of our own Nation. The arms sale would significantly increase the military threat to Israel and thus jeopardize the military balance in the Middle East. In 1978, the F–15's represented a potential threat to the security of Israel, our truest friend and most dependable ally in the Middle East. The new sale clearly increases this threat. The conformal fuel tanks more than double the combat range of the Saudi F–15's. And the air-to-air missiles, aerial refueling and airborne surveillance systems are substantial force multipliers which also enhance the offensive power of the Saudi aircraft. The Saudi's best intentions are no guarantee that F–15's will not fly against Israel in the future. No one can guarantee who will command the Saudi arsenal tomorrow or the next day. We must never be willing to hazard the guess.

The proposed arms sale raises other considerations not the least of which is further burdening Israel's economy with even greater requirements for arms. The administration's quid pro quo of extending additional credit to Israel for the purchase of more military hardware is hardly the solution for a nation already overwhemed by defense costs.

The arms spiral means not more security but even greater economic struggle for Israel and greater instability in the Middle East. Whatever the immediate benefit of improved relations with Saudi Arabia they are no bargain if their price is Israel's military or economic security.

In addition, the sale would violate specific commitments made to Congress just 2 years ago not to sell Saudi Arabia these systems for its F–15's. In a letter to the chairman of the Senate Foreign Relations Committee, Defense Secretary Brown stipulated—

The plane requested by Saudi Arabia will not be equipped with the special features that could give it additional range. Specifically, the planes will not have conformal fuel

tanks (fast packs), i.e., auxiliary fuel tanks that conform to the body of the plane, and Saudi Arabian KC-130 tankers do not have the equipment for air refueling of the F-15.

Our national interests are not served by a policy that seeks to promote peace and stability in the Middle East by reversing previous commitments and by increasing the capabilities for war.

The administration's justification for its new course of action is that Soviet advances in the region have radically changed the complexion of the region and the administration must adopt a new perspective on the region's problems in light of these dangers. The Soviet challenge and the West's need for continuing access to the region's resources are indeed important concerns, but so are the value of U.S. pledges and the increasing danger imposed by the introduction of sophisticated weapons, especially in the absence of any movement toward political progress.

Saudi Arabia is a friend, and we share common security concerns. We must not forget, however, that the arms we are giving her are being introduced into an environment in which there has been no progress toward alleviating tensions between Israel and its neighbors. Saudi Arabia has if anything been more bellicose in recent weeks, leading the way for Arab and Moslem countries to issue radical declarations calling for boycotting Israel and waging holy wars to liberate Jerusalem.

The Saudis' decision to seize upon this equipment package as a test of our friendship is unfortunate. This is the worst argument in favor of the new sale. The original F-15 sale was described the same way. The administration satisfied the Saudi request, but for the United States the relationship did not improve and the "tests" continued.

This sale would not enhance the security of Saudi Arabia, a nation increasingly threatened by internal instability. Pouring arms into this region will in fact only increase instability.

Nor would the sale strengthen the Arab-Israel peace process. Saudi Arabia has been a leading opponent of the Camp David accords, and there is no evidence the Saudis will be willing to work toward a lasting peace in the Middle East in exchange for this sale.

For the reasons I have outlined, I believe the proposed arms sales do not advance the interests of the United States in the Middle East. I oppose the sales, and I urge my colleagues to do likewise.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. Mr. President, I yield 2 minutes to the Senator from Arizona, Mr. GOLDWATER.

Mr. GOLDWATER. Mr. President, I wish to address myself to the subject of the F-15 aircraft proposed to be sold to Saudi Arabia. This matter has waxed hot and cold in the press. It goes up one day, down the next.

I am in favor of selling Saudi Arabia F-15's. In fact, I think it is time that we began to think a little bit more about the Islamic presence as a part of the world, whether we like it or not, that we are probably going to become more and more engaged in.

In fact, just the other day the Secretary of State indicated that he could see the day when American forces might occupy that part of the world that I am talking about.

Now, just a word about this F-15 aircraft. It is an air superiority fighter, Mr. President. It is not—I repeat—it is not a ground support aircraft.

If I were a member of the Israeli Government and another country, a potential enemy, were being delivered ground support aircraft, it might be a little different thing. But this airplane is not a ground support aircraft, although I have to admit that there are members of our Joint Chiefs of Staff who have urged upon McDonnell Douglas to make a strike version of it. I doubt that it will be successful. I even doubt that the Armed Services Committee will approve it, because the F-15 does not have a good flying tendency near the ground. It does not pull as sharply as it should. It has a tendency to settle a bit before it starts up.

But, Mr. President, Saudi Arabia is one of the few friends we have left. Israel is certainly our friend.

Mr. President, there is no question about our loyalty to Israel. Even though we have no signed treaty with her, we have an understanding that we will come to her protection and I think that will be observed and honored by every Member of Congress.

But to say no to the one big friend we have in that part of the world would be a bad mistake. We are going to have to rely more and more and more on Saudi Arabia for ports, for airfields, for support, not to mention her oil. I think we can forget about that, because now that we have deregulated oil and gas I think we are going to become self-sufficient ourselves.

But I believe we made the right decision to sell them these airplanes and thereby cementing our friendship a little more. I think, in the long run, it will prove beneficial to Israel, rather than detrimental. I thank my friend from Texas for yielding.

ARMS SALE TO SAUDIS

Mr. COHEN. Mr. President, as a member of the Senate Armed Services Committee, I am keenly aware of the importance of maintaining peace—and an atmosphere which fosters peace—in the Middle East.

The Seapower and Force Projection Subcommittee, which I chair, has held a series of hearings on the Rapid Deployment Force and on the need for protecting the U.S. interests in Southwest Asia. There is no question about the strategic significance of that region to our Nation.

Because of this, it is especially important that our Government carefully weigh possible courses of action which affect the political stability of the Middle East. Before we undertake any step, it is imperative that there be a full airing of the full range of implications which that step could entail.

In this regard, I think that today's colloquy about the administration's proposal to provide sophisticated weapons to Saudi Arabia serves a healthy purpose. It puts on the public record some of the considerations which must be taken into account as the administration proceeds on this matter.

I am confident that most of us in this body would fully support helping the Saudis to strengthen their capability to defend against either internal subversion or the threat of attack or invasion by a hostile force. The relationship of the Saudis and our Government has been one of cooperation, and I know we will want to continue to work together toward goals or mutual interest and concern.

We must proceed with caution, however, on the sale of any weaponry which could, under certain circumstances, be used for purposes counter to those of peace in that region. In my view, the case for the sale of the offensive weapons is not yet clear or convincing.

In 1978, when the decision was made to sell F-15 fighter-bombers to Saudi Arabia, Congress was given specific assurances that no additional equipment which would enhance the capability of the F-15's would would be requested or provided to the Saudis. The Carter administration sought to provide the Saudis with equipment to upgrade the F-15's equipment last year, and I was one of 68 Members of the Senate who opposed that sale. I continue to have reservations about undertaking this kind of action.

The equipment involved in the proposed sale is exactly the type which Congress in 1978 was assured would not be requested. The conformal fuel tanks would increase the range of the F-15 dramatically, and the Sidewinder AIM 9-L air-to-air missiles would enhance the firepower of the F-15. The AWACS (advance warning and control system) observation plans would significantly enhance the Saudis' intelligence-gathering and command and control capability.

These items could affect the strategic balance in the region. The Israelis are concerned that with the fuel tanks, every city and town in Israel would fall within Saudi Arabia's range. The AWACS system would, says Israel's deputy defense minister, allow the Saudis to monitor all of Israel's military activities, locating troops, aircraft, tanks, and artillery pieces.

As the proposed sale is considered, then, attention should focus on whether the interests of the Saudis, and of our Nation, might not be better served by a different mix of weaponry. The threat from the Soviets and the efforts of radical elements to overthrow all pro-Western regimes are clear cause for assisting the Government of Saudi Arabia. But that assistance could be more valuable to the Saudis if it addresses their defense needs. That, rather than the sale of offensive weaponry which could one day be turned against our allies, would seem to be a course which deserves greater thought.

As the administration considers its course, and as we in Congress review the administration's actions, the goal of enhancing the prospects for long-term peace in the region must be paramount. Our stake in maintaining Mideast peace

is a large one. But it is equally large for the Saudis, the Israelis, and our other allies in the region.

Any action which carries with it the possibility of upsetting the balance needed for preserving the peace is an action which bears with it additional responsibility for all of us. That is why I welcome this colloquy, and why I look forward to working with the administration and my colleagues in the Senate to see that we act responsibly on this question.

The PRESIDING OFFICER. The Senator from Montana has the remaining time.

Mr. BAUCUS. Mr. President, I yield back the remainder of my time.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 30 minutes, and Senators may speak therein up to 5 minutes.

The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

PETE DOMINICK—A SENATOR'S SENATOR

Mr. HELMS. Mr. President, the news of the death of former Senator Peter H. Dominick leaves all of us saddened, and deeply so. Pete Dominick was a great American and a great Senator. He was, in fact, a Senator's Senator because he had an abiding respect for this institution and its meaning.

I served only a couple of years with Pete Dominick, but that was sufficiently long for me to understand that here was a man who approached his every responsibility with dedication. He did his homework, and he followed a set of principles that established him as one of the Nation's leading defenders of the free enterprise system.

I have so many memories of Pete's friendship. I recall his coming to North Carolina during my 1972 campaign, and appearing with me at a rally at the historic old Battery Park Hotel in Asheville. That was the last public event held in that hotel before it closed. I remember that Pete was experiencing severe discomfort that evening from a back ailment, but that did not deter him from making a trip to help a friend.

Mr. President, I join Pete Dominick's many other friends in saluting a gallant American. Dorothy joins me in extending our deepest sympathy to Nancy and her family.

AIRLINE DEREGULATION

Mr. PRESSLER. Mr. President, I would like to offer some comments on the sad state in which airline deregulation has left many regions of our country. The argument is frequently made that if the marketplace operates unfettered, we would have the best of both economic worlds: Business would be able to operate profitably; and the needs of the American public would be met. In the case of airline deregulation, this has not been the case. There are vast regions of the United States which have been left without service, or with service which is inadequate to meet both passenger and freight needs.

As an example, let me detail the current situation in my home State of South Dakota. Let me emphasize that I am using this example solely because it is the one with which I am most familiar.

There is one flight per day from Washington to Pierre, South Dakota's capital. This flight makes three stops, there is a change of planes, and the total travel time is 6 hours. Or take the case of Sioux Falls, our largest city, with a population of 81,232. This trip requires a change of planes, a limited flight availability and the trip takes at least 6 hours, although it would only be a 3½ hour trip if a direct, nonstop flight existed between Washington and Sioux Falls.

At least South Dakota still has service to many towns, albeit via cumbersome routes. Many other small- to medium-size cities around the country have lost service altogether. Nevertheless, there is one additional drawback to even this inconvenient service: the cost.

I am sure you have all seen the large ads in the major east coast newspapers which boast about flights to the west coast and back for approximately $300 round trip. Logic might suggest that since it is farther to the west coast than it is to South Dakota, it should cost less to fly between Washington and Pierre or Sioux Falls. Logic, however, no longer applies in the postderegulation era. The coach fare for a round trip ticket between Washington and Pierre is $522. For a round trip flight between Washington and Sioux Falls it is $456. Apparently the people of my State are being permitted to pay more money for less service. This makes no sense to me, nor does it make sense to my constituents.

We are still being told that commuter carriers will step in and fill the void when a major carrier leaves a service area. South Dakota is in the process of losing certificated carrier service to towns, and we are having difficulty finding a commuter carrier willing to serve these routes.

This brings me to another related point: The sunsetting of the Civil Aeronautics Board. The current discussion seems to focus on whether it will be possible to speed up the process of eliminating this agency, not whether it is wise to do so. Not enough attention has been paid to the assumption of certain CAB duties we cannot afford to lose. I have grave doubts about the ability of the marketplace to replace service we are losing. So far it has not, and unless some Federal body takes over this task from the CAB, I doubt that it will ever happen.

I question what interest the CAB has in continuing to carry out its functions during its final days. Most of the employees, I am led to believe, are primarily concerned with finding new employment and not with implementing the deregulation program passed by Congress. This is to be expected; it is human nature. Nevertheless, should we not be concerned about the many crucial decisions which the CAB must make in its last few years?

One of the most critical of these decisions is the ongoing competitive marketing case. This is an issue which will have a profound effect on whatever type of air transport system the CAB leaves behind. The future of thousands of travel agents is tied to whatever the CAB may decide. I do not believe it is proper for a Federal agency to implement an experimental program of such vast scope just prior to disappearing from the regulatory scene. This does not necessarily mean that I wish to retain the CAB past its proposed sunset date. However, unless oversight is provided for future review of the actions CAB is likely to take, then perhaps the CAB should not be pursuing an investigation with such potentially monumental economic consequences.

There are over 17,000 travel agents in the United States. Most of them are small businesses. It would be foolish to threaten this existing network in favor of some unknown system of travel service distribution. There is much speculation that an alternative system could offer the American public great financial savings. I also recall similar speculation during the debate on airline deregulation. Where are the savings which were envisioned for the people of my State under deregulation? And what happened to the service we used to receive?

What reason is there to think that this case will be different; that if the existing network of independent travel agents is dismantled we will somehow end up with a more efficient and less costly system? I am not convinced there would be greater benefits. Let me suggest that until we have a system in place to handle the regulatory problems which are bound to arise in the post-CAB world, perhaps the CAB should refrain from making such basic and far-reaching changes in what remains of this country's transportation network.

With these concerns in mind, I recently sent a letter to the Chairman of the Civil Aeronautics Board, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON COMMERCE,
SCIENCE, AND TRANSPORTATION,
Washington, D.C., March 17, 1981.

Mr. MARVIN COHEN,
Chairman, Civil Aeronautics Board,
Washington, D.C.

DEAR MR. COHEN: Recently I was visited by a group of travel agents from my home state of South Dakota. Among the topics we discussed was the ongoing competitive marketing case which is before the Board.

The purpose of this letter is to not only pass along the concerns expressed by these individuals, but also to let you know that I, too, am alarmed by the possible consequences of this investigation. You are undoubtedly aware that for many of us in primarily rural states the airline deregulation experiment has been a disaster. I voted against the measure, but with the deregulation tide peaking, there were few of my colleagues who joined me. However, I know that with the benefit of experience there are many more of my colleagues who now feel as I do.

The point of this is that we must be very careful not to make the same mistake in the case of the marketing travel services. We now have a very workable system which has proven itself after many years of trial. It would be foolish, I think you will agree, to sweep the system aside in favor of something untried and uncertain.

This is not to say that improvements could not be made to the existing system. But without a continuing government oversight and management system in place to monitor the effects of whatever changes are made, we could end up with another collapsing system similar to the existing air transport system in many rural states.

I ask that as you proceed with this case, every effort be taken to make sure whatever changes result do not reduce the current availability, range and quality of service travel agents provide. As we learned from the airline deregulation experiment, it is better to err on the side of being too cautious than too flamboyant.

Sincerely,

LARRY PRESSLER,
U.S. Senator.

Mr. PRESSLER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 2 P.M. TODAY

Mr. BAKER. Mr. President, there are certain meetings that are about to begin that relate directly to the matter that will be before the Senate later today, and other matters that will require the attention of the Senate later this week, and perhaps next week.

There will be meetings on both sides of the aisle. They are urgent, they are important, and they will facilitate the work of the Senate.

In order to provide time for those meetings to occur, I ask unanimous consent that the Senate now stand in recess until the hour of 2 p.m. this afternoon.

There being no objection, the Senate, at 12:06 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

IRS SHOULD RECONSIDER

Mr. PERCY. Mr. President, last December the Internal Revenue Service issued Revenue Procedure 80–55. Under this procedure, banks would be prohibited from deducting as a business expense the interest they pay on time deposits collateralized by tax-exempt securities.

IRS action reserves tax policy that has been in force since 1954, yet not a single day of public hearings was held on this procedure. IRS has the authority to interpret the Tax Code, but I believe they have overstepped their bounds in this case.

Consequently, I have added my name as a cosponsor to S. 321, which would prohibit this procedure from taking effect on June 1, 1981, as is now scheduled.

State and local government would be greatly affected by this procedure, as it would have the effect of undermining revenues immediately. It would also have the effect of further drying up the market for municipal securities, already hard hit by the sky high interest rates of the past year.

Financial institutions are the major purchasers of tax-exempt securities of State and local governments. According to the National League of Cities, commercial banks hold 45 percent of outstanding State and local debt. Moreover, 33 States—including my own State of Illinois—require banks to secure public deposits with State and local bonds.

If interest on these accounts were suddenly not deductible as a business expense, banks would have very little reason to purchase securities and a major source of capital for State and local governments would dry up. It has been estimated that Illinois alone would lose as much as $30 million a year in interest income on State time deposits in commercial banks.

It is not just large financial institutions that would be affected by this procedure, but any institution that accepted State funds in a time deposit. In Illinois, the State deposits its funds in 1,100 different financial institutions.

Mr. President, I have received an excellent, conscise letter from Governor Thompson of Illinois about this procedure and the effect it would have on our State. I ask unanimous consent that it be printed in the RECORD at the close of my remarks.

I hope the new administration will recognize the major changes this procedure would bring to State and local government finance and withdraw it so this legislative remedy will not be necessary. Tax policy should be made by Congress, after a careful assessment of who will be affected by a proposal. Procedure 80–55 is not a mere technical change and IRS should reconsider and withdraw it.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF ILLINOIS,
Springfield, Ill., January 22, 1981.

Hon. CHARLES PERCY,
U.S. Senate,
Washington, D.C.

DEAR CHUCK: On December 15, the Internal Revenue Service issued Revenue Procedure 80–55, which will prohibit banks from deducting interest paid on time deposits of state and municipal governments which are secured by tax-exempt obligations. This ill-advised position will significantly reduce the ability of Illinois state and local governments to fund much-needed capital projects. I urge you to request that the IRS withdraw this ruling.

The costs to Illinois in terms of higher borrowing and lower returns on deposits will be considerable. In addition, we are deeply concerned by the manner in which this procedure, reversing long-standing interpretations of law, was issued. It is particularly disturbing that this ruling was published without any effort to consult with state or local governments.

The procedure will affect the right of state and local governments to set standards for securing deposits of their own funds. As a Governor, I am concerned by the tendency of the federal government to take actions which limit the authority of state governments to pursue their daily business.

I will appreciate any assistance you can give us on this important issue.

Sincerely,

JAMES R. THOMPSON,
Governor.

BOBBY UNSER APPEARS AT ALCOHOL FUELS MEETING

Mr. PERCY. Mr. President, Bobby Unser, twice winner of the Indianapolis 500 automobile race, was the leadoff witness at a hearing on the future of alcohol fuels before the Senate Governmental Affairs Subcommittee on Energy, Nuclear Proliferation, and Government Processes.

He was introduced by Senator JACK SCHMITT. Also present at these hearings were Astronaut Gordon Cooper, who flew in from California, using 100-percent alcohol as fuel.

Through concentration on the vital role alcohol fuels play in many parts of American society and around the world, the hearing demonstrated the capacity of alcohol to provide enhanced energy security to the United States by displacing imported petroleum.

In view of the administration's decision to withdraw its loan and loan guarantees program for alcohol fuels, we need fresh approaches that will reassure private investors that alcohol fuels are viable and that they can play an important role in American energy policy now.

Few Americans realize that since 1965 alcohol fuel (methanol) has been the exclusive fuel used at the Indianapolis 500 because of its substantial power and safety advantages. I am especially pleased that we are able to profit from Bobby Unser's expert analysis of the particular contributions of alcohol fuels to racing. Unser has worked with the U.S. Environmental Protection Agency as an engine emissions adviser. He has an extensive race laboratory in his own home. He is undoubtedly one of the best informed and most articulate spokesmen for alcohol fuels in the racing world.

In addition to Bobby Unser, the following witnesses participated in the March 24 hearing:

Dr. Mario Garnero, a founder of the Brazilian National Alcohol Fuels program. About 400,000 pure alcohol-powered vehicles are expected to operate on Brazilian highways by the end of 1981.

Mr. Gerhard E. Delf, a chief engineer for Volkswagen of America. Delf described Volkswagen's participation in a

new methanol pilot program for passenger vehicles in West Germany, as well as the company's success in developing pure-alcohol vehicles for the California Energy Commission.

Dr. Serge Gratch, director of the Ford Motor Co. Chemical Services Laboratory. Gratch, a member of the National Alcohol Fuels Commission, discussed Ford's experimentation with alcohol-powered vehicles as well as the recommendations of the Commission.

Robert Jackson, senior commercial representative for Conoco Coal Development Co. Jackson addressed the feasibility of producing large quantities of methanol from American coal reserves.

Glen D. Alexander, superintendent of the Curecanti (Colorado) National Recreation Area. Over 70 National Park Service vehicles under his supervision are using a 25-percent blend of ethanol and gasoline, while 8 others are operating on pure ethanol.

S. 570—FAIR HOUSING AMENDMENTS ACT

Mr. MATHIAS. Mr. President, I ask unanimous consent that the text of S. 570, the Fair Housing Amendments Act, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the bill is as follows:

S. 570

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Fair Housing Amendments Act of 1981".

SHORT TITLE FOR 1968 ACT

SEC. 2. The Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by inserting immediately after the comma at the end of the enactng clause the following: "That this Act may be cited as the 'Civil Rights Act of 1968'.".

SHORT TITLE FOR TITLE VIII

SEC. 3. Title VIII of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by inserting immedately after the title's catchline the following new section:

"SHORT TITLE

"SEC. 800. This title may be referred to as the 'Fair Housing Act'.".

AMENDMENTS TO DEFINITIONS SECTION

SEC. 4. (a) Section 802(f) of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by striking out "section 804, 805, or 806" and inserting this title "in lieu" thereof.

(b) Section 802 of such Act is amended by adding at the end the following:

"(h) 'Handicap' means, with respect to a person, (1) a physical or mental impairment which substantially limits one or more of such person's major life activities, (2) a record of having such an impairment, or (3) being regarded as having such an impairment. Such term does not include any current alcohol, drug abuse, or any other impairment which would be a direct threat to property or the safety of others.

"(i) 'Aggrieved person' includes any person who claims to have been injured by a discriminatory housing practice or who believes that he or she will be irrevocably injured by a discriminatory housing practice that is about to occur.".

DISCRIMINATORY HOUSING PRACTICE AMENDMENTS

SEC. 5. (a) The catchline of section 804 of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by adding at the end the following: "AND OTHER PROHIBITED PRACTICES".

(b) Section 804 of such Act is amended by adding at the end the following:

"(f)(1) To refuse to sell or rent after the making of a bona fide offer, or to refuse to negotiate for the sale or rental of, or otherwise make unavailable or deny, a dwelling to any person because of a handicap of a prospective buyer or renter or of a person or persons associated with such buyer or renter unless such handicap would prevent a prospective dwelling occupant from conforming to such rules, policies, and practices as are permitted by clause (2).

"(2) To discriminate against any person in the terms, conditions, or privileges of sale or rental of a dwelling, or in the provision of services or facilities in connection therewith, because of a handicap. For purposes of this subsection, (A) discrimination shall include: (i) refusal to permit reasonable modifications of premises occupied or to be occupied, by persons with a handicap when such modifications are necessary to afford such handicapped persons access to premises substantially equal to that of nonhandicapped persons, if, with respect to the rental of premises regularly occupied as a landlord's personal residence, such handicapped persons have agreed to return such premises to their original condition if requested to do so by the landlord, or (ii) refusal to make reasonable accommodations in policies, practices, rules, services, or facilities when such accommodations are necessary to afford handicapped persons enjoyment of dwellings substantially equal to that of nonhandicapped persons; but (B) discrimination shall not include (i) refusal to make alterations in premises at the expense of sellers, landlords, owners, brokers, building managers, or persons acting on their behalf, (ii) refusal to make a modification of generally applicable rules, policies, practices, services or facilities where such modification would result in unreasonable inconvenience to other affected persons, or (iii) refusal to allow architectural changes to, or modifications of, dwellings which would materially alter the marketability of a dwelling or the manner in which a dwelling or its environs has been, or is intended to be, used.

"(g) For any employee or agency of a State or local government to take any action, or to deny any privilege, license, or permit, and thereby prevent the establishment of any community residence operated for the purpose of providing residential services or supervision for eight or fewer persons who have a handicap, unless such community residence or its proposed use—

"(1) would not meet an established, applicable Federal, State, or local health, safety, or program standard; or

"(2) violates, or would violate a comprehensive land use plan or zoning ordinance for the geographical area for which the employee or agency has jurisdiction and such land use plan or zoning ordinance as enforced would permit the establishment of such community residence in other equally suitable locations. The granting or denying of variances in the past shall be deemed a part of such plan or ordinance.

"(h) For a person in the business of insuring against hazards to refuse to enter into, or to discriminate in the terms, conditions, or privileges of a contract of insurance against hazards to a dwelling because of the race, color, religion, sex, handicap, or national origin of persons owning, or residing in or near, the dwelling.".

(c) Subsections (c), (d), and (e) of section 804, and section 806 are each amended by inserting "handicap," immediately after "sex," each place it appears.

(d) Section 805 of such Act is amended to read as follows:

"SEC. 805. After the date of enactment of the Fair Housing Amendments Act of 1981 it shall be unlawful for any person or other entity whose business includes the making, purchasing, or insuring of loans, or the selling, brokering, or appraising of real property, to deny or otherwise make unavailable a loan or other financial assistance which is for the purpose of purchasing, constructing, improving, repairing, or maintaining a dwelling, or to discriminate in the fixing of the amount, interest rate, duration, or other terms or conditions of such loan or other financial assistance, because of race, color, religion, sex handicap, or national origin.".

FUNCTIONS OF THE SECRETARY

SEC. 6. (a) Section 808(c) of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended—

(1) by inserting "(1)" after "(c)";

(2) by striking out "hearing, determining, ordering," in the first sentence;

(3) by striking out the second sentence;

(4) by striking out the last sentence; and

(5) by adding at the end the following new paragraph:

"(2)(A) There is established the Fair Housing Review Commission (hereinafter referred to as the 'Commission'). The Commission shall be composed of three members who shall be appointed by the President, by and with the advice and consent of the Senate, from among persons who by reason of training, education, or experience are qualified to carry out the functions of the Commission under this title. Not more than two members of the Commission may be members of the same political party. The President shall designate one of the members of the Commission to serve as Chairman.

"(B) The term of office of members of the Commission shall be six years, except that (i) the members of the Commission first taking office shall serve, as designated by the President at the time of appointment, one for a term of two years, one for a term of four years, and one for a term of six years, and (ii) a vacancy caused by the death, resignation, or removal of a member prior to the expiration of the term for which he was appointed shall be filled only for the remainder of such unexpired term. A member of the Commission may be removed by the President for inefficiency, neglect of duty, or malfeasance in office.

"(C) The Chairman shall be responsible on behalf of the Commission for the administrative operations of the Commission. The principal office of the Commission shall be in the District of Columbia. Whenever the Commission deems that the convenience of the public or of the parties may be promoted or that delay or expense may be minimized, it may hold hearings or conduct other proceedings at any other place.

"(D) The Commission shall appoint such administrative law judges and other employees as it deems necessary to assist in the performance of the Commission's functions and to fix their compensation in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and General Schedule pay rates. The assignment, removal, and compensation of administrative law judges shall be in accordance with sections

3105, 3344, 5372, and 7521 of such title, and the assignment of administrative law judges to individual cases shall take place on a fair and impartial basis in accordance with a system established by the Commission. The Commission may obtain the services of administrative law judges from other agencies on a reimbursable basis.

"(E) For the purpose of carrying out its functions under this title, two members of the Commission shall constitute a quorum and official action can be taken only on the affirmative vote of at least two members.

"(F) Every official act of the Commission shall be entered of record, and its hearings and records shall be open to the public. The Commission is authorized to make such rules as are necessary for the orderly transaction of its proceedings. Proceedings of the Commission shall be in accordance with chapter 5 of title 5, United States Code.

"(G) Not later than 180 days after a majority of the Commission has taken office, the Commission shall—

"(i) promulgate a code of ethics to assure the independence of administrative law judges employed by the Commission; and

"(ii) promulgate rules of discovery for the orderly conduct of its proceedings consistent insofar as is practicable with the Federal Rules of Civil Procedure.

"(H) For the purpose of considering an appeal from a proposed order of an administrative law judge, the Commission shall sit in review of such decision. The Commission may approve, reject, or modify, in whole or in part any proposed order under section 811 of this title, or may vacate and remand such order with directions for further proceedings. The Secretary is not authorized to modify any order under section 811 of this title or any decision of the Commission.

"(I) Within thirty days after the issuance of a proposed order of an administrative law judge, any party may apply to the Commission for review of such proposed order. Such order shall not become final until such period of thirty days has expired, or the Commission has acted on such application, if applicable.

"(J) Except as otherwise provided in this title, the administrative law judges shall be subject to the laws governing employees in the classified civil service, except that appointments shall be made without regard to section 5108 of title 5, United States Code. Each administrative law judge shall receive compensation at a rate not less than that prescribed for GS–16 under section 5332 of such title.

"(K)(i) The Chairman of the Commission shall be compensated at the rate provided for level III of the Executive Schedule under section 5314 of title 5, United States Code.

"(ii) The other members of the Commission shall be compensated at the rate provided for level IV of the Executive Schedule under section 5315 of title 5, United States Code.".

(b) Section 808(d) of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by inserting "(including any Federal agency having regulatory authority over financial institutions)" after "urban development".

(c) Section 808(e)(3) of such Act is amended by inserting "financial and" immediately before "technical".

ENFORCEMENT CHANGES

SEC. 7. The Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90–284, approved April 11, 1968) is amended by striking out sections 810 through 815 and inserting in lieu thereof the following:

"ADMINISTRATIVE ENFORCEMENT; PRELIMINARY MATTERS

"SEC. 810. (a)(1) Whenever an aggrieved person, or the Secretary on the Secretary's own initiative, files a charge alleging a discriminatory housing practice, the Secretary shall serve a notice of the alleged discriminatory housing practice on the party charged (hereinafter in this title referred to as the 'respondent') within ten days after such filing, and shall make an investigation thereof. Upon receipt of such charge, the Secretary shall serve notice upon the aggrieved person acknowledging receipt of the charge and advising the aggrieved person of the time limits and choice of forums provided under this title. At any time after the filing of a charge, the Secretary shall attempt, to the extent feasible, to resolve such charge by informal methods of conference, conciliation and persuasion. If both the aggrieved person and the respondent consent to binding arbitration, the Secretary shall refer such charge to an arbitrator who shall be made available by the Community Relations Service of the Department of Justice. Nothing said or done in the course of such informal endeavors may be made public or used as evidence in a subsequent proceeding under this title without the written consent of the persons concerned. Any employee of the Secretary who shall make public any information in violation of this provision shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned not more than one year. Such charges shall be in writing under oath or affirmation and shall contain such information and be in such form as the Secretary requires. An aggrieved person shall file a charge under this section with the Secretary not later than one year after the alleged discriminatory housing practice occurred or terminated. The Secretary may also investigate housing practices to determine whether charges should be brought under this section. In consultation with other appropriate Federal agencies, the Secretary shall issue new rules and regulations to implement the policies, purposes, and provisions of this title within one hundred and eighty days after the enactment of the Fair Housing Amendments Act of 1981.

"(2)(A) In connection with any investigation of such charge, the Secretary, at reasonable times, shall have access to, and the right to copy, any information that is reasonably necessary for the furtherance of the investigation. The Secretary may issue subpenas to compel such access to or the production of such information, or to compel the appearance of persons, and may issue interrogatories to a respondent to the same extent and subject to the same limitations as would apply if the subpenas or interrogatories were issued or served in aid of a civil action in the United States district court for the district in which the investigation is taking place. The Secretary may administer oaths.

"(B) Upon written application to the Secretary, a respondent shall be entitled to the issuance of a reasonable number of subpenas by and in the name of the Secretary to the same extent and subject to the same limitations as subpenas issued by the Secretary under subparagraph (A) of this paragraph.

"(C) Witnesses summoned by a subpena of the Secretary under this title shall be entitled to the same witness and mileage fees as witnesses in proceedings in United States district courts.

"(D) The Secretary or other party at whose request a subpena is issued under this title may enforce such subpena in appropriate proceedings in the United States district court for the district in which the person to whom the subpena was addressed resides, was served, or transacts business.

"(E) Any person who willfully fails or neglects to attend and testify or to answer any lawful inquiry or to produce records, documents, or other evidence, if it is in such person's power to do so, in obedience to the subpena or lawful order of the Secretary under this title, shall be fined not more than $1,000 or imprisoned not more than one year, or both. Any person who, with intent thereby to mislead the Secretary, shall make or cause to be made any false entry or statement of fact in any report, account, record, or other document produced pursuant to the Secretary's subpena or other order, or shall willfully neglect or fail to make or cause to be made full, true, and correct entries in such reports, accounts, records, or other documents, or shall willfully mutilate, alter, or by any other means falsify any documentary evidence, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"(3) Whenever a charge alleges a discriminatory housing practice within the jurisdiction of a State or local public agency which has been certified by the Secretary under this paragraph, the Secretary shall refer such charge to that certified agency before taking any action with respect to such charge. Except with the consent of such certified agency, the Secretary, after that referral is made, shall take no further action with respect to such charge unless the certified agency has not acted in a timely fashion following the date such charge was received or unless the Secretary determines that the certified agency no longer qualifies for certification under this paragraph. No agency may be certified under this paragraph unless the Secretary determines that the substantive rights protected by such agency, the procedures followed by such agency, the remedies available to such agency, and the availability of judicial review of such agency's action, are substantially equivalent to those created by and under this title. Before making such certification, the Secretary shall take into account the current practices and past performance, if any, of such agency. The Secretary shall not require, as a condition of making such certification or of providing any financial or other assistance, that the State or local public agency agree formally or informally to waive, in whole or in part, its exclusive processing authority over charges which allege a discriminatory housing practice that is referred to the agency.

"(4) The Secretary and other Federal agencies having authority to prevent housing discrimination shall cooperate and seek to avoid duplication of effort in the exercise of their several authority. The Secretary is authorized to enter into agreements to permit such other Federal agencies to carry out the provisions of this paragraph within their respective jurisdictions. Not later than 180 days after the date of enactment of the Fair Housing Amendments Act of 1981, the Secretary shall enter into agreements with the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board, and the National Credit Union Administration Board, to carry out this paragraph with respect to depository institutions which are subject to the jurisdiction of such agencies.

"(b) If the Secretary concludes, after a preliminary investigation of a charge, that the Secretary is unable to obtain voluntary compliance and that prompt judicial action is necessary to carry out the purposes of this title, the Secretary may refer the matter to the Attorney General. The Attorney General may bring an action for appropriate temporary or preliminary relief pending final disposition of such charge. Any temporary restraining order or other order granting pre-

liminary or temporary relief shall be issued in accordance with Rule 65 of the Federal Rules of Civil Procedure. It shall be the duty of a court having jurisdiction over proceedings under this paragraph to assign such proceedings for hearing at the earliest practical date and to cause such proceedings to be in every way expedited. An application for relief under this paragraph shall not affect the initiation or continuation of administrative proceedings under this section and section 811 of this title.

"(c)(1) If the Secretary determines, after an investigation under this section, that reasonable cause exists to believe the charge is true, the Secretary shall—

"(A) file, on behalf of the aggrieved person filing the charge, a complaint under the procedures provided under section 811 of this title; or

"(B) refer the matter to the Attorney General for the filing of an appropriate civil action under section 813(b) of this title.

"(2) Notwithstanding paragraph (1) of this subsection the Secretary shall refer charges involving the legality or validity of any State or local zoning, or other land use law or ordinance, or any novel issue of law or fact or other complicating factor, as determined by the Secretary, to the Attorney General for appropriate action under section 813(b) of this title.

"(3) After each investigation under this section, the Secretary shall provide to each aggrieved person and each respondent a copy of the report of such investigation.

"(d) Neither the Secretary nor any other officer or employee of the United States may utilize the services of any person, or provide direct or indirect assistance to any individual or organization, to induce violations of this title (testers), except where such action is undertaken for the purpose of verifying a violation of this title which the Secretary has reason to believe has occurred.

"ADMINISTRATIVE ENFORCEMENT; HEARING PROCESS

"SEC. 811. (a) Upon filing an administrative complaint, the Secretary shall cause a copy of such complaint to be served on the respondent, together with a notice of opportunity for a hearing on the record at a place and time (not less than thirty days after the service of such complaint) specified in such notice. On the request of the respondent and with the consent of all other parties, a hearing may be rescheduled for a time earlier than the time specified in such notice. Any resolution of a charge or complaint by means of conciliation shall require the consent of the person who filed the charge, and any such resolution following the service of complaint under this subsection shall also require the approval of the Secretary. The respondent shall have the right to file an answer to the administrative complaint, to appear in person or otherwise and give testimony at a hearing on the record, and to obtain a reasonable number of subpenas in the manner set forth in section 810(a)(2)(B). Any aggrieved person may be allowed to intervene in the proceeding, to appear in person or otherwise, to obtain the issuance of a reasonable number of subpenas in the manner set forth in section 810 of this title, and to present testimony. After the conclusion of such hearing, the administrative law judge shall make findings of fact and conclusions of law, and may issue an order providing for such relief as may be appropriate (including compensation for out of pocket loss incurred by the aggrieved person as the result of the discriminatory housing practice), and may impose a civil penalty of not to exceed $10,000. Any order issued under this subsection is subject to review in accordance with section 808(c) of this title and subsection (c) of this section.

"(b) The findings of fact and conclusions of law made with respect to a final order issued under subsection (a), together with a copy of such order, shall be served on each aggrieved person and each respondent in the proceeding.

"(c) Any petition for judicial review of a final order under subsection (a) shall be filed in the appropriate court of appeals not later than sixty days after the entry of such final order. Such judicial review of a final order shall be in the manner provided under chapter 158 of title 28 of the United States Code. For the purposes of judicial review of such an order, any aggrieved person shall be deemed a party in the administrative proceedings reviewed. The findings of fact shall be conclusive if supported by substantial evidence in the record considered as a whole. No objection not urged at the appropriate stage of the administrative hearing process shall be considered by the court unless the failure or neglect to urge such objection should be excused because of extraordinary circumstances.

"(d)(1) Any person who violates a final order under subsection (a) shall be subject to a civil penalty assessed by the administrative law judge of not more than $1,000 for each day during which such violation continues after the date on which such final order becomes unreviewable.

"(2) For the purposes of paragraph (1) of this subsection, a final order becomes unreviewable.

"(A) if a petition for review has not been filed in the appropriate reviewing court, on the day sixty days after the entry of such final order; or

"(B) on the date on which the last appellate court's decision becomes final and not subject to any further appellate proceeding.

"PRIVATE ENFORCEMENT

"SEC. 812. (a)(1) An aggrieved person may commence a civil action in an appropriate United States district court or State court at any time not later than two years after the alleged discriminatory housing practice occurred or terminated.

"(2) After an aggrieved person has commenced a civil action under this section, the Secretary may not commence or continue proceedings toward the issuance of a remedial order based on such charge.

"(3) An aggrieved individual shall not commence a civil action under this subsection with respect to a charge made by that individual to the Secretary if the Secretary (or a State or local agency to which the Secretary refers such charge) has commenced a hearing on the record with respect to such charge.

"(4) Upon timely application the Attorney General may intervene in such civil action if the Attorney General certifies that the case is of general public importance.

"(b) Upon application by an aggrieved person any trial or appellate court may appoint an attorney for such person and may authorize the commencement or continuation of the action without the payment of fees, costs, or security if in the opinion of the court such person is financially unable to bear the costs of such action.

"(c) If, in a civil action under this section, the court finds that an alleged discriminatory housing practice has occurred, is occurring, or is about to occur, the court shall award such relief as may be appropriate. Such relief may include money damages, equitable and declaratory relief, and punitive damages.

"ENFORCEMENT ROLE OF ATTORNEY GENERAL

"SEC. 813. (a) Whenever the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title, or that any group of persons has been denied any of the rights granted by this title and such denial raises an issue of general public importance, the Attorney General may bring a civil action in an appropriate United States district court.

"(b) The Attorney General may bring a civil action in an appropriate United States district court: (1) to enforce any final order under this title that is referred for enforcement by the Secretary; (2) to collect any civil penalty assessed under section 811 of this title; and (3) to remedy any discriminatory housing practice (A) with respect to which the Secretary has made a finding that reasonable cause exists under this title, and (B) which the Secretary refers to the Attorney General for enforcement under this subsection.

"(c) The court may award such relief in any civil action under this section as is authorized in section 812(c) of this title.

"(d) A person may intervene in any civil action commenced under this section which involves an alleged discriminatory housing practice with respect to which such person is an aggrieved person.

"ANCILLARY AND PROCEDURAL MATTERS RELATING TO ENFORCEMENT

"SEC. 814. (a) In any action or proceeding under this title, the court, in its discretion, may allow a prevailing party (other than the United States with respect to attorney fees) reasonable attorney and expert witness fees as part of the costs, and the United States shall be liable for such costs the same as a private person. Such costs may also be awarded upon the entry of any interlocutory order which determines substantial rights of the parties.

"(b) In any administrative proceeding based on a charge under section 810(a) of this title, any prevailing party (other than the United States with respect to attorney fees) may be awarded reasonable attorney and expert witness fees as a part of a final order under section 811(b) of this title.

"(c) Any court in which a proceeding is instituted under this title shall assign the case for hearing at the earliest practicable date and cause the case to be in every way expedited.

"(d) Any sale, encumbrance, or lease executed before the issuance of any order under this title, and involving a bona fide purchaser, encumbrancer, or tenant without actual notice of the existence of the filing of a complaint or civil action under this title shall not be affected by such court order.

"EFFECT ON OTHER LAWS

"SEC. 815. (a) Nothing in this title shall be construed to invalidate or limit any law of a State or political subdivision of a State, or of any other jurisdiction in which this title shall be effective, that grants, guarantees, or protects the same rights as are granted by this title; but any such law that purports to require or permit any action that would be a discriminatory housing practice under this title shall to that extent be invalid.

"(b) Nothing in this title shall be construed to repeal, supersede or diminish the protection provided to handicapped persons by any other Federal law.".

INTERFERENCE, COERCION, OR INTIMIDATION

SEC. 8. Section 817 of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90-284, approved April 11, 1968) is amended by striking out "section 803, 804, 805, or 806." and inserting "this title." in lieu thereof.

CONFORMING AMENDMENTS TO TITLE IX OF 1968 CIVIL RIGHTS ACT

SEC. 9. Section 901 of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes" (Public Law 90-284, approved April 11, 1968) is amended by inserting ", handicap

(as defined in section 802 of this Act)," immediately after "sex" each place it appears

CONFORMING AMENDMENTS TO TITLE 28, UNITED STATES CODE

SEC. 10. (a) Section 2341(3) of title 28, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (B);

(2) by striking out the period at the end of subparagraph (C) and inserting "; and" in lieu thereof; and

(3) by inserting the following new subparagraph:

"(D) the Commission, when the order was entered by the Fair Housing Review Commission.".

(b) Section 2342 of such title is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting "; and" in lieu thereof; and

(3) by adding immediately after paragraph (6) but before the final sentence, the following:

"(7) all final orders under section 811 of the Fair Housing Act.".

RETROFITTING COST AND NEED STUDY

SEC. 11. (a) One year following the fiscal year ending September 30, 1981, the Architectural and Transportation Barriers Compliance Board shall provide a report to the Congress concerning—

(1) the extent to which architectural barriers and other obstacles to accessibility of housing are operating to deny handicapped persons access to a reasonable housing choice in the private market;

(2) the extent to which public, private, or cooperative public and private efforts have been undertaken to increase housing choice for the handicapped in the private market; and

(3) the projected cost of retrofitting an adequate supply of existing housing units to make such units suitable for occupancy by handicapped persons.

(b) The Board shall include in its report recommendations concerning further legislative or other action necessary to provide an adequate private market housing supply for handicapped persons, including the Board's recommendations regarding how costs associated with actions should be borne.

BUDGET AUTHORITY

SEC. 12. This Act and the amendments made by this Act shall not be construed to authorize the enactment of new budget authority for the fiscal year ending September 30, 1980. Effective October 1, 1981, there are authorized to be appropriated such sums as may be necessary to carry out this Act and the amendments made by this Act.

ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. BAKER. Mr. President, I am about to propound a unanimous-consent request for the recognition of certain Senators on tomorrow. I might say I expect there may be other requests as well, since all of these requests come from our side of the aisle. While the distinguished minority leader is not on the floor at this time, I anticipate that he may wish to add to the list. Since there are 24 names on this list already, it appears that tomorrow will be special order day.

I say for all those who care to listen that it may be necessary to adjust the convening time of the Senate on tomorrow in order to accommodate the requests of several Senators who have made their requests known. For the time being, Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order and after the transaction of routine morning business if the same is ordered to follow after the recognition of the two leaders, the following Senators be recognized for not more than 15 minutes each:

Mr. HATCH, Mr. THURMOND, Mr. COCHRAN, Mr. GRASSLEY, Mr. TOWER, Mrs. HAWKINS, Mr. JEPSEN, Mr. GOLDWATER, Mr. D'AMATO, Mr. ROTH, Mr. ABDNOR, Mr. WALLOP, Mr. HUMPHREY, Mr. HAYAKAWA, Mr. DENTON, Mr. SYMMS, Mr. GORTON, Mr. MURKOWSKI, Mr. ANDREWS, Mr. BOSCHWITZ, Mr. KASTEN, Mr. SPECTER, Mr. STAFFORD, and Mr. PERCY.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECESS UNTIL 2:25 P.M. TODAY

Mr. BAKER. Mr. President, the Senate, as a practical matter, cannot conduct any business at this moment. Certain meetings and conferences are going on with Members on both sides of the aisle in preparation for the proceedings of the Senate later this week. Because of that, I ask unanimous consent that the Senate now stand in recess until the hour of 2:25 p.m.

There being no objection, the Senate, at 2:03 p.m., recessed until 2:25 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ADJUSTMENT OF PRICE SUPPORT FOR MILK

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of the pending business, which will be stated by the clerk.

The assistant legislative clerk read as follows:

A bill (S. 509) to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support of price of milk be adjusted semiannually.

The Senate resumed the consideration of the bill.

Mr. BAKER. Mr. President, might I inquire, is there an order for a vote on the Melcher amendment to occur beginning at 2:30 p.m.?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. It is now 2:25. I will be happy to yield the floor if anyone has any debate. Otherwise, I am prepared to suggest the absence of a quorum.

Mr. DOLE. Will the Senator yield?

Mr. BAKER. I yield.

Mr. DOLE. I would like to ask the chairman or the majority leader a question if I may. It is my understanding that the President will direct the International Trade Commission to make a study under section 22 of the Agricultural Adjustment Act as to whether or not imports of casein interfere with the dairy price support program and impact on the dairy industry in this country. Has that happened?

Mr. HELMS. Mr. President, that is my understanding. I will ask the majority leader if that has occurred.

Mr. BAKER. The answer is yes. I was given the message by the White House earlier today that the President would indeed request such a study.

Mr. DOLE. I might say to the majority leader and the chairman, I think that, in itself, is an indication of the President's concern about imports that might impact adversely on the dairy industry. I would hope that those who have a concern about this will understand that this is a positive step by the President, that he will proceed under section 22, that the ITC will make a study, that they will report the findings, and appropriate action taken. I thank the leadership, the majority leader and the chairman of the committee, Senator JEPSEN and others, for obtaining that result.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated March 23, 1981, to the President, and signed by Senators DURENBERGER, BOSCHWITZ, JEPSEN, ABDNOR, HATCH, PRESSLER, and me, as chairman.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE,
Washington, D.C., March 23, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: For the past several days the Senate has been considering S. 509, a bill to delete the requirement that the support price of milk be adjusted semiannually. During these deliberations several Senators have raised the longstanding issue of imports of casein and their impact on the domestic dairy producers. These Senators are concerned that imports of casein, a milk byproduct, are displacing competitive domestically produced milk products in the U.S. market and are causing the Federal Government to increase its purchases of these milk products under the dairy price-support program.

There is no question that imports of casein and casein mixtures have risen in the last several years. From 1976 to 1980 such imports increased from 112 million pounds to 152 million pounds. During this period the Department of Agriculture increased its price support purchasers of nonfat dry milk from 157 million pounds to 634 million pounds, an all time high. Since U.S. production of whole milk continues to increase, the distinct possibility exists that the Government will be forced to purchase increased quantities of nonfat dry milk. The amount which must be purchased by the Government could well be increased by the continued growth in casein imports.

Given these conditions we believe it would be appropriate for the Secretary of Agriculture to initiate an investigation under Section 22 of the Agricultural Adjustment Act of 1933 to determine whether he has reason to believe that casein and casein mixtures are being imported in such quantities as to tend to render ineffective or materially interfere with the domestic price support program. If the Secretary so determines and so advises you, the International Trade Commission can be requested to make an investigation to determine the facts and make nonbinding recommendations to you. Upon com-

pletion of an ITC investigation and recommendations, import restraints can be imposed. As a result of a waiver obtained from our trading partners in 1955 specifically for actions taken under Section 22, it is unlikely that the United States would be subject to retaliation or forced to pay compensation for any restraints imposed.

In our judgement, an investigation by the Secretary of Agriculture would be preferable to legislative action such as that which has been proposed as an amendment to S. 509. While this amendment may not be approved by the Senate, the extent of the concern with the casein problem cannot be underestimated. A proceeding under Section 22 would provide both casein producers and consumers with an impartial forum in which to present their respective views. It would also provide a means of reassuring agricultural interests in general that established legal procedures can be invoked to provide them with an opportunity to seek redress for their problems in a timely manner.

Sincerely yours,

BOB DOLE, *Chairman.*

LARRY PRESSLER.

● Mr. MITCHELL. Mr. President, the problems of our economy today demand that Congress take swift and sometimes difficult action to reduce the growth in Federal spending.

One such opportunity is before us today in S. 509, legislation which will eliminate the semiannual price support increase for dairy products.

The dairy price support program has been successful in its goals: It was established to assure a stable and adequate supply of perishable dairy products for the Nation's consumers, and it has admirably fulfilled that goal. American consumers are fortunate in paying among the lowest prices in the world for milk, cheese, butter, and other dairy products. The American dairy industry is a model of efficiency and productivity.

The fact is, however, that the success of the dairy program can no longer blind us to the costs that the Government and consumers have to pay at this time. This is a period of economic retrenchment in many Federal programs and agencies. The fact that the semiannual milk price support increase is due on April 1, and without congressional action cannot be legally prevented from going into effect, means that we must act now to bring the costs of this program into line with the budgetary stringency that will be imposed on all Federal programs.

The productive capacity of the American dairy farmer has meant that the semiannual milk price support increase last year cost the Federal Government almost $1 billion. Without action to eliminate one of the price adjustments, the cost this year will be $1.5 billion. This means that the Government will buy the equivalent of 8 billion pounds of milk, a quantity that translates into massive stockpiles of butter, cheese, and nonfat dry milk. The school lunch program can use only 3 billion pounds of this product.

At the end of the 1978–79 marketing year, the Government had on hand 147 million pounds of butter and 448 million pounds of nonfat dry milk. This year, if the April 1 milk price support increase goes through, the Government will have on hand 562 million pounds of butter, 479 million pounds of cheese, and 970 million pounds of nonfat dry milk. The cost of this purchase would run to $1.5 billion—and the storage costs would rise from their current half-million dollars daily to three-quarters of a million dollars a day.

Dairy farmers ought not carry the full burden of balancing the budget—and they will not be the only ones asked to make a sacrifice. Many other groups—in and out of agriculture—will be affected by the forthcoming budget cuts. But unless we act now, before the rest of the budget decisions can be made, the April 1 price rise will go into effect, and the Government will spend an additional $147 million this year to purchase the production of a product which is in more than ample supply.

At a time of fiscal stringency, such a Government outlay cannot be defended. When we are asking many members of our society, many productive sectors of our business and agricultural communities to make individual sacrifices for the common good, we must, at the very least, make certain that this budgetary saving is made.

Elementary fairness requires that:

I will, therefore, support the President's request to eliminate the semiannual price support adjustment for dairy products. It is one immediate step we can take today to demonstrate that we are willing to make politically unpopular spending cuts and, more importantly, it will stop the spending of $147 million tax dollars immediately. The American people have been demanding fiscal discipline and responsibility of the Congress. This bill asks no less and, certainly, we can respond with no less than our full support.

I also support passage of the amendment to limit casein imports.

Casein is a milk product derivative. It can be made from the same dairy product for which our Government now pays support prices.

This amendment would not eliminate the entire importation of casein. That relatively small percentage now used in industrial and medical areas would be adequately available from the one-half of current import levels permitted into the country.

Since the casein now imported is substituted for a domestic product, this amendment would more than double the savings proposed by the administration's bill by making it unnecessary for the Federal Government to buy some 200 million pounds of nonfat dry milk in the coming years.

Much of the skim milk for which the dairy industry is unable to find a market is now processed into dry milk which the Government must purchase under the dairy price support system.

In 1979, about 65 million pounds of casein were used in products as a replacement for 2.1 billion pounds of skim milk. That quantity of skim milk would convert to 201 million pounds of nonfat dry milk at a cost to the Federal Government of $189 million. So the savings we make by forgoing the April 1 dairy price support increase will be more than doubled by the limitation of casein imports. By voting for this amendment we vote to reduce Federal spending by $189 million. This is a substantial saving which must be made in this time of fiscal restraint.●

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, I understand that some folks are suggesting that the Mattingly-Jepsen resolution would adequately deal with the embargo question, and that my amendment should be passed over in favor of the resolution.

I would point out to my colleagues who find it convenient to accept this sort of reasoning that the two approaches are not synonymous. My amendment does require a decision by the President. But it does not presume to impose a foreign policy decision on him.

The Jepsen-Mattingly resolution, on the other hand, simply expresses the sense of the Senate that any embargo of grain shipments should be a total embargo. It does make a foreign policy judgment and it does not require a decision by the President.

Surely by now President Reagan is aware that it is the sense of the Senate that the embargo should not be restricted to grain. More than a month ago, I and a number of my colleagues impressed that point on him at a White House meeting. Yet no decision has been made—either to escalate or to end the embargo.

Our country's farmers are tired of hearing that we have told the President how we feel. They are tired of hearing that we have urged, cajoled, and suggested some action to him. They want to know where they stand and so do I.

Mr. DECONCINI. Mr. President, although I have consistently favored the grain embargo of the Soviet Union and continue to do so, I would like to express my support for Senator ZORINSKY's amendments to S. 509, and explain my rationale for doing so.

First, I think the Nation's farmers have the right to know what this administration's views are vis-a-vis the grain embargo. It has certainly sent conflicting signals in this regard. While the Secretary of Agriculture has expressed his support for the immediate termination of the embargo, the President has indicated that the foreign policy implications of such an action need to be thoroughly reviewed. While I can appreciate the fact that any new administration needs time to evaluate existing policies, it has been almost 5 months since President Reagan was elected and more than 2 months since he assumed office, yet no final determination has been made with regard to the embargo. The lack of de-

finitive action on the part of the administration places both the agricultural community and Congress in an impossible situation. Not only does it prevent farmers from making reasonable decisions with regard to planting, it makes it impossible for Congress to make informed decisions with regard to the omnibus farm bill.

Second, I believe the Zorinsky amendments provide the President with sufficient flexibility with regard to the grain embargo. He can extend the embargo beyond either April 15 or the April 30 deadlines contained in the Zorinsky amendments by simply informing Congress that it is necessary for foreign policy and national security reasons and that it will not have an undue adverse impact on farmers, and the President has an additional option available to him.

If he believes that it is necessary to keep the embargo in place while the administration reviews our bilateral grain agreement with the Soviet Union, which is due to expire on September 30, 1981, he can do so simply by advising Congress. If the President intends to negotiate a new agreement with the Russians, which I sincerely hope he will not do, it is imperative that the Congress and the Nation's farmers be informed of his intent.

The time has come to end the confusion and uncertainty regarding the embargo. I believe Senator ZORINSKY's amendments are eminently reasonable and fair to all concerned parties and urge my colleagues to join me in supporting them.

THE REAGAN GRAIN EMBARGO: THE TIME FOR DECISION IS NOW

● Mr. BAUCUS. Mr. President, I am very pleased to join my distinguished colleague from Nebraska, Senator ZORINSKY, in cosponsoring this amendment. Nearly 15 months have lapsed since President Carter invoked the grain embargo. Nearly 8 months have passed since Mr. Reagan, then a candidate for President, promised to lift the grain embargo if he were elected. And, nearly 2 months have gone by since Mr. Reagan, now President, pledged to review the grain embargo and to decide whether to end it or to continue it.

Mr. President, any further delay in clarifying the outlook for grain exports during this next marketing year can only make it difficult, if not impossible, for agricultural producers to make reasonable, informed decisions about the demand for their crops and in turn, to make sound planting determinations.

At the same time, the agricultural committees, and Congress, will find it difficult, if not impossible, to make reasonable decisions in shaping the comprehensive 1981 farm bill without some assurance of the long-term predictability of the Soviet grain market.

It is imperative that there be action to dispel the confusion and uncertainly about the embargo and future grain exports to the Soviet Union. This amendment accomplishes that purpose. It will lift the embargo on April 30, 1981, unless President Reagan certifies to Congress that our national security compels its continuation.

I hope the President will decide to end the embargo. I believe he should. American farmers deserve no less.

When the grain embargo was first imposed in response to the Soviet invasion of Afghanistan, American farmers patriotically accepted it. They asked only that the embargo meet the criterion of fairness, evenhandedness, and that it work in halting food exports to the Soviet Union.

But, the embargo has not been fair, or evenhanded. The embargo stopped the probable sale of 17 million tons of grain to the Soviet Union. It did not stop the sale of Coca-Cola, tractors, or computers to the Soviet Union. Although the previous administration vowed to make every effort to maintain farm prices in light of the embargo, the grain market suffered a serious price-depressing effect. Many experts see the embargo as a major factor contributing to an estimated 40-percent decline in farm income during the second quarter of this year.

Nor, Mr. President, has the grain embargo worked. Although the embargo did force the Soviet Union to seek alternative grain supplies, the fact remains that the Soviets did obtain nearly as much grain on the world market as they would have had the grain embargo not been in effect. The Soviets accomplished this through some not so ingenious maneuvering on the world market. To underscore this point, I ask at this time for unanimous consent to insert in the RECORD a recent article from the New York Times by Paul W. MacAvoy, entitled "The Leaks in the Grain Embargo." Incidentally, Mr. MacAvoy was a member of former President Ford's Council of Economic Advisers.

Mr. President, in addition to being unfair and impractical, continuation of the grain embargo could seriously threaten and imperial the availability of the Soviet market to U.S. agricultural exports in coming years. If past agricultural embargoes are any example—the soybean embargoes that Presidents Nixon and Ford imposed upon the Japanese—the Soviet Union is likely to take steps to minimize its dependence on the United States for wheat and feedgrains.

In the past decade, our Nation has spent a great deal of money in developing foreign markets for agricultural products. Today the United States is the world's major grain exporter. But if this embargo is continued, if this embargo is allowed to reflect a major change in the use of food exports for U.S. foreign policy and diplomatic purposes, not only will our position in the world market suffer, but we will be denying all the investment and progress made in the past 10 years. Since 1970, the value of our agricultural exports has grown from $7 billion to over $40 billion. As we embark upon an economic recovery program, we simply cannot afford to signal to the world that we are dramatically changing the farm trade policies developed over the past several years.

Mr. President, I wholeheartedly support this amendment and I hope my colleagues will, too. This past January, I wrote to President Reagan urging him to fulfill his campaign promise to lift the grain embargo. Just last week, I received a reply from the administration. In essence, the administration is simply continuing to review the situation. But, the decision on the grain embargo should not be delayed any longer. Without objection, Mr. President, I ask that my correspondence with the administration be included in my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 15, 1981]

THE LEAKS IN THE GRAIN EMBARGO

(By Paul W. MacAvoy)

On Jan. 4, 1980, President Carter imposed an embargo on grain sales to the Soviet Union in reaction to the invasion of Afghanistan. As was the habit of the Carter Administration, economic sanctions were imposed as a diplomatic response. But it is poor logic and bad practice to trade economic apples for diplomatic and strategic oranges. Worse than that, the economic apples may not be any good.

The embargo limited sales to the Soviet Union to 8 million tons of wheat and corn in the 1979–80 crop year, an amount already under contract in a five-year, United States-Soviet trade agreement. Since the Russians were seeking 25 million tons, the embargo was designed to reduce their purchases by 17 million tons. With a poor home crop of feed grains, the Soviet Union would be punished for its Afghanistan venture by reduced supply of bread and meat for home consumers.

The theory is that, along the lines of the Organization of Petroleum Exporting Countries in the oil trade, the United States in grain can raise or lower world supply, thereby affecting prices and sales levels of all exporting nations.

Because we are the world's major grain supplier, and our trading partners in Australia, Argentina and Western Europe would voluntarily comply with the embargo, the Soviet Union would not obtain the supplies it wanted. Its demand for 17 million tons would evaporate as our supply was withheld, and the rest of trade would go on as a matter of course.

If demand evaporates and supply is withheld, someone is left with the inventory. American farmers quickly perceived that they were left holding the bag and so the Department of Agriculture promised to purchase grain and carry out storage so as to maintain the market just as if the Soviet demand for 17 million tons had not evaporated.

In fact, however, the Soviet Union refused to be embargoed. Based on a sophisticated understanding of how world commodity markets work, it undertook a series of complicated and indirect transactions. But three of its steps are important and obvious, and should have been anticipated if American diplomats knew anything about how markets operate.

First, the Soviet Union made up a substantial portion of its needs by purchases from other grain-supplying countries. The other suppliers were as a consequence unable to meet the demand of their regular customers, so those customers came to the United States. While Soviet demand for United States grain exports was reduced, demand from elsewhere increased.

Of course those running the embargo were not quite so naive as to have missed the leakage. The Department of Agriculture acknowledged at the end of the 1979–1980 crop year that 11 million tons of the 17 million-ton embargo had been made up by sales of other exporting nations.

Second, the Soviet Union took advantage of the fact that it is an exporter as well as an importer of grain. Its practice was to export 3 million to 4 million tons each year to Eastern Europe. If it reduced such exports, the Eastern Europeans could simply turn to the world market. And, indeed, Department of Agriculture trade statistics indicate that purchases of Eastern European countries in world markets increased by 3 million tons while the purchases from the Soviet Union were reduced by 3 million tons. This gambit probably reduced the impact of the embargo to only 3 million tons.

The third method of evasion is the most direct, and thus the easiest to overlook. Since grain is to be used to feed cattle and hogs, the obvious method for compensating for reduced grain imports is to import more meat. Soviet importts of meat in the 1979–1980 crop year shot up by 425 million tons from the previous year's 185 million tons. If this did not compensate for the last vestiges of the embargo, then it increased the sum total of grain and meat imports to a level higher than that before the embargo began.

Where does this leave the Soviet Union? Certainly the Russians must have been irritated. Given all the trouble we made them go through to work around the embargo, they experienced increases in purchase and transportation costs. But they were not required to reduce inventories or meat consumption insofar as can be determined.

Their livestock inventories are now higher than ever, while per capita meat consumption has held steady at 1978–79 levels. They are now in the second poor crop year in a row, and their grain inventories are holding while their imports are increasing substantially. Indeed, they have apparently found very helpful trading partners in Argentina and Spain, willing not only to provide additional supplies but also to find long-term trade agreements to keep the supply level much higher than in the last decade.

But we should be much more than irritated by this whole exercise. Recall that the Agriculture Department bought substantial amounts of grain to compensate for the loss of Soviet demand—which did not materialize.

Thus the Federal authorities added $2 billion to demand in world trade. This raised prices, perhaps by as much as $1 a bushel, and thus American inflation. This effect may have been transitory, as other countries reduced their stocks in reaction. Even so, American consumers paid more for bread and hamburger for awhile, even though Soviet consumers most probably did not.

The lesson to be learned from theory versus facts is that selective embargoes of specific countries in world commodity trade do not work. This is no surprise to shrewd Soviet traders, or to economic analysts familiar with the history of such embargoes (including the fiasco of the OPEC embargo against the United States in the world oil trade in 1973–1974).

But this is only a lesson in economic affairs. The lesson in diplomatic affairs is serious. It is difficult to trade an economic for a diplomatic initiative and it is impossible to do so when the economic initiative is ineffective.

My expectation is that the United States is being laughed at for its economic foolishness in diplomatic circles across the world. Not in Argentina and Spain, however. We put pressure on them to make an impossible scheme work, and ended up attaching them even more strongly to the Soviet trading bloc in grain. Squeezing other nations diplomatically to do the economically impossible in place of a diplomatic initiative on Afghanistan is bad political economy.

HOW THE RUSSIANS GOT THEIR GRAIN

On Jan. 4, 1980, President Carter announces a partial embargo on grain sales to the Soviet Union, limiting them to 8 million tons in the 1979–80 crop year. That leaves the Soviet Union with an expected shortfall of 17 million tons. In order to protect American farmers from the shrinkage in demand, Washington promises to buy enough grain to offset the lower level of exports to Moscow.

The Soviet Union buys grain from other exporters such as Argentina and Spain. This provides an estimated 11 million tons. It also cuts its grain exports to Eastern Europe, making up another 3 million tons. And it imports far more meat, thus helping to compensate for the loss of feed for its own livestock.

Customers of the other grain exporters turn to the United States, thus increasing demand. Eastern Europe steps up purchases on the world market, further increasing demand. Washington fulfills its agreement to buy American grain, also increasing demand.

In the United States, with demand so high, prices rise, so American consumers pay more for both grain and meat and the inflation rate goes up. In the Soviet Union, with some grain supplies made up elsewhere and meat imports subsituted for other supplies, consumers feel little discomfort.

U.S. SENATE,
Washington, D.C., January 29, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing to express my concern about the status of the partial embargo of grain sales to the Soviet Union. I read with great interest Mr. Block's comments on the Cabinet-level review you have scheduled on this issue.

As you know, few issues have caused as much concern among farmers as the embargo. Your campaign pledge to lift the embargo was heavily supported in Montana and other farm states.

However, the lack of a clear and unequivocal reiteration of that pledge since the election is causing alarm and concern among farmers.

As you noted several months ago, any limitation on farm exports is nothing more than a government action to hold down farm income. It is unconscionable to ask agricultural producers to sacrifice more than other Americans.

I urge you to avoid further delays and lift the embargo immediately. I hope a Cabinet level review does not mean the Administration will back away from this position.

In October of last year, a majority of the Senate voted with me to end the embargo. If it is not lifted in the near future, there will be increased pressure to take similar action again this year. I hope that will be unnecessary.

I appreciate your consideration in this matter.

With best personal regards, I am
Sincerely,

MAX BAUCUS.

THE WHITE HOUSE,
Washington, D.C., March 9, 1981.

Hon. MAX BAUCUS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BAUCUS: The President has asked me to thank you for your January 29 letter regarding the Soviet grain embargo.

We understand and share your concern about the economic impact of the embargo on the American farmer. We must, however, view this issue in its broadest context, taking into account foreign as well as domestic policy considerations. Therefore, a review has been initiated within the Administration to assess many diverse factors including: the costs of the embargo to American farmers and domestic economy; the impact on the USSR; the effect on cooperative efforts by our allies and other grain producers; the situation in Afghanistan; and the continuing threat to Poland. Also, any action taken with respect to the embargo will be interpreted at home and abroad as a possible signal of the future course of United States-Soviet relations. A decision by the United States, either to lift or to continue the embargo, must logically await completion of this policy review.

The President has not forgotten the commitments on the embargo that he made during the campaign. Secretary of Agriculture John Block has repeatedly pointed out to all of us that, as we approach the 1981 harvest season with a potentially record wheat crop, and as the time is at hand for corn and soybean planting, it is increasingly important that farmers know whether sales will continue in the future. During the past crop year the U.S. sold eight million tons of grain to the Soviets. For these reasons the policy review on this important issue is being given a very high priority.

We appreciate knowing your views on this matter. You may be assured that we will give them our most careful consideration during the review process.

With cordial regard, I am
Sincerely,

MAX L. FRIEDERSDORF,
Assistant to the President.●

● Mr. RIEGLE. Mr. President, I have had very strong reservations about the grain embargo since it was first announced. While the embargo may have hurt the Soviets, it has probably hurt our own economy far more. The initial price disruptions here in the U.S. markets were chaotic and grossly unfair to our farmers.

Once this policy was established, however, the exact timing and nature of its termination will carry with it very important and sensitive international ramifications. The situation in Poland at this precise moment is particularly sensitive, given the military exercises now underway in Poland by the Soviet Union and Warsaw bloc nations. I am reluctant to have the Senate take an action at this moment that might serve to upset the extremely delicate and dangerous situation in Poland.

While I favor the termination of the grain embargo, an immediate termination might be interpreted by the Soviets that we are unconcerned about their activities in Poland, and we must avoid this mistaken inference at this time. Despite my longstanding opposition to the embargo the President should be given the flexibility to handle the issue with the Soviets as he sees fit. For this reason I have voted "present" to indicate that I continue to be opposed to the embargo, while feeling it is not appropriate to instruct the President on the matter at such a delicate moment.

I am hopeful that President Reagan will lift the embargo soon without jeopardizing our strategic national interests.●

The PRESIDING OFFICER (Mr. SPECTER). Under the previous order, the Senate will now proceed to vote.

Mr. MELCHER. Mr. President, I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 8

Mr. MELCHER. Mr. President, I have become aware that the distinguished majority leader and the chairman of the Finance Committee, the distinguished Senator from Kansas, had a colloquy discussing the intention of the President to instruct the International Trade Commission to start a study under section 22 to limit the importation of casein.

Mr. President, I think that exactly makes our case. That is exactly where we were a couple of years ago. That instruction to the International Trade Commission to start a procedure under section 22 will trigger the mechanism that will take 1 year's time.

What we are asking in the amendment is simply to recognize that we are in an emergency, that the law requires the purchase of surplus milk, and it is going into the storage of the Commodity Credit Corporation.

It is indeed a serious and critical situation.

I do not think we have that year's time. We have $1.5 billion worth of milk and milk products in storage now. It will add up to $2 billion this year.

What the amendment seeks to do is to reduce the amount of casein imports so that we can save in Federal outlays approximately $200 million to $230 million per year and, therefore, enhance the President's program of cutting down on the budget.

● Mr. HAYAKAWA. Mr. President, 3 weeks ago most people did not know the meaning of the word casein. Today. it is practically a household word and the cause of much concern within the dairy industry. I would like to take a few moments to express my thoughts on the casein import issue.

I am a cosponsor of S. 509, legislation to delete the semiannual adjustment of the dairy price support program. Because production is continuing to increase while consumption is on the decline, I believe we must send a strong signal to the dairy industry to cut back on production. In order to bring Federal spending under control, changes in the program must be made and the time to act is now.

I also believe it is highly inappropriate to place any limitations on the importation of casein at this time. The affects of this hastily made decision would be serious and far-reaching. I urge all Senators to take this into consideration and to vote against the Melcher amendment that is before us today.

On June 1 of this year, the USDA will anounce the results of their intensive investigation into the problems casein imports cause our domestic dairy industry. It is at that time that we should give further consideration to the issue of casein imports.●

Mr. DURENBERGER. Mr. President, last Tuesday the Senate—by rejecting a tabling motion—refused to cut off debate on the impact of casein imports on the Nation's dairy farmers. Despite the controversy that followed the tabling motion, I am convinced that the Senate acted properly.

By rejecting the motion to table, the Senate provided dairy farmers with a forum to state their case on an issue affecting the livelihood of thousands of farming families, as well as the States and communities that depend on them. That issue is the need for American markets for American agriculture. The forum in the importation of casein. Casein is the natural protein derivative of skim milk. It is essential to the production of glues and a variety of pharmaceutical products, and no one questions the need to continue a level of import sufficient to fill this nonfood need.

But unfortunately for the American agricultural community, imported casein is also used in place of milk in items such as immitation cheese, coffee, whitener, and frozen dessert topping. Casein has certain properties that adapt well to long-term storage, and some use in frozen food is inevitable. But there is no getting around the fact that a significant portion of the 150 million tons of casein imported annually falls into direct competition with domestically produced skim milk.

Americans pay for these imports in two ways. Obviously, the Nation's dairy farmers pay through lost markets and lost income. But farmers and farm communities are not the only Americans that pay the price for this competition. Under the price support program, the Department of Agriculture purchases the surplus domestic skim milk, processing it into dry milk and placing it in storage in CCC stockpiles. American taxpayers end up paying $2.75 for each pound of domestic milk displaced by casein and placed in CCC storage. Standing alone, the cutbacks in milk price supports contained in S. 509 would save taxpayers $147 million.

In the casein amendment were passed in its present form, the bill could save an additional $200 million in subsidies for a possible Federal spending reduction of $347 million. The bottom line is that whether through lost markets or tax subsidies, everybody pays for casein competition.

The dairy community has attempted without success to bring this issue before the Congress for a number of years. To simply table the Melcher amendment, and cut off debate on the issue, would have been unjustifiable. The casein amendment presents a legitimate issue and it deserves a vote on the merits.

The Senate's decision to permit further debate and resolve the issue on its merits rather than through the expediency of a tabling motion was not—as some have suggested—a backdoor effort to kill the President's proposed reductions in dairy price supports. I am totally behind the President's proposal, as are most of the Senators who rejected the tabling motion. In fact, as I pointed out earlier, addition of the casein amendment could more than double the cutbacks in Federal spending contained in the administration's bill.

Nor is there validity to the suggestion that attaching this amendment to S. 509 will cause the bill to be sequentially referred, and thus delayed indefinitely in the House. Under the rules of that body, the Speaker has nearly absolute authority to determine the course of referral. This is not the first time the House of Representatives has considered a section 22 matter. A similar bill governing cotton imports was considered in 1956. At that time the Speaker did not use a sequential referral, and directed the bill only to the Agriculture Committee. The Speaker has the same authority to take identical action today.

In addition, the Speaker has the authority to place any limitation he chooses on the time a committee has to consider a bill and report it to the floor. The point of all ths should be obvious. If the Speaker wants to advance the bill by April 1, he has the authority to do so. If he wants to kill the bill, he does not need the excuse provided by the amendment to insure its defeat. The Melcher casein amendment is not an indirect device to kill the price support reduction. It is an issue distinct from that reduction, and it should be considered on its merits.

As important as this amendment may be in its own right, it is really only one aspect of a much broader issue confronting the 97th Congress. For in a real sense, we are considering the future role of the dairy industry in this country, as well as the role Government will play in preserving that industry's viability.

Generations of American policymakers have renewed their commitment to preserve the dairy industry because as a nation we cannot afford to lose that industry. Milk is the basic unit in any food cycle. Even in emerging nations, agricultural policy begins with policies designed to assure stable milk supply. Price supports form a part of those policies, but only a part. They cannot be treated in isolation from the cost and marketing issues that make up the whole of this Nation's agricultural policy. And the truth is that the rapid increase in outlays for dairy price supports is largely the result of our failure to deal effectively with these cost and marketing factors.

Over the years we have allowed a variety of foreign milk substitutes to seize an ever increasing share of the domestic market. Because these products are heavily subsidized by foreign competitors, they compete on favorable terms with American milk products. This creates an indefensible situation in which American consumers pay twice for every pound of imported milk substitute—once for the substitute itself, and once for the tax subsidy to compensate American producers for lost sales.

While witnessing this invasion of domestic markets, we have done an inadequate job in promoting foreign markets for our own surplus dairy products.

Poor policy coordination between dairy programs and other farm assistance programs has also played a major role in increasing subsidy outlays. There are few entry barriers to dairy farming. Whenever income falls in other types of farming, thousands of farmers shift their operations to dairy farming so they can take advantage of the price support subsidies. But of course, dairy farmers do not have the same entry and exit options vis-a-vis other branches of agriculture.

The result has been inadequate market growth, increasing surpluses, and of course, increasing outlays to maintain the price support level. We can address the symptoms of this process by cutting back the price support level, as President Reagan proposes to do. And I have no reservations about supporting his proposal. But until we address the problems of rising cost and inadequate market growth, we will neither protect the industry's viability nor strike back at the factors that have caused the increase in support expenditures over the past decade.

I do not believe that limiting the imports of casein can solve the entire problem. But it represents a first step toward addressing the industry's problems by expanding markets rather than increasing subsidies. This is the only policy that offers any long-term relief for the industry, the consumer, or the taxpayer. And by casting my vote on behalf of the Melcher casein amendment, I want to draw the attention of both the administration and congressional policymakers to the need for a comprehensive review of the Nation's dairy policies.

The Melcher casein amendment is not a test vote on the price support issue, and support for that amendment is perfectly consistent with support for the administration's program. As my distinguished colleague from Kentucky Senator HUDDLESTON, pointed out during floor debate last week—

S. 509 . . . keeps the (price support) program from becoming more expensive and more burdensome.

It reduces the potential amount of surplus dairy products that would come into the hands of the Federal Government . . .

The amendment by the Senator from Montana also deals with the overall program affecting dairy farmers of this country. It seems to me that if you are going to take from them with one hand, and you have an opportunity to restore something with the other hand that costs the government nothing but in fact saves the government, that it is proper and prudent to attempt to do that. The whole package of dairy legislation and dairy policy should be considered.

I am in complete support of the President's proposal to repeal the automatic price support increase that is scheduled to take effect April 1. I also support this effort to preserve American markets for the products of American agriculture.

I ask unanimous consent that a letter written to the President by Senator DOLE, Senator BOSCHWITZ, and myself be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE,
Washington, D.C., March 23, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: For the past several days the Senate has been considering S. 509, a bill to delete the requirement that the support price of milk be adjusted semi-annually. During these deliberations several Senators have raised the longstanding issue of imports of casein and their impact on the domestic dairy producers. These Senators are concerned that imports of casein, a milk by-product, are displacing competitive domestically produced milk products in the U.S. market and are causing the Federal Government to increase its purchases of these milk products under the dairy price-support program.

There is no question that imports of casein and casein mixtures have risen in the last several years. From 1976 to 1980 such imports increased from 112 million pounds to 152 million pounds. During this period the Department of Agriculture increased its price support purchases of nonfat dry milk from 157 million pounds to 634 million pounds, an all time high. Since U.S. production of whole milk continues to increase, the distinct possibility exists that the Government will be forced to purchase increased quantities of nonfat dry milk. The amount which must be purchased by the Government could well be increased by the continued growth in casein imports.

Given these conditions we believe it would be appropriate for the Secretary of Agriculture to initiate an investigation under Section 22 of the Agricultutral Adjustment Act of 1933 to determine whether he has reason to believe the casein and casein mixtures are being imported in such quantities as to tend to render ineffective or materially interfere with the domestic price support program. If the Secretary so determines and so advises you, the International Trade Commission can be requested to make an investigation to determine the facts and make no-binding recommendations to you. Upon completion of an ITC investigation and recommendations, import restraints can be imposed. As a result of a waiver obtained from our trading partners in 1955 specifically for actions taken under Section 22, it is unlikely that the United States would be subject to retaliation or forced to pay compensation for any restraints imposed.

In our judgment, an investigation by the Secretary of Agriculture would be preferable to legislative action such as that which has been proposed as an amendment to S. 509. While this amendment may not be approved by the Senate, the extent of the concern with the casein problem cannot be underestimated. A proceeding under Section 22 would provide both casein producers and consumers with an impartial forum in which to present their respective views. It would also provide a means of reassuring agricultural interests in general that established legal procedures can be invoked to provide them with an opportunity to seek redress for their problems in a timely manner.

Sincerely yours,

BOB DOLE,
Chairman.
DAVID DURENBERGER.
RUDY BOSCHWITZ.

Mr. HEINZ. Mr. President, I would like to take this opportunity to discuss my views on the Melcher amendment which the Senate is considering today. This amendment would require that the President recognize the effects that casein imports are having on American dairy operations, by setting a quota on these imports.

The dairy farmer desperately needs to have his problems properly considered by the Congress. Indeed, with the introduction of this year's farm bill, I fully expect that we will take the necessary steps to insure that the dairy farmer's problems are not swept under the rug or blatantly ignored, but rather are given full exposition and effectively resolved.

The dairy farmers of America are our lifeblood. Nowhere will you find a segment of our population that is harder working or more dedicated to preserving the vitality of our country.

This bill currently before us, is yet another example of the dairy sector's resolve to make sacrifices on behalf of national interests. I have been greatly impressed by the willingness of so many dairy farmers in my State to share in the sacrifice that is necessary to revitalize our economy.

While I do not necessarily oppose the idea of restricting casein imports with respect to the Melcher amendment, I cannot support this amendment under the circumstances in which it is presented to us today. As a member of the Senate Finance Committee, I believe it is essential that the committee which has jurisdiction over international trade questions, have the opportunity to fully investigate and review the potential impact of the approach suggested by Senator MELCHER.

It may well be that our conclusion will indicate that the Melcher approach is the proper approach; certainly, I am very sympathetic to the concerns that motivated Senator MELCHER. But we simply must have a chance to follow regular Senate procedures, and permit the committee which knows the most about this issue to look into it.

Clearly, the question of a violation of the GATT agreement, which the Office of the U.S. Trade Representative believes to be the case, must be one factor foremost in our minds. In addition, the possible ramifications of a casein import quota for the products we export to casein-producing countries must be fully considered.

The International Trade Commission, a body for which I have the greatest respect, has concluded in a study completed in December 1979 that there is no injurious relationship between imports of casein and our domestic price support program for dairy products. Disputes on this matter continue, but I believe it is important that such a relationship be established before restrictive action is taken. The USDA is conducting its own study, due in June of this year, which will address many of the same issues.

It is my understanding that President Reagan today has agreed to invoke section 22 of the Agricultural Adjustment Act, and begin his own analysis of the casein imports question. Having had some reservations over the findings of the earlier ITC study, I applaud the President's actions and urge the swift completion of his investigation.

While I have procedural objections about the way this amendment has been brought to the floor, I do feel that this is an issue which deserves our full attention. Set in the proper context, the problem of casein imports must be fully investigated through those channels created to handle such problems.

Mr. President, I believe that a healthy dairy farm industry is a vital part of America. To that end I pledge my support to an early resolution of both the casein import question and a national farm and agriculture policy sensitive to the difficult circumstances of our dairy farmers.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Mr. President. what is the question before the Senate?

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to vote in relation to the amendment of the Senator from Montana. The yeas and nays have been ordered and the clerk will call the roll.

Mr. BAKER. Mr. President, before the clerk begins, will the Chair state the nature of the amendment?

The PRESIDING OFFICER. To establish a section 22 quota on the importation of casein products into the United States.

Mr. BAKER. I thank the Chair.

Mr. HELMS. Mr. President, I ask unanimous consent that I may be permitted to proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Mr. President, the sponsors of this amendment argue that it is a fair amendment, designed to help the Government save money. The amount of savings claimed varies, but the most recent claim is $163 million. And, that is in addition to the saving from foregoing the April 1 increase in milk price supports.

On its face, it sounds reasonable and sensible. But, can it stand scrutiny? I think not. It hangs on so many important assumptions and involves so many risks that it deserves very, very careful examination.

In fact, no one has really made the case that imported casein displaces even 1 pound of domestic milk. There is no domestic casein—none is produced. Why? Because U.S. milk producers can get two or three times as much for their skim milk if they convert it to nonfat dry milk and sell it to the Government than they could if it went for casein. Imported casein comes in because U.S. producers have walked away from the domestic casein market. Or, to be more accurate, the Government has lured them away through the price-support levels for nonfat milk.

Imported casein goes into markets U.S. milk producers cannot fill at current prices. But, what if there were no imported casein? Would not U.S. milk products then fill those markets?

The sponsors of this amendment argue that domestically produced products that now go into Government stocks would, instead, go into products now made from imported casein. In general, that argument ignores the fact that at current milk price support levels, no U.S. milk products would replace imported casein except at much higher prices—casein prices probably in the range of 120 percent higher than they are now. At those prices, what would happen to casein use?

Many markets for casein would simply disappear if the price went up 120 percent. Another protein would be used, perhaps one made from soybeans or some other vegetable source. In other cases. the product now made from casein would become so expensive that its use would fall sharply. In all cases, I would expect a price increase as great as 120 percent would sharply curtail casein use.

However, we do not have specific estimates of how much use would be cut by such an increase in price and neither does the author of this amendment, based on the information I have seen. I have seen assertions that this or that share of the imitation cheese market would be supplied by domestic milk products, or this or that share of bakery product or speciality food uses would continue. But such assertions are a far cry from the hard facts needed for such an important determination. As far as I know, solid information on this issue will not be available until the Department concludes its study, about June 1. There may be some displacement of domestic milk products by imported casein. But until we have estimates that will stand careful scrutiny, it would be dangerously premature to restrict imports.

I say dangerously premature. The danger comes from two directions. First, by sharply restricting imports and increasing the cost of casein-based food products, we will be increasing costs U.S. consumers pay for food by many millions of dollars. I could support such a cost increase if it were necessary to protect our dairy industry, or to protect our dairy programs, but we cannot make such a claim. Milk price supports protect farmers' prices whether imports come in or not. And, the hard facts with regard to the impact of imports on the programs still must be determined.

The second risk, and the really important one, is the damage this amendment could do to our international trade. We expect to sell $47 billion worth of agricultural products overseas this year—with a $29 billion positive trade balance. By limiting casein imports through legislation rather than following the well-defined "Section 22" procedure, we make ourselves extremely vulnerable to those who would argue that we are not fulfilling our commitments under the general agreement on tariffs and trade. If our trading partners retaliate, they can damage that trade flow. Even a very small reduction of market access can have far-reaching and hugely expensive implications.

Technically, we would be liable for damages equivalent to the value of trade lost. However, our real concern is the risk of losing access to important markets. That loss could easily and quickly exceed any calculation of direct damages.

That risk is unnecessary. The Department is measuring the impacts of casein imports. If the Secretary finds reason to believe the imports materially interfere with the milk price support program, he has promised to recommend action under section 22. By careful investigation under the section 22 rules, we can minimize the danger of retaliation by our trading partners.

Finally, this amendment has little to do with the bill under consideration. Restricting casein imports would not remove the need to avoid giving producers a costly and unnecessary signal to increase milk production in the face of our huge surplus. There will be full opportunity to consider the casein question in the course of the farm bill debate.

And while I hate to say this, I suspect that the casein amendment is nothing more than a killer amendment designed to focus attention away from the President's recommendation and to cloud the simple issue the administration bill is designed to address.

Because the time before April 1 is short, we must pass this bill quickly without amendment if it is to accomplish anything. For those who would work to kill the bill by this device, I urge you to deal with these important issues on their merits. For these reasons, I urge you to join me in rejecting this amendment.

Mr. President, I yield back the remainder of my time and call for the vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Alaska (Mr. STEVENS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD) is necessarily absent.

The PRESIDING OFFICER. Are there any Senators in the Chamber who have not voted who wish to vote?

The result was announced—yeas 38, nays 60, as follows:

[Rollcall Vote No. 34 Leg.]

NOT VOTING—2

Dodd	Stevens

So Mr. MELCHER's amendment No. 8 was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 11

Under the previous order, the Senate will now vote on the amendment in the second degree offered by the Senator from Nebraska to that Senator's amendment in the first degree. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Alaska (Mr. STEVENS) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 33, nays 65, as follows:

[Rollcall Vote No. 35 Leg.]

YEAS—33

Abdnor	Eagleton	McClure

NOT VOTING—2

Dodd	Stevens

So Mr. ZORINSKY's amendment in the second degree (No. 11) to his amendment in the first degree (No. 9) was rejected.

UP AMENDMENT NO. 17

(Purpose: To express the sense of the Senate regarding the Soviet grain embargo)

Mr. JEPSEN. Mr. President, I send to the desk a substitute amendment to the amendment by the Senator from Nebraska and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. JEPSEN), for himself, Mr. DOLE, and Mr. MATTINGLY, proposes an unprinted amendment numbered 17 to Zorinsky amendment numbered 9:

In lieu of the matter intended to be proposed by Mr. ZORINSKY insert the following:

Sec. 2. It is the sense of the Senate that the restrictions on the exportation of agricultural commodities to the Union of Soviet Socialist Republics should be terminated.

● Mr. PERCY. Mr. President, I am supporting the Jepsen substitute resolution for the Zorinsky amendment because it signals the President our collective desire to see the grain embargo ended. This resolution is nonbinding and, in effect, advisory only.

As we all know, the President is currently reviewing all the facts and circumstances pertaining to the grain sales suspension to the Soviet Union. He may determine that the embargo is necessary for foreign policy reasons. If this is the case, it is my feeling that all trade, across the board, should be suspended. The farmers and our Nation's agricultural community should not continue to bear the full burden of this action.

I cosponsored a similar resolution last week that asks of the President either to remove the embargo or extend it to all trade.

With this resolution, we are simply saying that if we are to have an embargo of the grain and food which this country produces so abundantly, then the embargo should be extended further than farm products.●

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the Senator from Nebraska. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EXON (when his name was called). Present.

Mr. HEFLIN (when his name was called). Present.

Mr. RIEGLE (when his name was called). Present.

Mr. ZORINSKY (when his name was called). Present.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

Mr. BAKER. I announce that the Senator from Alaska (Mr. STEVENS), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD), is necessarily absent.

The result was announced—yeas 58, nays 36, as follows:

[Rollcall Vote No. 36 Leg.]

YEAS—58

Abdnor	Cochran	Garn
Andrews	D'Amato	Gorton

ANSWERED "PRESENT"—4

Exon	Riegle	Zorinsky
Heflin		

NOT VOTING—2

Dodd	Stevens

So the amendment (UP No. 17) was agreed to.

Mr. BAKER. Mr. President, what is the next item pending before the Senate?

The PRESIDING OFFICER. The next question is on agreeing to the amendment of the Senator from Nebraska as amended by the substitute amendment offered by the Senator from Iowa.

Mr. BAKER. Mr. President, have the yeas and nays been ordered on the amendment?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HELMS. Why do we not do it by voice vote?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I wonder if the Senator would consider withdrawing the request for the yeas and nays?

Mr. ZORINSKY. Mr. President, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, what is the next order of business before the Senate?

AMENDMENT NO. 9, AS AMENDED

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska as amended by the substitute amendment offered by the Senator from Iowa.

[Putting the question.]

The PRESIDING OFFICER. The ayes appear to have it. The ayes have it.

The amendment (No. 9) as amended, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HARRY F. BYRD, JR., subsequently said: Mr. President, a short while ago, the Senate, by a voice vote, adopted the Zorinsky amendment as amended by the amendment offered by the Senator from Iowa (Mr. JEPSEN). I have voted for the substitute offered by the Senator from Iowa. However, had a recorded vote been taken on the motion to approve the

Zorinsky amendment as amended by the Jepsen amendment, I would have voted in the negative.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Oklahoma (Mr. BOREN).

The yeas and nays have been ordered.

UP AMENDMENT NO. 18

(Purpose: To express the sense of the Senate regarding imports of agricultural commodities from the Soviet Union under certain conditions)

Mr. BAKER. Mr. President, I send to the desk an amendment to the amendment of the Senator from Oklahoma and ask that it be stated.

The PRESIDING OFFICER. The amendment wil be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) proposes unprinted amendment numbered 18 to the Boren amendment numbered 13.

Mr. ROBERT C. BYRD. Mr. President, may we have order so we can understand what the amendment is about?

The PRESIDING OFFICER. The Senate will be in order.

The clerk may proceed.

The legislative clerk resumed reading as follows:

In lieu of the matter intended to be proposed by Mr. BOREN insert the following:

SEC. 2. It is the sense of the Senate that no agricultural commodities produced in the Union of Soviet Socialist Republics should enter the United States during any period during which the President imposes restriction on, or prohibits, the export of grain or any other agricultural commodity to the Union of Soviet Socialist Republics (including the restrictions on the exportation of agricultural products to such country initiated on January 7, 1980).

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Mr. President, may we have the amendment explained by the author?

Mr. BAKER. Mr. President, I ask unanimous consent to proceed for 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the sole purpose of this amendment to the Boren amendment is to convert it from its status as an amendment to this bill to a sense-of-the-Senate resolution attached to this bill.

Mr. MELCHER. I thank the majority leader.

Mr. BOREN. Mr. President, I ask unanimous consent that I may be given 60 seconds in which to address a question to the author of the substitute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, I wish to ask the majority leader or the manager of the bill is there authority under present law? If we pass the sense of the Senate resolution saying we should not be importing Soviet agricultural products during the embargo, is there power under the present law for the President to stop immediately short of us enacting it the importation of Soviet agricultural products during the time the embargo is in effect? In other words, would it have any teeth in it?

Mr. HELMS. I am advised he can on a temporary basis.

Mr. ROBERT C. BYRD. What is meant by "temporary basis"?

Mr. HELMS. I say to my friend that everyone knows what "temporary" means.

[Laughter.]

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may have 30 seconds to get the answer.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. The majority leader—oops, the minority leader—has asked a question to which I frankly do not know the answer.

Mr. BAKER. The minority leader.

Mr. HELMS. The minority leader. Look at that grin.

[Laughter.]

Mr. ROBERT C. BYRD. The Senator does not know the answer?

Mr. HELMS. That is correct, not at the moment. Counsel is researching the matter, but I confess that I do not know.

Mr. ROBERT C. BYRD. All right.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee to the amendment of the Senator from Oklahoma.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. EXON (when his name was called). Present.

Mr. HEFLIN (after having voted in the affirmative). Present.

Mr. PRYOR (when his name was called). Present.

Mr. ZORINSKY (when his name was called). Present.

Mr. BAKER. I announce that the Senator from Alaska (Mr. STEVENS) is necessarily absent.

Mr. CRANSTON. I announce that Senator from Connecticut (Mr. DODD) is necessarily absent.

The PRESIDING OFFICER. Is there any other Senator in the Chamber who desires to vote?

The result was announced—yeas 80, nays 14, as follows:

[Rollcall Vote No. 37 Leg.]

YEAS—80

Abdnor	Durenberger	Laxalt

So Mr. BOREN's amendment (No. 13), as amended by Mr. BAKER's substitute amendment (UP No. 18), was agreed to

Mr. HELMS. Mr. President.

Mr. MELCHER. Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

POTENTIAL UNITED KINGDOM HOOF-AND-MOUTH DISEASE

Mr. MELCHER. Mr. President, yesterday I had printed in the RECORD some explanatory material demonstrating that of the countries from which we import casein, there are a number that are afflicted with outbreaks of the so-called hoof-and-mouth disease. The reason that is important is that in the processing of milk to prepare casein, it is pasteurized at 72 degrees centigrade for 15 seconds. Most of the virus of hoof-and-mouth, which is passed from infected animals in milk products, is killed by pasteurization. But not all.

Yesterday, I had printed in the RECORD information explaining that fact. As of yesterday, those countries from which casein is imported and have experienced outbreaks of hoof-and-mouth include France, Italy, the Netherlands, West Germany, Argentina, Russia, and Poland. As of yesterday, a new country has been added to that list, the United Kingdom.

Mr. President, the United States does import substantial quantities of casein from the United Kingdom. The new outbreak of hoof-and-mouth reported just yesterday in the United Kingdom is in the Isle of Wight. I have asked the Department of Agriculture to tell me today if there is any milk produced in the Isle of Wight that gets into casein products imported into the United States. They have been unable to answer that question today. They are attempting to run down information from the United Kingdom and supply it to me as rapidly as possible.

The Department of Agriculture, in guarding against contamination in any of the casein that does come into this country from countries having hoof-and-mouth disease, goes through a series of procedures that they feel—that they feel—will prevent the virus from getting into either cattle or hogs or other animals that could cause a devastating outbreak of that disease in this country.

For the information of my colleagues, this country has been free from hoof-and-mouth disease for a good number of years; in fact, several generations. We hope we never have another outbreak, but we guard zealously against importation of any product or any animal from an area that has disease that might bring the live virus to this country and cause an outbreak here. The method that is used in protection against the virus being in casein is not entirely satisfactory to me at all. Nevertheless, there is a procedure that the Department follows. Obviously, in a situation with an outbreak reported yesterday in the United Kingdom's Isle of Wight, there is no effective means of even identifying the possibility, at this time, that there is any milk product from infected animals that may have gotten into casein that is being imported into this country.

Mr. President, I hope that the Department can give us an immediate report, first of all, on how much milk is produced in the Isle of Wight, from where the disease has been reported; and second, has any of that milk gone into a processing plant that develops and is sending casein—or has sent that casein—recently to the United States? I think it is important that we know that and find it out immediately.

I have no amendments to offer at this time, Mr. President. To the managers of the bill and to the majority leader, I respectfully suggest that maybe we do not want to vote passage of the bill tonight.

Mr. President, I have described the circumstances with regard to the outbreak of hoof-and-mouth disease in the United Kingdom yesterday and my concern about it. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator may not reserve the right to object.

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there any objection?

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll.

CALL OF THE ROLL

The assistant legislative clerk called the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum No. 5 Leg.]

Abdnor	Denton	Lugar
Andrews	Dole	Melcher
Armstrong	East	Nunn
Baker	Garn	Packwood
Bentsen	Hayakawa	Quayle
Boschwitz	Helms	Rudman
Burdick	Huddleston	Simpson
Cranston	Inouye	Specter
D'Amato	Jepsen	Wallop
DeConcini		

The PRESIDING OFFICER. A quorum is not present.

Mr. BAKER. Mr. President, I move that the Sergeant at Arms be instructed to invite the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to instruct the Sergeant at Arms to invite the attendance of absent Senators. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut (Mr. DODD) is necessarily absent.

The PRESIDING OFFICER (Mr. ROTH). Are there any other Senators wishing to vote?

The result was announced—yeas 94, nays 2, as follows:

[Rollcall Vote No. 39 Leg.]

YEAS—94

Abdnor	Garn	Metzenbaum
Andrews	Glenn	Mitchell
Baker	Gorton	Moynihan
Baucus	Grassley	Murkowski
Bentsen	Hart	Nickles
Biden	Hatch	Nunn
Boren	Hatfield	Packwood
Boschwitz	Hawkins	Pell
Bradley	Hayakawa	Percy
Bumpers	Heflin	Pressler
Burdick	Heinz	Proxmire
Byrd, Harry F., Jr.	Helms	Pryor
Byrd, Robert C.	Hollings	Quayle
Cannon	Huddleston	Randolph
Chafee	Humphrey	Riegle
Chiles	Inouye	Roth
Cochran	Jackson	Rudman
Cohen	Jepsen	Sarbanes
Cranston	Johnston	Sasser
D'Amato	Kassebaum	Schmitt
Danforth	Kasten	Simpson
DeConcini	Kennedy	Specter
Denton	Laxalt	Stafford
Dixon	Leahy	Stennis
Dole	Levin	Symms
Domenici	Long	Thurmond
Durenberger	Lugar	Tsongas
Eagleton	Mathias	Wallop
East	Matsunaga	Warner
Exon	Mattingly	Williams
Ford	McClure	Zorinsky
	Melcher	

NAYS—2

Goldwater	Weicker

NOT VOTING—4

Armstrong	Stevens	Tower
Dodd		

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

Mr. BAKER. Mr. President, I wonder whether I may have the attention of the distinguished Senator from Montana.

I understand his concern about the report of an outbreak of hoof-and-mouth disease in the United Kingdom. It is my understanding of his position that he wishes to delay third reading and final passage of this bill until he can obtain a report from our Department of Agriculture in respect to that story.

The Senator from Montana understands that we have been on this bill for some time and that the leadership on this side—I even presume to suggest perhaps the leadership on both sides—would like to move this bill and get it over with. However, in deference to the very legitimate concern of the Senator from Montana, I wonder whether he would consider another arrangement which I should like to propose now, informally; and if he thinks well of the suggestion, perhaps we could offer it as a unanimous-consent agreement.

In view of the fact that it appears that there are no other amendments—none that I am aware of and none we have been made aware of—other than the amendment that may be offered by the Senator from Montana, I suggest that we agree to put this bill over until the morning—say, to convene the Senate around 9:30—and that we go back on this bill after the recognition of the two leaders under the standing order; that we would have a vote on final passage of this bill, to the exclusion of all other amendments, except one amendment which may be offered by the Senator from Montana in respect to hoof-and-mouth disease, not later than 11 o'clock tomorrow.

That would be the request I would propound, if the Senator from Montana thinks favorably of that proposal.

I observe that the distinguished chairman of the Agriculture Committee is in the Chamber as well, and I am prepared to yield to either or both of them, so that they can express their preference.

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. MELCHER. I say from the outset that the proposal the majority leader has made is entirely satisfactory to me.

I should like to describe very briefly why I have such concern. The outbreak of hoof-and-mouth disease in the United Kingdom was just reported yesterday. It is on the Isle of Wight. My question to the Department today is this: "Is there any milk produced in the area that would get into the chain going into a casein plant and then possibly come into the United States?"

The reason why I think this is significant is this. Permit me just to quote briefly from some material I submitted for the RECORD yesterday, from the outstanding authorities on hoof-and-mouth disease and the chance of spreading it through milk products. I quote:

As indicated above, cattle infected with FMD shed the virus through various pathways. This includes mammillary secretions. As a result, milk and milk products from infected animals are of special concern to animal health authorities. During the 1967–68 outbreak of FMD in Great Britain, observations were made on the involvement of the milk in the spread of the virus. Samples of milk taken from milk collection trucks were shown to contain virus even from premises where the disease had not been diagnosed and from milk on store shelves. This observation led to a study which demonstrated high concentrations of virus in milk from infected cows before the appearance of signs of the disease.

In other words, cows that appear normal, that are not sick but are incubating the virus and will become diseased, are shedding the virus even before there is any sign of the disease in the cows.

In addition, the virus may persist in mammary tissue of convalescent cows.

The inactivation of FMDV in milk has been studied by various workers. This includes milk to which virus is added and milk from infected animals. FMDV in milk from infected animals may be extracellular or intracellular. The majority of the virus in milk is inactivated by Pasteurization, 72° C for 15 seconds; however, there is a small fraction which persists.

That is a small fraction of the inactive virus, and that 72 degrees centigrade or 15 seconds, which is pasteurization, is exactly the process that is used in milk in preparation for casein. So it is possible—and it has been checked out numerous times—that casein can contain the virus.

The threat is so serious that I believe it is imperative that we have a report from the Department of Agriculture indicating that they have identified where the disease is in the United Kingdom, on the Isle of Wight, and whether the milk produced from that area could be coming into the processing of casein that is imported—or, for that matter, other dairy products—being imported into the United States from the United Kingdom.

We do import a sizable amount of casein from the United Kingdom. I would like to be assured by the Department that all safeguards have been taken and identified; that no milk products from the Isle of Wight, where the outbreak of foot-and-mouth disease has occurred, is destined for the United States. I believe we can receive that assurance from the Department of Agriculture by tomorrow. If satisfactory, that would satisfy my concerns.

Mr. BAKER. I thank the Senator from Montana.

I yield now to the distinguished chairman of the Agriculture Committee.

Mr. HELMS. I thank the distinguished majority leader.

Mr. President, the Senator from Montana certainly is right in his concern.

I believe that the proposal by the majority leader is excellent. I assure the Senator from Montana that we are pushing for the information he has requested of the Department of Agriculture; and I hope, with the majority leader, that we may have it before we leave here this evening.

Mr. BAKER. I thank the Senator from North Carolina.

Mr. President, in view of these representations, and based on other inquiries I have made, I now ask unanimous consent as follows——

Mr. President, I withhold the request momentarily.

I join the distinguished Senator from Montana in urging that the Department of Agriculture and all other agencies and Departments of this Government inquire diligently and promptly into the matter suggested by the Senator from Montana.

It is my intention to propound the unanimous-consent request essentially as I have described it, after certain other details have been attended to.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 10 minutes, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR HEFLIN'S VOTE ON THE JEPSEN SUBSTITUTE FOR THE ZORINSKY AMENDMENT

Mr. HEFLIN. Mr. President, in regard to the Jepsen substitute for the Zorinsky amendment, I voted "present," and I should like to inform the Members of the Senate my reasons for voting "present" rather than voting "yea" or "nay."

The Zorinsky amendment, in my judgment, was an intelligent approach to the issue of whether or not the grain embargo should be continued or lifted. It called for the removal of the embargo unless the President, by April 15, 1981, certified to Congress two things: First, that the continuation of the embargo was necessary in the national security or the foreign policy interests of the United States; and second, that the continuation of such embargo will not have an adverse effect or discriminatory burden on this Nation's farmers.

The Jepsen substitute was not really an amendment to the bill before us but rather was a sense of the Senate resolution. Such a resolution has no teeth. It does not have the force and effect of law, whereas an amendment to the bill would have such force and effect. The Jepsen substitute, in my judgment, was toothless and would accomplish nothing. I am very much in favor of the Zorinsky amendment, for his amendment takes a sound approach and does something. It does have teeth. I am in favor of lifting the grain embargo, because I feel that the farmers have borne an undue and adverse burden in regard to this issue. On the other hand, I am not in favor of doing anything which would harm the national security interests or the foreign policy interests of the United States.

I believe that the Zorinsky amendment was the proper approach to resolve these competing but not mutually exclusive issues. It called on the President to report to Congress the two things I mentioned. I believe we should hear from the President, directly and clearly, whether or not he thinks the embargo is in the national interests.

The President should be given the power, in my judgment, to make the farmers whole and to see that the farmers do not suffer adversely and that no discriminatory practices are carried out against them. That is what the Zorinsky amendment would do. It would let our Chief Executive execute the congressional mandate.

Mr. President, the President and the Secretary of State are privy to classified

information which we in the Congress do not have access to on a day-to-day basis He is in the best position to make timely decisions about matters such as these. The United States today has many problems with Russia, particularly in Afghanistan and in Poland, and in my judgment, many of the problems in El Salvador can be traced to the Soviet Union. The President has at his disposal up-to-the-minute information about what the Russians are or are not doing in these trouble spots.

By voting "present," I do not vote against lifting the embargo. By voting "present," I think that I reserve the right to be better informed in regard to whether the national interest or the foreign interest of the United States might be affected.

I think a resolution that merely lifts the embargo is not the proper way to approach it. I think that we ought to approach it from an intelligent and knowledgeable basis of whether it is in the national interest and this can be supplied to us by the administration. There are methods by which the farmer can be made whole and I think they must and will be pursued. Therefore, I feel that my vote of "present" was the proper vote under the circumstances.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENTS BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, in accordance with Public Law 93-618, and upon the recommendation of the chairman of the Committee on Finance, and on behalf of the President pro tempore appoints the following Senators as official advisers to the U.S. delegation to international conferences, meetings, and negotiation sessions relating to trade agreements:

Official advisers—ROBERT DOLE, BOB PACKWOOD, WILLIAM ROTH, RUSSELL LONG, and LLOYD BENTSEN.

Alternate official advisers—JOHN DANFORTH, JOHN CHAFEE, JOHN HEINZ, MALCOLM WALLOP, DAVID DURENBERGER, WILLIAM L. ARMSTRONG, STEVEN D. SYMMS, CHARLES GRASSLEY, HARRY F. BYRD, JR., SPARK MATSUNAGA, PATRICK MOYNIHAN, MAX BAUCUS, DAVID L. BOREN, BILL BRADLEY, and GEORGE MITCHELL.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER MODIFYING THE PREVIOUS ORDER FOR THE RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I suggest there was an order entered to provide for the recognition of certain Senators, I believe 24 in number, to begin after the recognition of the 2 leaders under the standing order and after the close of morning business if morning business is ordered.

I ask unanimous consent now to modify that so that if the Senate resumes consideration of the milk price support bill the special orders commence after the conclusion of the Senate action on that measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

ADJUSTMENT OF PRICE SUPPORT FOR MILK

Mr. BAKER. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. Consideration of S. 509, with amendments adopted by the Senate.

Are there further amendments?

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded; and before the Senator objects, I want to say a word or two about this situation, and then we will go back into a quorum, if he wishes.

I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have spent a good bit of time now in trying to negotiate arrangements to complete consideration of this measure. It had been my expectation that we could finish this bill tonight. I know of no other amendments, with the possible exception of an amendment by the distinguished Senator from Montana dealing with hoof-and-mouth disease in the United Kingdom.

I am perfectly willing to consider that amendment tonight. I know that it is late and that some Senators may already have gone about the business of trying to fill their commitments for this evening. However, I should like to see us finish this bill tonight, and I believe we can, including the consideration of any amendment that may be offered by the Senator from Montana.

The Senator from Montana indicated that he would like to have some more information about the alleged outbreak of hoof-and-mouth disease in one of the English Channel islands. The distinguished Senator from North Carolina, who is chairman of the Agriculture Committee, joined the Senator from Montana in trying to gain as much information as possible on that subject; and I believe they did succeed, to some extent at least, with some information on that subject, perhaps a great deal of information on that subject.

Even so, in what I hope was a gesture of consideration, I suggested that if the Senator wanted this matter to go over until tomorrow, which was the first suggestion by the Senator from Montana, I was willing to do that, if we could arrive at a time certain to reach a vote on final passage.

I described the unanimous-consent request I was prepared to propound, to provide that the Senate would return to consideration of this matter in the morning and that the vote on final passage would occur at 11 o'clock; that no other amendments would be in order, except one amendment which may be offered by the Senator from Montana. It is my understanding that that was not agreeable, that there is an objection to a time certain to vote in the morning.

I suggested that perhaps we could vote tomorrow afternoon or perhaps any time tomorrow. As I understand the information that came back, it was that an objection would be lodged unless we could vote on final passage sometime Thursday.

Mr. President, we have been on this bill for a long time, off and on. Frankly, there are other matters that simply must be addressed by the Senate, matters such as the consideration of the report on the budget resolution of reconciliation instructions reported by the Committee on the Budget of the Senate.

In addition, we have a deadline for consideration of this measure. We can have an automatic milk price support increase on April 1 unless it is acted on by the two Houses, unless the bill can reach the President's desk in advance of that time.

So for those reasons and a variety of other reasons, it is simply not practical and it is not possible from our standpoint to put over the final consideration of this bill until Thursday.

Mr. President, that leaves us with the unhappy situation of either continuing on the consideration of this measure tonight or arriving at a reasonable time for its final disposition on tomorrow, and I reiterate my hope that we can conclude this bill tonight and I am willing to consider any other suggestion within reason to do that to reach that conclusion not later than some time during the day on tomorrow.

It is now 6:15 in the evening, and I would be loath to continue the Senate in session for a long period of time to complete the consideration of this bill tonight, but I am prepared to attempt to do so.

Mr. FORD. Mr. President, will the Senator yield?

Mr. BAKER. I am happy to yield.

Mr. FORD. Mr. President, I understand what the Senator is trying to do, and I am willing to stay as long as it is necessary this evening to complete this piece of legislation.

I might bring to the distinguished majority leader's attention that he announced the the schedule for the Senate and the days we would be in session and the days we would not be in session, the late night sessions and pro forma sessions on Friday, and he has been extremely good at this. We have been proceeding now for almost 3 months along this line, and it has been very good. Not only colleagues on my side but colleagues on the majority leader's side have been using that schedule in order to make their schedules. The majority leader will find that for many who are interested in dairy products and the dairy legislation tomorrow is just not a good day.

So, it seems that it would only take a few minutes on Thursday, if that does not interfere with the budget resolution, to take a vote some time early Thursday and allow Senators who will not be here to vote tomorrow.

The majority leader is jeopardizing some pretty decent Members, and I say "decent" in reference to their attendance. They have been faithful in their attendance and by the schedule that was announced. I understood that Friday during the pro forma the announcement was made that we would probably stay in all week, but that was on the basis that we thought the budget resolution would come on Friday but it did not come Friday. It came Monday, and that skewed the schedule some. I understood the announcement was going to be that we were going to be in on Saturday and there was a possibility of the Senate in on Saturday and now probably the majority leader is going to be good to the Senate and let the Senate out on Saturday and we will have no votes.

So it is a bit confusing to some of those who have been adhering to the majority leader's schedule on which I compliment him. It has been very good.

I understand there is just one individual maybe who has an amendment as it relates to the problem in Great Britain on hoof-and-mouth disease. That is a significant thing for him in his area and for apparently the distinguished chairman of the Agriculture Committee.

So I hope that we might be able to make arrangements.

Let me ask the majority leader this question: Is there no way we could have a time certain on Thursday to vote and not deprive or jeopardize the budget resolution for more than, say, 30 minutes?

Mr. BAKER. Mr. President, let me turn the question around. Is there no way that we cannot have the vote tonight, some time at a time certain, because on Thursday we are going to reach that budget resolution at a fairly early time during the day? I am sure a great number of Senators will be in a position or have to spend a great deal of time preparing for that and even if we began at 8 or 8:30 in the morning on Thursday I, frankly, think it is not the best part of scheduling discretion to put the final passage of this measure plus the consideration of one amendment in ahead of a matter of such monumental importance.

Mr. FORD. Mr. President, I think most Senators will have their minds made up by Thursday, and it should not be much of an imposition on any Senator to come in and to vote very quickly on one amendment and final passage.

I cannot see where it would jeopardize the budget resolution, only for a short period of time.

Second, apparently there is a very serious question as it relates to hoof-and-mouth disease in casein and other imports into this country. All the information is not available. It puts a fairly large responsibility on those who are attempting here in this short period of time to get this information, and it is something that has not been known for a long time, as I understand it, the problem that we have had.

Mr. MELCHER. Mr. President, will the majority leader yield?

Mr. BAKER. Mr. President, I thank the Senator from Kentucky for his remarks, and I will be happy to yield the floor to the Senator from Montana in just a moment.

I have the responsibility for the moment of scheduling the affairs of the Senate and exercising my best judgment and discretion in that respect just as my counterpart and colleague, Senator ROBERT C. BYRD, had for so long.

I regret really having to deviate from my professed intention to save late night sessions of the Senate for Thursday nights where possible. But in the initial communication with the Republican Members of the Senate, and I trust that a copy of that letter was delivered to Democratic Senators as well, because I supplied a copy to the distinguished minority leader, I pointed out that this is a schedule we would keep in the absence of extraordinary circumstances. But this is an extraordinary circumstance. We have been on this bill a long time. We have made a good-faith effort to conclude the consideration of this measure over that period of time.

We are perfectly willing to do that tonight at a time certain or without a time certain, or to do it tomorrow.

Mr. President, my responsibility, I believe, is to try to order the affairs of the Senate in a rational and reasonable way, and I do not believe it would be a reasonable and rational decision to try to finish this bill along with the commencement of the budget resolution on Thursday.

Mr. President, I will first yield to the Senator from Montana, but in a few moments I will put a unanimous-consent request that we proceed to final consideration of this measure not later than some hour during this evening, but before I do that so that Members may have a chance to come to the floor and so that the Senator from Montana may speak I yield the floor.

Mr. MELCHER. Mr. President, I wish to say to the majority leader that I think his concern in trying to arrive at a mutual or a satisfactory time for tomorrow has been very good. I sympathize with all the problems that the majority leader has to put up with in terms of making sure that no one's rights are violated and we can do the best job we can to protect everyone's interest.

Of course, this question of being present for a vote is one of the toughest decisions that a majority leader has to make, when someone tells him on either side that he cannot make a vote if it is scheduled for a certain time, when that Senator cannot be there.

I do not really want to inconvenience any Member of this Senate on this particular vote. However, I think it is rather serious that we know whether or not this recent outbreak of hoof-and-mouth disease reported only in the United Kingdom yesterday has had proper safeguards instituted by our Department of Agriculture to make sure that none of the infected products, that is, the products containing the virus, come into this country.

The sensitivity of my concern in this matter is predicated on some knowledge of how easy it is to have the live virus in a milk product exposed to some animals that are susceptible to the disease and they, therefore, contract the disease in that manner.

The fact is that we do import milk products from a number of countries that have hoof-and-mouth disease. So what difference does it make if we have one more country added to that list, in this case the United Kingdom, where the outbreak was first reported yesterday?

The problem is this, Mr. President, that in order to get safeguards in place to protect against the likelihood of importing the live virus and therefore spreading the infection to animals in this country, the most dangerous time is right at the initial outbreak.

What is necessary is for our people in the Department of Agriculture, cooperating with veterinarians in England, to make sure, first of all, that milk products from infected cows are not being placed into products that will be imported into the United States in such a manner that they would contain the live virus.

Pasteurization under the normal procedures, that is heating milk to 75 degrees centigrade for 15 seconds, will not kill all of the hoof-and-mouth virus. Some of that virus will survive pasteurization.

So it is extremely important that we can be sure that our safeguards are in place.

I am anxious for tomorrow to have a report from the Department of Agriculture describing the measures they have taken and the steps they have taken to make sure they have traced the various milk products that might be coming from the area, in this case the Isle of Wight, a part of England, where the outbreak occurred, are not in the process of coming into this country without proper protection.

I think it is an extremely serious matter. We have not had hoof-and-mouth disease in this country for several generations. When we had it in the early 1900's the cost to the country was in the hundreds of millions of dollars and with the change in the price of livestock now I suspect if not strictly controlled in this country we could lose billions of dollars worth of livestock.

The animals that are readily affected by hoof-and-mouth disease are clove and hoof animals which, of course, includes hogs, cattle, and sheep and also includes wildlife that are clove and hoof.

A few months ago there was a mock demonstration of what might happen if the hoof-and-mouth virus were introduced into this country undetected for a matter of 3 weeks and what might happen in the case of the spread of the disease during that period of 3 weeks was staggering. It was as if it were a war game played by our military. Our Federal veterinarians ran a mock test of the hoof-and-mouth virus actually introduced into the United States and undetected for a 3-week period of time and what might happen. It was devastating.

The safeguards that we have imposed upon ourselves have been effective during the past several decades. I said several generations. It has probably been about 65 years since we had an outbreak of hoof-and-mouth disease in this country. The safeguards we have put in place have been excellent.

I just want to be sure that we have all the safeguards in place in this particular instance. It is not an attempt to hold up the bill. It is an attempt to ascertain from the Department of Agriculture in the one clear way we can in the Senate or in the House of Representatives by saying to them we are waiting for a report and the whole body is waiting for a report for them to tell us just what safeguards they have taken and on that basis we are going to determine whether they are adequate.

From my own standpoint, I would prefer that the veterinarians in the Department of Agriculture and the animal, plant, health, and inspection service specifically, would have more rigid requirements and safeguarding against dairy products imported from hoof-and-mouth disease countries. I do not think their protections are rigid enough.

Be that as it may, the point is that in a few hours, the first 72 hours in the first 96 hours after an outbreak in a country, the chance of dissemination of the virus is at its worst.

It is true that the United Kingdom is a long way away from us, and it is true probably that the outbreak is localized in just a few communities. I hope that is the case. I do not think that is clear yet.

But the fact is that in modern day transportation and interchange in food products between the United Kingdom and here it is possible that the virus could be introduced very easily.

The fact is that pasturization does not kill all the virus. The fact is that veterinarians at Plumb Island in our research laboratory there who safeguard this country against hoof-and-mouth disease importation, have identified that the virus can and does survive in casein, for instance, for 84 days. For 84 days the virus can survive in casein that has been prepared from milk that has been pasturized. That is hardly reassuring at this time.

But we need to know, and it does not hurt this body to wait a day or 2, though I realize the serious handicap it imposes on the majority leader and on the minority leader trying to accommodate everyone so they have a vote when they can be present. I realize that.

The risk we are taking is great, Mr. President. For that reason, I will do what I can do to make sure that we do not wrap this bill up tonight until we have that report from the Department of Agriculture.

I repeat, I know the serious problems this imposes on the majority leader and the minority leader. But I also know that the bill is not going to be voted out of the House before Thursday. I think we could wait until tomorrow or Thursday morning. I am willing to do anything on the amendment itself tomorrow in the way of hurrying it up so all we would have to do is vote on final passage. I draw that to the attention of the majority leader and the minority leader if that helps in any way.

I yield to the majority leader.

Mr. BAKER. Mr. President, I thank the Senator for yielding. I have to confess, however, that I was in conversation with the minority leader. I wonder if the Senator would repeat himself.

Mr. MELCHER. Mr. President, I ask unanimous consent that I may yield without losing my right to the floor.

Mr. ROBERT C. BYRD. Without objection, it is so ordered.

Mr. MELCHER. I would do anything about making an arrangement to convenience anybody tomorrow on the amendment that might be offered. Just being assured by the report that the Department of Agriculture provide us with the information showing there is no need for the amendment, I would do anything I could within my power to clear that up tomorrow if that would somehow convenience everybody else just on voting on final passage on Thursday on the bill itself.

Mr. BAKER. Mr. President, as I indicated earlier, I would very much like to finish this measure tonight. As I understand, they are in contact right now with the United Kingdom to see if they can get the information the Senator requires before we recess tonight. That is my first preference.

If we can do that, I would hope that would resolve the dilemma. If we cannot do that, as I indicated earlier, I am prepared to agree to a time-certain vote with only one amendment in order during the day on tomorrow.

I think it is worth our while now just to wait a little, to continue to debate and to see whether or not we get some more information on this subject.

I would urge the Senator to propound his amendment. I do not know what disposition the Senate might make of it but at least we would have an opportunity to know what he is driving at. I have not seen the amendment. I have not had it described to me. I wonder if the Senator would consider submitting an amendment at this time.

Mr. MELCHER. I thank the majority leader for the suggestion. I will consult with the Department. I will have to draft the appropriate amendment and I will perhaps offer it later this evening.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr DURENBERGER). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I understand that there have been rather extensive negotiations between the distinguished Senator from Montana and others, including the distinguished Senator from North Carolina, the chairman of the Committee on Agriculture (Mr. HELMS). It appears that we are making good progress on trying to gain the information the Senator from Montana wishes. The minority leader has indicated to me in private conversation that there is some possibility that we can arrange for a time certain to dispose of this matter on tomorrow. I think that is a good arrangement.

Mr. President, I wish now to propound a unanimous-consent agreement for their consideration. I observe that the Senator from North Carolina is on the floor, as are the Senator from Montana and, of course, the minority leader.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR ROBERT C. BYRD AND SENATOR EAGLETON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, the Senate turn to the consideration of the listing of 24 special orders in favor of Senators as previously described.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I inquire of the distinguished minority leader if there is any need for additional special orders on his side.

In addition to the 24 that have been provided for, Mr. President, I ask unanimous consent that there be added the Senator from Missouri (Mr. EAGLETON) for not to exceed 15 minutes; and the

distinguished minority leader, Mr. ROBERT C. BYRD, for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF S. 509 AT 3:30 P.M. AND FOR A VOTE THEREON AT 4 P.M. TOMORROW

Mr. BAKER. Mr. President, notwithstanding those special orders, I ask unanimous consent that the Senate return to the consideration of this measure, S. 509, at 3:30 p.m. on tomorrow and that the Senate proceed to a final vote on this bill at 4 p.m.; and that no other amendment be in order except one amendment which may be offered by the distinguished Senator from Montana (Mr. MELCHER) dealing with hoof-and-mouth disease; and that paragraph 4 of rule XII be waived.

Mr. ROBERT C. BYRD. Reserving the right to object, Mr. President, I wonder if the distinguished majority leader would provide assurance for some time on Mr. MELCHER'S amendment, because, under the agreement as presented, Mr. MELCHER might not get the floor until 4 o'clock, the time at which the rollcall vote would occur on the bill, and he would have no time for debate on his amendment.

Mr. BAKER. Mr. President, I shall be happy to do that.

I wonder if the Senator from Montana would be agreeable to, say, a guarantee of half that time to be provided, to go on the bill at 3:30 and to provide that 15 minutes of the 30 minutes from 3:30 to 4 o'clock be under his control?

Mr. MELCHER. Will the Senator yield?

Mr. BAKER. Yes.

Mr. MELCHER. I thank the majority leader. That is perfectly agreeable with me.

Mr. President, I want personally to thank the majority leader and the minority leader and the distinguished chairman of the Committee on Agriculture for their patience. It is very good of them to do that, all three of them.

I also thank all of the staff and the distinguished Senator from Minnesota, now in the chair, for their patience through the inconvenience of being held here. It is only on the basis that I think this matter is very serious and that it is absolutely essential that we have some report assuring us of the consequence and the degree of spread of the disease in the United Kingdom and what effect it might have on dairy products that might be permitted to come to this country that I base my sensitivity and my strong desire to have this amount of time.

Mr. BAKER. Mr. President, if the Senator will permit me to say, I have never doubted for a moment his sincerity in this amendment. It is indeed an important matter. I think the time we have spent since a little earlier today has been well spent, because we have provided an opportunity for a careful and prudent examination of this problem. We have provided now for a firm disposition of this measure. I think both of those things are much to be desired.

Mr. President, I thank the Senator from Montana for his cooperation. I thank the distinguished minority leader for his, and I express my gratitude to the distinguished chairman of the Committee on Agriculture (Mr. HELMS) for his assistance throughout the day.

Mr. HELMS. Will the Senator yield?

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Reserving the right to object.

Mr. HELMS. Mr. President, I thank the distinguished majority leader for his comments.

I say to the Senator from Montana that he has properly exercised his concern. I think it is going to be resolved to his satisfaction. I might report for the RECORD that we are getting British officials out of bed. It is now about 5 minutes past 1 in London and they are checking on the casein production there. I believe the answer that he will receive tomorrow morning, or perhaps later this evening, will be satisfactory to him.

I commend him for raising the question, because it is an important one. To whatever extent he has brought this matter to the attention of the Senate and, more particularly, the Agriculture Department, the better. I thank him. I appreciate what he has done.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, I thank the distinguished Senator from Montana for pursuing the matter in a very serious way. His concern is not a frivolous one. It is a very conscientious and serious concern. He is attempting to secure certain information which, as the distinguished Senator from North Carolina (Mr. HELMS) has pointed out, is very difficult to receive at this hour.

There were two or three Senators on this side who will be inconvenienced by the vote which will occur at 4 o'clock tomorrow, but they have been contacted and we have the understanding that they would prefer that we proceed to set the vote for tomorrow, even though they will be inconvenienced, rather than go farther into the night. I think that the agreement that has been worked out is the best that can be secured and I, therefore, state that there is no objection on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the minority leader. I think that is a good arrangement. I am grateful to him, as I have previously said, to the Senator from Montana, and to the Senator from North Carolina. I also express my appreciation to Senators on both sides of the aisle, who are being inconvenienced from a scheduling standpoint. Members have expressed their willingness to proceed with this matter on tomorrow, notwithstanding that some of them will not be present. Without naming them, I should like the record to show that all of us, I am sure on both sides of the aisle, are grateful to them for their sense of cooperation and that degree of sacrifice.

Mr. BAKER subsequently said:

Mr. President, there is one element of the agreement that was reached by the distinguished minority leader, the Senator from Montana, and myself, that was not included in the original request. I now amend that request. I ask unanimous consent that the vote on the Melcher amendment, if such is offered, be an up-or-down vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That Senate will resume consideration of S. 509 at 3:30 p.m. on Wednesday, March 25, 1981 with 15 minutes of the time between 3:30 and 4 p.m. under the control of the Senator from Montana (Mr. MELCHER) and 15 minutes under the control of the majority leader or his designee.

Ordered further, That the only amendment in order be one to be offered by the Senator from Montana on hoof-and-mouth disease with an up-and-down vote on that amendment.

Ordered further, that final passage of S. 509 occur at 4 p.m.

PROGRAM

Mr. BAKER. Mr. President, on tomorrow, the Senate will convene at 9:30 a.m. The two leaders will be recognized under the standing order. Following that, a series of special orders in favor of 26 Senators will commence. That sequence will be interrupted at 3:30 in the afternoon, at which time, the Senate will return to consideration of S. 509. A final vote on that measure will occur at 4 p.m. The intervening 30 minutes will be divided in accordance with the usual form and 15 minutes of that time will be under the control of the distinguished Senator from Montana.

Mr. President, after the Senate completes the consideration of this measure, it will return to the execution of several standing orders if they have not been completed. It is anticipated that, during the course of the day, there will be a time for the transaction of routine morning business. The Senate will be in tomorrow until fairly late in the afternoon or the early evening.

On Thursday, it is anticipated that the Senate will return to consideration of the report of the Budget Committee and the resolution of reconciliation and instructions which has been reported by that committee. I feel that the consent to do that or the motion to proceed to that item will occur at approximately 11 a.m.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I am happy to yield.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for providing, for the vote in connection with the Melcher amendment, that it will be an up-or-down vote on the amendment. That was the understanding as the majority leader and I discussed it and it is in accordance with the wishes of the author of the amendment if it is offered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask that there now be a period for the transaction of routine morning business not to exceed 5 minutes, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

GRANT OF POSTHUMOUS HONORARY CITIZENSHIP TO DOUGLAS CLYDE MACINTOSH

Mr. BAKER. Mr. President, I send to the desk a resolution on behalf of Mr. DANFORTH, Mr. WEICKER, Mr. DODD, and Mr. HART, and ask that it be considered.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 55), granting honorary citizenship posthumously to Douglas Clyde Macintosh.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration and, without objection, the joint resolution will be considered to have been read the second time at length.

Mr. DANFORTH. Mr. President, I am pleased today to reintroduce a joint resolution to grant honorary citizenship posthumously to Douglas Clyde Macintosh, a distinguished theologian and respected teacher, late of Yale Divinity School. I am honored to be joined in this effort by the two Senators from Connecticut, Senator WEICKER and Senator DODD, and by Senator GARY HART.

In 1941, the U.S. Supreme Court—by a vote of 5 to 4—affirmed a Federal district court decision which denied citizenship to Douglas Macintosh, a native of Canada, because he would not promise to bear arms in defense of the United States unless he believed the war to be morally justified. Chief Justice Charles Evans Hughes dissented, in an opinion joined by Justice Holmes, Justice Brandeis, and Justice Stone. "There is abundant room for enforcing the authority of law." Hughes argued, "* * * without demanding that either citizens or applicants for citizenship shall assume by oath an allegiance to God as subordinate to allegiance to civil power."

Fifteen years later, the Supreme Court overruled the Macintosh decision, but, by then, Professor Macintosh had suffered an incapacitating stroke and could not renew his petition for naturalization. He died without receiving vindication for his sufferings.

Mr. President, the story of Professor Macintosh's case is well told in William Harbaugh's book, "Lawyer's Lawyer: The Life of John W. Davis." Mr. Davis argued the Macintosh case before the Supreme Court in 1931. I ask that an edited version of Mr. Harbaugh's narrative be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LAWYER'S LAWYER—THE LIFE OF JOHN W. DAVIS

(By William H. Harbaugh)

SELECTIVE CONSCIENTIOUS OBJECTION

Douglas Clyde Macintosh was an old-school Baptist by inheritance, training, and conviction. Born in Ontario in 1877, he was ordained a Baptist minister at the age of thirty. In 1909, the same year he received a Ph.D. from the University of Chicago, he was appointed to the faculty of the Yale Divinity School. Macintosh was not, and never had been, a pacifist. During World War I he volunteered for the Canadian Expeditionary Force as a chaplain, serving at Vimy Ridge and in the Battle of the Somme before returning to the United States on a speaking tour for the Allies. He then went back to France to run an American Y.M.C.A. hut behind the lines at St. Mihiel. After the war he resumed teaching at Yale as Timonthy Dwight Professor of Theology.

Dr. Macintosh wore pince-nez and high starched collars, spoke in clipped accents, and was reserved among strangers and casual acquaintances. Although proud, stubborn, and independent-minded, he was neither vainglorious nor conceited. Intimates valued him for his warmth, unswerving devotion to principle, and inspiring qualities as a teacher. "The more passionately Mac felt about a position, the softer his voice became. When he started to whisper it was time to head for the hills." His doctrinal outlook was conservative, but his methodology was liberal. He established himself as a philosopher of note with *The Problem of Knowledge* in 1915 and as a theologian of distinction with *Theology as an Empirical Science* four years later. In 1928 Macintosh offended many of his co-religionists by contending, in a series of lectures in Calcutta, that non-Christian philosophies were often infused with religious values. Yet he considered himself a staunch defender of evangelical Christianity, and he maintained his Baptist connections throughout his life.

Dr. Macintosh took out first citizenship papers in 1925. Four years later he joined 185 other applicants for naturalization in a crowded federal courtroom in New Haven. One of the other petitioners had been arrested three times in the preceding eighteen months; two would acquire criminal records during the following three years; one would be brought before the Humane Society for gross abuse of her children; and several were, or would become, prostitutes. All except Macintosh would be granted United States citizenship.

Dr. Macintosh was determined not to fight in an immoral war. As he said on his written application, he wanted "to be free to judge the necessity" of bearing arms, he did not believe in having his moral opinions settled by the majority, and he could not promise to act against what might be the best interests of humanity:

"I do not undertake to support 'my country, right or wrong.' . . . I am not willing to promise beforehand, and without knowing the cause for which my country may go to war, either that I will or that I will not 'take up arms in the defense of this country' however 'necessary the war may seem to the Government of the day.' ".

Under interrogation by the court on June 24, 1929, Macintosh amplified those views. His counsel, Dean Charles E. Clark of the Yale Law School, then argued for his admission on the ground that Dr. Macintosh's age made the question of military service moot. But District Judge Warren B. Burrows, a simple, patriotic Baptist who was to resign to run for the state attorney generalship the next year, denied the petition. No matter how estimable Macintosh's character, said the Judge, if men of his beliefs were naturalized there would be no one to fight "when the powder begins to burn and the bullets to fly"; patently, the Reverend Doctor was "not attached" to the Constitution of the United States.

Had Macintosh applied for citizenship before World War I, he probably would have been naturalized as a matter of course, for the right of conscientious objection was long established. The original colonies had all exempted members of recognized pacifist bodies from bearing arms, and the Fundamental Constitution for the Province of East New Jersey (1683) had not even required formal religious attachments. In ratifying the United States Constitution, North Carolina and Virginia had suggested that "any person religiously scrupulous of bearing arms, ought to be exempt, upon payment of an equivalent to employ another to bear arms in his stead"; and Madison had included a similar statement in his original draft of the First Amendment. Although both that draft and a revision incorporating the phrase, "or to infringe the rights of conscience," were struck out, apparently in the interests of brevity, the rights of conscientious objectors were understood by many to be implicit in the final version.

Judge Burrows' refusal to naturalize Dr. Macintosh in July 1929 evoked an impassioned editorial endorsement in conservative nationalist circles. The New York Herald Tribune predicted that "national suicide" would result if citizens refused to surrender their will in crises of life and death. The Memphis Commercial Appeal announced that good citizenship could "permit of no reservations." Other newspapers thanked Burrows for saving the country from "anarchism." Almost alone among major dailies, Walter Lippmann's New York World attacked the ruling. "The absoluteness of this doctrine," it declared, "is as naive as it is intolerable. The majority of wars in which any great Power engages are not life-and-death struggles in which its existence is at stake, but little wars of policy, interest, or accident. It is absurd to lay down a rule which makes it the absolute obligation of the citizen to give unquestioning support to every war. . . . The Herald Tribune's position is nothing more or less than a challenge to the principle of a moral responsibility."

Within hours of Judge Burrows' ruling against Macintosh, Professor Jerome Davis of the Yale Divinity School had asked his old friend Allen Wardwell to take the case, on the theory that it would be better if a leading Wall Street office handled the matter. He added that, although Macintosh was limited in means, he was one of the most distinguished theologians in the world. Four days later Professor Davis reminded Wardwell that "faith in God and Freedom of Conscience" were fundamental American traditions and that Macintosh was "merely upholding the principle for which our forefathers came to this country." Wardwell, a prominent Episcopal layman of strong liberal convictions, did not need to be reminded. After conferring with Dr. Macintosh, he recommended to John W. Davis that they take the case without fee.

Not only did Davis approve, he said with rare fervor that he wanted to argue the appeal himself.

Davis' partners believed that he took the appeal because it was brought to him, because it presented a debatable issue under law, and because it afforded him an opportunity to express his deep feeling for personal rights against governmental power. As he caustically remarked at the time, the framing of Question 22 by the Naturalization Service rather than by Congress made the question "a pure bureaucratic innovation . . ., an adornment and embroidery of the act which Congress itself had passed." He may also have been influenced, if only subconsciously, by a desire to purge himself of the illiberal statements he had made in his World War I cases, the tone of which had been wholly out of keeping with his abiding concern for the right of conscience. But however that may be, he felt more keenly about this case than almost any he ever argued.

Davis thrust hard on the practical aspects of the case in his opening argument in the ornate federal courtroom in the old Post Office Building at Broadway and Park Row.

He extolled Macintosh's character, emphasized that he was not a dangerous propagandist, and challenged the essence of an oath. It was doubtful, he observed, that any man had ever sworn allegiance "without making some reservation which would leave him some freedom of action." Near the end he moved the bench to laughter:

"If war ever came again to this country, I for one would not sleep any sounder if I knew that I was being defended by an army of middle-aged Baptist ministers with conscientious scruples against fighting."

Davis also seized the advantage when Judge Hand asked the befuddled government counsel if he believed that an act of Congress necessarily expressed the will of God. Would counsel, demanded Davis, bar naturalization to an alien who opposed the Prohibition Amendment? Finally, he declared that the Constitution "plainly does not require anyone to set aside his conscientious religious beliefs" and that it was "unconscionable to require an alien . . . to bind himself to conditions not imposed upon American-born citizens."

Davis was persuasive. On June 30, in an opinion which paraphrased or incorporated large sections of both the brief and the oral argument, Judge Manton, for a unanimous court, reversed Judge Burrows' decision. He affirmed Davis' contention that naturalized citizens should receive the same privileges as native-born citizens.

Davis altered his strategy in no essential in arguing against the appeal before the Supreme Court in April 1931. He told the bench with all his usual pungency that "the idea that a priest in his cassock, a nurse in her gown, a woman with her children hanging to her skirts, and a paralytic in his chair must all swear to bear arms before they become citizens reduces the process of naturalization to an absurdity." He declared that "what we want now is not more men who agree with the majority but [more] who are willing to go against the majority on occasion." And he pounded hard on the inconsistency of the government's adherence to the Kellogg Pact and its warlike demands upon Dr. Macintosh.

Four weeks later, in an opinion almost unique for its indifference to the First Amendment, Justice Sutherland overruled the Court of Appeals for a five-to-four majority. He declared that Davis' contentions that exemption of conscientious objectors was "a fixed principle of our Constitution" and that applicants for naturalization were being discriminated against were "astonishing." Congress, not the Constitution, gave them such rights as they possessed, and Congress could remove them at will. Unlike the native-born citizen, Macintosh was "unwilling to rely . . . upon the probable continuance by Congress of the long-established and approved practice of exempting the honest conscientious objector." Passing over the Kellogg-Briand Pact altogether, Sutherland then reduced one of the most uncompromising endorsements of the war power ever made by a member of the Supreme Court, "Unqualified allegiance to the Nation and submission and obedience to the laws of the land . . . are not inconsistent with the will of God"; the only limitations on the war power were those in the Constitution or in international law:

"To the end that war may not result in defeat, freedom of speech may, by act of Congress, be curtailed or denied so that the morale of the people and the spirit of the army may not be broken by seditious utterances; freedom of the press curtailed to preserve our military plans and movements from the knowledge of the enemy; deserters and spies put to death without indictment or trial by jury; ships and supplies requisitioned; property of alien enemies, therefore under the protection of the Constitution, seized without process and converted to the public use without compensation and without due process of law in the ordinary sense of that term; prices of food and other necessities of life fixed or regulated; railways taken over and operated by the government; other drastic powers, wholly inadmissable in time of peace, exercised to meet the emergencies of war."

Not until 1954 would Davis again be so outraged by an opinion of the Supreme Court. "Dear Dr. Macintosh," he said in a one-sentence letter to the theologian, "I blush for my country." The finding of the majority, he acidly remarked in other letters, was as wrong in law as it was in policy. It would doubtless meet the approval of 100 per cent Americans, most of whom would not fight if "there were any way in the world to wiggle out of it"; but by any thoughtful measure it was "a sad reflection on the intelligence of Congress and the country."

In his book-lined study in Timothy Dwight College at Yale, where a reporter sought him out on the afternoon of the decision, Dr. Macintosh said that he had rather expected the result. He brightened momentarily on learning that Chief Justice Hughes had written a forceful dissent in which Holmes, Brandeis, and Stone had concurred. But he responded grimly when asked if he would modify his position in order to gain citizenship: "I'm not budging from my stand one bit. I will make no further attempt to obtain citizenship if my point of view is unacceptable."

Not until 1942, when Congress amended an act of 1940 by authorizing the naturalization of conscientious objectors then serving in the armed forces in a non-combatant capacity, was the way opened for a possible reversal of the *Macintosh* decision.

Within a year, James Louis Girouard, a French-Canadian Seventh-Day Adventist, filed final naturalization papers in Massachusetts. Asked the usual questions, Girouard replied that he would serve as a non-combatant but would not bear arms. Over the vigorous protest of the naturalization examiner, the District Judge admitted him to citizenship. The government secured a reversal on appeal, after which the Supreme Court granted certiorari.

In an opinion which drew heavily on Hughes' dissent in *Macintosh*, Justice William O. Douglas reversed the lower court's ruling against young Girouard and overturned *Macintosh*, in the process. Dismissing the notion that Congress' failure to change the oath implied that it supported the government's construction of it, Douglas said that it was "treacherous to find in congressional silence alone the adoption of a controlling rule of law." Furthermore, the "affirmative recognition" in the 1942 amendment, that one could be attached to the principles of the government without bearing arms, negated any inference that might be drawn from Congress' earlier silence. He added a moving coda to Hughes' dissent in *Macintosh:* "Throughout the ages, men have suffered death rather than subordinate their allegiance to God to the authority of the State, Freedom of religion guaranteed by the First Amendment is the product of that struggle."

Mr. DANFORTH. Mr. President, the purpose of this resolution is to right the wrong done Professor Macintosh 50 years ago. A similar measure—sponsored by Senator Ribicoff—passed the Senate last year, but there was not sufficient time to consider it in the House of Representatives. To my knowledge, it is not controversial, and I am hopeful that it can be considered and passed by the Senate today.

The joint resolution (S.J. Res. 55) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. R. 55

Whereas Douglas Clyde Macintosh, a native of Canada and a Baptist minister, distinguished himself as an outstanding theologian and respected teacher in more than thirty years of service on the faculty of the Yale Divinity School, and as a visiting lecturer in philosophy and religion at the Universities of California, Chicago, Calcutta, and Harvard;

Whereas in World War I Douglas Clyde Macintosh voluntarily saw service as a chaplain with the Canadian army at Vimy Ridge and in the Battle of the Somme, lectured on behalf of the Allies in the United States, and operated an American Y.M.C.A. outpost at the front until the Armistice in 1918;

Whereas in 1931 the Supreme Court of the United States, in the case of United States versus Macintosh (283 U.S. 605 (1931)), affirmed the decision of the Federal District Court of Connecticut denying Douglas Clyde Macintosh's petition for naturalization as a citizen of the United States because he would not promise to bear arms in defense of the United States unless he believed the war to be morally justified;

Whereas in proceedings before the District Court Douglas Clyde Macintosh stated that he was ready to give to the United States all the allegiance he had ever given or ever could give any country, but could not put allegiance to the government of any country before allegiance to the will of God;

Whereas in 1946, in the case of Girouard versus United States (328 U.S. 61 (1946)), the Supreme Court of the United States overruled the decision of United States versus Macintosh;

Whereas Douglas Clyde Macintosh suffered an incapacitating stroke in 1942 making him unable to renew his petition for naturalization;

Whereas one of the cardinal principles upon which this nation was founded is the unalienable right to the free exercise of religion, according to the dictates of conscience; and

Whereas Douglas Clyde Macintosh died in 1948 without receiving vindication for his personal sufferings on behalf of that principle: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and directed to declare by proclamation that Douglas Clyde Macintosh is an honorary citizen of the United States.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JOINT REFERRAL OF NOMINATIONS

Mr. BAKER. Mr. President, I have a series of requests here that I understand have been cleared by the minority. I shall proceed to state them.

Mr. President, as in executive session, I ask unanimous consent that the nomination of Lionel H. Olmer, of Maryland, to be Under Secretary of Commerce for International Trade be jointly referred to the Committee on Finance and the Committee on Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the nomination of G. Ray Arnett, of California, to be Assistant Secretary for Fish and Wildlife, Department of the Interior, be jointly referred to the Committee on Environment and Public Works and the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CURRENT PLIGHT OF THE FARMER

Mr. THURMOND. Mr. President, I rise today to bring to the attention of the Senate the crisis situation afflicting the agricultural community of my State of South Carolina. Although the drought of 1980 is over, its devastating effects still plague the farmers of my State.

Mr. President, in 1980 the farmers of South Carolina were subjected to one of the worst droughts in the State's history. Although this drought was not limited to South Carolina alone, few, if any, other States suffered as severely as mine. Losses of tremendous proportions were incurred. Many farmers were unable to meet their debt commitments and either had to liquidate their farms or, when possible, refinance their 1980 debt. Reduced income and increased debt pushed the debt-to-net income ratio to over 8-to-1 by year end.

As a result of strong export demand and reduced national production, depressed commodity prices rebounded during the latter half of 1980. Subsequently, net national farm income projections improved considerably over earlier projections. However, South Carolina farmers had little or no crops to sell; and thus, were unable to take advantage of the higher crop prices.

Mr. President, large numbers of farmers in South Carolina were forced to turn to the Farmers Home Administration and the Small Business Administration for financial assistance as a result of the heavy losses they encountered in 1980. However, delays in the processing of disaster and operating loans have created serious cash-flow problems for these beleaguered farmers. This already bad situation is now further aggravated by the arrival of planting time in South Carolina.

Corn producers have been particularly hard hit by this unfortunate situation. Although planting time has come, they lack sufficient funds to sow their fields. Those fortunate enough to have acquired adequate capital to purchase the supplies necessary to prepare and plant their fields are now finding themselves short of funds for fuel, fertilizer, and nitrogen—all necessary for crop cultivation and an ultimate good harvest. As the planting dates for other commodities draw near, producers of these commodities are likely to encounter similar situations. A continuation of these circumstances does not bode well for prospects of recovery from last year's disaster, and may well bring about yet another disaster year for many farmers.

Mr. President, I ask unanimous consent that a resolution adopted by the South Carolina General Assembly memorializing the President, the Secretary of Agriculture, and Congress to take immediate action to relieve the economic hardship of the American farmers and agribusinessmen be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CONCURRENT RESOLUTION

A concurrent resolution to memorialize the President, the Secretary of Agriculture and Congress to take immediate action to relieve the economic hardship of the American farmers and agribusinessmen which was brought on by the drought and extended scorching heat of the summer of 1980

Whereas, the American farmer has been able to adequately feed and clothe our people, even under the disastrous conditions of heat and drought during the summer of 1980; and

Whereas, the American farmers are the foundation of this Nation's economic prosperity, whereby four percent of the people feed the other ninety-six percent, which frees this large percentage for employment in industry, commerce, service professions and the arts and sciences; and

Whereas, the American farmer has paid the price for this national security against hunger and food shortages through enormous investments in mechanized equipment, fertilizers and chemicals and yearly operating expenses; and

Whereas, the cost of these investments has steadily risen under the pressure of inflation; and

Whereas, many of the farm lenders in South Carolina and the Nation are faced with numerous foreclosures and forced sales of farms and farm businesses due to reduced farm incomes caused by the drought.

Now, therefore, be it resolved by the House of Representatives, the Senate concurring:

That the President, the Secretary of Agriculture and Congress are memorialized to take immediate action to relieve the economic hardship of the American farmers and agribusinessmen which was brought on by the drought and extended scorching heat of the summer of 1980.

Be it further resolved that the President is urged to use his discretionary authority to approve a three-year moratorium on principal payments for the 1977 agricultural disaster loans made through the Farmers Home Administration and the Small Business Administration and subordinate such loans to allow farmers to secure long-term bank loans and make low-interest disaster loans available to all farmers who have been adversely affected by the drought by suspending the "credit elsewhere" requirement normally used for Farmers Home Administration loan eligibility.

Be it further resolved that Congress is urged to provide for the extension by the Agricultural Stabilization and Conservation Service (ASCS) of direct disaster relief payments to farmers for drought losses to all crops with such payments made at one hundred percent of the production costs based "target prices" on one hundred percent of a farmer's normal yield and that ASCS emergency feed purchases assistance payments be made available for all feed purchases required to replace pastures, forage and feed grain lost due to the drought and not for feed only on hand at the time of a farmer's application and to allow the provision that eligibility be based on an alternate method of estimating the feeding period by using estimated crop yield and crop disaster payments whenever a farmer still has unharvested crops and provide that payments may be made immediately upon determination of eligibility using the alternate method and to take action to provide that ASCS emergency feed assistance payments may also be made available to poultry farmers.

Be it further resolved that the Farmers Home Administration implement a low-interest irrigation loan program to insure against future natural disasters due to drought.

Be it further resolved that action be taken to allow federal funds to be made available to drought-stricken states for development of irrigation projects under the Soil and Water Conservation Districts Watershed Development Program.

Be it further resolved that copies of this resolution be forwarded to the President, the Secretary of Agriculture and to each member of Congress representing South Carolina.

ADM. JOHN S. McCAIN, JR., NAVAL LEADER AND AUTHORITY ON SEA POWER

Mr. HELMS. Mr. President, the U.S. Navy in its long history since the founding of the United States has produced many heroes, leaders, and statesmen, among them Adm. John S. McCain, Jr., who died on Sunday, March 22, 1981, on board a military aircraft while returning from a visit in Europe.

Following a distinguished naval career, including submarines during World War II, he rose steadily through subordinate positions and finally became U.S. Commander in Chief, Pacific, 1968–72, with enormous responsibilities in connection with the Vietnam war.

It is significant that his early assignments included duty in submarines stationed at Coco Solo, C.Z., which experiences enabled him to become familiar with the Panama Canal and some of its major problems as well as to become an authority on the great subject of sea power.

Upon retirement from active service in the Navy in 1972 at a time when the future of the Panama Canal was becoming a subject of major national debate, he did not rest on his oars but started upon a sustained program of highly informative lectures on sea power in various parts of the Nation. In them and during appearances before congressional committees he vigorously opposed the surrender of the canal and strongly urged its retention under the undiluted sovereign control of the United States as a vital element in American sea power.

Mr. President, as Admiral McCain's career should serve as an inspiration to the youth of our great country, I ask unanimous consent for the obituary of him as published in the March 24 issue of the Washington Star be printed in the RECORD.

There being no objection, the obituary was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 24, 1981]

ADM. JOHN McCAIN JR. DIES; PACIFIC COMMANDER 1968–72

Retired Navy Adm. John S. McCain Jr., 70, commander in chief of U.S. Pacific forces at the height of the Vietnam War, died Sunday aboard a C–5 military aircraft after suffering a heard attack while returning from Europe to the United States. A Washington resident since his retirement in 1972, he lived on Connecticut Avenue NW.

Adm. McCain and his wife, Roberta, had been in Spain and Portugal where he was on a business and pleasure trip. This plane was scheduled to land at Dover Air Base, Del., but after the admiral was stricken landed in Loring Air Force Base, Maine, where he was pronounced dead.

From 1968 to 1972 McCain was commander of all U.S. military forces in the Pacific, including the troops then fighting in Vietnam. His was the single largest military command in the country's history, including more than a million soldiers, sailors and airmen and covering 85 million square miles.

Before he became commander of the Pacific forces, Adm. McCain was military representative to the United Nations for two years and then commander of naval forces in Europe in 1967 and 1968.

The son of a four-star Navy admiral, Adm. McCain lived in Washington for part of his youth and was a graduate of old Central High School here. He was graduated from the U.S. Naval Academy in 1931 and served aboard the old battleship Oklahoma.

He next went to submarine school in New London, Conn., and during World War II commanded three different submarines which sank 20,000 tons of Japanese shipping. On one occasion, he settled his submarine on the ocean floor for 72 hours while a Japanese destroyer dropped depth charges from above before finally giving up.

Adm. McCain also served in the Atlantic, one of his submarines serving as the beacon ship for the Casablanca landings in North Africa. During the war he was awarded a Silver Star and a Bronze Star for his exploits as a submarine commander.

On the day the peace treaty was signed in Tokyo harbor. Adm. McCain met his father, John S., also a four-star admiral, who was to participate in the signing ceremonies on the battleship Missouri that afternoon.

After the ceremony the senior McCain flew home to Coronado, Calif., where he died shortly after arrival. His father had been commander of the Fast Carrier Task Force under Adm. William F. Halsey during the war.

During the Korean war, Adm. McCain was second in command of the heavy cruiser St. Paul and also participated in shore bombardment in support of U.N. troops. After the war he became chief of congressional liaison for the Navy. One of his sons, Capt. John S. III, a prisoner of war in Hanoi for five years during the Vietnam War, now is Navy liaison to the Senate, a post similar to that held by his father and also, after World War I, by his grandfather.

Promoted to admiral in 1959, he became chief of information for the Navy and later as an amphibious specialist was appointed commander of the Atlantic Amphibious Training Command.

As vice admiral he commanded the Navy's Atlantic amphibious forces and also commanded American landing forces in the Dominican Republic crisis in 1967. For that operation he was awarded the Distinguished Service Medal. His next assignment was commander of naval forces in Europe.

Besides his wife and son, John S. III of Washington, he leaves another son, Joe, of Bethesda; a daughter, Alexandria of Houston; a brother, Gordon, of Corcoran, Calif.; and a sister, Catherine, of Coronado.

Services will be held at 10 a.m. Friday in the new Fort Myer Chapel, with burial in Arlington Cemetery.

The family suggest that expressions of sympathy be in the form of contributions to the Navy Relief Fund.

Mr. MATHIAS. Mr. President, will the Senator yield to me?

Mr. HELMS. I yield.

Mr. MATHIAS. Mr. President, I wish to join with the Senator in his tribute to Admiral McCain.

When I was a Member of the other body Admiral McCain was the Navy liaison officer on Capitol Hill, and one of the most famous events that occurred during those years was when Admiral McCain would give his sea power lecture.

Later I visited him in Norfolk when he was commander of amphibious forces, Atlantic, and he had perfected the sea-power lecture to the point where it was a very realistic exercise in what could be done by Navy forces.

That was typical of Admiral McCain. He thought Navy. He lived Navy. His spirit was Navy and he had to infect others. He had to inspire other people because of his enormous dedication to the concept of the U.S. Navy as a place where people could serve their country.

He is one of the distinguished sailors of this century and his passing will be noted with sorrow by thousands of people with whom he was associated in his many years in the U.S. Navy.

Mr. HELMS. I thank the Senator.

Mr. President, I know the family of Admiral McCain will appreciate the eloquent remarks of the distinguished Senator from Maryland.

URBAN DEVELOPMENT ACTION GRANTS

Mr. TSONGAS. Mr. President, President Reagan has come forward with a comprehensive program for the Nation's economic recovery which is designed to create jobs and stimulate badly needed reinvestment in our economic infrastructure. At the same time, despite rhetorical assurances to the contrary, we have every reason to believe that we are facing de facto abolition of the Urban Development ACTION grant program—a program which has demonstrated extraordinary success as a stimulus for private investment, job creation, and increased revenues to stabilize our most distressed cities and towns. As I understand it, a large number of urban programs, including the ACTION grant program, will be "folded into" the community development block grant program, with no money for fiscal year 1982. My colleagues on the Budget Committee have proposed to eliminate the balance of the funding for fiscal year 1981 as well. This approach has been described by my colleague from the Fourth District in Massachusetts, as "less redtape and less green paper."

Let us not delude ourselves that "folding in" the ACTION grant program, and taking away the funds for that program, is anything other than elimination of the program, plain and simple.

Let me briefly highlight the accomplishments of this program in its first 2 years of operation. ACTION grants have targeted $2 billion in assistance to support 1,000 projects. This has resulted in nearly $12 billion in private commercial industrial and neighborhood investment—over $6 for every dollar of ACTION grant funds. In addition, ACTION grants have created or retained almost one-half million jobs—including the creation of 287,000 new, permanent jobs at an average one-time cost of $6,000. ACTION grants have also generated $324 million in new, annual revenues for local governments—almost 17 cents for every dollar of ACTION grant funds.

To be eligible for ACTION grant funds is, of course, a mixed blessing. I wish that we did not have 56 cities and towns eligible for these funds in Massachusetts. It is a clear indication of the level of physical and economic distress that older communities in our State are experiencing.

Of these 56 cities and towns, 22 have received a total of 51 ACTION grants. These funds total $140 million, and have a private return of $500 million. The number of new permanent jobs created is 16,500, the jobs retained is 5,000, and the construction jobs are 10,000. These Massachusetts projects will generate over $10.9 million in desperately needed new annual tax revenues.

To my colleagues who doubt the "action" nature of this program, I extend an invitation to tour the Wang Laboratory Building, which was completed and occupied 16 months after the ACTION grant was announced.

The President's economic program ignores the ACTION grant. Instead of being eliminated, ACTION grants should be an integral part of our efforts to revitalize and reindustrialize this Nation's infrastructure.

In closing, let me say that the ACTION grant program has provided a model for the careful use of scarce Federal resources to support private sector development of high poverty, unemployment, and fiscal distress. Infusion of ACTION grant funds to assist in the reindustrialization and revitalization of these areas represents a wise Federal investment in our economic future. I strongly urge my colleagues to support this program, and specifically to support the President's budget with respect to fiscal year 1981 and to keep a separate and significant amount of funding for this program in fiscal year 1982.

SENATE BILL 421 AND THE PRESIDENT'S CALL FOR SAVINGS IN FILMMAKING AND PUBLICATIONS

Mr. DECONCINI. Mr. President, I was pleased and encouraged to read over the weekend that President Reagan intends to issue an Executive order this week requiring Federal agencies to cut back on publications and films and not publish or issue any new publications or films without OMB approval. This activity is exactly the type of low priority, nonessential Government spending that can, and should be, reduced and reduced sharply both this year and in years to come.

Mr. President, I am particularly pleased to find the President zeroing in on these areas of waste in Government only a little over 1 month after I introduced S. 421, the General Government Expenditure Control and Efficiencies Act of 1981, which called for general Government savings totaling $3.9 billion next year, including $250 million in audiovisual activities, filmmaking, production, and $150 million in public affairs, public information, and advertising.

As I mentioned in my floor statement of February 5, the Federal Government, according to the National Audiovisual Center within the General Services Ad-

ministration (GSA) spends approximately $450 to $500 million a year on audiovisual activities, including over $53 million on motion picture, TV, and video tape and audio production activities. The Department of Defense alone spends well over $410 million a year on audiovisual production, duplication, equipment, and supplies.

The National Audiovisual Center at GSA also reports in its fiscal 1979 report on audiovisual activities that the Federal Government owned or leased 1,519 audiovisual facilities, totaling 8.9 million square feet of space in fiscal year 1979. The Department of Agriculture alone owned or leased 62 such facilities; the Veterans Administration, 181 facilities; and the Department of Defense, 1,074 audiovisual facilities. In fiscal year 1979, 11 departments and 23 agencies owned or leased their own facilities. Since 1978, the Office of Management and Budget has been attempting to force agencies to consolidate or even eliminate audiovisual facilities that may be underutilized or nonessential to the Government's missions. However, it does not appear that OMB's directives as outlined in Circular A–114 have had much effect to date. Again, I am pleased to see that OMB intends to try again.

Mr. President, as I mentioned on the Senate floor last month, many of these Government-sponsored productions are useful, but in a year when we need to cut back nonessential Government activities, these audiovisual and filmmaking activities are prime candidates for the budget ax. After reviewing some of the films that have been produced at taxpayer's expense, my first impression is why has it taken the administration so long to discover this pocket of waste in Governmentt? Here are a few examples of films and productions that have been produced over the past several years by Uncle Sam:

Tent Flaps and Flapjacks: Portrays the recreational opportunites in the national forests in the north-central states.

Squirrel Cage Rotor Principles: Describes the laws of magnetism and induced electromotive force, explains how in squirrel-cage rotors electrons flow up magnetic poles.

Silver Fox Rodeo: Shows the Navy Attack squadron at work and play. Also shows enlisted personnel and officers flying over the Sierras, riding broncos and wild burros, and milking wild cows.

Sign of Profit: Depicts the dreams of a farmer and his wife; explains how these dreams for bettering farming are not so far off if the farmer has the incentive to work for them.

Blondes Prefer Gentlemen: Shows proper and improper etiquette on a dinner date.

26 audiocassettes on teaching Swahili.

Conducted Tours: Shows some of the things that commonly go wrong with conducted tours.

Faces of Freedom: A story about our hostages in Iran? No way. This film traces the history and purpose of the National Portrait Gallery since its founding.

The Autobiography of a Jeep: Gives a look at that most all American of vehicles, the jeep. Celebrates our national love affair with the automobile, transferred here to a remarkable little machines which would become a symbol of America's presence throughout the world.

Feelings—A Way to Better Letter Writing: Compares two kinds of letter writing—one simple, easy to read and to the point; the other wordy, pedantic and complicated; suggests how agencies should correspond with the public in a simple style to say what needs to be said.

I Like the Overhead Projector Because: Designed to offer ideas to teachers on how to use the overhead projector.

Hidden Beauty: Shows that a profitable junkyard business need not be an eyesore to highway users.

These are just a sampling of the hundreds of films produced over the years on topics ranging from art to zoology. To make matters worse, there is little indication that the number of those who actually use these films or the effect of the message communicated justifies the cost. The President has apparently received the same message that we received several months ago when we were looking for and discovering many general Government savings that could be immediately cranked into next year's budget plan.

The President has also apparently decided to cut back on the number of Federal publications that are churned out by Federal agencies by the ton, many of which are merely self-promoting booklets used to justify their programs or even their very existence. Many of these publications come under the category of "public relations, public affairs, or public information" proving without a doubt that Government is big, big business. S. 421 calls for reducing Federal spending for public affairs, public information, and public relations by $120,000,000, plus another $30,000,000 in advertising expenses.

As I said to my colleagues on February 5, I have no problem with the private sector using its capital for such activities—after all, businesses are in business to make money, promote their products, and sell their services. But I do not believe that Uncle Sam should be in the business of promoting Federal agencies or their programs at the taxpayer's expense.

It has been estimated that the cost of Government public relations, self-promotion, and other public information activities could be as high as $1.5 billion a year, including $400,000,000 for public relations, public affairs, and personnel that run these so-called "PR" programs for the Government agencies. Certainly not all of this amount is directly spent on publications, but one need only take a look in any Senator's "in" box for any given day to see glossy paper booklets, promoting everything from housing programs overseas to full-colored brochures on the benefits of the space program.

Many of these publications serve a useful purpose in informing the public about ways the Federal Government can be of assistance to the needy, the aged, or the unemployed. But a cutback of the magnitude suggested in my legislation, I believe, would go a long way toward distinguishing those publications that are helpful from those which merely serve to pat Federal agencies on the back.

Mr. President, again, I am pleased to see that the administration is prepared to take an active role in rolling back spending in these two important areas of filmmaking and publications. I believe that the savings in these two activities that I spelled out in S. 421 45 days ago are achievable. I would welcome the support of the President and my colleagues for S. 421 and the savings objectives it is intended to achieve in the coming fiscal year.

AMERICANS WHO DIED FIGHTING COMMUNIST TERRORISM IN RHODESIA

Mr. HELMS. Mr. President, courage and heroism are distinctive American virtues even when, as has often happened in our history, they are expended for the benefit of those who live in other countries. I am reminded of this fact by a letter I recently received from Mr. Kevin F. Dwyer of Wheaton, Ill., whose brother, Stephen Michael Dwyer of 3 Commando, 1 Battalion, Rhodesian Light Infantry, was killed in action against Communist terrorists on July 16, 1979, at the age of 27 years.

Trooper Dwyer gave his life so that Rhodesians, both black and white, would have the opportunity to live unmolested and in freedom. Tragically enough, the opportunity to do so, which was all but a certainty until Western politicians subverted it by refusing to recognize the Muzorewa government, has been lost and now the newly metamorphosed nation of Zimbabwe is Marxist in all but name.

Stephen Dwyer, writes his brother—

Had served 4 years with the U.S. Marine Corps. He was honorably discharged after serving his Corps and his country both faithfully and well. He was intelligent, brave, and a patriot.

Mr. President, three other Americans gave their lives in Rhodesia's long and hard fought battle against Communist terrorism. The names of these Americans are: Sgt. Hugh McCall, New York, N.Y.; Trooper Joseph Byrne of Ridgefield Park, N.J.; and Trooper Joseph Battaglia of Florida. I mention these names today in the Chamber and take cognizance of their supreme sacrifice so that the historical record will be complete.

MESSAGES FROM THE HOUSE

At 9:46 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to section 10(a) of Public Law 96–289, the Speaker appoints as members of the Commission Concerning the Role of Gold in Domestic and International Monetary Systems the following Members on the part of the House: Mr. REUSS, Mr. NEAL, Mr. WYLIE, and Mr. PAUL.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–726. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to eliminate the requirement for waiving interest on certain wheat and feed grain loans; to the Committee on Agriculture, Nutrition, and Forestry.

EC–727. A communication from the Acting Administrator of the General Services Administration, transmitting a draft of pro-

posed legislation authorizing disposal of certain materials from the national defense stockpile, to the Committee on Armed Services.

EC–728. A communication from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation authorizing supplemental appropriations for military construction for fiscal year 1981; to the Committee on Armed Services.

EC–729. A communication from the Deputy Assistant Secretary of Defense for Manpower, Reserve Affairs, and Logistics (Military Personnel Policy), transmitting, pursuant to law, the annual report concerning officer responsibility pay; to the Committee on Armed Services.

EC–730. A communication from the Acting General Counsel of the Department of Defense, transmitting a draft of proposed legislation entitled "Military Construction Authorization Act, 1982"; to the Committee on Armed Services.

EC–731. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to dissolve the National Consumer Bank; to the Committee on Banking, Housing, and Urban Affairs.

EC–732. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on a Bank transaction involving U.S. exports to the Philippines; to the Committee on Banking, Housing, and Urban Affairs.

EC–733. A communication from the Chairman of the Federal Deposit Insurance Corporation, transmitting, pursuant to law, the annual report of the Corporation's Office of Consumer and Compliance Programs; to the Committee on Banking, Housing, and Urban Affairs.

EC–734. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "An Economic Overview of Bank Solvency Regulation"; to the Committee on Banking, Housing, and Urban Affairs.

EC–735. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize an Under Secretary of Commerce for Economic Affairs; to the Committee on Commerce, Science, and Transportation.

EC–736. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation to reauthorize use of the Airport and Airway Trust Fund, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC–737. A communication from the Acting General Counsel of the Department of Energy, transmitting, pursuant to law, notice of a meeting related to the international energy program; to the Committee on Energy and Natural Resources.

EC–738. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report under the Powerplant and Industrial Fuel Use Act; to the Committee on Energy and Natural Resources.

EC–739. A communication from the Acting Administrator of the U.S. Environmental Protection Agency, transmitting a draft of proposed legislation to amend the Solid Waste Disposal Act to eliminate resource conservation and recovery panels; to the Committee on Environment and Public Works.

EC–740. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize funds to carry out purposes of the Disaster Relief Act of 1974; to the Committee on Environment and Public Works.

EC–741. A communication from the Chairman of the Foreign Claims Settlement Commission, transmitting, pursuant to law, a report on the freedom of information activities of the Commission for calendar year 1980; to the Committee on the Judiciary.

EC–742. A communication from the Chairman of the Tennessee Valley Authority transmitting, pursuant to law, the report of the Authority under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–743. A communication from the Chairman of the Federal Deposit Insurance Corporation transmitting, pursuant to law, a report under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC–744. A communication from the Acting Assistant Attorney General, Department of Justice, transmitting a draft of proposed legislation to authorize appropriations for fiscal year 1982 for the Department of Justice; to the Committee on the Judiciary.

EC–745. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Financial Status of Major Federal Acquisitions September 30, 1980"; to the Committee on Governmental Affairs.

EC–746. A communication from the Acting Commissioner of the Immigration and Naturalization Service, transmitting, pursuant to law, a report on certain visa petitions accorded third and sixth preference classification; to the Committee on the Judiciary.

EC–747. A communication from the Secretary of Education transmitting a draft of proposed legislation relating to the Federal impact aid program; to the Committee on Labor and Human Resources.

EC–748. A communication from the Secretary of Education transmitting a draft of proposed legislation to amend the Higher Education Act of 1965; to the Committee on Labor and Human esources.

EC–749. A communication from the Special Assistant, Office of the Secretary of Defense, transmitting, pursuant to law, a report on Department of Defense procurement from small and other businesses; to the Select Committee on Small Business.

EC–750. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a decision made to convert the laundry function at Nellis Air Force Base, Nev., to performance under contract; to the Committee on Armed Services.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–46. A resolution adopted by the City Council of Wheeling, W. Va., requesting modification of the rules and regulations under the National Flood Insurance Act so as to allow construction and improvements to properties within the flood plain; to the Committee on Banking, Housing, and Urban Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

H. Con. Res. 85. A concurrent resolution congratulating the government and people of Spain on their commitment to democracy.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. WE"CKER, from the Select Committee on Small Business:

Michael Cardenas, of California, to be Administrator of the Small Business Administration.

(The above nomination, reported from the Select Committee on Small Business, with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY, from the Committee on Foreign Relations:

O. Rudolph Aggrey, of the District of Columbia, to be a Foreign Service officer of the class of career minister, a consular officer, and a secretary in the diplomatic service of the United States.

(The above nomination reported from the Committee on Foreign Relations with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

AFFIDAVIT

Socialist Republic of Romania, Municipality of Bucharest, Embassy of the United States of America.

Before me appears O. Rudolph Aggrey, who, being sworn, deposes and says as follows:

Following is the political contribution information requested by the Senate Foreign Relations Committee:

Contributions, amount.
Self: O. Rudolph Aggrey, none.
Spouse: Francoise F. Aggrey, none.
Daughter: Roxane R. Aggrey, none.
Parents: Deceased.
Grandparents: Deceased.
Brother: Kwegyir Aggrey, none.
Spouse: Thelma H. Aggrey, none.
Sister: Abna A. Lancaster, none.
Spouse: Spencer W. Lancaster, none.
Sister: Rosebud D. Aggrey, single, none.

By Mr. THURMOND, from the Committee on the Judiciary:

William Francis Baxter, of California, to be an Assistant Attorney General.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MOYNIHAN:

S. 775. A bill to amend the Internal Revenue Code to reduce the tax effect known as the marriage penalty; to the Committee on Finance.

By Mr. HUDDLESTON (for himself, Mr. CHILES, Mr. RANDOLPH, Mr. JOHNSTON, Mr. FORD, Mr. PRYOR, Mr. SASSER, and Mr. COCHRAN):

S. 776. A bill to amend the Immigration and Nationality Act to more fully limit and control immigration to the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. TOWER (for himself and Mr. BENTSEN):

S. 777. A bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes; to the Committee on Environment and Public Works.

By Mr. GOLDWATER (for himself and Mr. JACKSON):

S. 778. A bill to amend Public Law 96–36 to authorize additional funds to plan for the

development of the area south of the original Smithsonian Institution Building adjacent to Independence Avenue at Tenth Street, Southwest, in the city of Washington; to the Committee on Rules and Administration.

By Mr. STAFFORD (for himself and Mr. LEAHY):

S. 779. A bill to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones and markers to commemorate veterans who by choice are buried at sea, who donate their bodies to science, or who are cremated and have their ashes scattered without interment; to the Committee on Veterans Affairs.

By Mr. EXON (for himself and Mr. ZORINSKY):

S. 780. A bill to prohibit the use of Federal housing assistance with respect to certain aliens; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. TSONGAS:

S. 781. A bill for the relief of Hanna E. Aboufarah; to the Committee on the Judiciary.

By Mr. COCHRAN:

S. 782. A bill to amend the Internal Revenue Code of 1954 to exempt from taxation the pay received by members of the National Guard or of Reserve components of the Armed Forces to the extent that such pay does not exceed $5,000; to the Committee on Finance.

S. 783. A bill to amend section 3104 of title 38, United States Code, to permit certain service-connected disabled veterans who are retired members of the Armed Forces to receive compensation concurrently with retired pay, without deduction from either; to the Committee on Veterans' Affairs.

By Mr. PERCY (by request):

S. 784. A bill to authorize appropriations for fiscal years 1982 and 1983 for the Department of State; to the Committee on Foreign Relations.

S. 785. A bill to provide for continuing participation by the United States in the International A bill to provide for continuous participation by the United States in the International Bank for Reconstruction and Development, and for other purposes; to the Committee on Foreign Relations.

S. 786. A bill to provide for continuing U.S. participation in the International Development Association, to provide for U.S. participation in the African Development Bank, and for other purposes; to the Committee on Foreign Relations.

By Mr. KENNEDY:

S. 787. A bill to amend the Internal Revenue Code of 1954 to provide nonrefundable tax credits for investments in qualified industrial energy efficiency and fuel conversion projects, and for other purposes; to the Committee on Finance.

By Mr. MITCHELL:

S. 788. A bill to provide unemployment insurance converge for certain U.S. workers; to the Committee on Finance.

By Mr. D'AMATO:

S. 789. A bill to amend the Federal Water Pollution Control Act to provide that the limitation on the use of grants for publicly owned treatment works for treatment, storage, or conveyance of flows of industrial users shall not take effect until November 15, 1984; to the Committee on Environment and Public Works.

By Mr. RIEGLE:

S. 790. A bill to amend section 44 of the Internal Revenue Code of 1954 to allow a credit against tax for the purchase of certain new principal residences, and for other purposes; to the Committee on Finance.

By Mr. MITCHELL (for himself, Mr. MATHIAS and Mr. HEFLIN):

S. 791. A bill to amend the Internal Revenue Code of 1954 to exclude certain service performed on fishing boats from coverage for purposes of unemployment compensation; to the Committee on Finance.

By Mr. MELCHER (for himself, Mr. BURDICK, Mr. HATFIELD, Mr. INOUYE, Mr. GOLDWATER, Mr. MATSUNAGA, Mr. BAUCUS, Mr. DOMENICI, and Mr. DECONCINI):

S. 792. To promote the development of Native American culture and art; to the Select Committee on Indian Affairs.

By Mr. DOMENICI:

S. 793. A bill to facilitate collection of defaulted loans under the United States Government direct and guaranteed loan programs to individuals, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BAKER (for Mr. DANFORTH (for himself, Mr. WEICKER, Mr. DODD, and HART):

S.J. Res. 55. Joint resolution to grant honorary citizenship posthumously to Douglas Clyde Macintosh.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MOYNIHAN:

S. 775. A bill to amend the Internal Revenue Code to reduce the tax effect known as the marriage penalty; to the Committee on Finance.

REDUCTION OF MARRIAGE TAX PENALTY

● Mr. MOYNIHAN. Mr. President, I am introducing a bill today that offers a new and, I think, very practical approach to the problem of the marriage penalty. The bill is the work of the tax section of the American Bar Association, and it carries their endorsement.

The marriage penalty, of course, is the difference between what a working married couple and two single individuals would pay in taxes on the same total income. Very often under present law, the couple's taxes are higher.

Angela and David Boyter, a Maryland couple who are now divorced but who still live together, testified before the Finance Committee last summer that dissolving their marriage has saved them $15,000 in taxes since 1975. Ms. Boyter said:

> If we both work until age 65 at our current salaries, our lifetime marriage penalty would exceed $130,000. I am afraid that I believe such a price is too high to pay for legal marital bliss.

The Boyters are not the only taxpayers who are aware of the penalty. When I appeared on a call-in interview program in New York last July, fully 20 percent of the individuals who called wanted to ask questions about it.

Three bills have been introduced on the subject in the Senate; they fall into two broad categories. One would let a husband and wife pay taxes as if they were still single. This is an optional separate filing proposal. There are another two measures that would give a couple with both spouses working a tax deduction for some share of the lesser-paid spouse's earnings. The deduction might cover, for example, 10 percent of that spouse's first $30,000 in income.

The plan I am proposing fits into neither category. It combines the best features of both, while addressing certain technical difficulties that may make the other proposals hard to use and administer.

My plan is simply stated: I would give each couple a tax credit for the amount of marriage penalty, if any, on its earned income. The IRS would compute the penalties for each tax bracket and publish a table. A taxpayer need only match up his wages, along the top margin, with those of his spouse, on the left-hand side, to determine his credit.

My staff has prepared a table of the sort I have in mind. Mr. President, I ask unanimous consent that that table be included at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD as follows:

MARRIED EARNERS CREDIT (SAMPLE TABLE)

	Earned income of spouse No. 1 (thousands of dollars)										
	0	5	10	15	20	25	30	35	40	45	50
Earned income of spouse No. 2 (thousands of dollars):											
0	0	0	0	0	0	0	0	0	0	0	0
5	0	186	198	170	0	0	0	0	0	0	0
10	0	198	351	515	591	622	637	627	454	439	389
15	0	170	515	843	1,128	1,394	1,619	1,681	1,736	1,721	1,691
20	0	0	591	1,128	1,626	2,052	2,349	2,639	2,694	2,699	2,699
25	0	0	622	1,394	2,052	2,549	3,074	3,364	3,439	3,474	3,474
30	0	0	637	1,619	2,349	3,074	3,564	3,874	3,979	4,014	4,014
35	0	0	627	1,681	2,639	3,364	3,874	4,174	4,279	4,314	4,314
40	0	0	454	1,736	2,694	3,439	3,979	4,279	4,334	4,369	4,369
45	0	0	439	1,721	2,699	3,474	4,014	4,314	4,369	4,394	4,394
50	0	0	389	1,691	2,699	3,474	4,014	4,314	4,369	4,394	4,394

Mr. MOYNIHAN. Mr. President, my plan has two virtues. It is simple. There is no need to compute one's taxes twice to determine whether filing separate returns would save money. A taxpayer would just look at the table.

The plan is also simple because it would apply only to the penalty on a couple's earned income, that is to say its wages, less the standard deduction (or zero bracket amount) and personal exemptions. Without such a limitation, a husband and wife could apportion their interest and dividends, and itemized deductions between them in a way that would minimize their taxes. The allocation rules that one would need to prevent this would make the provision terribly complicated. There is an excellent discussion of this problem in the Joint Tax Committee's recent report on the marriage penalty, "The Income Tax Treatment of Couples and Single Persons," at page 47.

My plan has a second virtue. It is efficient. A couple's credit would be its actual marriage penalty, not some vague approximation of it. Last year, the Senate Finance Committee voted to let two-wage-earner couples deduct a percentage of the wages of the lesser-paid spouse. In 1981, the deduction would have been 5 percent of the first $30,000 in wages. In 1982 and beyond, it would have been 10 percent.

Like mine, the committee's plan was a simple one. But it would have distributed relief in a haphazard fashion, increasing the marriage bonuses of some taxpayers and only offsetting the marriage penalties of others.

I have a table that shows what effect the plan would have had. Mr. President, I ask unanimous consent that it, too, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FINANCE COMMITTEE PLAN

	Share of lesser-earning spouse										
	0	5	10	15	20	25	30	35	40	45	50
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Total family income:											
$5,000	−260	−240	−190	−138	−98	−68	−28	(0)	0	0	0
$7,000	−348	−315	−252	−189	−126	−66	−10	(65)	98	147	168
$10,000	−495	−370	−275	−180	−85	(0)	(100)	162	182	200	202
$15,000	−340	−515	−328	−148	(32)	132	183	220	236	243	251
$20,000	−1,092	−760	−460	−160	(42)	150	238	300	355	381	391
$25,000	−1,385	−1,055	−630	−268	−30	160	310	447	535	594	611
$30,000	−1,389	−1,334	−749	−334	−26	214	439	644	785	875	903
$40,000	−2,881	−1,821	−939	−338	(177)	667	1,031	1,329	1,564	1,644	1,692
$50,000	−3,344	−2,094	−1,094	−286	(454)	1,133	1,731	2,121	2,439	2,574	2,674
$100,000	−3,464	−1,214	(359)	1,691	2,699	3,474	4,014	4,314	4,369	4,394	4,394

Note: The numbers in the table are the actual marriage penalities and marriage bonuses that one finds under current law. Marriage penalties are positive; marriage bonuses are negative. Couples in the area marked "x" would be unaffected by the Committee's plan. They now have a marriage bonus. Couples in the area marked "o" now have a marriage penalty, but would have that converted into a marriage bonus. Couples to the left of the "o's" would have a larger marriage bonus than at present. Couples to the right of the "o's" would have a smaller marriage penalty.

Mr. MOYNIHAN. Mr. President, under my bill, a couple's credit would be its actual marriage penalty.

The bill I am introducing is virtually identical to S. 3032, the measure I sponsored last year. There has been one change. Last year, I would have had the IRS determine the marriage penalty, if any, on each couple's "taxable earned income." And "taxable earned income" was defined as wages, less two personal exemptions. The new bill amends the definition to read wages, less three personal exemptions.

A third exemption has been added because the IRS must make some assumption about how many children the average couple has. Otherwise, it cannot prepare a table. And it seems fair to assume that the average is one child. Remember that we are talking about couples with both spouses working and with an income split of at least 20/80. The lesser paid spouse earns at least 20 percent of the couple's income.

Finally, let me say that any one who has studied the marriage penalty knows that the penalty cannot be gotten rid of in a way that will satisfy every taxpayer. The plan I offer is a reasonable and workable compromise. It has the support of the American Bar Association.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 775

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting immediately after section 44E the following new section:

"SEC. 44F. MARRIED EARNERS CREDIT.

"(a) GENERAL RULE.—In the case of married individuals each of whom has earned income during the taxable year, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the section 44F amount for such taxable year.

"(b) SECTION 44F AMOUNT.—

"(1) IN GENERAL.—For purposes of this section, the term 'section 44F amount' for any taxable year means the excess of—

"(A) the amount of tax imposed under section 1(a) on an amount of taxable income equal to the sum of the earned income of both married individuals less three personal exemptions,

over

"(B) the sum of the tax imposed under section 1(c) on—

"(i) an amount of taxable income equal to the earned income of the higher-paid married individual less two personal exemptions, and

"(ii) an amount of taxable income equal to the earned income of the lesser-paid married individual less one personal exemption.

"(2) TABLES.—Where appropriate, the Secretary shall prescribe tables which reflect the amount of the section 44F amount for all married individuals.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) EARNED INCOME.—The term 'earned income' means—

"(A) personal service income (within the meaning of section 1348(b)(1) without regard to subparagraph (B) thereof) other than wages,

"(B) wages (within the meaning of section 3401(a) without regard to paragraphs (1), (2), (5), (6), (9), (13), (16,) and (17) thereof), and

"(C) earned income (within the meaning of section 401(c)(2)(A)).

"(2) PERSONAL EXEMPTION.—The term 'personal exemption' means the exemption allowed a taxpayer under sections 151(a) or 151(e).

"(3) MARITAL STATUS.—Marital status shall be determined under section 143.

"(4) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—In the case of married individuals filing separate returns, each individual shall be entitled to a credit equal to one-half of the amount of the credit determined under this section.

"(d) LIMITATIONS.—

"(1) AMOUNT OF TAX.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than credits allowable by sections 31, 39, and 43.

"(2) MAXIMUM TAX.—If section 1348 applies to married individuals for any taxable year, the amount of the credit allowed by this section shall be reduced by an amount equal to the excess of the tax imposed by section 1 on the taxable income of such individuals without regard to section 1348 over the tax computed under section 1348.".

(b)(1) The table of sections for such subpart is amended by inserting after the item relating to section 44E, the following new item:

"Sec. 44F. Married earners credit.".

(2) Subsection (b) of section 6096 of such Code is amended by striking out "and 44E" and inserting in lieu thereof "44E and 44F".

SEC. 2. The amendments made by this Act shall apply to taxable years beginning after December 31, 1980.●

By Mr. HUDDLESTON (for himself, Mr. CHILES, Mr. RANDOLPH, Mr. JOHNSTON, Mr. FORD, Mr. PRYOR, Mr. SASSER, and Mr. COCHRAN):

S. 776. A bill to amend the Immigration and Nationality Act to more fully limit and control immigration to the United States, and for other purposes; to the Committee on the Judiciary.

IMMIGRATION AND NATIONAL SECURITY ACT OF 1981

● Mr. HUDDLESTON. Mr. President, for several years the Members of this body have heard me discuss this country's immigration problems. Others have often joined me in exploring various topics involving immigration, including our loss of control over our immigration, the impact of immigration on our lowest income and least fortunate citizens, and the tremendous hidden costs of immigration, which drive up Federal spending by billions of dollars each year.

On March 1, the congressionally established Select Commission on Immigration and Refugee Policy issues its long-awaited report. Unfortunately, the Commission did not supply the answers to many of the questions the American people have about our immigration policies. Nor did it make specific recommendations on a number of the more difficult issues.

Today, however, I will not dwell on the problems we all know and hear so much about. Today, I come to offer some solutions. Today I am offering specific proposals, not as a complete reform of our immigration system, but as a sorely needed way of insuring that our immigration problems do not continue to grow worse as we move forward on this problem.

The United States faces rapid acceleration of its immigration problems in the future. I hope to stop, or at least slow that momentum. Having conferred with many experts in this field, including the distinguished Senator from Wyoming, the chairman of the newly reinstituted Subcommittee on Immigration and Refugee Policy, I feel that we now have an opportunity to move on this issue. We must seize this chance for action and do something about immigration this year.

I have reviewed the report of the Select Commission on Immigration and Refugee Policy. The report is incomplete. It avoids some areas of intense controversy, and in other areas, does not reflect the feelings of the majority of American people. It is based far too much on what aliens want and not enough on what Americans need.

However, the report does have some useful conclusions. The Commission recognized that the United States cannot become a "land of unlimited immigration." Father Theodore Hesburgh, the Chairman of the Commission, echoed my assessment of the situation in declaring that illegal immigration is "out of control."

And the Commission recommended some useful actions. It said that the Immigration and Naturalization Service should be administratively improved, and that it should be given adequate resources to do its job. It recommended that the immigration laws be enforced, reversing the nonenforcement pattern of the last few years. It recommended that knowing employment of illegal aliens be prohibited, and that some system of more secure worker identification be instituted to assist employers. And it recommended against a massive new guest worker program, recognizing that minor improvements in present programs would be sufficient for virtually all areas.

Overall, however, the Commission's recommendations were not helpful. The Commission recommended increasing the legal quotas for immigration by two-thirds and further increasing the loopholes for entry outside the quotas. If these recommendations had been followed in 1980, our legal immigration would have been almost 1 million. Surveys indicate overwhelming public sentiment against such huge immigration levels. A 1980 Gallup poll found more than 80 percent of those polled wanted legal immigration brought below 400,000.

The Commission also recommended that millions of illegal aliens now in the United States be given amnesty and permanent resident status. There was no assessment of the impact of adding millions of eligible people to the food stamp, social security, and welfare rolls, or of their impact on the unemployment rate. The only saving feature of this recommendation is that the Commission recommended that the amnesty be delayed until increased enforcement measures were instituted.

The Commission was silent on some of the toughest issues we face. What should the United States do if huge numbers of foreign citizens, including hundreds of criminals, again appear on our shores? What kind of identification or authorization system is practical to use to enforce prohibitions against employing illegal aliens? How can Congress regain its historical control over immigration and reverse the recent trend of transferring power to the Executive?

We are still left with many unanswered questions that must be addressed immediately. In a few years the problem will be worse than it is today. We no longer decide which or how many immigrants we shall take; our immigration decisions are made in Havana, Hanoi, Tehran, and in a hundred other foreign cities. Other nations force us to take criminals, terrorists, and people we will have to support for the rest of their lives. No other country in the world would tolerate such insults, yet we seem powerless to do anything about them.

One of the reasons we got into this mess is a dramatic, but unnoticed shift in our immigration policy 16 years ago. The 1965 amendments to the immigration laws are often justly cited as having removed racism from our immigration policy.

But they had a more pernicious effect as well. They shifted our immigration system from one in which we chose who and how many to admit to the United States, to a system in which anyone who arrives here can stay, unless we can find some explicit reason to exclude or deport them. We have made immigration to the United States a new "right" allegedly held by anyone in the world. Skyrocketing immigration since that time has been the logical and predictable result.

Our own citizens know that this policy is wrong, and they are calling for action. For years national opinion polls have been reflecting how united the American people are on this issue. We all know how hard it is to get a consensus on any comprehensive policy. Yet, in both 1977 and 1980 the Roper poll found 91 percent of the American people wanted "an all-out effort to stop illegal immigration." Eighty percent wanted legal immigration reduced below 400,000 a year. Last year Gallup found that 72 percent supported a prohibition against the knowing employment of illegal aliens. We cannot ignore this unified sentiment any longer.

Yet there are those who believe that admitting unlimited numbers of persons to this country is a humanitarian goal. There are those who worry about discrimination or renewed racism in immigration decisions. There are those who say that we are a Nation of immigrants and we must continue to take all of those who want to come here because we did so at the turn of this century. There are those who see immigrants, legal and illegal, as a source of cheap and uncomplaining labor. There are even some who claim that illegal immigrants are the salvation of the social security system, ignoring the fact that there is no bar to illegal aliens receiving social security benefits once they reach the age of eligibility or become disabled.

But none of these excuses justify continued inaction on this issue. We are not going to solve our problems by delay. We cannot take everyone in the world who either wants to come here or who is dissatisfied with conditions in another country. No matter how successful a reindustrialization of America may be, and I hope it will be successful, we just do not have enough resources to support the world's excess population in our 50 States.

Conditions have changed since the turn of the century, when we allowed free immigration. Resources are more scarce, labor is more expensive, and our country has many more people than in 1910. Yet in 1980 we took in more immigrants, both legal and illegal, than in any year in our history. We cannot let the policies of the 1900's guide our immigration decisions any more than we can let the transportation policy of that day guide our space program.

And to those claiming unlimited immigration is a humanitarian necessity for this country, let me point out that it is far better that we make our policy decisions now, in whatever calm reflection we can manage. Otherwise, we face the specter of a massive backlash, as many of our people turn against all immigrants. We have seen growing resentment over the privileges and assistance given to refugees and new immigrants. In Texas, Colorado, and Florida that resentment has turned to violence. If we avoid thoughtful action now, that resentment may grow to the point where cries to cut off all immigration become overwhelming.

But by acting now, we can move ahead to formulate immigration policy ration-

ally and with an eye toward keeping this the most generous country in the world for immigration. And we are the most generous country in the world; we take more immigrants than all other nations combined.

I know of no one legitimately involved in immigration reform who wants to cut off immigration entirely, and my proposals do not suggest that, but we must set some limits on our generosity. It is where we set those limits, how they are enforced, and how they are to be structured that are the important decisions which have to be made.

So let us, Mr. President, look at how we can answer those tough questions. There are certain items on which we find almost a national consensus; we should move on those items immediately. Four major areas for immediate action come to mind.

The first is a return of congressional control to this issue. Our recent history has shown that when Congress abandons its constitutional prerogatives in this area, the Executive has been unable to withstand the immense short-term pressures for more immigration. Thus we must establish the kind of long-range, forward-looking policies which we, through extensive debate and discussion, can establish far more efficiently than a beleaguered Executive.

A second area is the need for more immigration law enforcement. Virtually everyone recognizes that the INS is badly managed and poorly funded. Yet, in this time of economic crisis, we cannot just offer a blank check. What we should do is insure that budget changes which are made for INS give priority to immigration law enforcement over providing more service benefits to aliens. The protection of our citizens is far more important than granting benefits to aliens.

Of course, more resources are not enough to insure better immigration law enforcement. Equally important is the leadership and commitment of the Department of Justice and the INS to immigration enforcement. We cannot guarantee those qualities by an action of this branch of government, but we should make our wishes known to the new administration. I noticed with some interest that Attorney General Smith, appearing recently before the House Judiciary Committee, heard from virtually every member of the panel on the need to move forcefully and quickly to help INS and enforce the immigration laws.

The third major area of consensus on immigration reform is for the establishment of an absolute ceiling on immigration. That ceiling must be consistent with our own national interest, with consideration of, but not controlled by, worldwide pressures to immigrate here. Our own needs should determine our immigration policies and admission numbers. There should be no loopholes in the ceiling, but there should be sufficient flexibility to respond to emergency situations.

Only with this kind of strong, firm congressional action can the President stand up to other nations and require them to share the burdens of controlling refugee and immigrant flows. Last year the Senate voted to establish a limit for fiscal year 1980. Now is the time to establish a ceiling for future years.

The fourth area of immigration reform is to institute a prohibition against the knowing employment of illegal aliens. Unemployment is predicted to remain over 7 percent this year. Surveys find the average salary of apprehended illegal aliens last year was far above the minimum wage in many instances; in Los Angeles for example, the average wage of illegal aliens was $5.25 an hour.

Estimates of the number of illegal aliens in this country go above 10 million. And those Americans displaced by immigrants are those who cost the Treasury the most. The Congressional Budget Office estimated in 1979 that each unemployed person costs the Treasury $7,000 a year.

The primary attraction for illegal immigration is economic: jobs. The most effective way to control illegal immigration is to restrict access to American jobs. Many experts believe that a prohibition against the employment of illegal aliens, with sufficient powers of enforcement is the best available means to substantially reduce illegal immigration.

I believe my proposals reflect these four areas of national consensus. I am introducing two bills, one primarily technical, making minor remedial reforms in the immigration laws in an effort to ease the burden of enforcement, and the other, the Immigration and National Security Act of 1981, which contains most of the substantive propositions I have discussed.

I would like to thank my able cosponsors, and also the many immigration reform experts who helped form these concepts into practical proposals. The distinguished Senator from Florida, Senator CHILES, played a particularly important role in developing the strengthened asylum provisions.

There are three major elements in the Immigration and National Security Act of 1981, Mr. President. It provides first for more enforcement of the immigration laws; second, for a flexible ceiling on all immigration; and third, for a gradual introduction of an enforceable prohibition against the knowing employment of illegal aliens in American jobs. These proposals do not constitute a new immigration structure for the United States; they merely allow us to more rationally and purposefully plan for overall immigration reform.

The immigration laws passed by Congress must be enforced, and American jobs must be protected. We can no longer tolerate statements like that given by a White House official during the Cuban boatlift who said, "we found it counterproductive to enforce the laws." We can no longer tolerate the Attorney General, as Mr. Civiletti did last year, banning enforcement of the immigration laws, and then restricting supplies to the INS so severely that the Border Patrol ran out of gas.

The second large area covered by the INS Act is a ceiling on immigration. The ceiling set forth is flexible enough to allow rapid responses to emergencies, yet firm, without loopholes that allow hundreds of thousands of persons unrestricted entry. Still, under this legislation, the United States will continue to be the most generous country in the world for immigration, but we recognize the need for some kind of absolute ceiling.

We are setting the number higher than in most of our history. Our ceiling is higher than the average admissions for the last 70 years, and is far higher than the average yearly admissions for the period 1920–70. The level is even higher than the present statutory level. And it is the same as the 350,000 initial figure offered by the Select Commission, but without the loopholes.

I do not agree with the 65 percent of those polled by the Gallup poll last year who want all immigration stopped until unemployment falls below 5 percent. I think we can continue with a large number. I think that number should be 350,000 admissions a year.

Some say that this figure is too low, that in 1980 we admitted more than 800,000. I would respond that one-third of a million people is a big number. Although official figures are not available, it is probably greater than the admission for permanent residence of all other countries combined, and greater than we admitted in 50 of the last 70 years.

If we continue our present course, annual immigration in excess of 800,000 would add at least 35 million people to our population in the next 20 years.

It is not that 350,000 a year is too small, but that 800,000 is far too large. A lower ceiling will reduce Government spending. A lower ceiling will lessen burdens on our resources, our environment, our economy and on our lowest income citizens. Those 35 million new citizens would need land, water, energy, and food. Where are we going to find those resources, Mr. President, unless we ask our own citizens to sacrifice more?

And what will all those people do for work? We have almost 8 million people unemployed. The President is appealing to private industry to make jobs available for those newly unemployed by the cutback in public service jobs and unemployment benefits. The creation of 2 million jobs a year was a historical record, yet we are planning to bring in enough people to take a substantial portion of those jobs right away, while illegal immigrants take even more. Think of the costs to the Treasury: $7,000 for each unemployed American. Again, Mr. President, the American people are right: immigration is far too high for our economic situation.

We must set a ceiling on immigration that reflects an understanding of our own problems and our own needs here at home. In its editorial response to the Select Commission report, the New York Times said:

> Who should decide which foreigners are allowed into the United States, the foreigners or the United States? In a responsible society, the question would answer itself. But that's not the way things now work in the United States.

How should things work in the United States, or, in other words, how do we establish a proper ceiling? Is it to be set on the basis of demand, the number of those the Times called foreigners de-

manding to come to the United States? Or is it to be set by us, the people of the United States, after consideration of how we would like this country to grow, how we would like to address our economic and resource problems, our cultural and socioeconomic problems? I think the latter course is better. We should decide on the basis of our own national interest.

Michael Teitelbaum recently titled an article on immigration "Right Against Right." I think he was correct. We must make a choice between two difficult alternatives. We cannot satisfy both; neither our Treasury nor our country contains enough to provide for everyone in the world. Who, then, shall we listen to in deciding our immigration policy?

The third major provision of the bill would implement a prohibition against the knowing employment of illegal aliens. Everyone seriously concerned with immigration realizes the necessity for such a prohibition. The Select Commission proposed such a prohibition, and public opinion polls consistently show high support among the general public.

The reasons such a prohibition is needed include all of the problems caused by illegal immigration. As new data has emerged over the last few years, we have debunked many of the old myths about illegal immigration.

Today's average illegal alien is relatively well educated by the standards of his own country. He is financially well off there, at least wealthy enough in many instances to afford to pay $1,000 or more to a smuggler to come here. He has had a substantial amount of work experience already, and probably was holding a well-paying job when he decided to come to this country. He is from an urban area, and is going to an American city to work in a manufacturing, construction, or service job. His job pays well above the minimum wage. And he is not coming for political, religious, or cultural reasons; he is coming for that job.

Most experts on immigration agree that to stop illegal immigration, we must restrict the access of illegal aliens to American jobs. But the major question is how to restrict that access with the least intrusion and the least cost for Americans, yet make it effective. My answer is called fair hiring procedures. The most cost-effective means of establishing fair hiring procedures is through a gradual approach.

Fair hiring procedures concentrate immigration enforcement on just one aspect of the entire work environment, the point of hire. By focusing on that point, we can introduce enforcement measures without dislocation of industries or work forces, and limit the impact on Americans. We will not change the present INS enforcement techniques of examining all suspected immigration law violators wherever found, but fair hiring procedures require action only when a person applied and is hired for a job.

The basic element in the procedure is to make it unlawful to knowingly hire an illegal immigrant. As a practical matter, INS officials know fairly well which employers hire illegal aliens. If this were a more perfect world we could leave out further provisions in this bill. We could count on voluntary compliance and spot checking by INS to insure that the law was being carried out.

Unfortunately, we all know that laws not enforced are laws often ignored. And we also know that the Government, on rare occasions, has made mistakes. So we must go further in our legislation. On the one hand we must insure that the Attorney General has the ability to successfully prosecute willful or flagrant violators of the law. We must establish some method of providing proof of intent.

But on the other hand, we must give employers absolute security against being prosecuted for inadvertent or unknowing violations. On both counts, some courts will be satisfied with the simple knowledge requirement, but other courts may require stronger evidence. Thus, the soft path proposals I am offering today provides practical means for effective enforcement, and also protect innocent employers with a minimum of effort.

Two other considerations were included in designing these fair hiring procedures. Whatever system evolves to enforce these provisions, it must not put any substantial burden on employers. My proposals today require nothing more from a complying employer than a simple telephone call.

We must also be careful to avoid the possibility of fostering discrimination in the workplace. For some time, whenever immigration policy was deliberated, certain groups would automatically charge that whatever result was contemplated would harm minority Americans. Of course, the real harm done to minority Americans was from unfair competition from illegal aliens. But these charges have delayed contemplation of any reforms of immigration law.

Mr. President, I believe it is time we stopped being sidetracked by misleading arguments. There is an incredibly simple means of avoiding discrimination against American minority groups, and that is to have everyone do the exact same thing when applying for a job. Thus there is no benefit involved in discrimination. We will not solve the discrimination problem with this bill, but we will not exacerbate it either.

But now to the elements of the fair hiring procedures. The basic element is the prohibition against employing an illegal alien. The first step is to require every applicant for employment to sign an affidavit, under penalty of perjury, that he or she is eligible to accept employment in the United States. All citizens and legal resident aliens may accept employment here; a few other aliens have been authorized by the immigration laws or the Attorney General to accept employment. Other aliens are not eligible for American jobs.

While simply signing an affidavit does not sound like a very effective deterrent, studies have shown that illegal aliens are reluctant to lie about their legal status, especially when faced with a possible perjury charge. Los Angeles County alone saves $46 million a year in welfare costs by simply requiring an affirmation of citizenship or legal status from welfare applicants.

The affirmation can be made a part of the existing W–4 witholding form all employees must fill out, or part of a standard application for employment, removing any additional paperwork burden. In this first phase of fair hiring, if an employer has a signed affidavit on file for an employee, he or she enjoys a presumption of compliance with the law.

In the second phase of the program, beginning soon after the bill becomes law, each applicant for employment must give a social security number to the employer. The employer must telephone the appropriate agency, perhaps the Employment Security Administration of the Department of Labor or the Social Security Administration itself, and report the number and the name of the person offering the number. The agency will inform the employer whether the number is valid and assigned to that name. If the number is valid, the employer will receive an authorizing or transaction code, signifying both that the employer called the number in and that the number was valid. If an employer has that transaction code for an employee, he or she will enjoy a complete defense against prosecution for violating the prohibition. This procedure is basically the same as that used by merchants in regard to most credit card purchases.

Of course, an essential part of this process is the improvement of the social security records, basically a process involving internal computer cross-checking to establish a number's validity. This is the beginning of "secondary verification," upon which the integrity of the system rests.

Secondary verification is the examination of the records and other information about a social security number which shows whether that number is valid or invalid. It is necessary to avoid fraud or misrepresentation, and should have the additional benefit of improving overall social security recordkeeping.

In the third and last phase of fair hiring, beginning perhaps 4 years after the enactment of this legislation and culminating 5 years later, new, secure social security cards will be issued. In order to obtain one of these new cards, however, a person must provide sufficient proof that he or she is eligible to accept employment in the United States.

This is the more secure form of secondary verification. Not everyone would need this new, secure card, only those people who want to change jobs. The new card would have a unique identifying element, such as a serial number, to insure that it cannot be forged.

When these cards are issued, the employers continue telephoning the social security numbers to the agency, but now simply offer the identifying element as well. There would be no additional burden on the employer, but the applicant for employment would need to show the card to the employer before the number is called in. This system should be secure enough to protect employers from inadvertent mistakes and Americans from competition from illegal alien workers.

In order to reduce costs involved in implementing fair hiring procedures, it could be introduced over a period of

years and with targeted enforcement concentrating in those areas with large illegal alien populations. And, I am introducing measures in the Immigration and National Security Act which will actually produce substantial amounts of revenues for the Treasury, far in excess of any costs from these proposals. But authorizing the imposition of certain fees and charges for immigration services and benefits, none of which would exceed $10, the INS can generate as much as $380 million a year in direct revenue. And let us not forget that displaced Americans cost the Treasury billions of dollars each year; if only 150,000 illegal aliens are replaced by unemployed Americans as a result of the Immigration and National Security Act, the Treasury will save $1 billion a year.

These three areas make up the Immigration and National Security Act of 1981, Mr. President. I believe that this year we can move forward on immigration proposals, after many long years of neglect. The American people want something to be done now. Our problems will only get worse if we do nothing. Thus, I urge my colleagues to support this bill, while we still have a chance to regain control of our immigration.

I ask unanimous consent that a section-by-section analysis of this bill be inserted in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

FACT SHEET AND SECTION-BY-SECTION ANALYSIS

THE IMMIGRATION AND NATIONAL SECURITY ACT OF 1981

Section 1: This section entitles the legislation as the Immigration and National Security Act of 1981.

Section 2: Provides a preamble to the Immigration and Nationality Act for the guidance of courts and others in interpreting the Act's provisions. The preamble recognizes the need for a generous immigration policy, but emphasizes also the need for controlled and limited immigration.

Section 3: Strengthening of Border Patrol—Requires expansion of the Border Patrol to at least 6,000 officers, and provides for the procurement and use of the most modern equipment and support available. It also provides the authorization for a new, more secure alien identification card. The effect of this section would be to increase the resources available to enforce the immigration laws.

Section 4: Numerical Limitations—Establishes a flexible ceiling on legal immigration admissions. The ceiling is set at 350,000, including all immigrants. In an emergency, and only after consulting with Congress, the President may "borrow" admissions from the next year in case of emergency, and/or may disregard internal statutory limits below the overall ceiling.

The President must report to Congress each year the projected number of admissions, and the Secretary of Labor must report an opinion to Congress on whether that level of admissions will affect the U.S. workforce. The effect of this section will be to limit legal immigration to the target set by Congress in 1975, and exceeds average immigration for the past 70 years. This level also exceeds the total immigration for permanent residence of all other countries in the world combined.

Section 5: Asylum—This section provides first that an applicant for asylum show that the qualifying persecution or fear of persecution is due to conditions prior to departure from his or her homeland, and not due to the actual fact of departure alone. This section also defines the "entry" into the U.S. of an applicant for asylum, as a means of returning the level of procedural rights afforded an asylum seeker to the same level as is used in other civil immigration proceedings. And third, this section requires the drafting of contingency plans to handle future large groups of asylum seekers, including the establishment of reception centers outside the U.S.

The effect of this language will be to make asylum more difficult for some aliens to achieve, but will reduce the adjudication burden on the government and the support costs for local and state governments from asylum procedures, such as those now being experienced in Florida.

Section 6: Parole Limitation—The Attorney General's parole authority was originally intended to be used in individual emergency situations when it was necessary to bring an alien into the United States temporarily. However, this authority has been distorted by prior attorneys general who have admitted large groups of aliens. This provision would restore the original intent of the authority.

Section 7: Record of Admission—Under specified circumstances, those illegal aliens who qualify would be permitted to obtain permanent resident status. This would be accomplished by amending an existing section which granted the same staus to illegal aliens who had entered the country prior to June 30, 1948.

The requirements would include continuous residence since January 1, 1978, registration within six months of the implementation of a secure Social Security card system, financial sponsorship similar to that required of applicants for legal immigration, a showing of undue hardship if forced to leave the U.S. and admissibility in accordance with Section 212(a).

Section 8: Fair Hiring Procedures—This section would prohibit the knowing employment of illegal aliens. It would provide graduated civil and criminal penalties for violations. Authority would be given to the Attorney General, Secretary of Labor and Secretary of HHS to implement a gradually phased-in program.

In the first phase, an applicant for employment would be required to sign an affirmation that he or she is eligible to work in the United States. The affidavit could be made part of the already existing W-4 withholding form each employee must already fill out. This easily and rapidly initiated procedure, along with increased enforcement procedures envisioned by Sec. 3, would provide immediate relief from the flood of illegal alien labor while the more extensive national fair hiring procedures in Phases Two and Three are implemented.

Phase Two would be an institution of a verification system to improve the security of the social security numbers now required to be used by all applicants for employment. Such a system would include the initial crosschecking of the existing social security data for obvious errors, such as that of several employees having identical numbers.

Further, there would be a check of social security numbers submitted by new employees for fradulent or erroneous numbers. This latter verification could be accomplished through a system whereby an employer could simply call in a prospective employee's social security number and receive almost instant verification. Initially, this would possibly have to be done on a random basis. If the number were found to be invalid, the prospective employee would be required to correct the problem before his employment would be confirmed.

If the Employment Security Administration of the Department of Labor, with 2600 offices nationwide, were incorporated into the system, the verification and correction process probably would be expedited. When a social security number was valid, the employer would receive a transaction or authorization code, showing that the number was valid and that the employer reported as required.

Section 8: Phase three would involve the issuance of a new and more secure social security card which would be based on positive proof that the individual is a citizen or legal resident. The new card would have some type of unique identifying element, such as a serial number or photograph. The data from these cards would again be submitted for verification when an individual applied for a new job. However, there should be adequate facilities by this time to verify immediately every new applicant for employment.

Section 9: Fees and charges—This section would clearly establish the authority of the Attorney General to prescribe a uniform schedule of fees and charges for immigration related procedures, which would help defray the cost of the new enforcement procedures.●

● Mr. CHILES. Mr. President, I am pleased to join today with my distinguish colleague, Mr. HUDDLESTON, in introducing the Immigration and National Security Act of 1981.

Our immigration policy is clearly out of control. The people of Florida will tell you that our immigration policy is out of control and that the social and financial costs have been tremendous. Immigration is out of control when a foreign government can dictate our immigration policy; when we allow that foreign government to determine who will come to our country. Immigration is out of control when the Federal Government lacks the resources and the willingness to enforce our immigration laws already on the books, and it is out of control when the Federal Government, including the Congress, is not prepared to make the hard decisions that must be made to reform our immigration laws. I think the residents of Florida and U.S. citizens across our land are asking themselves, "What about my rights?", "Who is going to help me find a job, who will help me find adequate housing, and who will pay for my medical needs?"

The Select Commission on Immigration and Refugee Policy has submitted its final report after 19 months of research and study, and after hearing over 700 witnesses who testified at 12 regional public hearings. The Commission's report will be a good basis for debate and comment, and I am pleased that Senator SIMPSON has indicated that the Senate Subcommittee on Immigration and Refugee Policy will begin hearings on the report in the near future.

The report is a good starting point, but I believe that it does not go far enough in tackling some of the severe problems we face with our immigration laws. To begin with, the Select Commission recommended that we increase our immigration quotas from its present level of 270,000 to 350,000, plus an allowance for an additional 100,000 aliens per year for 5 years to clear up the backlog of visa applications worldwide. It further recom-

mends we continue to accept 50,000 refugees per year, plus unlimited additional numbers, in consultation with Congress, for special humanitarian purposes. When you add all that up, it does not appear to be much of a change from our present policy at all.

In 1978 and in 1979, total legal immigration to the United States stood at over 600,000 and in 1980 over 800,000 legal immigrants and refugees were admitted to our country. Legal immigration is now at its highest level in 50 years and at its highest level in our Nation's history when you count illegal immigration. The United States is by far the world's largest recipient of refugees and immigrants.

I believe the time has come to place a cap on annual immigration. The Immigration and National Security Act places a reasonable ceiling on legal immigration. The bill will limit legal immigration to the United States to the target figure set by Congress in 1975—350,000 per year. In an emergency, and only after consulting with Congress, the President may "borrow" admissions from the following year, or he may disregard internal statutory limits below the overall ceiling. The President must report to Congress each year on the projected number of admissions, and the Secretary of Labor must report an opinion to Congress on whether the level of admissions will affect the U.S. work force.

To regain control of our immigration policy, we must also remove the magnet which attracts the millions of undocumented aliens in our country: The ability to find a job. Under our present Federal law, it is not a crime to employ an illegal immigrant. The Immigration and National Security Act would make it unlawful for any employer to hire an alien in the United States who has not been lawfully admitted for permanent residence.

Employers who knowingly violate the law would be subject to civil penalties of up to $1,000 per alien. Continued violators would be subject to a fine of up to $20,000 or by imprisonment of up to 3 years, or both. To make this system fair to the employer and to the applicant applying for a job, the Attorney General, the Secretary of Labor, and the Secretary of Health and Human Services are authorized to implement a gradually phase-in worker verification system, linking enforcement measures with implementation of this system.

In phase 1 of the worker verification system, 6 months after the bill is signed into law, each employer in the United States will require that each applicant for employment submit a written statement certifying that the applicant is a citizen of the United States or is an alien legally in our country. This could be made part of the existing W–4 withholding form each employee must already fill out. The written statement would be retained by the employer for each applicant he employs and would be presented, upon request, to the Attorney General.

Beginning not less than 6 months or no later than 2 years after this bill becomes law, the Attorney General, acting in cooperation with the Secretaries of Labor and Health and Human Services, would establish a system to verify the validity of the social security account numbers of applicants for employment. Notice of this system would be published in the Federal Register. Beginning 90 days after this notice, each employer will submit, in accordance with the procedures, the social security account number of each person thereafter applying for employment and will record whether the Attorney General has verified the validity of the number.

The third and final stage which will take place no more than 5 years after enactment of the act, all citizens and legal aliens will be issued a new employment social security card with a unique identifying element such as a serial number or photograph. Again, a notice of the availability of these revised social security cards and the procedures which employers would use in examining these cards would be published in the Federal Register. The data from these cards would be submitted for verification when an individual applies for a new job. By the time this third stage goes into effect, there should be adequate facilities to verify immediately every new applicant for employment.

I have reviewed the various options that are available to discourage the employment of undocumented workers, including a separate work permit card and a call-in data bank. In examining the impact of these and other systems from the perspective of cost to the taxpayer, the impact on employers, the impact on workers, and the degree of effectiveness, I believe that the fair hiring provisions of this bill are the best approach.

One of the most serious immigration problems of particular importance to Florida is the continued arrival of large numbers of undocumented aliens seeking political asylum in the United States. Our refugee laws never envisioned the United States being the country of first asylum. The last 11 months have been particularly trying to the people of my State and especially to Dade County.

Of the 125,000 Cubans who began arriving in Key West April 21, 1980, over 86,000 or 72 percent have settled in Florida. Ninety percent of the 11,000 Haitians who arrived between April 21 and December 31 have settled in Florida. Florida continues to be the recipient of large numbers of undocumented aliens. While the figures vary from week to week, Florida has received over 5,000 Haitians since the October 10, 1980, cutoff date for Cuban-Haitian entrant status, and 500 Haitians arrived during an 8-day period in March alone.

Undocumented aliens currently arriving are now subject to exclusion hearings that have been occurring at the rate of approximately 10 per day. The very fact that exclusion hearings are moving forward is a victory of sorts for those who have followed with concern the continued legal battles which have literally tied the hands of the Federal Government from enforcing its own laws.

The Immigration and National Security Act has several key provisions that will tighten up the asylum process, making it more difficult for some aliens to receive asylum, while protecting the rights of those who truly are political refugees. The changes will also reduce the adjudication burden on the Government. The effect of these provisions will be to return the level of procedural rights for asylum seekers to the same level that is used in other civil immigration proceedings. The alien seeking "entry" will be entitled to the same rights as any other alien seeking entry to our country, no more and no less. The intent will be to create a procedure where large numbers can be processed in a way that will not allow the process to drag on for years.

The bill also requires the drafting of a contingency plan to handle large groups of asylum seekers including the establishment of reception centers outside the United States. We have a situation right now in Florida where there just is not any more room to handle large numbers of undocumented aliens. Incredible as it may seem given the events of the last 11 months, the Federal Government still does not have a contingency plan to place and process large numbers of newly arriving aliens.

We have right now in Florida a processing center that is way over capacity. At this center, Krome North, there are approximately 590 aliens, twice the population it should be given the current staffing ability of the Immigration and Naturalization Service. Because our drug enforcement efforts have been so successful, the Immigration and Naturalization Service has even had to give up half of its space at the Federal correctional institution. Just where does the Federal Government expect the district director in Miami to place the next boatload or the next planeload of aliens? We absolutely have to have a contingency plan in place.

According to a June 1980 Roper poll taken last year, 91 percent of the American people believe that an all-out effort should be made to stop illegal immigration. I do not think the people of Florida are surprised by that. In my travels throughout the State the message has come to me loud and clear. Our country must regain control of our immigration policy. The bill being introduced today will go a long way in regaining that control.●

Mr. JOHNSTON. Mr. President, I am pleased to announce that I am a cosponsor of the Immigration and National Security Act of 1981 which is being introduced today by my colleague Senator HUDDLESTON. This bill improves our current immigration policy by placing a reasonable ceiling on the number of immigrants allowed to legally enter this country each year. More importantly, it establishes a system of graduated civil and criminal penalties on employers who knowingly hire illegal aliens.

The Immigration and National Security Act of 1981 establishes a unique registration system, tied in with our social security system. Every person in this country will be issued an identification card with some unique item on it such as a photograph or a serial number. A job applicant must present this card as he must now provide his social security number when applying for a job. The information contained on this card would

then be verified by the Social Security Administration for authenticity.

This approach to control illegal employment may seem novel in this country; however, identification cards of this nature have been required in European countries for a long time. France, West Germany, Belgium, Italy, and Luxembourg all use such cards to control employment of illegal aliens. By establishing an identification card for all citizens and legal aliens, civil rights advocates could not argue that this effort to regulate the flow of illegal aliens will unduly burden ethnic Americans.

It is widely believed that the major attraction of foreigners entering the United States illegally is the availability of employment. A system which makes the employment of such illegal aliens highly difficult or impossible diminishes this attraction and concurrently increases opportunities either for Americans or for those who comply with the legal prerequisites for work visas and temporary resident status.

It is estimated that there are between 3.5 and 12 million illegal aliens currently in the United States. During fiscal year 1979 the Immigration and Nationalization Service located over 1,000,000 aliens who were deportable under the Immigration and Nationality Act. Of these people 93 percent had entered the country illegally and 7 percent had violated the terms of their legal entry. Furthermore, approximately 93 percent were Mexican nationalist and at least 30 percent were repeat offenders.

Part of the responsibility for this large influx of illegal immigrants must be borne by our current outdated social security registration program. The system should be updated to control the influx of illegal aliens into our Nation's work force. This legislation improves the administration of social security by implementing procedures to prevent duplicative and false registration numbers. These improvements coupled with other provisions of this bill calling for a strengthening of our national border patrol and a tightening of the asylum procedures for immigrants wishing to permanently enter this country should effectively cut down the number of illegal aliens within our country.

Finally, this legislation establishes procedures to effectively regulate the large numbers of illegal aliens who now reside in our country by establishing procedures enabling them to obtain permanent resident status.

Because of their underground work status, many illegal aliens are willing to accept less than minimum salary and work in substandard conditions in return for protection by their employers from deportation. By providing a degree of legitimacy to these aliens we will reduce the unfair advantages such employers hold over those who do not hire illegal aliens.

Mr. President, I commend Senator HUDDLESTON for taking the lead in restricting our immigration procedures and am pleased to join him as an original cosponsor. I urge my other colleagues to pass favorably upon these proposed improvements in our immigration and social security registration systems. Laws which are not effectively enforced denigrate and undermine the fundamental principle that ours is indeed a nation of laws and not men.

● Mr. SASSER. Mr. President, during the markup of the fiscal 1981 reconciliation resolution in the Budget Committee last week, I voted—as did all my colleagues on the committee—for cutbacks of billions of dollars in Federal spending. These dollars would have gone to thousands upon thousands of American citizens who need assistance with food, housing, medical care, and other necessities of life. I am willing to make these drastic cuts because I feel that these people, and everyone else in this country, will be better off in the long run if we can restrain spending and reduce inflation. But it hurt.

We have a lot of hard choices facing us in the days ahead, choices that force us to try to draw that fine line between what we absolutely must do, and what we would like to do if we could afford it. And that is the same choice that faces us in the matter of immigration, in the numbers of people from around the world we admit to this country every year. There is not one among us who does not take pride in our historic role as a nation of immigrants, as a beacon of hope and a promise of freedom to less fortunate citizens of other lands. There is not one among us who wants to deny the opportunity for a full, productive life to another human being. But the choice must be made, and the time is now. We simply cannot continue to bring almost a million additional people per year—800,000 in 1980 alone—into the United States. At the moment, we do not have the economic resources to assist all the immigrants that wish to locate in our country.

I am therefore announcing today my cosponsorship of the Immigration and National Security Act of 1981, introduced by Senator HUDDLESTON. This legislation puts an overall limit of 350,000 on the annual number of immigrants, with stringent requirements on any proposal to increase that number; it makes significant improvements in border patrol operations; it prohibits the knowing employment of illegal immigrants; and it provides for amnesty of certain aliens with sufficient community ties and residence.

The problem in our existing system is not with the current limitation; the problem is in the categories of unlimited admission, the two largest of which are immediate families and refugees. This legislation will continue the rightful priority enjoyed by family members, but by giving them priority within the limitation—not putting them in an unlimited category. This legislation will allow a flexible response to a true refugee crisis and to victims of oppression and persecution, by allowing the President to increase the number of specifically described consultations with Congress—but only with full documentation of the projected effects on the American populace.

I do not like living with the idea that the bounty of this Nation is finite, that there are limits on our ability to bring in those people who so desperately want to earn a living wage and live a decent life but cannot do so in their own countries. This bill is a recognition of those limits and it is a commonsense approach to getting this problem under control.

I can envision a time when our employment rate, our productivity, our demographic composition, and our entire infrastructure are at a stage where we can expand these numbers. But as we pointed out with such clarity in the Senate Budget Committee last week, and as most of the country knows, we are not there yet.

This legislation is an important step—among many we must take in the days ahead—toward the goal of putting our economic affairs in order.●

By Mr. TOWER (for himself and Mr. BENTSEN):

S. 777. A bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes; to the Committee on Environment and Public Works.

LEGISLATION RELATING TO DISCHARGE OF DREDGED OR FILL MATERIAL

Mr. TOWER. Mr. President, I am today introducing with Senator BENTSEN legislation that will curtail the seemingly never-ending growth of the bureaucracy and will clarify the Corps of Engineers' authority over State water resources. Federal agencies have far overstepped their bounds in their interpretation of what constitutes a "navigable stream" under Public Law 92-500.

The bill would restrict expansion of Federal authority over nonnavigable waters under section 404 of the Federal Water Pollution Control Act, which authorizes the corps to issue permits for activities in navigable waters involving the discharge of dredged or fill material.

Mr. President, the intent of the bill I introduce today is not new to Congress. I attempted in 1975 and 1977 to obtain congressional mandate to instill commonsense in the Corps of Engineers' permit procedures by limiting its jurisdiction over waters which are neither navigable nor critical to navigation. Both attempts failed by only a narrow margin.

But, Mr. President, the country continues to be faced with a growing regulatory scheme covering not just the wetlands of the Nation, but virtually all surface waters. Prolonged delays and piles of redtape continue to prevail, precipitating a further erosion of public confidence in and support of the legitimate objectives of the clean water effort.

In particular, section 404 of the 1792 act has been cited by the corps for the actions it has taken both in denying owners the right to discharge material on their own property-wetlands and in denying public citizens navigation districts and municipalities what the corps broadly interprets as the right to undertake flood control projects that would affect the "waters of the United States."

Now in the 97th Congress I seek once again the definition of "navigable waters" to mean what it meant in the River and Harbors Act of 1889. Quite

simply, the words "navigable waters" are stipulated to mean "waters navigable in interstate or foreign commerce, shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean high water mark."

By definition, then, the Army Corps of Engineers would lose jurisdiction over wetlands, since wetlands are not navigable. This change alone should eliminate most of the problems that have been caused by present corps policy and regulations. However, I, too, share concern that nonnavigable waters—often referred to as "wetlands"—have some degree of protection. A major provision of my bill allows the Governor of any State, with the concurrence of that State's legislature, to provide the Secretary of the Army with a written request to extend application of this act to those waters, other than navigable waters.

Mr. President, I strongly endorse the right of a State to make this determination to seek Federal assistance if it so chooses. Wetlands adjacent to navigable waters can then be evaluated and protected on a local basis.

Again, I am pleased that Senator BENTSEN is joining with me in sponsoring this bill. I invite my colleagues to join us, and trust that the Senate Environment and Public Works Committee will give serious consideration to this bill as we reexamine clean water legislation this Congress.

Mr. President, I ask unanimous consent that the text of the bill and a resolution adopted by the Texas Legislature relating to the subject be included in the RECORD at this point.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 777

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SECTION 1. The Congress finds that the procedures mandated by, and regulations issued pursuant to, the Federal Water Pollution Control Act and the Act of March 3, 1899, have delayed the construction of needed energy water resource and other development projects without commensurate benefit to the Nation.

PERMITS FOR DREDGED OR FILL MATERIAL

SEC. 2. (a) Subsection (a) of section 404 of the Federal Water Pollution Control Act is amended to read as follows:

"(a) (1) The Secretary shall issue a permit to an applicant, after notice and opportunity for a public hearing, for the discharge of dredged or fill material into the navigable waters at a disposal site or sites specified by the applicant, unless the Secretary determines that such disposal site or sites cannot be specified through the application of the guidelines or other considerations in accordance with subsection (b). Not later than the fifteenth day after the date an applicant submits all the information required to complete an application for a permit under this subsection, the Secretary shall publish the notice required by this subsection.

"(2) For purposes of this section, the term 'navigable waters' means all waters which are used, or are susceptible to use in their natural condition or by reasonable improvement, as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean high water mark.

"(3) Notwithstanding any other provision of law, except as provided in subsection (g), the discharge of dredged or fill material in waters other than navigable waters is not prohibited by or otherwise subject to regulation under this Act, or section 9, 10, or 13 of the Act of March 3, 1899 (33 U.S.C. 401, 403, or 407), or any other Act of Congress.".

(b) Subsection (b) of section 404 of such Act is amended by striking out "by the Secretary".

STATE REQUEST FOR FEDERAL JURISDICTION OVER NONNAVIGABLE WATERS

SEC. 3. Subsection (g) of section 404 of the Federal Water Pollution Control Act is amended to read as follows:

"(g) At the written request of the Governor of any State, concurred in by the legislature of such State in accordance with State law, the Secretary shall extend application of the provisions of this Act to those waters, other than navigable waters, within such State which are listed and defined by the Governor of such State in his request.".

REPEAL OF OPTIONAL STATE PERMIT PROGRAM

SEC. 4. Section 404 of the Federal Water Pollution Control Act is amended by striking out subsections (h), (i), (j), (k), and (l) thereof, and by redesignating subsections (m) through (t) (and all references thereto) as subsections (h) through (o), respectively.

NINETY-DAY REQUIREMENT FOR PERMIT DECISION

SEC. 5. The second sentence of section 404 (l) of the Federal Water Pollution Control Act (as redesignated by section 4 (b) of this Act) is amended by striking out ", to the maximum extent practicable,".

MISCELLANEOUS AND CONFORMING AMENDMENTS

SEC. 6. (a) Section 404(o) of the Federal Water Pollution Control Act (as redesignated by section 4(b) of this Act) is amended to read as follows:

"(o) Nothing in this section shall preclude or deny the right of any State or interstate agency (or any entity designated by such State or interstate agency) to control the discharge or dredged or fill material in any portion of the waters, including the navigable waters, within the jurisdiction of such State, including any activity of any Federal agency, and each such agency shall comply with such State or interstate requirements both substantive and procedural to control the discharge of dredged or fill material to the same extent that any person is subject to such requirements. This section shall not be construed as affecting or impairing the authority of the Secretary to maintain navigation.".

(b) Section 205(g)(2) of such Act is amended by striking out "or 404".

(c)(1) Section 208(b)(4)(B)(ii) of such Act is amended by striking out ", which shall complement and be coordinated with a State program under section 404 conducted pursuant to this Act".

(2) Section 208(b)(4) of such Act is amended by striking out subparagraph (C) thereof and by redesignating subparagraph (D) as subparagraph (C).

(d) Section 308(a) of such Act is amended by striking out "404 (relating to State permit programs),".

(e)(1) Section 309(a)(1) of such Act is amended by striking out "or 404".

(2) Section 309(a)(3) of such Act is amended by striking out "or in a permit issued under section 404 of this Act by a State".

(3) Section 309(c)(1) of such Act is amended by striking out "or in a permit issued under section 404 of this Act by a State".

(4) Section 309(d) of such Act is amended by striking out "or in a permit issued under section 404 of this Act by a State,".

(f) Section 404(m) of such Act (as redesignated by section 4(b) of this Act) is amended by striking out "or a State program approved under this section,".

RESOLUTION RELATING TO THE DISCHARGE OF DREDGED AND FILL MATERIALS UNDER SECTION 404 OF THE FEDERAL CLEAN WATER ACT

Whereas, Section 404 of the Federal Clean Water Act allows the U.S. Army Corps of Engineers, under Environmental Protection Agency supervision, to issue permits for the discharge of dredged and fill materials into the waters of the United States; and

Whereas, Section 404 of the Clean Water Act and Sections 9, 10, and 13 of the 1899 Rivers and Harbors Act have delayed the construction of needed energy and water development projects and have deprived citizens of the use and enjoyment of private property without due process of law; and

Whereas, the jurisdictional limits of Section 404 are excessive, extending beyond navigable waters into areas where justified federal interests are not apparent; and

Whereas, the Fish and Wildlife Coordination Act of 1934, as amended in 1958, has been used by certain federal agencies to demand excessive concessions from applicants for federal permits, including Section 404 permits; and

Whereas, the coastal wetlands of Texas are of critical importance to the economy and environment of the State;

Now, therefore, be is resolved that Section 404 of the Clean Water Act be amended to limit federal jurisdiction to waters which are presently used, or are susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean high water marks; and be it

Resolved, that Section 404 be amended to require that no permit may be denied or conditioned for any reason other than that the discharge of dredged or fill material would not comply with the applicable provisions of the Clean Water Act concerning water quality requirements and to provide that a permit may not be denied nor conditions required for any reason relating to the effects of diversions, storage, or consumption of water authorized pursuant to state water allocation decisions; and be it

Resolved, that Section 404 be amended to allow any state at the written request of the Governor concurred in by the Legislature of such state to extend application of the provisions of Section 404 to those waters other than navigable waters within such state that are listed and defined by the Governor of such state in his request; and be it

Resolved, that Section 404 be amended to provide that discharges subject to Section 9, 10, or 13 of the Rivers and Harbors Act of March 3, 1899 be regulated by Section 404, and not subject to the Rivers and Harbors Act, except as to effect on navigation and anchorage; and be it

Resolved, that the State of Texas, through the Texas Energy and Natural Resources Advisory Council and other appropriate agencies, recognize and accept responsibility for the management and protection of all coastal wetlands.

Mr. BENTSEN. Mr. President, today I am joining with my distinguished colleague from Texas, Senator TOWER, in introducing a bill to revise the currently complex and disruptive bureaucratic nightmare of redtape of the Clean Water Act section 404 dredge and fill permit program.

My colleagues will well remember that this is not the first time Congress has had to deal with the issue. In 1976 and again in 1977 Congress failed to change section 404 of the act to draw a clear line between those dredge and fill permit requirements that are in the national interest and those that represent Federal encroachment on the everyday lives of this Nation's citizens.

Under current law every farmer and rancher who wants to alter the use of his land, every city that wants to lay a waterline, every county that wants to construct a drainage ditch could need a Federal permit.

In 1977 the Congress attempted to respond to problems with the 404 program that were resulting in unreasonable time delays for permits, Federal control of traditionally State responsibilities, and Federal infringement on the water rights of private landowners through a definition of "navigable" waters that had been broadened to extend to all waters of the United States. We were told during floor debate on amendments to section 404 program that the modifications—which have now become law—would "* * * dispel the widespread fears that the program is regulating activities that were not intended to be regulated." Sadly, this is not the case.

In 1977 it took the average 404 permit application 125 days to be reviewed. Proponents of the current law argued that time limits were set within the law to limit review time to 90 days. What has happened since then? A recent GAO study of three corps district offices revealed that average permit processing time ranges from 120 days to 300 days. Permit delays are worse today than they were 4 years ago. And they are going to get even worse as budget cuts and staff reductions at the key permitting agencies are implemented and take their toll.

In 1977 we were told that the current law provided for States to take permitting responsibility for the so-called phase II and phase III waters. And that this delegation to the States would reduce involvement. I said at that time that—

> EPA, the corps, and the fish and wildlife service, each retains an effective veto over any State proposal, I fail to see how we can realistically claim much in the way of progress. . . . I sincerely question whether many States will accept delegation of 404 power under such conditions.

Mr. President, my fears have become reality. Not a single State has been delegated 404 responsibility.

In 1977 we were told that the problems of Federal encroachment on the rights of private landowners would be resolved by specific activities exemptions and delegation of the phase II and phase III waters regulatory authority to the States. But this approach never really faces the key question—the definition of Federal jurisdiction in the regulation of dredge and fill activities. It makes every landowner with any bit of water subject to the maze of Federal regulation and power of the Federal Government whenever he wants to alter the use of water on his land. Let me give you a telling example. Much of the arid West has small bodies of water that exist periodically after rainfall. In my part of the country they are called "playa" lakes. There are 10,000 of these lakes. Most have no discharge. Almost all are privately held and used by their owners for agriculture purposes. Recently, the Fish and Wildlife Service convinced the Environmental Protection Agency to declare these private lakes subject to the 404 process. This far exceeds the concept of dredge and fill permitting that Congress intended. Yet, under the sweeping and uncontrolled authority of current law, it may well be allowable.

Clearly, with the 404 program loosely structured—as it is under current law—it lends itself to misinterpretations in the courts and abuse by the bureaucracy. The time has come for Congress to reestablish its will and define a clear and workable program. The bill that Senator TOWER and I are introducing today is a step in that direction.

By Mr. GOLDWATER (for himself and Mr. JACKSON):

S. 778. A bill to amend Public Law 96-36 to authorize additional funds to plan for the development of the area south of the original Smithsonian Institution Building adjacent to Independence Avenue at 10th Street SW., in the city of Washington; to the Committee on Rules and Administration.

SMITHSONIAN QUADRANGLE PLANNING AUTHORITY

● Mr. GOLDWATER. Mr. President, I am introducing today for myself and the senior Senator from Washington (Mr. JACKSON) a bill to authorize additional funds to the Smithsonian Institution for planning associated with development of the Quadrangle south of its original building.

The budget submitted to Congress in January included a request for $24,135,000 for construction of the Smithsonian's proposed South Quadrangle project. The project, located along Independence Avenue south of the Smithsonian Castle, would provide a permanent site on the Mall for the Museum of African Art, a center for the study and exhibition of Eastern art associated with the Freer Gallery, and subsurface structures for educational activities for schoolchildren during the day and resident associate classroom activities during the evening.

The total cost of the project has been estimated at $49.1 million, and its financing has been viewed as a joint enterprise in which Federal and non-Federal funds would be used in approximately equal parts to complete construction. The Board of Regents of the Smithsonian, on which we serve, has already approved the use of approximately $1.9 million of nonappropriated trust funds for planning and design purposes, and the Governments of Japan and Korea have each provided $1 million toward construction of the Eastern Art Center.

In the budget amendments proposed by President Reagan, the request for construction funding has been supplanted by a request for $1 million in planning funds. The Smithsonian currently has authority (Public Law 96-36) for $500,000 for planning purposes, but requires additional legislation to raise the figure to $1 million.

If the legislation we are introducing is approved and funding is provided, the Smithsonian will be able to complete working drawings, and would then hope to seek authority and funding for construction in the budget request for fiscal year 1983. The design concept for this project has been approved by the Commission of Fine Arts and the National Capital Planning Commission.●

By Mr. EXON (for himself and Mr. ZORINSKY):

S. 780. A bill to prohibit the use of Federal housing assistance with respect to certain aliens; to the Committee on Banking, Housing, and Urban Affairs.

PROHIBITING THE USE OF FEDERAL HOUSING ASSISTANCE TO CERTAIN ALIENS

Mr. EXON. Mr. President, today I am introducing legislation designed to insure that the benefits of the Federal subsidized housing programs will remain available to those Americans who are most in need. This measure would prohibit illegal aliens from taking advantage of public housing assistance to the detriment of many eligible low-income Americans by providing the Department of Housing and Urban Development with the necessary statutory authority to inquire into the citizenship status of persons applying for Federal housing subsidies.

An internal study by the GAO has found that there have been substantial numbers of illegal aliens in federally assisted housing projects. Although nearly all Federal assistance programs such as medicare, supplemental security income, food stamps, and public service employment require that participants be permanent, or at least legal residents of the United States, Congress deleted a citizenship requirement from the housing subsidy program in 1952.

Mr. President, as part of the general effort to control long-term Federal Government spending, the administration has proposed to reduce the planned number of additional subsidized housing units available after 1982. Given these limitations, it seems necessary that the Congress act to insure that the subsidized housing program be "fine tuned" to benefit the intended low-income citizens of this Nation.

The officials of HUD lack the necessary authority to inquire as to the citizenship status of persons applying for Federal housing subsidies. This lack of authority poses a difficulty in obtaining hard facts as to the extent to which illegal aliens are taking advantage of public housing assistance. The long waiting lists for existing public housing demonstrates that many eligible citizens are not currently receiving needed assistance.

The bill I have introduced would amend

section 214 of the Housing and Community Development Act of 1980, and would require that, to be eligible for Federal housing assistance, an alien must be a resident of the United States, lawfully present in this country. The programs affected by this proposal include the U.S. Housing Act of 1937 which established both the traditional public housing and the section 8 rental housing assistance programs, in addition to sections 235 and 236 housing, and section 101 housing of the Housing and Urban Development Act of 1965. Last year, Congress amended section 214 to limit nonimmigrant student aliens from receiving Federal housing assistance.

In 1976, the U.S. Supreme Court in Mathews against Diaz, held that, in the exercise of its broad power over naturalization and immigration, Congress may provide for such restrictions. The Court stated:

> The fact that Congress has provided some welfare benefits for citizens does not require it to provide like benefits for all aliens.

The Court continued by pointing out:

> Neither the overnight visitor, the unfriendly agent of a hostile foreign power, the resident diplomat, nor the illegal entrant, can advance even a colorable constitutional claim to a share in the bounty that a conscientious sovereign makes available to its own citizens.

The Court concluded:

> It is unquestionably reasonable for Congress to make an alien's eligibility depend on both the character and the duration of his residence.

Congressman WAYNE GRISHAM, of California, has introduced this measure in the House of Representatives. His bill, H.R. 1643, is identical to the measure being introduced here in the Senate today.

Mr. President, Congressman GRISHAM has indicated that recent GAO interviews with various resident managers of public housing projects in southern California have revealed that significant numbers of illegal aliens are enjoying rental assistance from U.S. taxpayers. One manager of a 487-unit project estimated that illegal aliens comprised 36 percent of the population of the project. Another manager of a 685-unit project estimated that 100 to 125 units were occupied by illegal aliens.

I would urge the Senate to consider this measure, to provide for the needs of our citizens within the limits of current budget constraints. In view of the limited amount of Federal housing funds available for assisting eligible citizens, I believe that an appropriate response is to provide HUD with the authority for inquiring into the citizenship status of persons applying for Federal housing subsidies. This action would be in the best interests of those truly needy Americans for whom such assistance was intended to benefit.

I ask unanimous consent that the text of this bill be printed in the RECORD, and that the bill be appropriately referred, which I now send to the desk at this time.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 780

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 214 of the Housing and Community Development Act of 1980 is amended to read as follows:

"RESTRICTION ON USE OF ASSISTED HOUSING

"SEC. 214. (a) Notwithstanding any other provision of law, the Secretary of Housing and Urban Development may not make financial assistance available for the benefit of any alien unless he or she is a resident of the United States and is—

"(1) an alien lawfully admitted for permanent residence as an immigrant as defined by sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15) and 8 U.S.C. 1101(a)(20)), excluding, among others, alien visitors, tourists, diplomats, and students who enter the United States temporarily with no intention of abandoning their residence in a foreign country;

"(2) an alien who entered the United States prior to June 30, 1948, or such subsequent date as is enacted by law, has continuously maintained his or her residence in the United States since then, and is not ineligible for citizenship, but who is deemed to be lawfully admitted for permanent residence as a result of an exercise of discretion by the Attorney General pursuant to section 249 of the Immigration and Nationality Act (8 U.S.C. 1259);

"(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157) or pursuant to the granting of asylum (which has not been terminated) under section 208 of such Act (8 U.S.C. 1158);

"(4) an alien who is lawfully present in the United States as a result of an exercise of discretion by the Attorney General for emergent reasons or reasons deemed strictly in the public interest pursuant to section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)); or

"(5) an alien who is lawfully present in the United States as a result of the Attorney General's withholding deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)).

"(b) For purposes of this section the term 'financial assistance' means financial assistance made available pursuant to the United States Housing Act of 1937, section 235 or 236 of the National Housing Act, or section 101 of the Housing and Urban Development Act of 1965.".

SEC. 2. An alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980 because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of section 214 of the Housing and Community Development Act of 1980, to be an alien described in section 214(a)(3) of such Act.

Mr. ZORINSKY. Mr. President, will my colleague from Nebraska yield for a comment?

Mr. EXON. I yield to my senior colleague from Nebraska.

Mr. ZORINSKY. I compliment my colleague from Nebraska on his articulate presentation of a problem that has become a greater burden upon the taxpayers of this Nation than was initially apparent at the outset of these programs, and I commend him for his recognition of this problem and for bringing it to the attention of this country, and specifically on those who fund the bill for the operation of this program, and that is the taxpayers of America; and I commend him for his initiative in attempting to resolve this problem.

I ask unanimous consent that my colleague from Nebraska include me as a cosponsor of his bill.

Mr. EXON. I ask unanimous consent that the Senator from Nebraska be added as a cosponsor, and I thank my friend and colleague from Nebraska.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. PERCY (by request):

S. 784. A bill to authorize appropriations for fiscal years 1982 and 1983 for the Department of State; to the Committee on Foreign Relations.

AUTHORIZATION OF APPROPRIATIONS FOR DEPARTMENT OF STATE

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to authorize appropriations for fiscal years 1982 and 1983 for the Department of State.

This legislation has been requested by the Department of State, and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with the section analysis of the bill and the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated March 11, 1981.

There being no objection, the bill, letter, and analysis were ordered to be printed in the RECORD, as follows:

S. 784

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—DEPARTMENT OF STATE

SHORT TITLE

SEC. 101. This title may be cited as the "Department of State Authorization Act, Fiscal Years 1982 and 1983".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. There are authorized to be appropriated for the Department of State to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States and other purposes authorized by law, the following amounts:

(1) For "Administration of Foreign Affairs", $1,318,754,000 for the fiscal year 1982 and $1,248,059,000 for the fiscal year 1983.

(2) For "International Organizations and Conferences", $563,806,000 for the fiscal year 1982 and $554,436,000 for the fiscal year 1983.

(3) For "International Commissions", $22,508,000 for the fiscal year 1982 and $22,432,000 for the fiscal year 1983.

(4) For "Migration and Refugee Assistance", $553,100,000 for the fiscal year 1982, and $460,000,000 for the fiscal year 1983.

SELECTIVE NON-IMMIGRANT VISA WAIVER

SEC. 103(a) Section 212(d) of the Immigration and Nationality Act (8 U.S.C. 1182 (d)) is amended by adding at the end thereof the following new paragraph:

"(9)(A) The requirement of paragraph 26 (B) of Subsection (a) may be waived by the Attorney General and the Secretary of State, acting jointly, in the case of an alien who—

(i) is applying for admission as a non-immigrant visitor for business or pleasure for a period not exceeding ninety days;

(ii) is a national of a country which extends, or is prepared to extend, reciprocal privileges to citizens and nationals of the United States; and

(iii) has been determined not to represent a threat to the welfare, safety, or security of the United States.

"(B)(i) For the period beginning on the effective date of this paragraph and ending on the last day of the first fiscal year which begins after the effective date of this paragraph, a country shall be considered to be within the purview of subparagraph (A)(ii) of this paragraph if, in the last fiscal year preceding the effective date of this paragraph, such country had a non-immigrant visa refusal rate, as determined by the Secretary of State in such manner as he shall by regulations prescribe, of less than two percent.

(ii) For each fiscal year following the period specified in subparagraph (B)(i), a country considered to be within the purview of subparagraph (A)(ii) during such period shall not be considered to remain within the purview of subparagraph (A)(ii) unless, in the fiscal year immediately preceding such fiscal year, it had a rate of exclusion and withdrawal of application for admission and rate of violation of non-immigrant status, as determined in both cases by the Attorney General in such manner as he shall by regulations prescribe, which did not exceed one percent. Determinations required by this subparagraph shall be made as soon as practicable after the end of each fiscal year.

(iii) If, in any fiscal year following the period specified in subparagraph (B)(i), a country not previously considered within the purview of subparagraph (A)(ii) shall have a non-immigrant visa refusal rate, as determined in the manner provided for in subparagraph (B)(i), of less than two percent, such country shall be considered to be within the purview of subparagraph (A)(ii) for the next following fiscal year and shall thereafter be treated in the manner specified in subparagraph (B)(ii).

"(C) Notwithstanding the provisions of subparagraphs (A) and (B) of this paragraph, no alien shall be admitted without a visa pursuant to this paragraph if he has previously been so admitted and failed to comply with the conditions of his previous admission."

(b) Section 214(a) of the Immigration and Nationality Act (8 U.S.C. 1184(a)) is amended by changing the period at the end thereof to a colon and by adding thereto the following:

"Provided, That no alien admitted to the United States without a visa pursuant to Section 212(d)(9) shall be authorized to remain in the United States as a temporary visitor for business or pleasure for a period exceeding ninety days from the date of his admission."

(c) Section 245(c) of the Immigration and Nationality Act (8 U.S.C. 1255(c)) is amended to read as follows:

"(c) The provisions of this Section shall not be applicable to (1) an alien crewman; (2) an alien (other than an immediate relative as defined in Section 210(b)) who hereafter continues in or accepts unauthorized employment prior to filing an application for adjustment of status; (3) an alien admitted in transit without visa under Section 212(d)(4)(C); or (4) an alien admitted as a temporary visitor for business or pleasure without a visa under Section 212(d)(9)."

(d) Section 248 of the Immigration and Nationality Act (8 U.S.C. 1258) is amended by inserting after the word "except" the following:

"An alien admitted as a temporary visitor for business or pleasure under Section 212(d)(9),".

PASSPORT FEES AND DURATION

SEC. 104. (a) Section 1 of the Act of June 4, 1920, as amended (22 U.S.C. 214), is amended by striking out the first sentence and inserting in lieu thereof, "There shall be collected and paid into the Treasury of the United States a fee, prescribed by the Secretary of State by regulation, for each passport issued and a fee, prescribed by the Secretary of State by regulation, for executing each application for a passport."

(b) Section 2 of the Act of July 3, 1926, as amended (22 U.S.C. 217a), is amended:

(1) by striking out "five" in the first sentence and inserting in lieu thereof, "ten";

(2) by inserting before the period at the end of the second sentence "in an individual case or on a general basis pursuant to regulation"; and,

(3) by striking out the third sentence, and substituting in lieu thereof, "A passport issued subsequent to the effective date of this section shall be valid for a period of ten years from the date of issue except where such passport is or has been limited by the Secretary of State to a shorter period."

LIVING QUARTERS FOR THE STAFF OF THE U.S. REPRESENTATIVE TO THE UNITED NATIONS

SEC. 105. Section 8 of the United Nations Participation Act of 1945, as amended (22 U.S.C. 287e), is amended:

(1) by striking "the representative of the United States to the United Nations referred to in paragraph (a) of Section 2 hereof" and inserting in lieu thereof, "the representatives provided for in Section 2 hereof and of their appropriate staffs", and

(2) by adding at the end thereof the following: "Any payments made by United States Government personnel for occupancy by them of such leased or rented premises shall be credited to the appropriation, fund, or account utilized by the Secretary for such lease or rental, or to the appropriation, fund or account currently available for such purposes."

INTERNATIONAL ORGANIZATIONS IN VIENNA

SEC. 106. Amend Section 2 of the United Nations Participation Act of 1945, as amended (22 U.S.C. 287) by adding at the end thereof the following new subsection:

"(h) The President, by and with the advice and consent of the Senate shall appoint a representative of the United States to the Vienna office of the United Nations with appropriate rank and status who shall serve at the pleasure of the President and subject to the direction of the Secretary of State. Such person shall, at the direction of the Secretary of State, represent the United States at the Vienna office of the United Nations, and perform such other functions there in connection with the participation of the United States in international organizations as the Secretary of State from time to time may direct."

BILATERAL SCIENCE AND TECHNOLOGY AGREEMENTS

SEC. 107. In addition to the amounts authorized to be appropriated by section 102(a) of this Act, there are authorized to be appropriated to the Secretary of State $3,700,000 for the fiscal year 1982 and $3,700,000 for the fiscal year 1983 for payment of the United States share of expenses of the science and technology agreements between the United States and Yugoslavia, and the United States and Poland.

EX GRATIA PAYMENT

SEC. 108. Of the amount appropriated under paragraph (1) of Section [illegible] of the "Department of State Authorization Act, Fiscal Years 1982 and 1983", $81,000 shall be available for payment ex gratia to the government of Yugoslavia as an expression of concern by the United States Government for the injuries sustained by a Yugoslav national as a result of an attack on him in New York City.

PAN AMERICAN INSTITUTE OF GEOGRAPHY AND HISTORY

SEC. 109. Paragraph (1) of Public Resolution 42, 74th Congress, approved August 2, 1935, as amended (22 U.S.C. 273), is amended by deleting, "not to exceed $200,000 annually,".

INTERNATIONAL INSTITUTE FOR THE UNIFICATION OF PRIVATE LAW AND HAGUE CONFERENCE ON PRIVATE INTERNATIONAL LAW

SEC. 110. Section 2 of P.L. 88–244, approved December 30, 1963, as amended (22 U.S.C. 269g–1), is amended by deleting ", except that in no event shall any payment of the United States to the Conference or the Institute for any year exceed 7 per centum of all expenses apportioned among members of the Conference or the Institute, as the case may be, for that year"

PAN AMERICAN RAILWAY CONGRESS

SEC. 111. Section 2(a) of P.L. 30–794 approved June 28, 1948 as amended (22 U.S.C. 230k), is amended by striking out "not more than $15,000 annually" and inserting in lieu thereof "such sums as may be necessary"

DEPARTMENT OF STATE,
Washington, D.C., March 11, 1981.

Hon. GEORGE BUSH,
President of the Senate,
U.S. Senate.

DEAR MR. PRESIDENT: In accordance with Section 16 of the Act of August 1, 1956, as amended (22 U.S.C. 2680), there is transmitted herewith proposed legislation to authorize appropriations for the Department of State to carry out its authorities and responsibilities in the conduct of foreign affairs during the fiscal years 1982 and 1983 and for other purposes contained in this bill.

The primary purpose of the bill is to provide authorization of appropriations for (1) "Administration of Foreign Affairs", which supports the operation of the United States diplomatic and consular posts abroad and the Department of State in the United States; (2) "International Organizations and Conferences", which includes contributions to meet obligations pursuant to treaties, conventions or specific acts of Congress; (3) "International Commissions", which enable the United States to fulfill treaty and other international obligations; United States annual contribution to the International Committee of the Red Cross and various refugee assistance programs. A section analysis further explaining the proposed legislation is also enclosed.

The Department has been informed by the Office of Management and Budget that there is no objection to the presentation of this proposed legislation to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary
for Congressional Relations.

SECTION ANALYSIS

SECTION 101—SHORT TITLE

This title may be cited as the "Department of State Authorization Act, Fiscal Years 1982 and 1983".

SECTION 102—AUTHORIZATION OF APPROPRIATIONS

Subsection (a)—This subsection provides an authorization of appropriations for the Department of State in accordance with the provisions of Section 15(a) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2680) as amended. The proposed Act authorizes funds to be appropriated under this legislation for the fiscal years 1982 and 1983 by category.

Category (1)—authorizes appropriations under the heading "Administration of Foreign Affairs" for fiscal years 1982 and 1983. This category provides the necessary funds for the salaries, expenses and allowances of the officers and employees of the Department, both in the United States and abroad. It includes funds for executive direction and policy formulation, conduct of diplomatic relations with international organizations, domestic public information activities, central program services, and administrative and staff activities. This category also provides for representational expenses in accordance with Section 905 of the Foreign Service Act of 1980. Further, it provides funds for such activities as the acquisition, operation and maintenance of office space and living quarters for American staff abroad; funds for relief and repatriation loans to United States citizens abroad and for other emergencies of the Department; a buying power maintenance appropriation; and payments to the Foreign Service Retirement and Disability Fund, and the American Institute in Taiwan.

Category (2)—Authorizes appropriations for fiscal years 1982 and 1983 under the heading "International Organizations and Conferences". This category provides the necessary funds for United States contributions of its assessed share of the expenses of the United Nations and other international organizations of which we are a member. In addition, provision is made for funding of official United States Government participation in regularly scheduled or planned multilateral intergovernmental conferences, meetings and related activities, and for contributions to international peacekeeping activities in accordance with international multilateral agreements.

Category (3)—Authorizes appropriations for fiscal years 1982 and 1983 under the heading "International Commissions." This category provides funds necessary to enable the United States to meet its obligations as a participant in international commissions and includes expenses of the American Sections (U.S. and Canada), the International Boundary and Water Commission (U.S. and Mexico) and the International Fisheries Commissions.

Category (4)—Authorizes appropriations for fiscal year 1982 and 1983 under the heading "Migration and Refugee Assistance" to enable the Secretary of State to provide assistance to migrants and refugees, both on a multilateral basis, through contributions to organizations such as the Intergovernmental Committee for Migration, and through the United Nations High Commissioner for Refugees designated by the President, as authorized by law.

SECTION 103—SELECTIVE NONIMMIGRANT VISA WAIVER

This proposal would amend the Immigration and Nationality Act to authorize the Attorney General and the Secretary of State to waive the non-immigrant visa requirement, on a reciprocal basis, for short-term business and pleasure visitors who are citizens of countries with the best record of compliance with our immigration laws. In addition, such a national would be required to complete immigration forms as are prescribed by regulation, and be the holder of a round-trip, non-refundable, non-transferable, open-dated transportation ticket with a carrier that has agreed to transport the alien out of the United States at the end of the alien's visit. It would extend the treatment now given citizens of Canada, the Bahamas, and certain British nationals (residing in Bermuda, the Cayman Islands, and the Turks and Caicos Islands) to citizens of approximately thirty countries, primarily in Western Europe.

SECTION 104—PASSPORT FEES AND DURATION

Subsection (a) would permit the Secretary of State to determine the execution and issuance fees for United States passports. It would eliminate the statutory issuance fee of $10.00 and provide flexibility in adjusting passport issuance as well as application fees. It would thus permit the Secretary of State to apply the same kind of process in determining passport fees as is applied in consular and other fees, in accordance with the policy and standards set out in 31 U.S.C. 483a. The Department intends to establish passport fees in accordance with the user charge principle provided for in title V of the Independent Office Appropriation Act of 1952.

Subsection (b) would set a ten-year duration for passport validity, extending the period from the present five years from the date of issuance. In addition, it would permit the Secretary of State to establish a shorter period either in a particular case or on a general basis pursuant to regulation. This will provide flexibility to deal with particular categories of cases which require that the period of a passport's validity be less than ten years (e.g., infants whose appearance will change greatly over a ten-year period).

SECTION 105—LIVING QUARTERS FOR THE STAFF OF THE U.S. REPRESENTATIVE TO THE UNITED NATIONS

This section would provide authorization for the lease or rental of living quarters for use of the staff of the United States Representative to the United Nations. This amendment is necessary to: 1) cope effectively with the housing market; and 2) eliminate substantial, out-of-pocket expenses and insure that economic hardship does not adversely affect the ability to attract the best qualified individuals for service at the United States Mission to the United Nations. To reduce expenditures of appropriated funds, the payments made by employees to occupy these living quarters would be credited to and used by the appropriation or account from which the Department's lease or rental is financed.

SECTION 106—INTERNATIONAL ORGANIZATIONS IN VIENNA

This section will enable the U.S. to combine the direction and management of its offices to International Organizations in Vienna into one mission.

Previously, the U.S. had representation in two units of the U.N. Secretariat, United Nations Industrial Development Organization (UNIDO) and the U.N. Scientific Committee on the Effects of Atomic Radiation (UNSCEAR); the International Atomic Energy Agency (IAEA), the U.N. Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) located in Vienna, the United Nations Fund for Drug Abuse Control, the Division of Narcotic Drugs, the Social Affairs Division, the International Trade Law Branch, and the Center for Social Development and Humanitarian Affairs.

SECTION 107—BILATERAL SCIENCE AND TECHNOLOGY AGREEMENTS

This section authorizes appropriations to Secretary of State to make payments for the United States share of expenses for United States bilateral science and technology agreements with Yugoslavia and Poland.

SECTION 108—EX GRATIA PAYMENT

This section provides an *ex gratia* payment to the Yugoslav Government on behalf of a foreign national of Yugoslavia who was injured as the result of an attack while on assignment at the Yugoslav mission to the U.N. in New York City.

SECTION 109—PAN AMERICAN INSTITUTE OF GEOGRAPHY AND HISTORY

This section would delete the limitation on the U.S. contribution to the PAIGH which is $200,000 annually. The U.S. contribution has been assessed at $274,005 since 1979. This amendment would permit the U.S. to pay the difference between past assessments ($148,010 cumulative arrearage for 1979 and 1980) and the $200,000 limitation.

The U.S. first participated in the Institute of Geography and History in 1935 and has been a member in good standing ever since. In order to meet the assessments applied to the U.S. as a member, the Department of State has had to request periodically an increase in the ceiling on annual contributions. To end such adjustments, it is requested that the ceiling be lifted completely, especially in view of the fact that the PAIGH General Assembly only meets once every four years and determines budget levels for the four years.

SECTION 110—INTERNATIONAL INSTITUTE FOR THE UNIFICATION OF PRIVATE LAW AND HAGUE CONFERENCE ON PRIVATE INTERNATIONAL LAW

This amendment would provide legal authority for the United States to pay arrearages in its assessments for 1979 and 1980 and to meet anticipated assessments in 1981 and beyond.

SECTION 111—PAN AMERICAN RAILWAY CONGRESS

This amendment would provide legal authority for the United States to pay fully its assessment for 1981 and to meet anticipated assessments in 1982 and beyond.●

By Mr. PERCY (by request):

S. 785. A bill to provide for continuing participation by the United States in the International Bank for Reconstruction and Development, and for other purposes; to the Committee on Foreign Relations.

S. 786. A bill to provide for continuing U.S. participation in the International Development Association, to provide for U.S. participation in the African Development Bank, and for other purposes; to the Committee on Foreign Relations.

LEGISLATION RELATING TO U.S. PARTICIPATION IN INTERNATIONAL DEVELOPMENT BANKS

● Mr. PERCY. Mr. President, I am introducing today at the request of the administration two bills concerning U.S. participation in multilateral development banks. One bill authorizes the U.S. subscription of $8.8 billion to the General Capital Increase of the International Bank for Reconstruction and Development (World Bank). The other bill authorizes the U.S. contribution of $3.24 billion to the Sixth Replenishment of the International Development Association, provides for U.S. membership in the African Development Bank, and amends other provisions of law pertaining to U.S. participation in multilateral development banks.

Legislation to authorize U.S. membership in the African Development Bank and the U.S. contribution to the Sixth Replenishment of the International Development Association was passed by the Senate last year by a vote of 53 to 24. Unfortunately, the House of Representatives did not take a vote on the measure prior to adjournment.

Early action by the Congress this year on IDA and AFDB is essential to avoid a

lapse in lending in the case of IDA, and the expiration of U.S. procurement opportunities in the case of the AFDB. Accordingly, the Foreign Relations Committee, which I chair, is planning early hearings and markup of legislation covering these two matters.

Mr. President, I ask unanimous consent for the texts of the two bills and summaries prepared by the Department of the Treasury, together with a letter from the Honorable R. T. McNamar, Acting Secretary of Treasury, to be printed in full in the RECORD.

There being no objection, the bills summaries, and letter were ordered to be printed in the RECORD, as follows:

S. 785

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That

SEC. 1. The Bretton Woods Agreements Act (22 U.S.C. 286 *et seq.*) is further amended by adding at the end thereof the following new section:

"SEC. 39. (a) The United States Governor of the Bank is authorized

"(1) to vote to increase by three hundred and sixty-five thousand shares the authorized capital stock of the Bank; and

"(2) to subscribe on behalf of the United States to not more than seventy-three thousand and ten shares of the capital stock of the Bank: *Provided, however,* that any subscription to additional shares shall be effective only to such extent or in such amounts as are provided in advance in appropriations Acts.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in this section, there are hereby authorized to be appropriated, without fiscal year limitation, $8,807,561,350 for payment by the Secretary of the Treasury.".

SEC. 2. This Act shall take effect upon enactment, except that funds authorized to be appropriated by this Act shall not be available for use or obligation prior to October 1, 1981.

SUMMARY

The bill authorizes the United States Governor to vote for increases of 365,000 shares in the authorized capital stock of the International Bank for Reconstruction and Development (IBRD). It also authorizes the U.S. Governor to subscribe up to 73,010 shares of IBRD capital stock and authorizes the appropriation of $8,807,561,350 to pay for the U.S. subscription. The bill provides that subscriptions to capital stock shall be effective to such extent or in such amounts as are provided in advance in appropriations acts.

The provisions of the bill are necessary because Section 5 of the Bretton Woods Agreements Act provides that authorization from the Congress must be obtained for the United States Governor to vote for an increase of the capital stock of the Bank which involves an increased U.S. subscription and for the U.S. Governor to subscribe to additional shares of capital stock. Moreover, legislation is required in order to authorize the appropriation of the necessary amounts to pay for the U.S. subscription.

The IBRD was established in 1945. Its capital is subscribed by its 135 member countries, and it finances its lending operations primarily from its own borrowings in world capital markets. Bank loans generally have a grace period of five years and are repayable over 20 years or less. Unlike loans from the International Development Association which focus exclusively on the poorest of the developing countries, a large proportion of IBRD loans are directed toward developing countries at more advanced stages of economic and social growth. The interest rate the Bank charges on its loans is calculated in accordance with a formula related to its cost of borrowing.

During fiscal year 1980 the IBRD approved 144 projects in 49 countries involving total commitments of $7.6 billion. On a cumulative basis, 1,875 projects totaling $59.3 billion have been approved through June 30, 1980. Since U.S. paid-in capital subscriptions to the IBRD totaled $935 million through 6/30/80, the Bank has in effect extended more than $63 in loans for every dollar of U.S. paid-in subscriptions.

Important as the transfer of resource function is for the Bank, its critical role in the development process also reflects the way Bank projects have become catalysts for growth and contributed to rational sector and macro-economic policies in developing countries. The Bank also has a key role in the transfer of technology and in providing sound advice on economic policy associated with its lending activity. This contribution to "institution building" and "human capital formation" permeates the process of project preparation and implementation and is perhaps the greatest contribution made by the Bank to the long-term economic prospects of the developing countries.

Economic growth in the developing countries is an important U.S. objective, in terms of both strategic and humanitarian concerns and as a source of strength to the global economy as a whole. The IBRD is critical to the development effort—and to the maintenance of economic and political stability in each of the major regions of the world and in key countries. One need only scan the list of the largest bank borrowers in FY 80—Brazil, Colombia, Indonesia, Korea, Mexico, the Philippines, Romania, Thailand, Turkey, and Yugoslavia—to grasp the importance of the Bank to U.S. security by way of its contributions to growth and material well-being, and thus to stability in vital regions of the world.

In June 1979, following two years of negotiations, the Executive Directors of the World Bank voted in favor of submitting a resolution for a $40 billion increase in the capital stock of the Bank to the Board of Governors for approval. Of the new stock to be subscribed, a 7.5-percent portion, amounting to approximately $3 billion, is to be paid-in to the Bank. The remaining 92.5 percent will be added to the subscribed capital which is callable only to meet the obligations of the Bank to holders of its securities. The Bank has never made a call on its callable capital, and any such calls are highly unlikely in the future.[1]

The IBRD capital expansion will approximately double total Bank resources. It was designed to permit the Bank to raise its loan commitments by about 3–5 percent annually in real terms through the mid-1980's, although higher than expected inflation now makes this quite unlikely. The negotiated expansion of Bank lending reflected an international consensus that while the economic record for developing countries over the past few decades shows clear progress, formidable development problems remain.

Poverty still exists on a large and pervasive scale and there are serious widespread deficiencies in health and nutrition, literacy and education, life expectancy, and in the overall physical environment. The growth of population continues to add to the immense problems of unemployment and underemployment, and rural to urban migration has also fueled a rapid increase in the number of urban poor. These serious development problems have been severely compounded by current world economic conditions. Surging energy prices, worldwide inflation, slower growth in the industrial countries, and growing constraints on the access of some developing countries to external capital have combined to cast a long and serious shadow over development prospects for the 1980's.

In response to these conditions, the Bank has sharply increased its lending for agriculture and basic needs in the poorest developing countries. More recently the United States and other developed countries encouraged the Bank to take major initiatives in the energy area; from this initiative, a number of proposals have emerged including further expansion of existing IBRD programs and establishing an energy affiliate with its own capital structure. Another initiative has been to assist the adjustment process by making non-project loans which combine financing with a set of corrective economic actions and policy measures. This program will probably have to expand sharply in the next few years to help cope with both the recycling and increased development problems of the 1980's.

Donor countries have recognized that to the extent that Bank operations contribute to sustained economic growth in borrowing countries, they also contribute to the health of the overall world economic environment and the economies of the industrial countries such as the United States. In a recent two-year period, for example, it was estimated that, for each dollar paid into the IBRD and the other multilateral development banks by the United States, our Gross National Product increased by three dollars as a direct result of bank-financed activity.

The General Capital Increase was approved in January 1980 when favorable votes from 127 countries with 77 percent of the voting power had been received. The vote of the United States—with 21.47 percent of the vote—was not cast, due to the need to first meet U.S. legislative requirements. Subscriptions under the GCI will be accepted beginning September 30, 1981.

The U.S. share in the $40 billion General Capital Increase would be $8.78 billion, or 21.95 percent of the total. This proportion is in line with the present U.S. share of the IBRD's subscribed capital. It represents a significant decline from the 34 percent U.S. share in the original subscription to World Bank capital in 1945, and is the minimum required to maintain the U.S. veto in the Bank over Charter amendments. Other countries with large shares of subscriptions include France (5.0%), Germany (5.0%), Japan (5.0%), and the United Kingdom (7.3%). The paid-in portion of the U.S. subscription would be $658.3 million. U.S. subscription to its full GCI share will provide the United States immediately with full voting power benefits, but budget outlays will be spread out over seven years and entail annual outlays of $65.8 million (FY 82), $84.4 million (FY 83), $84.1 million (FY 84), $94.0 million (FY 85), and $110 million (FY 86, 87 & 88).

Callable capital is guarantee authority for bank borrowings in private capital markets. The U.S. liability in respect to callable capital stock is highly contingent. The IBRD has never made a call on its callable capital and, because of the Bank's prudent financial management and its large liquid reserves, any such calls are highly unlikely in the future. Congress has already appropriated more than $8 billion in callable capital subscriptions to the IBRD, none of which has

[1] A companion resolution increasing the authorized capital stock of the Bank by $4.0 billion, none of which is to be "paid-in", was also favorably recommended to the Governors. The purpose of the additional increase was to allow each member to subscribe to 250 shares of callable capital ($30 million). Without this provision, the General Capital Increase would have had the unintended effect of reducing the voting power of the smaller member countries. It was agreed that this second increase would not be used to support additional IBRD lending.

ever resulted in an outlay of U.S. funds, but which is available should a call ever be made.

In recognition of the above factors, it is proposed that U.S. subscriptions to callable capital of $8,179,414,945 be made after program limitations on, rather than appropriations for, those subscriptions are enacted in Foreign Assistance and Related Programs Appropriations Acts.

The proposed appropriations treatment of U.S. subscriptions to IBRD callable capital is consistent with the provisions of legislation enacted in 1980 (Public Law 96-259) which authorized U.S. callable capital subscriptions under the Fifth Replenishment of the Inter-American Development Bank to be made on the basis of program limitations in appropriations acts. In two Continuing Resolutions approved by the 96th Congress for FY 1981, it was also decided to provide for this budgetary approach for the treatment of U.S. callable capital subscriptions to the multilateral development banks. The proposed appropriations treatment is essential to allow implementation of the President's FY 1982 Budget which proposes enactment of program limitations in the FY 1982 Foreign Assistance Appropriations Act for U.S. subscription to callable capital in all the banks.

Favorable Congressional action on this legislation is vital to growing U.S. political, economic, and strategic interests in the developing world. In helping developing countries continue to grow, the Bank makes a major contribution to international economic and political stability. The fact that such growth also helps expand demand for overseas goods and services is particularly important for the United States, for whom the developing countries now comprise the largest and most rapidly expanding export market. The largest Bank borrowers are also strategically centered in terms of U.S. security interests.

U.S. development assistance gets maximum impact when channeled through the IBRD because the cost of providing development assistance is shared with other countries, because the banks leverage paid-in contributions from the United States and other countries through much larger borrowings in world private capital markets backed by "callable" capital, and because the banks, through increased purchases of U.S. goods and services, return substantial economic benefits to the U.S. economy. As a result of the GCI, the IBRD will—through the combination of cost sharing and use of callable capital—be able to lend more than sixty dollars for each dollar paid-in by the United States. The IBRD is thus a particularly useful institution for furthering U.S. objectives in the developing world in this period of budgetary austerity.

A Special Report of the National Advisory Council on International Monetary and Financial Policies on the General Capital Increase of IBRD resources will be transmitted to the Congress separately.

S. 786

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—INTERNATIONAL DEVELOPMENT ASSOCIATION

SEC. 101. The International Development Association Act, as amended (22 U.S.C. 284 et seq.), is further amended by adding at the end thereof the following new section:

"SEC. 17. (a) The United States Governor is hereby authorized to agree on behalf of the United States to pay to the Association $3,240,000,000 as the United States contribution to the sixth replenishment of the Resources of the Association: *Provided, however,* That any commitment to make such contributions shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contributions provided for in this section, there is hereby authorized to be appropriated, without fiscal year limitation, $3,240,000,000 for payment by the Secretary of the Treasury.".

TITLE II—AFRICAN DEVELOPMENT BANK

SEC. 201. This Title may be cited as the "African Development Bank Act".

SEC. 202. The President is hereby authorized to accept membership for the United States in the African Development Bank (hereinafter referred to as the "Bank") provided for by the agreement establishing the Bank (hereinafter referred to as the "agreement") deposited in the archives of the United Nations.

SEC. 203. (a) The President, by and with the advice and consent of the Senate, shall appoint a governor and an alternate governor of the Bank. The term of office for the governor and the alternate governor shall be five years, subject at any time to termination of appointment or to reappointment. The governor and alternate governor shall remain in office until a successor has been appointed.

(b) No person shall be entitled to receive any salary or other compensation from the United States for services as a governor or alternate governor, except for reasonable expenses to attend meetings of the Board of Governors.

SEC. 204. (a) The governor, or in the governor's absence the alternate governor, on the instructions of the President, shall cast the votes of the United States for the director to represent the United States in the Bank.

(b) The director or alternate director representing the United States, if citizens of the United States, may, in the discretion of the President, receive such compensation, allowances, and other benefits as, together with those received from the Bank and from the African Development Fund, will not exceed those authorized for a chief of mission, under the Foreign Service Act of 1980.

SEC. 205. The provisions of section 4 of the Bretton Woods Agreements Act, as amended (22 U.S.C. 286b), shall apply with respect to the Bank to the same extent as with respect to the International Bank for Reconstruction and Development and the International Monetary Fund. Reports with respect to the Bank under paragraphs (5) and (6) of section 4 of the said Act, as amended, shall be included in the first and subsequent reports made thereunder after the United States accepts membership in the Bank.

SEC. 206. (a) Unless authorized by law, neither the President, nor any person nor agency, shall, on behalf of the United States—

(a) subscribe to additional shares of stock of the Bank;

(b) vote for or agree to any amendment of the agreement which increases the obligations of the United States, or which changes the purpose or functions of the Bank; or

(c) make a loan or provide other financing to the Bank, except that funds for technical assistance may be provided to the Bank by a United States agency created pursuant to an Act of Congress which is authorized by law to provide funds to international organizations.

SEC. 207. Any Federal Reserve bank which is requested to do so by the Bank shall act as its depository or as its fiscal agent, and the Board of Governors of the Federal Reserve System shall supervise and direct the carrying out of these functions by the Federal Reserve banks.

SEC. 208. (a) The President is authorized to agree to subscribe on behalf of the United States to 29,820 shares of the capital stock of the Bank: *Provided, however,* That the subscription shall be effective only to such extent or in such amounts as are provided in advance in appropriations Acts.

(b) There is hereby authorized to be appropriated, without fiscal year limitation, for payment by the Secretary of the Treasury of the initial United States subscription to 29,820 shares of the capital stock of the African Development Bank, $359,733,570.

(c) Any payment or distributions of monies from the Bank to the United States shall be covered into the Treasury as a miscellaneous receipt.

SEC. 209. For the purposes of any civil action which may be brought within the United States, its territories or possessions, or the Commonwealth of Puerto Rico, by or against the Bank in accordance with the agreement, the Bank shall be deemed to be an inhabitant of the Federal judicial district in which its principal office within the United States or its agent appointed for the purpose of accepting service or notice of service is located, and any such action to which the Bank shall be a party shall be deemed to arise under the laws of the United States, and the district courts of the United States, including the courts enumerated in title 28, section 460, United States Code, shall have original jurisdiction of any such action. When the Bank is defendant in any action in a State court, it may at any time before the trial thereof remove the action into the appropriate district court of the United States by following the procedure for removal provided in 28 U.S.C. 1446.

SEC. 210. The agreement, and particularly paragraph 5 of article 49 and articles 50 through 59, shall have full force and effect in the United States, its territories and possessions, and the Commonwealth of Puerto Rico, upon acceptance of membership by the United States in the Bank. The President, at the time of deposit of the instrument of acceptance of membership by the United States in the Bank, shall also deposit a declaration as provided in article 64, paragraph 3, of the agreement that the United States retains for itself and its political subdivisions the right to tax salaries and emoluments paid by the Bank to United States citizens or nationals.

SEC. 211. The seventh sentence of paragraph 7 of section 5136 of the Revised Statutes of the United States, as amended (12 U.S.C. 24), is further amended by striking the word "or" after the words "the Inter-American Development Bank" and inserting a comma in lieu thereof, and by inserting after the words "the Asian Development Bank" the words "or the African Development Bank".

SEC. 212. (a) Any securities issued by the Bank (including any guarantee by the Bank, whether or not limited in scope) in connection with raising of funds for inclusion in the Bank's ordinary capital resources as defined in article 9 of the agreement and any securities guaranteed by the Bank as to both principal and interest to which the commitment in article 7, paragraph 4(a), of the agreement is expressly applicable, shall be deemed to be exempted securities within the meaning of paragraph (a)(2) of section 3 of the Act of May 27, 1933, as amended (15 U.S.C. 77c), and paragraph (a)(12) of section 3 of the Act of June 6, 1934, as amended (15 U.S.C. 78c). The Bank shall file with the Securities and Exchange Commission such annual and other reports with regard to such securities as the Commission shall determine to be appropriate in view of the special character of the Bank and its operations and necessary in the public interest or for the protection of investors.

(b) The Securities and Exchange Commission, acting in consultation with such agency or officer as the President shall designate, is authorized to suspend the provisions of subsection (a) at any time as to any or all securities issued or guaranteed by the Bank during the period of such suspension. The Commission shall include in its annual reports to Congress such information as it shall deem advisable with regard to the operations and effect of this section and in connection there-

with shall include any views submitted for such purpose by any association of dealers registered with the Commission.

SEC. 213. Section 701(a) of Public Law 95–118 (22 U.S.C. 262d) is amended by striking the word "and" following the words "the African Development Fund" and inserting the words "and the African Development Bank," following the words "the Asian Development Bank".

SEC. 214. Section 801(a) of Public Law 95–118 (22 U.S.C. 262f) is amended by striking the word "and" following the words "the African Development Fund" and inserting the words "and the African Development Bank," following the words "the Asian Development Bank".

SEC. 215. Section 51 of Public Law 91–599, as amended (22 U.S.C. 276c–2) is further amended by striking the word "and" following the words "the Asian Development Bank" and inserting the words "and the African Development Bank," following the words "the African Development Fund".

TITLE III—INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT AND ASIAN DEVELOPMENT BANK

SEC. 301. Section 27(a)(2) of the Bretton Woods Agreements Act, as amended (22 U.S.C. 286e–1f), is further amended by striking "That any subscription to additional shares shall be made only after the amount required for such subscription has been appropriated." and inserting in lieu thereof "That any subscription to additional shares shall be effective only to such extent or in such amounts as are provided in advance in appropriations Acts.".
